

# ANNUAL REPORT & FINANCIAL STATEMENTS 31 MARCH 2019

Company number 4684034

# STRATEGIC REPORT

The Directors present the Strategic Report of Sumitomo Mitsui Banking Corporation Europe Limited (the Bank) for the year ended 31 March 2019.

### Overview of Business and Objectives

# Overview

The Bank is authorised by the Prudential Regulation Authority and regulated by the Prudential Regulation Authority and the Financial Conduct Authority. The Bank is registered in England and Wales under company number 4684034 and its registered office is located at 99 Queen Victoria Street, London, EC4V 4EH.

The Bank offers a wide range of wholesale banking products, including: bilateral loans, guarantees, syndicated loans, project finance, aircraft finance, shipping finance, other specialised structured finance, trade finance, leveraged finance, cash management, money markets, foreign exchange, deposit taking, derivatives and other capital markets instruments.

The Bank's treasury department is focused on customer dealing business, servicing the banking book, supporting credit business by offering treasury products, managing liquidity and conducting limited trading activities.

The Bank carries out the majority of its activities in Europe, the Middle East and Africa (EMEA).

The Bank is a wholly owned subsidiary of Sumitomo Mitsui Banking Corporation (SMBC), a Japanese banking institution, and forms part of the SMBC Group. SMBC is a wholly owned subsidiary of Sumitomo Mitsui Financial Group (SMFG), a company that is also incorporated in Japan.

The SMBC Group in EMEA comprises a number of subsidiary companies, branches and representative offices. The Bank has responsibility, as set out in various Service Level Agreements with SMBC and certain of its group companies, for the provision of services to those group companies, branches and representative offices.

At the date of signing this Report, the Bank was structured around ten main business units, as follows:

- two client management departments;
- an international and structured finance department;
- a global trade finance department;
- a transportation department;
- a loan capital markets department;
- a global financial institutions department;
- a specialised products department;
- a global transaction banking department; and
- a treasury department.

Each of the above business units work in conjunction with each other as well as with other entities within the SMBC Group, including SMBC, SMBC Bank EU AG, SMBC Nikko Capital Markets Limited, SMBC Nikko Capital Markets Europe GmbH, SMBC Leasing and Finance Inc and SMBC Aviation Capital Limited.

The Bank's long-term Standard & Poor's rating is A. The Bank is also rated A by Fitch and A1 by Moody's.

### **Business Model and Objectives**

The Bank's business model is to be a well-funded, well-controlled and risk averse corporate banking institution.

As an independent UK bank, the Bank's main objective is to serve its EMEA corporate customers, while sharing the SMBC Group's mission, vision and identity, which emphasises sustainable value creation both for customers and shareholders.

Serving Customers

To provide high quality value added services to EMEA customers as their bank of choice.

Sustainable Growth

To run our business in a way that is appropriately balanced and sustainable.

To develop an efficient and effective infrastructure to support sound business growth and to provide services to the SMBC Group in EMEA through Service Level Agreements.

"Edges" as SMBCE

To establish and develop our competitive "Edges". These are areas where the Bank feels it has a particularly strong position in:

- Client Relationships;
- Product Capabilities; and
- Japanese/Asian Origin business
- Team SMFG.
- To share the SMBC Group's Mission and Vision and to contribute to their realisation.

### Overview of non-financial information

Areas of the non-financial information statement are reflected by way of reference to following information:

- Business model Overview of Business and Objectives on pages 1 and 2
- Policies Conduct of Activities on pages 6 to 10
- Principal risks Overview of activities starting on page 4 and specifically the sections entitled Overview of Risk Management and Controls, Principal Risks and Uncertainties and Risk Management Arrangements
- Key performance indications Key Performance and Risk Indicators on page 2 and Overview of business during the year on page 3

### Results and dividends

Profit before income tax for the year amounted to USD 388.3 million (2018: USD 297.2 million) with profit after tax for the year of USD 275.3 million (2018: USD 213.2 million).

The results for the year are set out in the Statement of Comprehensive Income on page 24.

The Directors do not recommend the payment of a dividend in respect of the year ended 31 March 2019.

### Key Performance and Risk Indicators

Key Performance and Risk Indicators are widely used in the Bank and are reported as appropriate in Board and Committee meetings. The indicators used range from basic net income and cost income ratio targets through to more complex measures covering economic capital measures of risk appetite and Value at Risk. However, being a private company, the Bank has no publicly stated targets.

The Bank's return on equity for the year to 31 March 2019 was 6.4% (2018: 5.8%). Return on equity is calculated as profit after tax (USD 275.3 million (2018: USD 213.2 million)) divided by the average monthly equity in the year (USD 4,270.3 million (2018: USD 4,022.4 million)).

The Board continues to support the strategy of prudent use of capital resources for the continued profitability and development of the Bank. At the Balance Sheet date the Bank's tier 1 capital ratio was 18.5% (2018: 16.8%). At the Balance Sheet date the Bank's leverage ratio was 7.6% (2018: 5.8%). The leverage ratio is calculated as the Regulatory Tier 1 capital (USD 4,320.3 million (2018: USD 4,036.1 million)) divided by the Total Exposure Measure (USD 56,691 million (2018 USD: 70,312.4 million)).

The Bank's Pillar 3 disclosures can be found at www.smbcgroup.com/emea/about-us/corporate-disclosures.

#### Overview of business during the year

Despite a tough market environment, the Bank achieved a significant year on year improvement in profit after tax. Principal factors of note were:

- Net interest income was USD 291.5 million which is up on the previous year (2018: USD 222.5 million). The loan book has
  increased year on year boosting the underlying loan margin income, in addition to the impact of higher rates and a stronger
  USD.
- Net fees and commissions income remained consistent with the previous year at USD 345.5 million (2018: USD 338.6 million) with SLA income from group companies remaining the largest contributor. These increased year on year, but were offset by increased commissions paid on credit mitigation transactions (risk participations and credit insurance).
- Net operating expenses, excluding net impairment loss on financial assets, increased in the year from USD 405.0 million to
  USD 429.4 million. This reflected increased headcount and a general increase in the underlying expense base, offset by a
  weakening of GBP against USD reducing the impact on USD equivalent.
- Whilst the business environment has remained uncertain through the year, there has been very limited impact felt on credit costs. The relatively benign environment in the year resulted in net impairment losses of USD 13.1 million for the year (2018: 36.9 million). This has been the first year of impairment provisions calculated under the IFRS 9 methodology, and full details of the Bank's Expected Credit Loss (ECL) models can be found in note 18.
- The tax charge for the year amounted to USD 113.0 million (2018: USD 84.0 million). This equates to an effective tax rate of 29.1%, an increase on the previous year (28.3%) and reflected the varying rates of Corporation Tax affecting the Bank's branches in the year.
- Total asset balances decreased by USD 13.1 billion on the previous year to USD 48.0 billion (2018: USD 61.1 billion). In the year the Bank stopped its debt securities issuances which reduced the asset balance by USD 4.0 billion. In addition deposits from customers reduced by USD 5.0 billion. However, the Bank's liquidity position has remained strong and the reductions have simply reduced the levels of surplus cash held by the Bank. Cash and balances held at central banks has reduced by USD 14.0 billion in the year.
- The Bank's Milan Branch business was sold in March 2019 reducing the Bank's asset position by approximately USD 1.0 billion. A profit on disposal of USD 0.2 million was recognised in the year.
- Off balance sheet guarantees and commitments decreased year on year to USD 15.5 billion (2018: USD 17.8 billion).
- The Bank continues to play a significant role in SMBC's overall structured finance and trade finance businesses. SMBC continues to receive awards within these sectors, which together with a high ranking in various league tables, reflects the Bank's and SMBC's continuing strong reputation in these markets.

### Financial Instruments

The Bank uses financial instruments extensively as an integral part of its normal business activity. These instruments expose the Bank to a number of financial risks, including credit, market and liquidity risk. The Bank has in place well defined policies and procedures to mitigate, identify, measure and control these risks in line with the Bank's risk management objectives.

As part of the management of these risks the Bank uses derivatives to hedge interest and foreign exchange exposures on non-trading positions (primarily on fixed rate loans). Further information on this can be found in the accounting policy on derivatives, shown in note 3 (policy k) to the financial statements.

#### Brexit

Over the year, the Bank has been working with SMBC, of which it is a wholly owned subsidiary, to take steps to ensure that it is in a position to continue to offer its clients sustained and reliable banking services without disruption on the United Kingdom's withdrawal from the European Union (Brexit). The scheduled withdrawal date of 29 March 2019 was subsequently extended to 31 October 2019.

In conjunction with SMBC, the Bank has undertaken the following steps in preparation for Brexit:

- the assets and liabilities of the Bank's Branch in Milan were transferred to SMBC Bank EU AG, a German incorporated company, on 18 March 2019. The assets and liabilities of the Branches in Amsterdam, Dublin, Madrid and Prague were transferred to SMBC Bank EU AG on 1 April 2019. SMBC Bank EU AG was authorised by the European Central Bank on 12 November 2018 and is regulated to undertake banking business by the German banking regulators, BaFin and Deutsche Bundesbank. This bank commenced full operations on 1 April 2019.
- sought and received approval from the French banking regulators, Autorité de Contrôle Prudentiel et de Résolution, on 19 November 2018 for the Bank's Paris Branch to be converted to a branch of a third country bank. This conversion will take place once the UK's relationship with the EU becomes that of a third country, whether immediately upon the date of Brexit or after any transition period (if agreed), during which the UK is expected to be treated as a Member State.

In addition to the above, the SMBC Group has also established in Germany a new securities subsidiary, SMBC Nikko Capital Markets Europe GmbH, which commenced full operations on 1 April 2019.

The post-Brexit business environment remains uncertain and, therefore, the Board and management will continue to closely monitor market developments.

### Going concern

The Bank's business activities, together with the factors likely to affect its future performance and position, are set out in this Strategic Report. The financial statements set out the financial position of the Bank at 31 March 2019.

Note 4 to the financial statements describes in further detail the ways in which the Bank manages, and its exposure to, market, liquidity, credit, operational and conduct risk. Details of financial instruments and hedging activities can be found in notes 4 and 6 respectively.

The Directors believe that the Bank has adequate financial resources and is well placed to manage its business risks successfully despite the current uncertain outlook for the global economy and the banking sector. This belief is based on the following factors: (i) the Bank and its parent company, SMBC, have entered into a Keep Well Deed under which the Bank and SMBC agree to certain financial arrangements, including the obligation of SMBC to maintain tangible net worth in the Bank at all times sufficient to cover the Bank's obligations arising through any of its business activities; and (ii) a number of measures have been adopted by the Bank to reduce liquidity and funding risk, including ongoing steps to improve the deposit base.

Based on the above, the Bank continues to prepare financial statements on a going concern basis and adopts the view that at this time, no material uncertainties exist that lead to significant doubt upon the Bank's ability to continue as a going concern.

# Overview of activities

This section sets out the key activities undertaken by the Bank in pursuit of its objectives.

### Overview of Risk Management and Controls

The Bank's risk strategy is designed to support the corporate strategy and the achievement of sustainable growth over the long term. The risk strategy comprises four pillars, being the foundations upon which the Bank seeks to achieve its strategic objectives: business model (sustainable growth), maintaining solvency and liquidity, conducting business (in accordance with all regulatory requirements) and maintaining operational resilience.

The Bank uses Risk Appetite to define the broad-based level of risk it is able and willing to take in carrying out its business. The Bank's Risk Appetite is arranged according to the four strategic pillars and ensures formal management identification and consensus about the strategic level risks the Bank is facing and, as such, is a key tool for managing the business.

# Principal risks and uncertainties

The Bank is exposed to certain risks and uncertainties in conducting its business. The Bank's principal risk categories are shown below:

- Credit Risk the risk of any losses the Bank may incur due to reduction or loss of the value of assets (including off-balance sheet assets) arising from any credit events, such as the deterioration of a borrower's financial standing.
- Liquidity Risk the risk that the Bank cannot meet its liabilities, unwind or settle its positions as they become due.
- Market Risk the risk that movements in interest rates, foreign exchange rates, or stock prices will change the market value of financial products, leading to a loss. The Bank uses Value at Risk (VaR) to a 99% confidence interval to measure market risk alongside other relevant metrics. During the year the average VaR was USD 2.2 million (2018: 1.2 million).
- Conduct Risk is the risk of the Bank's behaviour resulting in poor customer outcomes and/or damage to the integrity of the financial markets. Any significant failure in this area could lead to regulatory censure and/or reputational damage. Further detail on how the Bank conducts its business is set out in the Conduct of Activities section on page 6.
- Operational Risk the risk of loss resulting from inadequate or failed internal processes, people and systems, or from
  external events, including legal risks. Historically, losses in this risk category have been extremely low.
- Other non-financial risks as a result of its activities the Bank assumes other potential risk impacts such as reputational and others which it manages within the overall policy framework. Historically, losses in this risk category have been low.

Further information on the way the Bank manages its risk is set out in note 4 to the financial statements.

At the year-end, the Bank's risk profile was within the overall tolerance established by the Board. The risk profile relative to Risk Appetite is reported monthly at the Executive Committee and quarterly at the Risk Committee.

The Bank's Risk Appetite for Market Risk, Conduct Risk, Operational Risk and Other Non-Financial Risks is low. As a consequence, the main risks that the Bank proactively acquires are Credit Risk and Liquidity Risk.

- Credit Risk the Bank's total maximum credit exposure as at 31 March 2019 was USD 63.6 billion (2018: USD 78.6 billion) net of total provisions of USD 109.3 million (2018: USD 173.7 million).
- Liquidity Risk as at 31 March 2018, the Bank's CRD IV Delegated Act Liquidity Coverage Ratio (LCR) was 141.4% (2018: 133.4%) and the Net Stable Funding Ratio (NSFR) based on the latest Basel 3 rules was 110.5% (2018: 102.9%).

# Risk Management Arrangements

The Directors, through the Risk Committee, consider annually the adequacy and appropriateness of the Bank's risk management framework. Based on the annual review undertaken in respect of the year ended 31 March 2019, the Directors have formed the view that the Bank's Risk Management framework is adequate.

Further details on the Bank's Risk Management framework are set out below.

The Bank adopts a three lines of defence (3 LOD) model in order to communicate clear accountabilities and to achieve and assure overall effective risk governance, management and assurance, which reflects and reinforces the Bank's internal control framework.

The 3 LOD approach separates the ownership and management of risk from the functions that oversee risk and the function that provides independent assurance:

- First Line of Defence Functions that own and manage risk;
- Second Line of Defence Functions that independently oversee risk; and
- Third Line of Defence Functions that provide independent assurance.

Senior management in the first line of defence are ultimately responsible for the risks and controls that fall within their area of responsibility and are required to establish their own Risk Tolerances at departmental level. Each department proposes individual Business Unit Risk Tolerance statements and thresholds in the context of its own strategy, taking into account the Bank's overall risk management framework and Corporate Strategy. This approach is designed to ensure that the Bank's risk appetite is cascaded down to those areas of the Bank where risk is taken.

Risk Management Department, Compliance Department and Credit Department are collectively the Bank's Second Line of Defence. Such departments are independent from the business areas that generate risk and operate within a governance framework that allows them to exercise professional judgement and make recommendations in an effective and impartial manner. The second line of

defence employs the following key risk management tools to ensure the provision of independent oversight of the first line of defence:

- Risk governance
- · Risk strategy and appetite setting
- Risk Register
- Risk Control Assessment
- Stress testing/reverse stress testing
- · Active Credit Portfolio Quality Management
- · Senior management training
- Risk indicators
- Model governance

The third line of defence comprises the Bank's Internal Audit function and the external auditors, which together provide independent assurance through: (a) the review of the activities and results of the first and second lines of defence; and (b) by ensuring that the arrangements and structures of the first and second lines of defence are appropriate and that those involved are discharging their roles and responsibilities effectively.

### Audit Department

Audit Department comprises an Internal Audit Group and a Credit Review Group. The objective of Internal Audit is to provide reasonable assurance to the Board, management and other stakeholders that an effective internal control environment has been established and maintained within the Bank. In order to achieve this objective, the Internal Audit Group conducts audits and related services using a risk-based approach and through following the Guidance on Effective Internal Audit in the Financial Services Sector issued by the Chartered Institute of Internal Auditors.

Additional assurance is provided by Credit Review Group, which is responsible for reviewing the credit grading process.

Audit Department acts independently of the Bank's business units. The two Co-General Managers of Audit Department report to the Audit Committee at its quarterly meetings.

### Annual review of internal controls

The Directors, through the Risk Committee, undertake an annual review of the effectiveness of the Bank's systems of internal controls. At its June 2019 meeting, the Risk Committee received confirmation from the Bank's Risk Management Department that management has taken or is taking the necessary actions to remedy any weaknesses identified through the operation of the Bank's framework of controls. This review considers the results of an attestation process under which the key risks facing the Bank, along with related key controls, are assessed and recorded by the heads of business units and functions.

In addition to this review, at its June 2019 meeting the Audit Committee received the results of a review undertaken by management of the effectiveness of the internal controls and risk management arrangements in relation to financial reporting.

On the basis of these assessments, the Board considers the Bank's system of internal controls to be appropriate. The Bank's system of internal controls is designed to mitigate and manage, rather than eliminate, the Bank's risks. As such, this system can only provide reasonable and not absolute assurance against material misstatement or loss.

Key components of the framework that the Bank has in place to provide assurance to the Board on the effectiveness of internal controls are set out in note 4.

### **Conduct of Activities**

This section sets out the principal factors related to the conduct of the Bank's activities.

### **Credit Policy**

- The Bank has established a Credit Policy, which is consistent with that of its parent, SMBC. This Policy sets out the lending guidelines and standards, including legal and regulatory requirements, followed by the Bank in undertaking its credit activities. The Policy is owned by Risk Management Department, and significant revisions to the Policy require the approval of the Risk Committee.
- In undertaking its credit business, the Bank seeks to achieve a balance of responsibility to the community and profitability as a
  private enterprise. The Bank seeks to employ best practice and avoids carrying out business that may breach acceptable social
  standards, including any laws or regulations. Recognising these responsibilities, the Bank will not extend any credit that may
  damage its reputation.

### **Environmental and Social Considerations**

- The Bank and the SMBC Group assign a high priority to environmental issues. The SMBC Group, of which the Bank is a part, seeks to reduce the environmental impact of its business activities and to contribute to global environmental protection from an economic standpoint by leveraging its financial functions.
- In December 2017, the SMBC Group expressed its support for the Task Force on Climate-related Financial Disclosures (TCFD), which was established by the Financial Stability Board to develop voluntary, consistent climate-related financial risk disclosures for use by companies in providing information to investors, lenders, insurers and other stakeholders. On 25 April 2019, SMFG announced details of the steps it had taken in response to recommendations made by the TCFD to improve the following areas of the Group's disclosures: Governance, Strategy, Risk Management and Metrics and Targets.
- SMBC has adopted the Equator Principles, a set of environmental and social risk management standards for private-sector financial institutions with regard to the financing of large-scale development projects with the potential to significantly negatively impact the environment or society (http://equator-principles.com/). In order to meet these Principles, SMBC has established a document called "Procedures for Social and Environmental Risk Assessment". These Procedures also apply to the Bank and require the Bank to undertake a social and environmental risk assessment for relevant transactions. For a relevant transaction to proceed, the results of this assessment must be deemed acceptable by the Bank and by SMBC's Environmental Analysis Department. The scope of the assessment, as set out in the Procedures, also extends to loans other than project finance loans where the purpose is to fund a specific development project or capital investment. In addition to adopting the Equator Principles, the SMBC Group has announced that it has endorsed the Principals for Responsible Banking proposed by UNEPFI (United Nations Environment Programme Finance Initiative) ahead of its launch in September 2019.
- Further details on the SMBC Group's environmental position is available on its website at https://www.smfg.co.jp/english/responsibility/issue/environment
- The Bank had previously been selected for participation in a UK Environment Agency audit called The Energy Savings Opportunity Scheme (ESOS) through which the Bank's total energy consumption and significant areas of energy consumption were assessed. In April 2018, the Bank received confirmation from the UK Environment Agency that it was compliant with the requirements of ESOS.
- The Bank has established an Anti-Slavery Policy, which sets out the processes through which the Bank seeks reasonable assurance that none of its customers, business partners, suppliers and other third parties are involved in the commission or facilitation of slavery and/or human trafficking. This Policy is owned by Compliance Department and significant changes to the Policy require the approval of the Chief Executive Officer. The Bank publishes its Slavery and Human Trafficking Statement on its website https://www.smbcgroup.com/emea/about-us/corporate-disclosures. This Statement is subject to annual Board review and approval.

### Customer Relations

• The Bank is committed to putting its customers first by providing quality and innovation through its products and services. The Bank has in place a Customer Voice Policy, which sets out how the Bank seeks to identify, record, investigate, respond to and escalate expressions of dissatisfaction made by its customers and potential customers in relation to the products and services the Bank provides and/or behaviours of its employees. The Bank also has a number of other policies in place which set out how the Bank will treat and communicate with its customers, such as its Pre-Sales, Sales, Conflicts of Interest, Market Abuse and Competition policies. Adherence to these policies is monitored by Compliance Department and Risk Management Department, and key metrics around customer outcomes, marketing materials and customer expressions of dissatisfaction are reported quarterly to the Risk Committee and Board.

### Compliance and Prevention of Financial Crime

- The Bank has an overarching Compliance Policy Framework, which comprises a number of individual compliance policies, standards and guidance. The purpose of these documents is to identify, measure, monitor and report the Bank's compliance risks. The policies included in the framework are approved by the Chief Executive Officer and, as necessary, by the Board and Risk Committee.
- The Bank's business is cross-border in nature, and its customers and suppliers come from many different jurisdictions and business sectors. The Bank recognises the risk arising from, among other things, the jurisdictions of its customers and suppliers, their legal form, the nature of their business activities, its own employees and the nature of its own products. The Bank seeks to avoid financial crime risk, but recognises that such risk is inherent in its business activities.
- The Bank has established an Anti-Money Laundering/Combating Terrorist Financing Policy, which sets out the Bank's controls and customer due diligence processes through which it seeks to meet its legal obligations to mitigate money laundering and terrorist financing risks. This Policy is owned by Compliance Department and significant changes to the Policy require the approval of the Chief Executive Officer.
- The Bank also has specific policies in relation to the prevention of fraud and market abuse and ensuring compliance with financial sanctions.
- The Bank has zero tolerance towards and is committed to preventing all forms of bribery and corruption. The Bank is also committed to carrying out its business in a fair, open and ethical manner. The Bank has established an Anti-Bribery and Corruption Policy, which sets out the requirements and principles that the Bank and all employees must adhere to in relation to the prevention of bribery and corruption. This Policy is owned by Compliance Department and significant changes to the Policy require the approval of the Chief Executive Officer.

# Policy Due Diligence

- Adherence by employees to the Bank's policies is assessed through a number of means, including:
  - Risk Management Department through the implementation and monitoring of the risk management framework;
  - Compliance Department the Compliance Monitoring function, which forms part of Compliance Department, is a
    Second Line of Defence function tasked with assessing the Bank's controls, processes and conduct against regulatory
    rules on an ongoing basis; and
  - Audit Department through its regular audit activity.

### **Employees and Equal Opportunities**

- The Bank is committed to equal opportunities and to providing a fair working environment. The Bank is an equal opportunities employer and the Bank's Equal Opportunities Policy is set out in the Employee Handbook, which is issued to all employees. As stated in this Policy, it is the Bank's intention that:
  - no potential or current employee is subject to discrimination on account of age, race, nationality, colour, disability, ethnic background, gender, sexual orientation, gender reassignment, pregnancy or maternity leave, marital status, religion or belief;
  - employees are not disadvantaged by conditions or requirements that have a disproportionately adverse effect on them
    more than any other group;
  - criteria and procedures are in place to ensure that the Bank will select, appoint, train, develop and promote on the basis
    of merit and ability;
  - all employees have personal responsibility for the practical application of the Bank's equal opportunities policy, which
    extends to the treatment of employees, customers and suppliers;
  - special responsibility for the practical application of the Bank's equal opportunities policy falls upon managers and supervisors involved in the recruitment, selection, promotion and development of employees;
  - the Bank's grievance procedure is available to any employee who believes that they may have been unfairly discriminated against; and

- the Bank will take disciplinary action against any employee who is found to have committed an act of unlawful discrimination. Discriminating conduct and sexual or racial harassment may be treated as gross misconduct.
- The Bank's equal opportunities philosophy is articulated through its Working With Respect Programme, on which all
  employees and workers receive regular training.
- Other key employee developments and initiatives are set out below:
  - the Bank has established a Diversity and Inclusion Steering Committee, which has responsibility for diversity and inclusion initiatives.
  - in 2016 the Bank established DRIVE (which stands for Diversity, Respect, Inclusion, Value and Equality). DRIVE is the Bank's employee-led diversity initiative, which aims to promote the sustainable growth of the Bank by fostering a diverse and inclusive workplace. Activities undertaken through DRIVE include employee events and the gathering of information, opinions and perspectives from employees in order to support the direction and oversight of the Bank's overall Diversity and Inclusion initiative. Under the umbrella of DRIVE, the Bank has also established two specific network groups: a Women's Inclusion Network and an LGBTA Network.
  - the Bank is a signatory to the HM Treasury Women in Finance Charter. The SMBC EMEA Region, of which the Bank is a part, has set itself the target to increase senior female representation to 30 per cent by 2022. Senior female representation in the Bank has increased from 25.3 per cent at 31 March 2018 to 26.2 per cent at 31 March 2019. The senior executive who chairs the Diversity and Inclusion Steering Committee is responsible for making regular progress updates on these targets to the Executive Committee, Nomination Committee and Board.
  - in 2018 the Bank ran for the second time its Elevate female leadership development programme and enhanced this with the introduction of a 12 months mentoring programme for the participants. Elevate was designed in response to the Bank's new Diversity and Inclusion strategy and has been established in order to enhance diverse leadership in the Bank
  - the Bank is committed to supporting the physical and mental wellbeing of its employees and provides a number of employee benefits in this regard, such as private medical insurance, income protection and occupational health. In 2018, the Bank launched a new independent employee helpline and a number of other mental wellbeing initiatives such as stress awareness workshops, resilience and mental toughness training, and enhancements to manager and new joiner training on mental health.
  - the Bank values its employees and their views and endeavours to ensure that they are properly consulted on matters
    affecting them. The means of communication with employees varies depending on the situation, but includes e-mails
    and employee meetings.
  - to ensure management are aware of key issues related to the Bank's workforce, a number of non-financial key risk indicators are collated by the Bank's Planning Department Human Resources Group. The KRIs include data such as employee turnover on a 12 month rolling basis; number of disciplinaries on a monthly basis; number of grievances in the last six months and number of ongoing litigations. These are reported to Risk Management Department and Operational and General Risk Committee on a monthly basis. The KRIs are also presented to the Executive Committee on a quarterly basis.
  - the Bank has an employee 'Speak Up' Policy, which sets out the Bank's approach towards whistleblowing and reporting concerns. The Policy is regularly updated and awareness of the Bank's Speak Up framework is reinforced by staff training and posters. The Chair of the Audit Committee has been appointed the Bank's Whistleblowers' Champion and makes an annual report to the Audit Committee on the effectiveness of the Bank's whistleblowing systems and controls.
  - in response to changing working practices, a new agile working policy was introduced in 2018 to encourage more inclusive and flexible ways of working.
  - the Bank has a well-established work placement programme and in the year, 58 students undertook short-term placements in the Bank. Following a strategic review of work placements in 2017, the Bank has also further developed and enhanced the placement opportunities available, continuing to establish a talent pipeline of prospective future employees. The main source for this is the sandwich placement scheme, which is offered to students in their third year at university. The Bank has offered such placements to students for roles in Planning Department Finance & Control Group, Operations & Administration Department, Compliance Department and Risk Management Department. In 2018 the Bank continued to grow and strengthen its relationship with a number of universities, placing multiple

students from Russell Group and top 10 universities. The number of roles increased once again from 14 in the previous fiscal year to 17 in the year ended 31 March 2019.

- the Bank plans to recruit a number of interns in 2019, who will be appointed to positions in the front office departments, Operations and Administration Department, Planning Department - Finance & Control Group, Compliance Department and Risk Management Department.
- in 2017 the government introduced the apprenticeship levy as a means to support employers in funding apprentice training. In 2018, the Bank hired two apprentices to undergo a structured information technology technical specialist development programme. There are plans underway to expand the apprenticeship programmes in the current fiscal year in support of the Bank's investment in emerging talent across the organisation.
- in 2018 the Bank has taken steps to improve its overall employee learning and development programme, with key
  initiatives aimed at supporting manager and employee development and continued investment in the Bank's senior
  leadership development programme.

### Culture

The Bank believes that a strong and positive culture underpins appropriate conduct, which in turn helps protect itself, its customers and its stakeholders and helps preserve the integrity of the financial markets in which it operates.

The Bank has undertaken a variety of culture-related initiatives, which commenced with the conducting of an employee survey in 2017. This survey was designed to assess organisational effectiveness and to measure levels of employee engagement and commitment and the results were subsequently circulated to employees in a variety of different ways.

In response to the survey results, management established three work streams designed to address some immediate opportunities for cultural improvement, namely Internal Communications; Customer Focus; and Engagement. During the fiscal year, and under these three work streams, management has undertaken a number of measures to ensure the further evolution of the Bank's culture. All culture-related activities have had continuous senior executive oversight and sponsorship and progress is reported to the Board on a regular basis.

One of the key cultural outcomes during the fiscal year was the adoption of a new Culture Statement for the Bank. This Statement was designed in part to reflect the current culture of the Bank, but also to be aspirational in outlining a culture that will help sustain the Bank's business over the longer term, whilst continuing to respect and protect its customers and markets. The Statement was launched by the Chief Executive Officer and has five integral components all designed to complement the SMBC Group's existing core global values:

- 1. Provide an excellent service to customer and colleagues, through collaboration, teamwork and a sense of shared purpose;
- 2. Build our brand by being a reliable and trusted partner to our customers and contribute positively to the societies in which we operate:
- 3. Protect our customers and markets by conducting our business in a transparent, prudent and compliant manner;
- 4. Treat each other with respect and integrity and embrace diversity in all its forms; and
- 5. Be focused, creative and proactive in evolving our business to meet new challenges.

### Charitable and political donations

The Bank respects its employees, its clients and its local community. The Bank provides up to six paid days per year for employees volunteering for community activities and the Bank is confident that the interaction of our employees with charities and other voluntary organisations helps the Bank keep up to date and ensures that diversity is respected in all areas of the Bank's business. Many employees have actively supported the Bank's community volunteering scheme and, during the year, 214 hours (2018: 221 hours) of employee work time were given to community volunteering, with many more hours volunteered in employees' personal time.

To support its involvement in community initiatives, the Bank established a Corporate Giving Fund. Under this scheme, the Bank provides an annual fund from which donations are made to carefully selected community organisations and charities that have long-term relationships (via volunteering) with Bank employees. In addition, from this Fund, subject to certain restrictions, the Bank will match contributions made by employees and funds raised by employees from other charitable fund-raising events. During the year, including the matching of employee donations and fund raising, the Bank made total charitable donations of USD 1,812 (2018: USD 24,990) to community organisations focused on a variety of social initiatives.

SMFG's Corporate Social Responsibility Department also collates social data across the Group. Data is collected on total expenditure in social contribution activities, the allocation of such contributions and volunteer activities. The Bank contributes to this data as appropriate.

The Bank made no political contributions during the year (2018: nil).

Kafea

# Relationship with Suppliers

The Bank has established a policy, owned by Planning Department - Finance and Control Group, which sets out the way in which it meets the Payment Practices Regulations. The purpose of the policy is to summarise the disclosure and reporting requirements under the Regulations and to provide details of the reporting process through which the Bank ensures it is in compliance with the legislation.

Approved by the Board of Directors

Hideo Kawafune

Director

10 July 2019

### REPORT OF THE DIRECTORS

The Directors present their report and the audited financial statements of Sumitomo Mitsui Banking Corporation Europe Limited.

#### **Directors**

The Directors who held office at 31 March 2019 were as follows:

Ms Laurel Powers-Freeling Independent non-executive Director, Chairman

Mr Tetsuro Imaeda Executive Director, Chief Executive Officer

Mr Hideo Kawafune Executive Director

Ms Charlotte Morgan Independent non-executive Director

Mr Masaki Kambayashi Executive Director

Mr Alan Keir Independent non-executive Director

Mr Keiichiro Nakamura Non-executive Director

Mr Stanislas Roger Executive Director

The following changes to the Directorate occurred in the year:

- Mr Keiichiro Nakamura resigned as an executive Director on 3 April 2018 and was reappointed as a non-executive Director on 25 July 2018;
- Mr Hideo Kawafune was appointed as an executive Director on 3 April 2018; and
- Mr Kenichi Hosomi resigned as a non-executive Director on 25 July 2018.

# Directors' indemnities

During the financial year, the independent non-executive Directors benefited from qualifying third party indemnity provisions. These provisions remain in place at the date of this Report.

# Corporate Governance

The Board is committed to maintaining a high standard of corporate governance within the Bank. Set out within this section is a description of the Board's governance arrangements.

### **Board of Directors**

The Board is responsible for the leadership, direction and control of the Bank and for ensuring that the Bank complies with its legal and regulatory requirements. The Board has delegated to the Chief Executive Officer (CEO) responsibility for the management and day-to-day running of the Bank. The Chief Operating Officer assists the CEO in this role by participating in and overseeing all key decision making in the Bank.

### Board structure

At the date of signing this Report, the Board consisted of eight Directors, four of whom were executive and four of whom were non-executive.

### **Executive Directors**

The executive Directors, under the leadership of the CEO, Mr Tetsuro Imaeda, are responsible for running the business of the Bank, implementing the strategy and policies approved by the Board and for ensuring the Board's decisions are implemented appropriately. They also have executive responsibility for certain areas of the Bank's business.

Further information on the Directors who held office at the date of this report is shown below:

Mr Tetsuro Imaeda, appointed as a Director on 27 September 2016, is the Chief Executive Officer

- Mr Masaki Kambayashi, appointed as a Director on 17 July 2017, is a Deputy Chief Operating Officer.
- Mr Hideo Kawafune, appointed as a Director on 3 April 2018, is the Chief Operating Officer and General Manager of Planning Department, which has responsibility for the following activities: corporate planning, human resources, financial reporting, legal and company secretarial and information systems.
- Mr Stanislas Roger, appointed as a Director on 29 April 2015, is a Deputy Chief Executive Officer.

#### Non-Executive Directors

The Board has appointed four non-executive Directors.

Independent Non-Executive Directors

- Ms Laurel Powers-Freeling is the Chairman of the Board, the Nomination Committee and the Remuneration and Human Resources Committee. She was appointed a Director of the Bank on 1 July 2015.
- Mr Alan Keir was appointed to the Board on 12 October 2016 and is Chairman of the Risk Committee.
- Ms Charlotte Morgan was appointed to the Board on 1 September 2017 and is Chairman of the Audit Committee.

Group Non-Executive Director

Mr Keiichiro Nakamura is an Executive Officer of SMBC and SMFG and is General Manager of SMBC's Planning
Department, International Banking Unit and SMFG's Planning Department, International Business Unit. He was
appointed a non-executive Director of the Bank on 25 July 2018, having previously been appointed an executive Director
from 2 April 2012 to 3 April 2018

The Board meets quarterly and, additionally, when necessary. Between these meetings there is regular contact between the executive and non-executive Directors. The Board has a formal schedule of matters reserved for its consideration. All Directors have access to the advice of the Company Secretary and have the right to seek independent professional advice at the Bank's expense in the furtherance of their duties.

The Board conducts regular reviews of its own effectiveness and engages a third party to facilitate those reviews every three years. The results of these reviews and proposals to improve the Board's effectiveness are considered by the Nomination Committee and Board

### **Board Composition**

The Nomination Committee is responsible for nominating candidates to the Board to fill Board, Senior Manager Function and certain other senior level vacancies. The final decision on whether to appoint a candidate to one of these positions lies with the Board of Directors.

The Board has put in place a Diversity Policy. This Policy and the Bank's policy on the selection and appointment of senior management and Directors reflect the Bank's status as a wholly-owned subsidiary of SMBC. The Board's target is that at least 25 per cent of the Board will be made up of women, while keeping in mind the need to ensure that there is an appropriate mix of skills, experience and competencies on the Board. Currently, 25 per cent of the Board is made up of women.

As a wholly-owned subsidiary of SMBC, the Bank typically receives candidates from SMBC to fill senior management (General Manager and Director) vacancies. In cases where no suitable SMBC or internal Bank candidates are available to fill senior management positions and management determines that it needs to recruit in the local market, the Bank will typically engage recruitment consultants to identify suitable candidates for appointment.

Appointments to Board and senior management level are made on the basis of the competencies, skills, experience and values of the candidates.

In addition, appointments to the Board seek to ensure that the Directors possess adequate collective knowledge, skills and experience to understand the Bank's activities and that it reflects an adequately broad range of experiences. Directors are also expected to commit sufficient time to perform their functions and to act with honesty, integrity and independence of mind to effectively assess and challenge the decisions of senior management and to effectively oversee and monitor management decision-making.

A bespoke training and induction programme is in place for all new senior management and Board members. The purpose of this programme is to give those individuals the information they need in order for them to become as effective as possible in their new role within the shortest practicable time.

### **Board Committees**

The Board has delegated specific areas of responsibility to the Board Committees, each of which has terms of reference that are reviewed periodically. These Committees are as follows:

• Audit Committee: The members of the Audit Committee are the non-executive Directors, with Ms Morgan acting as Chairman. At the invitation of the Committee Chairman, Mr Imaeda and Mr Kawafune, together with a representative of the Bank's external auditors, also attend Committee meetings. The relevant members of executive management are also invited to attend Committee meetings as necessary and include the Co-General Managers of Audit Department, General Manager of Compliance Department and Money Laundering Reporting Officer, General Counsel and Chief Legal Officer (EMEA) and Head of Planning Department – Finance and Control Group.

The Audit Committee is principally responsible for considering matters related to the preparation and audit of the Bank's financial statements, internal financial controls and engagement with the Bank's external auditors. It is also responsible for safeguarding the independence and overseeing the performance of the Audit Department, considering the results of Internal Audit and Credit Review activity, and the appointment and dismissal of the Co-General Managers of Audit Department and for assessing the effectiveness of the Bank's whistle blowing arrangements. The Audit Committee meets quarterly and reports to the Board of Directors.

- Executive Committee: Mr Imaeda is the Chairman of this Committee, which is attended by all executive Directors and other members of senior management. The Co-General Managers of Audit Department attend Committee meetings as non-members. The Executive Committee is responsible for the supervision and management of the Bank's daily operations and for overseeing the work of the risk committees (further details on which are shown on page 15). The Executive Committee meets monthly and reports to the Board of Directors. The Bank's non-executive Directors receive a copy of the papers and minutes of all Executive Committee meetings.
- Nomination Committee: Ms Powers-Freeling is the Chairman of this Committee, with the other members being Mr Keir, Ms Morgan, Mr Imaeda, Mr Kawafune and Mr Roger.

The Nomination Committee is responsible for assessing and recommending candidates to the Board to fill Board, Senior Manager Function and certain other senior executive management level vacancies. The Committee is also responsible for: (i) considering the composition of the Board, which includes matters of diversity and the Board's policy for the selection and appointment of Directors and senior management; (ii) assessing at least annually the knowledge, skills and experience of the Directors individually and the Board collectively; (iii) assessing annually the size, composition and performance of the Board; and (iv) taking into account the need to ensure that the Board's decision-making is not dominated by any one individual or small group of individuals in a manner that is detrimental to the interest of the Bank as a whole.

• Remuneration and Human Resources Committee: The members of the Remuneration and Human Resources Committee are the non-executive Directors with Ms Powers-Freeling acting as Chairman. In addition, Mr Imaeda, Mr Kawafune and the Head of Human Resources Group attend meetings but have no voting rights.

The Remuneration and Human Resources Committee is responsible for overseeing the development and implementation of the Bank's remuneration policies and practices, which includes specific responsibility for recommending the Remuneration Policy to the Board for approval. The Committee also considers other Board level remuneration and human resource matters, such as approval of remuneration for Material Risk Takers and the bonus fund cap calculation.

• Risk Committee: The members of the Risk Committee are the non-executive Directors, with Mr Keir acting as Chairman. At the invitation of the Committee Chairman, Mr Imaeda and Mr Kawafune also attend Committee meetings. The relevant members of executive management are also invited to attend Committee meetings as necessary and include: Co-General Managers of Risk Management Department, Co-General Managers of Audit Department, General Manager of Compliance Department and Money Laundering Reporting Officer and General Counsel and Chief Legal Officer (EMEA).

The Risk Committee is principally responsible for considering the Bank's risk management structure and systems, the main areas of risk faced by the Bank, the Internal Capital Adequacy Assessment Process document, the Individual Liquidity Adequacy Assessment Process document and regulatory engagement and compliance. The Risk Committee meets quarterly and reports to the Board of Directors.

# SMBCE risk committees

The risk committees have been established to consider certain areas of risk for the Bank and report, as relevant, to the Executive Committee and the Risk Committee. The risk committees are as follows:

Asset and Liability Management Committee - this Committee is primarily responsible for considering market and
liquidity risk management issues, asset and liability management issues, discussing operations and funding policy (including
the long-term funding strategy) and reporting on the Bank's risk appetite and associated risk tolerances, monitoring limits,
guidelines and compliance with regulatory requirements.

The Asset and Liability Management Committee has established the following sub-committee:

- Liquidity Management Committee responsible for considering issues relating to liquidity risk management, including
  analysis of the funding market, stress testing results, impact of business strategy on assets and deposits and funding
  strategy.
- Credit Risk Committee primarily responsible for reporting and discussing a range of credit issues including consideration
  of credit risk Key Risk Indicators, portfolio analysis, sector analysis, asset allocation as well as the Bank's credit risk appetite
  and associated risk tolerances. It also reviews matters such as credit policies and rules, credit strategy and provisioning policy.
  Issues arising from the ongoing credit review by Audit Department Credit Review Group are also discussed at this
  Committee.
- Cyber Resilience Committee responsible for driving actions to ensure the Bank meets the expectations set out by the Financial Conduct Authority and other regulators in the area of cyber and technical resilience. This Committee, the Security Committee and the IT Steering Committee all contribute to the Bank's cyber and technical resilience.
- Financial Crime Committee the Committee is independent of other Committees, but reports to the Executive Committee and Risk Committee on any significant matters that require the attention of those Committees.
- Operational and General Risk Committee responsible for examining and discussing matters related to general risk management issues of the Bank. The subjects discussed include risk issues arising in relation to the overall risk management framework, the risks arising from the implementation of new products and services and the operational risk management framework and elements thereof, such as information systems issues, information security matters, compliance and regulatory matters and Internal Audit findings.

The Operational and General Risk Committee has established the following sub-committees:

- IT Steering Committee responsible for examining and discussing SMBCE and EMEA IT initiatives and policy and
  for considering any impacts on the Bank's operations in the EMEA region.
- New Products and Services Committee responsible for considering applications for the introduction of new products and services in the Bank.
- Security Committee responsible for supporting actions to deliver the Bank's Security Strategy to achieve the right balance between keeping the Bank secure and doing customer-focused business at speed.
- Prudential Regulatory Committee responsible for considering a number of prudential risk issues, including examining the governance processes, assumptions and results related to: the Internal Capital Adequacy Assessment Process, Recovery and Resolution planning, Wind Down Analysis, Internal Liquidity Adequacy Assessment, credit risk management models and non-credit risk related models (such as the Operational Risk model).

### Financial instruments

The Bank's use of Financial Instruments is set out in the accompanying Strategic Report and in note 3 (policy k) of the financial statements.

### Contracts of significance with controlling shareholder

In addition to the Keep Well Deed with SMBC, in accordance with the normal course of business, the Bank and SMBC have entered into an ISDA Master Agreement and Credit Support Annex whereby SMBC agrees, inter alia, to provide the Bank with collateral of a value that is greater than the Bank's exposure to SMBC. The Bank has also entered into a USD1.5 billion revolving multicurrency revolving liquidity facility agreement with SMBC.

### Overseas offices and other operations

During the course of the fiscal year, the Bank had Branches established in Amsterdam, Dublin, Madrid, Milan, Paris and Prague. On 18 March 2019, the assets and liabilities of Milan Branch were transferred to SMBC Bank EU AG and the Branch ceased its operations as part of the Bank on that date. After the year-end, on 1 April 2019, the assets and liabilities of the Branches in Amsterdam, Dublin, Madrid and Prague were also transferred to SMBC Bank EU AG and the Branches ceased operations as part of the Bank on that date. As a result, at the date of signing this Report the Bank had one Branch, which is established in Paris.

### Future developments

The Bank will continue with its primary objective of providing high quality value-added services to its corporate customers. Consistent with this objective, the Bank will continue to assess market conditions carefully, to identify its core competencies and to enhance its credit and other risk management techniques. The Bank will seek sustainable growth with a well-balanced assessment of risk and reward, this being particularly important given the current uncertainty in the banking sector and the recessionary environment in some of the wider economies of Europe, Middle East, Africa and beyond.

# Charitable and political donations

Details of the Bank's charitable donations and activities are set out in the accompanying Strategic Report.

The Bank made no political contributions during the year (2018: nil).

# Equal opportunities

Details of the Bank's equal opportunities activities are set out in the accompanying Strategic Report.

### Disclosure of Information to Auditor

The Directors who held office at the date of approval of this Directors' Report confirm that, so far as they are each aware, there is no relevant audit information of which the Bank's auditor is unaware, and the Directors have taken steps that they ought to have taken as Directors to make themselves aware of any relevant audit information and to establish that the Bank's auditor is aware of that information.

### Auditor

Pursuant to Section 485 of the Companies Act 2006, the Bank appointed its existing auditors, KPMG LLP, as its auditor for its fiscal year beginning 1 April 2019. This appointment was made following the completion of an audit tender process, which was undertaken in line with the requirements of Statutory Auditors and Third Country Auditors Regulations 2016 (SATCAR).

Approved by the Board of Directors and signed by order of the Board

# SUMITOMO MITSUI BANKING CORPORATION EUROPE LIMITED DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE STRATEGIC REPORT, THE DIRECTORS' REPORT AND THE FINANCIAL STATEMENTS

The directors are responsible for preparing the Strategic Report, the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with International Financial Reporting Standards as adopted by the European Union (IFRSs as adopted by the EU) and applicable law.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of its profit or loss for that period. In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable, relevant and reliable;
- state whether they have been prepared in accordance with IFRSs as adopted by the EU;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that its financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

### 1. Our opinion is unmodified

We have audited the financial statements of Sumitomo Mitsui Banking Corporation Europe Limited ("the Bank") for the year ended 31 March 2019 which comprise the Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Equity, Statement of Cash Flows and the related notes, including the accounting policies in note 3.

In our opinion the financial statements:

- give a true and fair view of the state of the Bank's affairs as at 31 March 2019 and of its profit for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards as adopted by the European Union; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion. Our audit opinion is consistent with our report to the audit committee.

We were first appointed as auditor by the shareholders on 10 July 2009. The period of total uninterrupted engagement is for the ten financial years ended 31 March 2019. We have fulfilled our ethical responsibilities under, and we remain independent of the Bank in accordance with UK ethical requirements including the FRC Ethical Standard as applied to public interest entities. No non-audit services prohibited by that standard were provided.

Overview		
Materiality: financial statements as a whole	USD 14.5m (2018:USD 13.5m) 3.8% (2018: 4.5%) of profit before tax	
Key audit matters		vs 2018
Event driven	The impact of uncertainties due to the UK exiting the European Union on our audit	New
Recurring risk	Impairment of loans and advances to customers	<b>A</b>

### 2. Key audit matters: including our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. We summarise below the key audit matters in arriving at our audit opinion above, together with our key audit procedures to address those matters and, as required for public interest entities, our results from those procedures. These matters were addressed, and our results are based on procedures undertaken, in the context of, and solely for the purpose of, our audit of the financial statements as a whole, and in forming our opinion thereon, and consequently are incidental to that opinion, and we do not provide a separate opinion on these matters.

	The risk	Our response
	THETISK	Our response
The impact of uncertainties due to the UK exiting the European Union on our audit  Refer to page 4 (Strategic report)	Unprecedented levels of uncertainty:  All audits assess and challenge the reasonableness of estimates, in particular as described in impairment of loans and advances to customers below, and related disclosures and the appropriateness of the going concern basis of preparation of the financial statements (see below). All of these depend on assessments of the future economic environment and the Bank's future prospects and performance.	We developed a standardised firm-wide approach to the consideration of the uncertainties arising from Brexit in planning and performing our audits. Our procedures included:  - Our Brexit knowledge: We considered the directors' assessment of Brexit-related sources of risk for the Bank's business and financial resources compared with our own understanding of the risks. We considered the directors' plans to take action to mitigate the risks.
	Brexit is one of the most significant economic events for the UK, and at the date of this report its effects are subject to unprecedented levels of uncertainties and outcomes, with the full range of possible effects unknown.	- Sensitivity analysis: When addressing impairment of loans and advances to customers and other areas that depend on forecasts, we compared the directors' analysis to our assessment of the full range of reasonably possible scenarios resulting from Brexit uncertainty and, where forecast cash flows are required to be discounted at a rate other than the original effective interest rate, considered adjustments to discount rates for the level of remaining uncertainty.
,		- Assessing transparency: As well as assessing individual disclosures as part of our procedures on impairment of loans and advances to customers we considered all of the Brexit related disclosures together, including those in the strategic report, comparing the overall picture against our understanding of the risks.
		Our results
		As reported under impairment of loans and advances to customers, we found the resulting estimates and related disclosures of impairment of loans and advances to customers and disclosures in relation to going concern to be acceptable. However, no audit should be expected to predict the unknowable factors or all possible future implications for a company and this is particularly the great in substitute to Provide

ticularly the case in relation to Brexit.

### The risk

# Impairment of loans and advances at amortised cost

Charge: USD 13.1 m (2018: USD 36.9 m)

Provision: USD 102.8

(2018: USD 167.3 m)

Note 3(l) (accounting policy) and Note 18 (impairment provisions).

### Subjective estimate:

IFRS 9 was implemented by the Bank on 1 April 2018. This new and complex standard requires the Bank to recognise expected credit losses ("ECL") on financial instruments which involves significant judgement and estimates. During the year credit loss provisions reduced from USD 167.3 million as at 31 March 2018 to USD 102.8 million as at 31 March 2019. The key areas where we identified greater levels of management judgement and therefore increased levels of audit focus in the Bank's implementation of IFRS 9 are:

- Model estimations Inherently judgemental modelling is used to estimate ECLs which involves determining Probabilities of Default ("PD"), Loss Given Default ("LGD"), and Exposures at Default ("EAD"). The non-Japanese corporate portfolio PD models are the key drivers of the expected credit loss calculation (including staging of assets) and are therefore the most significant judgemental aspect of the Bank's ECL modelling approach.
- Economic scenarios IFRS 9 requires the Bank to measure ECLs on a forward-looking basis reflecting a range of future economic conditions. Significant management judgement is applied to determining the economic scenarios used and the probability weightings applied to its corporate lending portfolios.
- Significant Increase in Credit Risk ("SICR") For the corporate lending portfolios the criteria selected to identify a significant increase in credit risk is a key area of judgement within the Bank's ECL calculation as these criteria determine whether a 12 month or lifetime provision is recorded.
- Lifetime expected credit losses on customer exposures in Stage 3 These are individually determined based on the cash flows using various key inputs including the expected future cash flows, discount rates, and expected cash flows arising from guarantees
- Disclosure quality The disclosures regarding the Bank's application of IFRS 9 are key to understanding the change from IAS 39 as well as explaining the key judgements and material inputs to the IFRS 9 ECL results.

The effect of these matters is that, as part of our risk assessment, we determined that the expected credit loss provisions on loans and advances to customers has a high degree of estimation uncertainty, with a potential range of reasonable outcomes greater than our materiality for the financial statements as a whole. The financial statements (note 18) disclose the sensitivity estimated by the Bank.

# Our procedures included:

Our response

- Assessment of accounting policies: We evaluated the appropriateness of ECL model related policies and accounting policies based on IFRS 9 requirements, our business understanding and industry practice.
- Control testing: We tested the design and operating effectiveness of key controls relating to: the approval of loan credit grading assessments and the approval of individually assessed Stage 3 lifetime expected credit losses.
- Our financial risk modelling expertise: We engaged our own credit specialists to critically assess and challenge the appropriateness of the key judgements and assumptions relating to the non-Japanese corporate portfolio PD models and methodologies used. We also performed sensitivity analysis on key assumptions to assess the possible impact on the ECL arising from a range of possible outcomes.
- Our economic scenario expertise: We engaged our own economists to assess and challenge the appropriateness of the key judgements and assumptions related to forward looking economic variables included in the ECL model.
- Assessing SICR criteria: We tested a sample of Stage 2 performing loans that were assessed as experiencing a significant increase in credit risk since origination (such as a customer experiencing financial difficulty or in breach of covenant) and also tested a sample of Stage 1 performing loans. Based on the individual facts and circumstances, including consideration of disconfirming evidence, we formed our own judgement as to the appropriateness of the assigned credit grade and the resulting assessment of whether a significant increase in credit risk had occurred.
- Assessing individual exposures: For the full population of Stage 3 exposures, we understood the latest developments with each borrower and the basis for classifying and measuring the Stage 3 ECL and considered whether key judgements were appropriate given the borrower's circumstances. We also re-performed the lifetime expected credit loss calculation, testing key inputs including the expected future cash flows, discount rates and expected cash flows arising from guarantees.
- Assessing transparency: We considered the adequacy of the Bank's accounting policies and disclosures in respect of loss allowances for expected credit losses of loans and advances to customers.

### Our results

The results of our testing were satisfactory and we considered the credit impairment charge and provision recognised to be acceptable (2018: acceptable).

### 3. Our application of materiality and an overview of the scope of our audit

Materiality for the financial statements as a whole was set at USD 14.5 million (2018: USD 13.5 million), determined with reference to a benchmark of profit before tax, of which it represents 3.8% (2018: 4.5%).

We agreed to report to the Audit Committee any corrected or uncorrected identified misstatements exceeding USD 725,000 (2018: USD 670,000), in addition to other identified misstatements that warranted reporting on qualitative grounds.

Our audit of the Bank was undertaken to the materiality level specified above and was performed at the Bank's head office in London. We also visited the Bank's branch in Paris, France.

Certain processes and controls operate at the Bank's Parent locations in Tokyo and New York. We instructed the participating audit teams in Tokyo and New York to perform specific risk-focused audit procedures as follows:

- Control and test of details over credit impairment model inputs; and
- Certain IT general and application controls on systems hosted by the Parent.

We evaluated the work which the participating audit teams performed in these areas. We communicated with participating audit teams throughout the audit by holding regular telephone conference meetings and we visited Tokyo in June 2019.

### 4. We have nothing to report on going concern

The Directors have prepared the financial statements on the going concern basis as they do not intend to liquidate the Bank or to cease their operations, and as they have concluded that the Bank's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

Our responsibility is to conclude on the appropriateness of the Directors' conclusions and, had there been a material uncertainty related to going concern, to make reference to that in this audit report. However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the absence of reference to a material uncertainty in this auditor's report is not a guarantee that the Bank will continue in operation.

In our evaluation of the Directors' conclusions, we considered the inherent risks to the Bank's business model and analysed how those risks might affect the Bank's financial resources or ability to continue operations over the going concern period. The risks that we considered most likely to adversely affect the Bank's available financial resources over this period were:

- availability of funding and liquidity in the event of a market wide stress scenario including the impact of Brexit, and
- impact on regulatory capital requirements in the event of an economic slowdown or recession.

As these were risks that could potentially cast significant doubt on the Bank's ability to continue as a going concern, we considered sensitivities over the level of available financial resources indicated by the Bank's financial forecasts taking account of reasonably possible (but not unrealistic) adverse effects that could arise from these risks individually and collectively and evaluated the achievability of the actions the Directors consider they would take to improve the position should the risks materialise.

Based on this work, we are required to report to you if we have concluded that the use of the going concern basis of accounting is inappropriate or there is an undisclosed material uncertainty that may cast significant doubt over the use of that basis for a period of at least a year from the date of approval of the financial statements.

We have nothing to report in these respects, and we did not identify going concern as a key audit matter.

### 5. We have nothing to report on the strategic report and the directors' report

The directors are responsible for the strategic report and the directors' report. Our opinion on the financial statements does not cover those reports and we do not express an audit opinion thereon.

Our responsibility is to read the strategic report and the directors' report and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in those reports;
- in our opinion the information given in the strategic report and the directors' report for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

### 6. We have nothing to report on the other matters on which we are required to report by exception

Under the Companies Act 2006, we are required to report to you if, in our opinion

- adequate accounting records have not been kept by the Bank, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

### 7. Respective responsibilities

### Directors' responsibilities

As explained more fully in their statement set out on page 17, the Directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

### Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or other irregularities (see below), or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud, other irregularities or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

### Irregularities - ability to detect

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the directors and other management (as required by auditing standards), and discussed with the directors and other management the policies and procedures regarding compliance with laws and regulations. We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Bank is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related companies legislation), distributable profits legislation, taxation legislation, banking and financial markets legislation and the PRA and FCA regulations, and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Bank is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation or the loss of the Bank's license to operate. We identified the following areas as those most likely to have such an effect: regulatory capital and liquidity and certain aspects of company legislation recognising the financial and regulated nature of the Bank's activities and its legal form. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. Through these procedures, we became aware of actual or suspected non-compliance and considered the effect as part of our procedures on the related financial statement items. The identified actual or suspected non-compliance was not sufficiently significant to our audit to result in our response being identified as a key audit matter.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it. In addition, as with any audit, there remained a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

# 8. The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Bank's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Bank's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Bank and the Bank's members, as a body, for our audit work, for this report, or for the opinions we have formed.

The notes on pages 28 to 88 are an integral part of these financial statements.

### 1. REPORTING ENTITY

The Bank is a company domiciled in the United Kingdom. The nature of the Bank's principal activities are set out in the Strategic Report. The registered office is 99 Queen Victoria Street, London, EC4V 4EH.

### 2. BASIS OF PREPARATION

### (a) Statement of compliance

The Bank's financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), as adopted by the European Union.

### (b) Basis of measurement

The Bank's financial statements are prepared on a going concern basis and under the historic cost convention as modified by the revaluation of investments, derivatives and other financial instruments, in accordance with applicable accounting standards and the Companies Act 2006.

The Bank's management has made an assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the resources to continue in business for the foreseeable future. Further information regarding this assessment is given in the strategic report. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

### Functional and presentation currency

These financial statements are presented in US Dollars, which is also the Bank's functional currency. US Dollars is the Bank's functional currency as it is the dominant operating currency of the Bank's business. All financial information has been rounded to the nearest one million US Dollars.

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

### (c) Adoption of IFRS

i) New and amended standards and interpretations

### **IFRS 9 Financial Instruments**

The Bank has applied IFRS 9 as issued in July 2014 initially on 1 April 2018. This includes the adoption of "Prepayment Features with Negative Compensation (Amendments to IFRS 9)", which is effective for annual accounting periods beginning on or after 1 January 2019 with early adoption permitted. The effect of this adoption is not significant. The classification and measurement and impairment requirements by IFRS 9 are applied retrospectively by adjusting the opening balance sheet at date of initial application and any changes in measurement arising have been incorporated through an adjustment to the opening reserves and retained earnings position at 1 April 2018.

The key changes to the Bank's accounting policies as a result of the adoption of IFRS 9 are summarised below.

### Classification and measurement of financial assets and liabilities

IFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, fair value through either comprehensive income (FVOCI) or fair value through profit and loss (FVTPL). The classification and measurement of financial assets under IFRS 9 is based upon the business model in which a financial asset is managed and whether contractual cash flows of those assets represent solely payments of principal and interest. IFRS 9 eliminates the previous IAS 39 categories of held to maturity, loans and receivables and available for sale.

IFRS 9 retains most of the existing requirements in IAS 39 for the classification and measurement of financial liabilities.

For an explanation of how the Bank classifies and measures financial instruments and accounts for related gains and losses under IFRS 9, see Note 3 (k).

# Impairment of financial assets

IFRS 9 introduces a new impairment model that requires the recognition of expected credit losses on all financial assets at amortised cost or at fair value through other comprehensive income (other than equity investments), lease receivables and certain

loan commitments and financial guarantee contracts. The expected credit loss (ECL) model replaces the "incurred loss" model in IAS 39.

IFRS 9 introduces a three-stage approach to impairment as follows:

- Stage 1 the recognition of 12 month expected credit losses (ECL), that is the portion of lifetime expected credit losses from default events that are expected within 12 months of the reporting date, if credit risk has not increased significantly since initial recognition;
- Stage 2—lifetime expected credit losses for financial instruments for which credit risk has increased significantly since initial recognition;
- Stage 3 lifetime expected credit losses for financial instruments which are credit impaired.

For an explanation of how the Bank applies the impairment requirements under IFRS 9, see Note 3 (1).

### Transition

Changes in accounting policies resulting from the adoption of IFRS 9 have been applied retrospectively, except as described below.

Comparative periods have not been restated. Differences in the carrying amounts of financial assets and financial liabilities
resulting from the adoption of IFRS 9 are recognised in retained earnings and reserves as at 1 April 2018. Accordingly, the
information presented for the year ended 31 March 2018 and as at 31 March 2018 does not reflect the requirements of
IFRS 9 and therefore is not comparable to the information presented for the year ended and as at 31 March 2019 under
IFRS 9.

For more information and details on the changes and implications resulting from the adoption of IFRS 9, please see Note 35.

### IFRS 15 - Revenue from Contracts with Customers

The Bank has adopted IFRS 15 'Revenue from Contracts with Customers' with effect from 1 April 2018. IFRS 15 replaces IAS 18 Revenue and IAS 11 Construction Contracts. IFRS 15 establishes a more systematic approach for revenue measurement and recognition by introducing a five-step model governing revenue recognition. The five-step model includes: 1) identifying the contract with the customer, 2) identifying each of the performance obligations included in the contract, 3) determining the amount of consideration in the contract, 4) allocating the consideration to each of the identified performance obligations and 5) recognising revenue as each performance obligation is satisfied.

The adoption of IFRS 15 has had no effect on financial information reported in the current or comparative periods. Interest income and expense continues to be recognised using the effective interest rate method for financial instruments measured at amortised cost. There has been no restatement of profit or loss for comparative periods.

ii) New standards or amendments to standards which will become applicable in the future and may have an impact on the Bank are outlined below. However, the Bank has not applied them in these financial statements.

### IFRS 16 - Leases

The Bank is required to adopt IFRS 16 Leases from 1 April 2019.

IFRS 16 introduces a single, on-balance sheet lease accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are recognition exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the current standard – i.e. lessors continue to classify leases as finance or operating leases.

IFRS 16 replaces existing leases guidance, including IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases – Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease.

The Bank has processes in place to implement IFRS 16. The most significant impact from initially applying IFRS 16 will be to recognise rights of use assets in respect of office properties leased by the Bank under contracts classified as operating leases under LAS 17. The present value of other contracts is immaterial.

The Bank will apply IFRS 16 on a cumulative catch up basis. The opening balance sheet at 1 April 2019 will be adjusted to create a right of use asset of approximately USD 38m. A lease liability will also be recognised at the same amount.

No significant impact is expected for the Bank's finance leases.

### (d) Significant accounting judgements and estimates

The preparation of the Bank's financial statements in accordance with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise judgement in the process of applying the accounting policies. The most significant areas where judgements and estimates have been used, and the notes where information on these is disclosed, are as follows:

### Impairment losses on loans and advances and undrawn loan commitments (note 18)

The Bank reviews its problem loans and advances at each reporting date to assess whether an allowance for credit impairment should be recorded in profit and loss. In determining the expected credit loss, management is required to exercise judgement in defining what is considered to be a significant increase in credit risk and in making assumptions and estimates to incorporate relevant information about past events, current conditions and forecasts of economic conditions. The exercise of judgement in making estimations requires the use of assumptions that are highly subjective and sensitive to the risk factors. Further information and sensitivity analyses of ECL to different economic scenarios is provided in Note 18.

In addition to specific allowances against individually significant loans and advances (Stage 3), the Bank also makes provisions on performing assets based on 12 months expected credit losses (stage 1) and on assets subject to a significant increase in credit risk based on lifetime expected credit losses (stage 2).

### Pensions (note 12)

The cost of the defined benefit pension scheme is determined using actuarial valuation. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long term nature of the scheme, such estimates are subject to significant uncertainty. See note 12 for the assumptions used.

### Fair value of financial instruments (note 4 and 5)

Where the prices of financial assets and financial liabilities recorded on the statement of financial position cannot be derived from markets where valuations are actively quoted, they are determined using a variety of valuation techniques that include use of mathematical models. The input to these models is taken from observable market data where possible, but where this is not feasible a degree of judgement is required in establishing fair values.

### 3. SIGNIFICANT ACCOUNTING POLICIES

### (a) Basis of Consolidation

Subsidiaries are investees controlled by the Bank. The Bank 'controls' an investee if it is exposed to, or has rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The Bank reassesses whether it has control if there are changes to one or more of the elements of control. In the normal course of business the Bank lends to structured entities in a number of different industries. The assessment undertaken by the Bank includes circumstances in which protective rights held (e.g. those resulting from a lending relationship) become substantive and lead to the Bank having power over the investee. The financial statements of any subsidiaries would be included in the consolidated financial statements from the date control commences until the date control ceases. At 31 March 2019 the Bank did not control any investees.

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured at the fair value of the consideration, including contingent consideration, given at the date of exchange. Acquisition-related costs are recognised as an expense in the income statement in the period in which they are incurred. The acquired identifiable assets, liabilities and contingent liabilities are generally measured at their fair values at the date of acquisition. Goodwill is measured as the excess of the aggregate of the consideration transferred, the amount of non-controlling interest and the fair value of the group's previously held equity interest, if any, over the net of the amounts of the identifiable assets acquired and the liabilities assumed.

### (b) Interest and similar income and expense

# Policy applicable from 1 April 2018

Interest income and expense are recognised in the income statement for all financial assets and financial liabilities at amortised cost using the effective interest method. The effective interest method is a method of calculating the cost of a financial asset or liability

and of allocating the interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period if appropriate. The application of the method has the effect of recognising income receivable on the instrument in proportion to the amount outstanding over the period to maturity or repayment. In calculating effective interest, the Bank estimates cash flows considering all contractual terms of the financial instrument but excluding future credit losses. Where it is not possible to otherwise estimate reliably the cash flows or the expected life of the financial instrument, effective interest is calculated by reference to the payments or receipts specified in the contract, and the full contractual term.

### Policy applicable before 1 April 2018

Interest income and expense are recognised in the income statement on the same basis as the policy applicable from 1 April 2018 but applies to all financial instruments classified as held to maturity, available for sale, loans and receivables, and financial liabilities at amortised cost.

### (c) Fee and commission income and expense

Fee income relating to loans and advances held at amortised cost is recognised in profit and loss as either an adjustment to the effective interest rate or on an accruals basis as the service is provided. Where a fee is considered to be an adjustment to the effective interest rate, it is recognised as such over the original life of the advance or expected life if this is reliably estimated to be shorter. Where loans and advances are purchased in the secondary market and there is observable evidence that the fair value is higher than the purchase price, then the differential is recognised as profit within fees. Fees and commissions receivable in respect of all other services provided are recognised in profit and loss when the related services are performed and when considered receivable.

Fee and commission expense relate mainly to transaction and service fees, which are expensed as the service is received.

### (d) Net trading income

Net trading income comprises gains less losses related to trading assets and liabilities, and includes all realised and unrealised fair value changes, interest, dividends and foreign exchange differences.

### (e) Leases and rental agreements

Leases in terms of which the Bank assumes substantially all risks and rewards of ownership are classified as finance leases. Upon initial recognition the lease asset receivable is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Lease income is recognised in interest income over the term of the lease using the net investment method (before tax) which reflects a constant periodic rate of return.

Rentals payable under operating leases are accounted for on a straight-line basis over the periods of the leases. The leased assets are not recognised in the statement of financial position.

# (f) Property and equipment

Fixed tangible assets are stated at capitalised cost less accumulated depreciation and accumulated impairment losses. The carrying values of fixed tangible assets are reviewed for impairment at each reporting date and when events or changes in circumstances indicate that the carrying value may not be recoverable.

Property and equipment are depreciated on a straight-line basis over their estimated useful lives as follows:

Leasehold improvements	10 years or over the remaining life of the lease, whichever is the shorter
Computer hardware	3 years
Motor vehicles	5 years
Equipment, Fixtures and fittings	5 years

# (g) Intangible Assets

Intangible assets are stated at capitalised cost less accumulated amortisation and accumulated impairment losses. The carrying values of intangible assets are reviewed for impairment at each reporting date and when events or changes in circumstances indicate

that the carrying value may not be recoverable. Expenditure on internally developed software is recognised as an asset when the Bank is able to demonstrate its intention and ability to complete the development and use the software in a manner which will generate future economic benefits, and can reliably measure the costs to complete the development. The capitalised costs of internally developed software include all costs directly attributable to developing the software and are amortised over its useful life.

Intangible assets are amortised on a straight-line basis over their estimated useful lives as follows:

Computer software 3 years

### (h) Goodwill

Goodwill is not amortised, but instead tested for impairment annually, as well as whenever there are events or changes in circumstances (triggering events) which suggest that the carrying amount may not be recoverable. Goodwill is carried at cost less accumulated impairment losses. The goodwill impairment test is performed at the level of a cash-generating unit. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to the cash-generating unit that is expected to benefit from the synergies of the business combination. If the carrying amount of the cash-generating unit to which the goodwill is allocated, exceeds its recoverable amount, an impairment loss on goodwill allocated to this cash-generating unit is recognized. The recoverable amount is the higher of the cash-generating unit's fair value less costs to sell and its value in use. If either of these amounts exceed the carrying amount, it is not always necessary to determine both amounts. These values are generally determined based on discounted cash flow calculations. Impairment losses on goodwill are not reversed in future periods if the recoverable amount exceeds the carrying amount of the cash-generating unit or the group of cash-generating units to which the goodwill is allocated.

### (i) Income tax expense

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit and loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable profit or loss for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years. Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantially enacted by the reporting date.

A deferred tax asset is recognised for unused tax losses, tax credits, and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realised.

### (j) Pensions and other post-retirement benefits

The Bank operates, for the majority of staff, a defined-contribution scheme. Contributions are charged to profit and loss as they become payable in accordance with the rules of the scheme.

A defined-benefit scheme is provided to a small number of staff. The assets of the scheme are held separately from the assets of the Bank and are administered by trustees. This scheme is closed to new members.

The cost of providing benefits under the defined-benefit scheme is determined using the projected-unit method, which attributes entitlement to benefits to the current period (to determine current service cost) and to the current and prior periods (to determine the present value of defined-benefit obligations) and is based on actuarial advice. Past service costs are recognised in profit or loss as operating expenses.

The interest element of the defined-benefit cost represents the change in present value of scheme obligations arising from the passage of time, and is determined by applying the discount rate to the opening present value of the benefit obligation, taking into account material changes in the obligation during the year. The expected return on plan assets is based on an assessment, made at the beginning of the year, of long-term market returns on scheme assets, adjusted for the effect on the fair value of plan assets of contributions received and benefits paid during the year. The differences between the expected return on plan assets and the interest costs are recognised in profit and loss as other finance income or expense.

Actuarial gains and losses are recognised in full in other comprehensive income in the period in which they occur.

The defined benefit pension asset or liability in the statement of financial position comprises the total for the plan of the present value of the defined benefit obligation (using a discount rate based on high quality corporate bonds that have been rated at AA or equivalent status), less any past service cost not yet recognised and less the fair-value of plan assets out of which the obligations are to be settled directly. Fair value is based on market price information and in the case of quoted securities is the published bid price. The value of

any net pension asset recognised is limited to the amount that may be recovered either through reduced contributions or agreed refunds from the scheme.

### (k) Financial Instruments - initial recognition and subsequent measurement

### i) Classification, initial recognition and subsequent measurement - policy applicable from 1 April 2018

Financial assets are classified into the following measurement categories:

those to be measured at fair value (either through other comprehensive income (FVOCI), or through profit or loss (FVTPL))

those to be measured at amortised cost

The classification depends on the business model for managing financial assets and the contractual terms of the financial assets' cash flows

### **Business Model Assessment**

The Bank makes an assessment of the objective of the business model in which a financial asset is held based on the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether
  management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile,
  matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising
  cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Bank's management;
- the risks that affect the performance of the business model and how those risks are managed;
- how managers of the business are compensated e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

### Contractual terms of financial assets' cash flows

For financial assets to be held at amortised cost, the contractual terms of the financial asset must give rise to cash flows on specified dates that represent solely payments of principal and interest on the principal amount outstanding.

For the purposes of this assessment, principal is defined as the fair value of the financial assets on initial recognition and interest is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Bank considers:

contingent events that would change the amount or timing of cash flows;

terms that may adjust the contractual coupon rate, including variable-rate features;

prepayment and extension features; and

terms that limit the Bank's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents

the contractual par amount plus accrued contractual interest (which may include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

In addition, on initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial liabilities are classified at amortised cost unless specifically designated as liabilities at fair value through profit or loss or held for trading such as derivative liabilities.

Financial instruments are initially recognised at their fair value plus, in the case of financial assets or financial liabilities not at fair value through profit and loss, any transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Fair value for financial instruments traded in an active market is based on quoted market prices or dealer price quotations (bid price for long and offer price for short positions). For other financial instruments, the fair value is determined by using appropriate valuation techniques including present-value techniques or comparison to similar instruments.

### Financial assets and liabilities at fair value through the profit and loss

Financial instruments held at fair value through the profit and loss include all instruments classified as held for trading, those instruments irrevocably designated as held at fair value through the profit and loss on initial recognition and debt instruments with contractual terms that do not represent solely payments of principal and interest on the principal amount outstanding.

Financial instruments classified at fair value through the profit and loss are recorded at fair value on the statement of financial position with changes in fair value recognised in profit and loss. Financial instruments are classified as held for trading when they are held with the intention of generating short-term profits.

#### Derivatives

Derivatives include interest rate swaps and futures, cross currency swaps, credit default swaps, forward foreign exchange contracts and options on interest rates and foreign currencies. Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative.

Derivative instruments that do not meet the criteria to be designated as a hedge are deemed to be held for trading and are measured at fair value with the resultant profits and losses included in Net trading income.

The fair value of exchange-traded derivatives is determined by reference to the quoted market price.

The fair value of OTC derivatives is determined by calculating the expected cash flows under the terms of each specific contract, and then discounting these to their net present value. The expected cash flows for each contract are determined either directly by reference to actual cash flows implicit in observable market prices, or through modelling cash flows using appropriate pricing models. The effect of discounting expected cash flows back to present value is achieved by constructing discount curves derived from the market price of the most appropriate observable interest rate products such as deposits, interest rate futures and swaps.

The impact of changes in a counterparty's credit spreads (known as credit valuation adjustments or CVA) is considered when measuring the fair value of derivative assets and the impact of changes in the Group's own credit spreads (known as debit valuation adjustments or DVA) is considered when measuring the fair value of its derivative liabilities.

### Financial assets at amortised cost

### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and exclude those that are classified as held for trading and those that are designated as at fair value through profit and loss. Subsequent to initial recognition, loans and receivables are measured at amortised cost less impairment losses where:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise to cash flows on specified dates, that represent solely payments of principal and interest on the principal amount outstanding.

Where exposures are hedged by derivatives designated and qualifying as fair value hedges, the carrying value of the loans and advances so hedged includes a fair value adjustment for the hedged risk only.

### Financial assets at fair value through other comprehensive income

#### Debt instruments

Investments in debt instruments that are classified as at fair value through other comprehensive income are those where:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount.

Debt instruments at fair value through other comprehensive income generally comprise securities. The assets are measured at fair value on the statement of financial position. Unrealised gains and losses are recognised in other comprehensive income and only when disposed of is the cumulative gain or loss, previously recognised in other comprehensive income, recognised in profit and loss

### Equity instruments

Investments in equity instruments that are not held for trading are measured at fair value through other comprehensive income where an irrevocable election has been made on initial recognition by management. Amounts presented in other comprehensive income are not subsequently transferred to profit or loss.

# Financial Liabilities

These include deposits, debt securities issued and subordinate debts which are the Bank's source of debt funding. Financial liabilities are classified as non-trading, held for trading or designated as held at fair value through profit and loss. Subsequent to initial recognition, non-trading liabilities are recorded at amortised cost. Subsequent to initial recognition, liabilities held for trading or liabilities designated as held at fair value through profit and loss are accounted for as indicated in the accounting policy for financial liabilities at fair value through the profit and loss.

### ii) Initial recognition and subsequent measurement – policy applicable before 1 April 2018

Financial instruments are initially recognised at their fair value plus, in the case of financial assets or financial liabilities not at fair value through profit and loss, any transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Fair value for financial instruments traded in an active market is based on quoted market prices or dealer price quotations (bid price for long and offer price for short positions). For other financial instruments, the fair value is determined by using appropriate valuation techniques including present-value techniques or comparison to similar instruments.

Regular way purchases and sales of financial assets are accounted for at trade date.

### Financial assets and liabilities at fair value through the profit and loss

Financial instruments held at fair value through the profit and loss include all instruments classified as held for trading and those instruments designated as held at fair value through the profit and loss.

Financial instruments classified at fair value through the profit and loss are recorded at fair value on the statement of financial position with changes in fair value recognised in profit and loss. Financial instruments are classified as held for trading when they are held with the intention of generating short-term profits.

### **Derivatives**

Derivatives include interest rate swaps and futures, cross currency swaps, credit default swaps, forward foreign exchange contracts and options on interest rates and foreign currencies. Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative.

Derivative instruments that do not meet the criteria to be designated as a hedge are deemed to be held for trading and are measured at fair value through profit and loss. The resultant profits and losses included in Net trading income.

The fair value of exchange-traded derivatives is determined by reference to the quoted market price.

The fair value of OTC derivatives is determined by calculating the expected cash flows under the terms of each specific contract,

and then discounting these to their net present value. The expected cash flows for each contract are determined either directly by reference to actual cash flows implicit in observable market prices, or through modelling cash flows using appropriate pricing models. The effect of discounting expected cash flows back to present value is achieved by constructing discount curves derived from the market price of the most appropriate observable interest rate products such as deposits, interest rate futures and swaps.

The impact of changes in a counterparty's credit spreads (known as credit valuation adjustments or CVA) is considered when measuring the fair value of derivative assets and the impact of changes in the Group's own credit spreads (known as debit valuation adjustments or DVA) is considered when measuring the fair value of its derivative liabilities.

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and exclude those that are classified as held for trading and those that are designated as at fair value through profit and loss. Subsequent to initial recognition, loans and receivables are measured at amortised cost less impairment losses.

Where exposures are hedged by derivatives designated and qualifying as fair value hedges, the carrying value of the loans and advances so hedged includes a fair value adjustment for the hedged risk only.

### Held-to-maturity assets

Held to maturity assets are non-derivative financial instruments with fixed or determinable payments and maturity dates. Financial assets classified as held to maturity are measured at amortised cost, less impairment losses.

#### Available-for-sale assets

Available-for-sale assets are those which are designated as such or do not qualify to be classified as held at fair value through profit and loss, or classified as either held-to-maturity investments or loans and receivables. They generally comprise securities.

Financial assets classified as available-for-sale are measured at fair value on the statement of financial position. Unrealised gains and losses are recognised in other comprehensive income and only when disposed of is the cumulative gain or loss, previously recognised in other comprehensive income, recognised in profit and loss. If an available-for-sale instrument is determined to be impaired, the respective cumulative unrealised losses previously recognised in other comprehensive income are included in impairment losses in profit and loss in the period in which the impairment is identified.

### Financial Liabilities

These include deposits, debt securities issued and subordinate debts which are the Bank's source of debt funding. Financial liabilities are classified as non-trading, held for trading or designated as held at fair value through profit and loss. Subsequent to initial recognition, non-trading liabilities are recorded at amortised cost. Subsequent to initial recognition, liabilities held for trading or liabilities designated as held at fair value through profit and loss are accounted for as indicated in the accounting policy for financial liabilities at fair value through the profit and loss.

#### iii) De-recognition of financial assets and liabilities

The Bank derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial assets in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred or in which the Bank neither transfers nor retains substantially all the risks and rewards of ownership and it does not retain control of the financial asset. On de-recognition of a financial asset, the difference between the carrying amount of the asset and the sum of i) the consideration received including any new asset obtained less any new liability assumed and ii) any cumulative gain or loss that has been recognised in other comprehensive income is recognised in profit and loss. From 1 April 2018 any cumulative gain or loss recognised in other comprehensive income in respect of equity investments designated as at fair value through other comprehensive income is not recognised in profit or loss on de-recognition.

The Bank enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. If all or substantially all risks and rewards are retained, then the transferred assets are not derecognised.

The Bank derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

#### iv) Modifications of financial assets and liabilities

#### Financial assets

If the terms of a financial asset are modified, the Bank evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this instance, the original financial asset is derecognised and a new financial asset is recognised at fair value.

#### Policy applicable from 1 April 2018

If the cash flows of a modified financial asset carried at amortised cost or FVOCI are not substantially different, then the modification does not result in the de-recognition of the financial asset. In this case, the Bank recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in profit or loss. If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income.

#### Policy applicable before 1 April 2018

If the terns of a financial asset were modified because of financial difficulties of the borrower and the asset was not derecognised, then impairment of the asset was measured using the pre-modification interest rate.

#### Financial liabilities

The Bank derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability derecognised and the new financial liability with modified terms is recognised in profit or loss.

If the modification of a financial liability is not accounted for as derecognition, then the amortised cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognised in profit or loss.

#### v) Derivatives used for asset and liability management purposes - hedge accounting

The Bank continues to apply the requirements of IAS 39 Financial Instruments: Recognition and Measurement for hedge accounting purposes and consequently there have been no changes to the hedge accounting policies and practises following the adoption of IFRS 9.

Derivative financial instruments are used to hedge interest rate risk on fixed rate assets and liabilities and foreign exchange movement risk on forecast transactions. Instruments used for hedging purposes include interest-rate derivatives, cross currency interest rate derivatives and foreign exchange forwards.

The criteria required for a derivative instrument to be classified as a hedge are:

- At inception of the hedge the Bank formally documents the hedge relationship between hedged item and the hedging
  instrument. This will also include the aim and objective of the risk management and the method that will be used to assess the
  effectiveness of the hedging relationship;
- The hedge is expected to be highly effective;
- For cash flow hedges, any forecast transactions included must be highly probable and must present an exposure to variations in cash flows that could affect the profit and loss;
- The effectiveness of the hedge (hedged item and hedging instrument) can be reliably measured;
- The hedge effectiveness is assessed on an ongoing basis and determined to have been highly effective throughout the financial reporting periods for which the hedge is designated.

The Bank applies either fair value or cash flow hedge accounting when the transaction meets the above criteria. Hedge accounting is discontinued when it is determined that the derivative ceases to be highly effective as a hedge. A hedge is regarded as highly effective if the changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated are expected to offset in a range of 80% to 125%. A hedge will also cease to be effective if the derivative or asset is sold, terminated, expires or matures, or when a forecast transaction is no longer deemed probable.

For qualifying fair value hedges, the changes in fair value of both the hedged item and hedging derivative are recognised in profit and loss. If the hedging derivative is sold, terminated, expires or matures, or the hedge is no longer highly effective, the hedge relationship is terminated. For the hedged item the difference between the carrying value of the hedged item on termination and the face value is amortised over the remaining term of the original hedge from the date of termination. If the hedged item is derecognised, the unamortised fair value is recognised immediately in profit and loss.

For qualifying cash flow hedges in respect of financial assets and liabilities, the effective portion of the change in the fair value of the hedging derivative is initially recognised in other comprehensive income and is released to profit and loss in the same periods during which the hedged item affects profit and loss. Any ineffective portion of the hedge is immediately recognised in profit and loss.

#### (l) Impairment of financial instruments

#### Policy applicable from 1 April 2018

The Bank applies a three-stage approach to measuring expected credit losses (ECL) for the following categories of financial instruments that are not measured at fair value through profit and loss:

- Loans and advances to banks and customers measured at amortised cost
- debt instruments measured at amortised cost and fair value through other comprehensive income;
- loan commitments; and
- financial guarantee contracts.

The Bank has grouped its financial instruments into Stage 1, Stage 2 and Stage 3, based on the implied impairment methodology, as described below:

Stage 1 – For performing financial instruments where there has not been a significant increase in credit risk since initial recognition, the Bank recognises an allowance for the portion of the lifetime expected credit loss associated with the probability of default events occurring within the next 12 months.

Stage 2 – For financial instruments where there has been a significant increase in credit risk since initial recognition but are not credit impaired, the Bank recognises an allowance for the lifetime expected credit loss.

Stage 3 - Financial instrument exposures are assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of the instrument have occurred. For financial instruments that have been assessed as credit impaired, the Bank recognises an allowance for the lifetime expected credit losses.

Further information regarding the staging criteria is provided in Note 18 Impairment Provisions.

#### Determining the stage for impairment

At each balance sheet date, for loans carried at amortised cost, loan commitments, financial guarantee contracts and debt securities carried at fair value through other comprehensive income, the Bank assesses whether there has been significant increase in credit risk for exposures since initial recognition by comparing the risk of default occurring over the expected life between the balance sheet date and the date of initial recognition. Credit risk is assessed either individually to financial assets, or collectively to a portfolio of similar, homogenous assets.

#### **Default definition**

The definition of default for the purpose of determining ECL's has been aligned to the Regulatory Capital CRR Article 178 definition of default, to maintain a consistent approach with IFRS 9 and associated regulatory guidance.

The following events generally provide objective evidence of a default situation:

- The management bodies of the borrower/group of borrower decide to reorganise or liquidate the borrower and/or any bankruptcy proceedings or involuntary liquidation in respect to the borrower is initiated (either by the borrower itself or by any third parties) and/or external manager, provisional manager, liquidator or commissioner is appointed;
- · Delinquency exceeds 3 months. Delinquency is considered to be caused by the deterioration of business conditions or constrained cash flow (and including cases in which only interest is not paid, but there is no delay in repayment of the principal);
- The loan is restructured towards the more favourable conditions for a borrower, in the absence of which the borrower could not fulfil the obligations towards the Bank properly;
- Breach of financial covenants, which, in the reasonable opinion of the Bank, may result in improper fulfillment of obligations by the borrower;
- Any other event happened in relation to borrower/group of borrower that, in the Bank's opinion, can cause improper fulfillment of obligations by the Borrower.

An exposure will migrate through the expected credit loss stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed significant increase in credit risk since origination, the impairment provision reverts from lifetime ECL to 12-months ECL.

The Bank recognises write offs only when sales of distressed assets are realised.

#### Measurement of expected credit losses

ECL's are derived from probability-weighted estimates of expected loss, and are measured as follows:

- financial assets that are not credit-impaired at the balance sheet date: as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Bank in accordance with the contract and the cash flows that the Bank expects to receive;
- financial assets that are credit-impaired at the balance sheet date: as the difference between the gross carrying amount and the present value of estimated future cash flows discounted by the effective interest rate;
- undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Bank if the commitment is drawn down and the cash flows that the Bank expects to receive; and
- financial guarantee contracts: the expected payments to reimburse the holder less any amounts that the Bank expects to recover.

Movement in expected credit losses is recognised as impairment loss in the income statement and for financial assets measured at amortised cost as a deduction from the gross carrying amount of the assets. In the case of debt securities measured at fair value through other comprehensive income no loss allowance is recognised in the statement of financial position because the carrying amount of the assets is their fair value. However, the Bank recognises the impairment charge in the income statement with the corresponding amount recognised in the fair value reserve in other comprehensive income. For undrawn loan commitments and financial guarantee contracts that are recognised off balance sheet, the Bank recognises the impairment charge in the income statement with the corresponding amount recognised in other provisions on the balance sheet.

### Purchased or originated credit-impaired

Financial assets that are purchased or originated at a deep discount that reflects the incurred credit losses are considered to be purchased or originated credit-impaired ("POCI"). This includes the recognition of a new financial asset following a renegotiation where concessions have been granted for economic or contractual reasons relating to the borrower's financial difficulty that otherwise would not have been considered. Any changes in lifetime expected credit losses since initial recognition of POCI assets are recognised in profit or loss until the POCI is derecognised, even if the lifetime expected credit losses are less than the amount of expected credit losses included in the estimated cash flows on initial recognition.

As at 31 March 2019, the Bank does not hold any financial assets that are purchased or originated credit-impaired.

### Policy applicable before 1 April 2018

Financial assets carried at amortised cost are impaired if there is objective evidence that the Bank may not receive cash flows according to the original contractual terms. Financial assets are assessed for objective evidence of impairment at a minimum on each statement of financial position reporting date. The test for impairment is applied either individually to financial assets, or collectively to a portfolio of similar, homogeneous assets.

Individual provisions are raised when the Bank considers that the credit-worthiness of a borrower has deteriorated such that the recovery of the whole or part of an outstanding advance is in serious doubt. When establishing individual provisions, management considers past losses, business and economic conditions, their knowledge of the borrower and any other relevant factors in determining the expected future cash flows.

Impairment is calculated in two principal ways;

i. Impairment is calculated as the difference between the carrying value of the asset and the expected cash flows from the asset discounted at the original effective interest rate. Where a secondary market exists for the asset, this calculation is checked for reasonableness by comparing it to the difference between the current market price (which reflects the market's perception of the discounted value of the future cash flows from the asset) and the carrying value. A provision for impairment is reversed only when there is objective evidence that the credit quality has improved to the extent that there is reasonable assurance of timely collection of principal and interest in terms of the original contractual agreement. Assets individually identified as impaired are removed from the portfolio assessment.

ii. For the purpose of a collective (portfolio) evaluation of impairment, financial assets are grouped on the basis of the Bank's internal grading system that considers credit risk characteristics such as asset type, tenor, industry, geographical location, collateral type, past due status and other relevant factors.

Impairment on a portfolio of assets is calculated as the difference between the carrying value of the portfolio of assets and the expected cash flows from the portfolio of assets discounted at the original effective rate. Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group, together with specific portfolio factors which indicate impairment of the portfolio of assets at the statement of financial position date.

Historical loss experience is adjusted where appropriate on the basis of current observable data to reflect the effects of current conditions that do not affect the years on which the historical loss experience is based. The methodology and assumptions used are reviewed regularly to ensure that estimates remain appropriate.

The aggregate of individual and specific provisions, which are made during the period, less amounts released and recoveries of bad debts previously written off, is charged to profit and loss.

The bank recognises write offs only when sales of distressed assets are realised.

Available-for-sale debt assets are considered to be impaired when there is objective evidence of impairment. Available-for-sale equity assets are considered to be impaired when there has been a significant or prolonged decline in the fair value below its cost or where other objective evidence of impairment exists.

Where a decline in the fair value of an available-for-sale asset has been recognised through other comprehensive income and there is objective evidence that the asset has been impaired, the cumulative loss that has been recognised through other comprehensive income is removed and recognised in profit and loss. If, in a subsequent period, the fair value of an available-for-sale debt asset increases and the increase can be objectively related to events after the impairment loss was recognised in profit and loss, the impairment loss is reversed through profit and loss. Impairment losses on available-for-sale equity assets are not reversed through profit and loss; increases in the fair value after impairments are recognised through other comprehensive income.

### (m) Foreign currencies

The financial statements are presented in US Dollars, which is the Bank's functional and reporting currency. Items included in the financial statements of each of the Bank's operations are measured using their functional currency being the currency of the primary economic environment in which they operate.

Foreign currency transactions are translated into the appropriate functional currency using the exchange rates prevailing at the dates of the transactions. Monetary items denominated in foreign currencies are translated at the rate prevailing at the period end. Foreign exchange gains and losses resulting from the translation and settlement of these items are recognised in the income statement except for qualifying cash flow hedges.

Non monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Translation differences on equities classified as at fair value through the profit or loss are reported as part of the fair value gain or loss in the income statement.

#### (n) Financial guarantees

In the course of its business, the Bank gives financial guarantees, consisting of letters of credit, guarantees and acceptances. Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Financial guarantees are initially recognised in the financial statements at fair value being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amortised premium or the provision in line with policy (p). The premium receivable is recognised in profit and loss in fees and commissions income on a straight-line basis over the life of the guarantee. Any increase in the liability relating to financial guarantees is taken to profit and loss.

### (o) Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalent comprises balances with original maturities of up to three months including cash and cash equivalent with central banks and loans and advances to banks. These comprise highly liquid investments that are readily convertible into cash with an insignificant risk of changes in value.

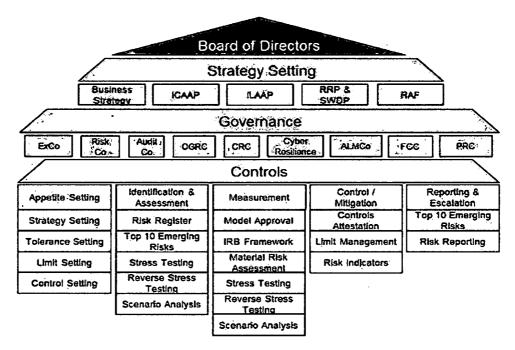

#### (p) Provisions

Please refer to note 2(d) and 3(l) for impairment provisions on financial instruments.

Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events or present obligations where the transfer of economic benefit is uncertain or cannot be reliably measured. Contingent liabilities are not recognised but are disclosed unless they are remote.

#### 4. RISK MANAGEMENT

The Bank's risk framework is represented below illustrating the key management and governance processes employed in managing risk

Ken:

AJ.M.Co: Asset and Liability Management Committee
Audit Co: Audit, Committee
CRC: Credit Risk Committee
Ex.Co: Executive Committee
FCC: Financial Crime Committee
ICAAP: Internal Capital Adequacy Assessment Process

Please also refer to Governance structure detailed in the strategic report.

ILAAP: Internal Liquidity Adequacy Assessment Process IRB: Internal Ratings Based OGRC: Operational and General Risk Committee

PRC: Prudential Regulatory Committee

RAF: Risk Appetite Framework
Risk Co: Risk Committee

RRP & SWDP: Recovery and Resolution Planning, Solvent Wind Down Plan

## Corporate Culture

Management believes that key to ensuring the long term sustainability of the Bank is maintaining a culture that is conducive to effective risk management. In FY 2018, SMBC adopted and implemented a regional Culture Statement comprising 5 elements:

- We will provide an excellent service to customers and colleagues through collaboration, teamwork and a sense of shared purpose.
- We will build our brand by being a reliable and trusted partner to our customers and contribute positively to the societies in which we operate.
- We will protect our customers and markets by conducting our business in a transparent, prudent and compliant manner.
- We will treat each other with respect and integrity and embrace diversity in all its forms.
- We will be focused, creative and proactive in evolving our business to meet new challenges.

In addition the tone set by senior management includes:

- Maintaining valued customer relationships upon which the Bank's business model is based;
- Achieving sustainable growth over the long term;
- Ensuring business is run in a appropriately balanced way where all possible risks are correctly identified and managed;
- Ensuring the maintenance of a sufficiently robust risk management and governance framework that is supportive of current and future strategic objectives;
- Ensuring the Bank is appropriately rewarded for the risks it incurs in undertaking its business;
- Ensuring that management and staff are appropriately trained;
- Ensuring the appropriateness of remuneration; and
- Setting objectives to ensure there is no conflict between the strategic and risk management objectives of the Bank.

#### Risk strategies and objectives

The Bank's business model is designed to ensure that the Bank remains a well-funded, well-controlled, risk averse corporate banking institution focusing resources on carefully selected sectors and regional customer partnerships in order to achieve sustainable and balanced growth. SMBCE's risk strategy has been developed to support the corporate strategy and the achievement of long-term sustainable growth. The risk strategy comprises of 4 pillars, being the foundations upon which the Bank seeks to achieve its strategic objectives:

### **Business Model (Sustainable Growth)**

SMBCE generates revenue as a direct result of taking credit risk through its lending portfolio. Therefore the bank has an active appetite for well controlled credit risk and limited appetite for market risk.

SMBCE ensures that its pricing for risk is appropriate for maintaining a sustainable business.

SMBCE seeks to limit the volatility of its earnings to ensure that under a moderate (1 in 10 year) stress, the Bank does not make a loss.

#### Maintaining Solvency & Liquidity

SMBCE aims to ensure it is robust from a capital and liquidity perspective, in excess of regulatory minimum and risk appetite levels

In addition to controlling earnings volatility, the Bank needs to manage more extreme stresses (1 in 1000 year), to ensure it is capitalised in line with regulatory expectations.

SMBCE maintains sufficient cash and liquid assets to cover plausible but extreme stresses. The Bank will consider the key liquidity risks and ensure that the balance sheet is robust to cover the resulting stresses.

Furthermore, resolvability is demonstrated through the maintenance of a liquidity structure that can plausibly support the Solvent Wind Down Plan. ("SWDP").

#### **Conducting Business**

Through the strong management of its business, SMBCE will ensure that it does not, through action or inaction, cause an adverse reputation with regulators, customers, suppliers and/or the wider stakeholder group.

The Bank seeks to manage its business at all times with the aim of meeting applicable financial crime regulatory requirements of all bodies and countries within which it operates.

The Bank will seek to emphasise its "customer first" value through fair and transparent dealings with its customers. The Banks aims to minimise regulatory/compliance risk by meeting both the spirit and letter of all applicable regulation.

The Banks staff and the culture of the organisation are key strengths in achieving sustainable growth, guided by the organisation's five values.

The Bank wishes to maintain a balance between the emphasis on team rather than individual, and individual accountability. The bank wants to maintain a "customer first" focus, whilst ensuring that there is a strong and embedded risk sensitivity and conservatism.

### Maintaining Operational Risk & Resilience

The Bank's systems, processes and infrastructure should have strong market standard defences and be able to withstand plausible operational risk scenarios such as cyber attacks, supplier failure, natural disasters and terrorist activity etc.

This will include actionable recovery plans such as Business Continuity Plans, Disaster Recovery Plans, and Incident Management that minimise recovery times and limit disruption.

The Bank should ensure that critical services can be maintained during resolution.

The Bank's risk management objectives are as follows:

- To ensure the Bank's risk appetite, as articulated in preference statements quantitative tolerances and limits, is observed and maintained in the pursuance of the Bank's strategic objectives;
- To maintain a risk appetite that maximises risk/return whilst ensuring that the Bank maintains adequate capital at all times;
- To ensure that prudent levels of liquidity are in place to fund the Bank even under stressed conditions;
- To maintain fair and ethical relationships with all our customers;
- To manage and minimise risk that we assume as a consequence of our business strategy e.g. Operational Risk, Conduct Risk;
- To maintain an adequate and effective control environment; and
- To ensure adherence to the rule and spirit of laws and regulations governing our business.

### (b) Enterprise Risk Management

The Bank utilises the industry-wide standard 3 Lines Of Defence ("3 LOD") model to manage its risk. The model is used as a means to communicate clear accountabilities to achieve and assure overall effective risk governance, management and assurance, reflecting and reinforcing the Bank's internal control framework.

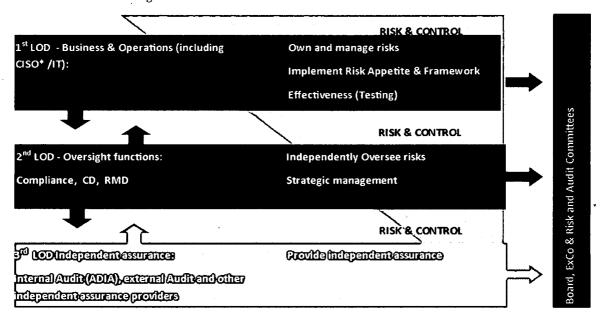

The Bank's 3 LOD approach separates the ownership/management of risk from the functions that oversee risks and the functions that provide independent assurance:

First line of Defence - Functions that own and manage risk;

Second line of Defence - Functions that independently oversee risk; and

Third line of Defence - Functions that provide independent assurance.

The model is illustrated in the diagram below:

Key:
Compliance: Compliance Department
CD: Credit Department
RMD: Risk Management Department

## (c) Risk Identification and Assessment;

The key principles used in the Bank for risk identification and assessment are:

- To identify the major risks that could impact the Bank's long term sustainability;
- To assess the likelihood and impact of the risks materialising; and
- To assess the robustness of the controls that mitigate the risks.

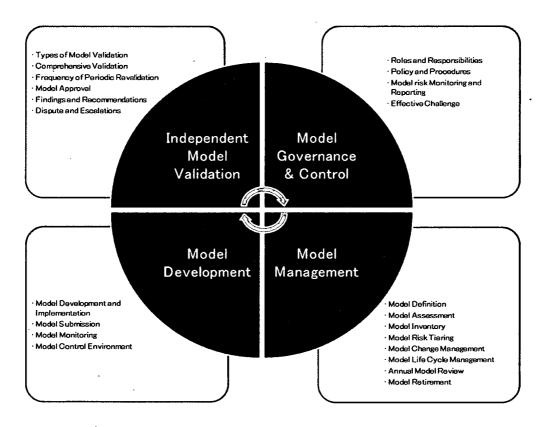

#### (d) Risk Management and Monitoring

The key principles for risk measurement and monitoring are:-

- Measure risk exposure by loss modelling, enterprise level KRIs and scenarios,
- Provide an Operational Risk capital methodology and implementation,
- Facilitate senior management understanding of the severity of the risk,
- Ensure appropriate reporting to Board and ExCo of inherent and post-mitigation risk via KRIs to facilitate any mitigation and/or changes to the risk appetite, and
- Maintain a record of accepted risks.
- Measure risk exposure by loss modelling, enterprise level KRIs and scenarios;
- Maintain a record of accepted risks; and
- Ensure appropriate reporting to Board and ExCo of inherent and post-mitigation risk via KRIs to facilitate any mitigation and/or changes to the risk appetite.

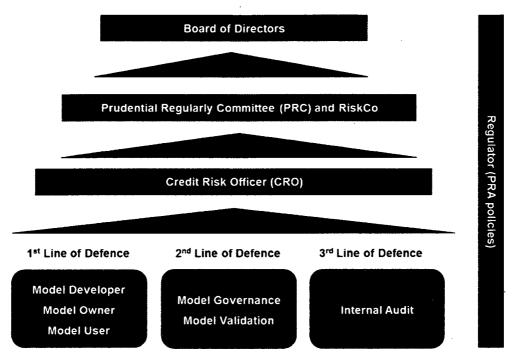

### Model Risk Management Framework

SMBCE has developed a comprehensive Model Risk Management ("MRM") framework which consists of 4 key components Model Governance & Control, Model Management, Model Development and Independent Model Validation as depicted in the diagram below:-

Model risk governance and control is based on the framework depicted in the following diagram which outlines roles and responsibilities in accordance with three line of defence approach. This allows alignment of responsibility and authority as well as identifying potential conflict of interests.

Model stakeholders including Model Users, Owners and Developers are the first line of defence in the MRM. The Model Validation team acts as the second line providing independent challenge. The third line of defence is Internal Audit which reviews and provides assurance of the overall effectiveness of the MRM framework.

### Stress Testing and Scenario Analysis

Stress testing is a key forward looking tool to calculate the impact of several scenarios over differing timeframes. Stress testing and scenario analysis are used across the principal risks to ensure that the Bank can adequately understand and quantify not only risks as they currently exist, but as they might develop in times of stress.

### Reverse Stress Testing

Reverse Stress Testing is used by the Bank to identify and monitor the factors and the stress levels that have the potential to cause the Bank's business model to become unviable. Reverse stress testing is an important part of the overall risk management framework of the Bank, and assists management in understanding potential business model vulnerabilities.

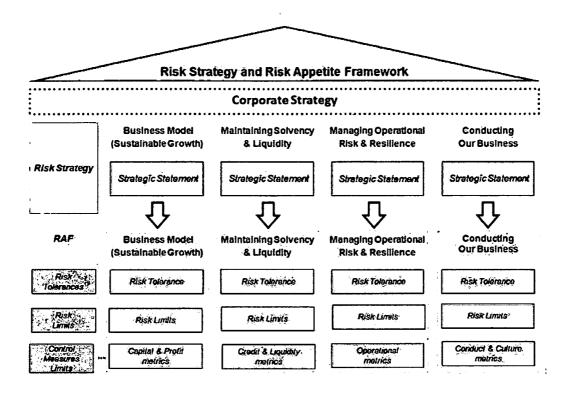

## (e) Risk Appetite Setting

The Bank's risk appetite defines the broad-based level of risk that the entity is able and willing to undertake in pursuit of its objectives.

The key principles of the Risk Appetite Framework are:

- Appropriate governance at Board and ExCo level. The Risk Appetite of the Bank is set by the Board on an annual basis as
  part of the strategic planning process and monitored throughout the year;
- Risk Appetite is driven by both top-down Board leadership and bottom-up involvement of business units;
- To facilitate embedding of risk appetite into the Bank and its culture;
- To evaluate opportunities for appropriate risk taking and act as a defence against excessive risk-taking;
- To promote robust discussions;
- To be adaptive to changes in business and market conditions;
- To cover all activities at the Bank;
- That Board level appetite changes should drive real changes in risk taking at the business level;
- That risk taking is calibrated to the Bank's long term sustainability; and
- That risk appetite setting is an integral part of the Bank's strategy.

The Risk Appetite Framework consists of: Risk Strategy, Risk Tolerances, Risk Limits and Control Measures. Risk appetite is linked to overall business strategy, including assessment of new business opportunities, liquidity, funding and capital planning.

## (f) Risk Control and Mitigation

The Bank seeks to control and mitigate its inherent risk as far as possible to ensure that it remains within the risk appetite. Risks are monitored on an inherent (pre control/ mitigation) and residual (post control/ mitigation) basis to analyse the Bank's risk profile.

The risk control and mitigation that the Bank undertakes is in the form of:

- Tangible security;
- Financial collateral;
- Credit default swaps and guarantees;
- Risk governance, policy and procedures;
- Individual and collective controls; and
- Other mitigation and control actions.

The control and mitigation is articulated in the policy framework for the main risk types. Controls that implement the policies are contained in the relevant procedure manuals for the Bank's operational processes.

### Acceptance List

Certain risks may not be capable of being fully mitigated or in certain circumstances the cost or practicality may be excessive for the size of the inherent risk. These risks are formally accepted by the Bank.

To ensure appropriate monitoring and good governance, all outstanding risk acceptances are recorded on the Acceptance List.

## (g) Credit Risk

Credit risk is the risk of any losses the Bank may incur due to a reduction or loss of the value of assets (including off-balance sheet assets) arising from any credit events, such as the deterioration of a borrower's financial standing.

### The Framework

The Bank's Board is ultimately responsible for ensuring that the level of credit risk taken by the Bank is in line with its risk appetite and business model. It achieves this through the following key measures:

 Having a credit risk management framework that consists of appropriate controls and senior management governance and oversight;

- The establishment of well-defined policies and procedures for the identification, measurement and control of credit risk;
- A centralised credit risk control function, under the responsibility of the Co-Chief Risk Officer's (Co-CRO's). The Co-CRO's have a right of veto on credit and underwriting transactions;
- Having thorough risk analysis and reporting functions, conducted by a credit management team with the capabilities and resources to evaluate and monitor the exposures and limits;
- By the implementation of the Bank's risk appetite framework;
- Ensuring understanding of vulnerabilities through stress testing and reverse stress testing;
- Having strong rating systems to measure the risk of individual transactions; and
- By regular reviews conducted by Audit Department Credit Review Group to ensure compliance with policies, procedures and market best practice.

#### Credit Assessment

The Bank assesses and manages the credit risk of individual loans and credit portfolios on a consistent quantitative basis utilising an internal rating system.

The rating system consists of two indicators namely:

- The obligor grading, which indicates the credit worthiness of the borrower; and
- The facility grading, which indicates the probability of repayment of each facility. Facility grades are assigned based on the borrower's obligor grading and transaction terms such as guarantee, maturity and collateral.

The Bank's internal grading, and borrower categories are set out in the table below, and are used for the purposes of determining the Bank's credit quality of obligors.

G grade*	J grade*	
Code	Code	Borrower's Category
G1	J1	
G2	J2	
G3	J3	
G4	J4	Normal Borrowers
G5	J5	
G6	J6	
G7	J7	Borrowers requiring caution
G7R	J7R	Substandard Borrowers
G8	J8	Potentially Bankrupt Borrowers
G9	J9	Virtually Bankrupt Borrowers
G10	J10	Bankrupt Borrowers

<sup>\*</sup>G grade – non Japanese borrowers, J Grade – Japanese borrowers.

The internal ratings, G7R and J7R through to G10 and J10 are recognised as "Default" in terms of CRD IV and in line with regulatory default definition.

In addition to the above internal rating assessment, to ensure a fully comprehensive credit assessment further analysis is undertaken including:

- Analysis of a variety of financial measures (e.g. cash flow); and
- Quantitative analysis of industrial trends such as the competitiveness of a borrower's products, services and management calibre.

#### **Credit Monitoring**

Credit monitoring is carried out through an ongoing reassessment of obligor grades involving:

Annual monitoring following financial results disclosures; and

### Ad-hoc monitoring should credit conditions deteriorate.

Should a customer be downgraded or considered a likely candidate for future downgrade(s) to below 'normal borrower' category, the customer is added to the special credit borrower list and reported to management.

To minimise the potential loss that may arise from any model failure and/or inadequate usage of the models and systems, the Bank has appropriate policies in place to manage its models and grading systems. The Bank's Credit Risk Control Unit (CRCU) performs validation of the grading models at least annually to ensure the appropriateness and conservatism of the grading models. The Bank regularly monitors the credit risks associated with wider aspects of its business, such as specific country exposure, products, industries etc. on a portfolio basis. The Bank also undertakes regular stress tests on its portfolio to ensure adequate capital is kept at all times to cover potential losses incurred during extreme but plausible events.

### **Industry Exposures**

The exposure by major industrial sectors of cash and balances at central banks, settlement balances, loans and advances to banks and customers, reverse repurchase agreements, investment securities and derivative assets can be analysed as follows:

	2019	2018
	USDm	USDm
Finanœ and insuranœ	27,854.6	40,464.5
Government and local authorities	1,632.0	1,943.0
Manufacturing	3,174.4	2,277.6
Wholesale and services	909.5	1,000.7
Other corporate exposures	10,534.0	11,276.0
Transport	973.0	851.0
Energy and infrastucture	2,338.3	2,432.6
	47,415.8	60,245.4

The industry exposure classifications shown above follow the same categories as used in the Bank's Pillar 3 disclosures. Finance and insurance includes USD 9,213.2m to the Bank of England (2018: USD 14,169.6m) and USD 10,457m to the Banque de France (2018 19,485.4m).

### Geographical Exposures

The table below analyses the geographical spread of cash and balances at central banks, settlement balances, loans and advances to banks and customers, reverse repurchase agreements, investment securities and derivative assets. This is based on country of residence of the counterparty.

	2019	2018
	USDm	USDm
United Kingdom	15,593.6	20,979.9
France	13,755.5	23,291.1
Italy	292.8	536.6
Other Europe	6,829.5	4,440.0
Eastern Europe	1,103.7	1,237.7
Japan	2,136.1	2,147.2
Middle East and Africa	5,822.7	4,519.2
Other Countries	1,881.9	3,093.7
	47,415.8	60,245.4

The geographical exposure classifications shown above follow the same categories as used in the Bank's Pillar 3 disclosures. The above disclosures are based on country of residence, whilst the Bank's Pillar 3 disclosures use country of risk. The figures reported include balances with the Bank of England and Banque de France as disclosed above.

### Maximum exposure to credit risk

The table below shows the maximum exposure to credit risk for the components of the statement of financial position, including derivatives. The maximum exposure is shown gross and does not take into account collateral or other credit enhancements.

	2019 USDm	2018 USDm
Cash and balances at central banks	19,670.1	33,655.0
Settlement balances	131.0	57.0
Loans and advances to banks	2,914.6	2,486.4
Loans and advances to customers	21,484.2	20,394.1
Reverse repurchase agreements	1,793.4	1,333.6
Investment searities	426.5	751.1
Derivative assets	996.0	1,568.2
	47,415.8	60,245.4
Guarantees and Letters of Credit	2,673.0	4,349.4
Commitments	13,384.9	13,479.2
	16,057.9	17,828.6
Total	63,473.7	78,074.0

### Collateral Held

Whilst the Bank's corporate lending is at times secured by fixed and floating charges on the assets of borrowers unless the asset is impaired, the only collateral which is valued on a continuous basis are Cash and Bonds. The value of this collateral held by the Bank, including collateral held against Reverse Repurchase Agreements and against inter-group positions for large exposure purposes, was USD 5,698.5m (2018: USD 5,833.0m). This collateral is held against loans and advances to banks and customers USD: 5,318.2m (2018: 5,649.1m) and derivative assets USD 380.3m (2018: 183.9m). There are no restrictions on re-pledging the collateral held against Reverse Repurchase Agreements.

Estimates of the fair value of the collateral held are made when a loan is individually assessed for impairment. Collateral takes various forms and the value of this security will vary over time and is dependant on the types of asset and the jurisdiction of the borrowers as well as the ability to dispose of the collateral.

The Bank's estimate of the fair value of different types of collateral held as security against loans to customers that are individually impaired is USD 36.5m (2018: USD 36.9m).

#### Offsetting of financial assets and financial liabilities

The Bank does not offset any financial assets and liabilities. It does however receive or give collateral against certain derivative transactions and reverse repurchase agreements with such collateral subject to standard industry terms including ISDA Credit Support Annex.

In addition the Bank also enters into ISDA and similar master netting agreements which only allow offsetting on certain events, such as following an event of default. These do not meet the criteria for offsetting in the statement of financial position.

The disclosures set out below include derivative assets, derivative liabilities and reverse repurchase agreements that are subject to enforceable master netting arrangements or similar agreements.

		Related amounts	s not offset			
	Gross amounts recognised in the statement of financial position USDm	Financial instruments USDm	Cash oʻllateral USDin	Net Amount USDm	Amounts not subject to enforceable netting amangements USDm	Total USDm
At 31 March 2019						
Derivative Assets	846.9	(526.1)	(92.2)	228.6	149.1	996.0
Reverse Repurchase						
Agreements	1,793.4	(1,793.4)	-	-	-	1,793.4
	2,640.3	(2,319.5)	(92.2)	228.6	149.1	2,789.4
Derivatives Liabilities	743.1	(526.1)	(81.2)	135.8	127.7	870.8
At 31 March 2018 Derivative Assets Reverse Repurchase	1,485.3	(438.3)	(965.9)	81.1	82.9	1,568.2
Agreements	1,333.6	(1,333.6)	-		-	1,333.6
•	2,818.9	(1,771.9)	(965.9)	81.1	82.9	2,901.8
Derivatives Liabilities	1,096.3	(438.3)	(606.2)	51.8	524.8	1,621.1

#### (h) Market Risk

Market Risk is the risk that movements in interest rates, foreign exchange rates, or stock prices will change the market value of financial products, leading to a loss.

The Bank's Board is ultimately responsible for ensuring that the level of market risk run by the Bank is in line with their risk appetite and business model.

The Bank uses a variety of matrices to measure and control market risk. One such tool is the use of Value at Risk (VaR). VaR is a measure of the maximum expected loss in a portfolio to a given degree of confidence over a specified period. The Bank uses a 99% confidence interval and a one-day time horizon. The Bank currently uses a historical simulation which is updated monthly to generate the VaR result using data from a four year observation period. The Bank uses VaR to control market risk both on the Trading and Banking accounts on both a standalone and consolidated basis. The Bank has in place an ongoing programme of back -testing and analysis for the VaR model. However, VaR is not a perfect tool for risk management and cannot provide an indication of the potential losses that may occur. The Bank therefore conducts a program of stress-testing using scenarios relevant to the current portfolio composition.

Interest rate risk on the Banking book is stressed by taking the Basis Point Value (BPV) positions and stressing them by an average of 100 basis points (bp). In addition to this a further 200 bp parallel shift stress test is carried out (as per BIPRU2.3.8) as part of the ICAAP submission. Stress tests are also carried out on FX positions (assuming 17% appreciation and depreciation of each currency vs. USD).

Risk management for each category is augmented by employing suitable sensitivity limits such as BPV limits which measure the potential change in portfolio fair value for an instantaneous 0.01% shift in interest rates. Using the BPV, the Bank can examine the effects to income of movements in yields applied to the Banking and Trading portfolios.

The Bank's VaR exposures during the year were:

		To 31 Ma				To 31 Mai	di 2018	
	Maximum	Minimum	Average	31 Mardi	Maximum	Minimum	.\verage	31 Mardi
	USDm	USDm	USDm	USDm	USDm	USDm	USDm	USDm
Trading	0.3	-	0.1	0.1	0.3	-	0.1	0.1
Banking	2.6	1.5	2.2	2.2	1.6	1.0	1.2	1.5
Consolidated	2.7	, 1.5	2.2	2.1	1.6	1.0	1.2	1.5

The income sensitivity table below reports the worst case of six possible yield curve shift scenarios averaging 100bp, including "Steepening", "Flattening" and "Parallel" shifts, which comprises of the Market Risk Stress Test.

Income sensitivity with respect to changes in interest rates:

	Banking Book		Trading I	Book

## (i) Liquidity Risk

Liquidity risk is the risk that the Bank cannot meet its liabilities, unwind or settle its positions as they become due.

The Bank's Board is ultimately responsible for ensuring that the level of liquidity risk run by the Bank is in line with its risk appetite and business model. It achieves this through the following main measures:

• The establishment of a clear, consistent Risk Appetite Framework that is understood across the organisation.

- Defining clear roles and responsibilities for the management of liquidity under normal and stressed circumstances.
- The implementation of a robust committee framework to manage liquidity risk issues, with clear terms of reference and standard agendas.
- Regular management information to demonstrate that the Bank is operating within risk appetite, along with other select metrics.
- Regular senior management training.

Within the governance framework outlined above, the Bank has established a liquidity risk management approach as a core component of the enterprise risk management process. The purpose of the framework is to ensure that the Bank successfully follows its strategy while operating within the bounds outlined by the liquidity risk appetite statement.

The Bank uses a variety of matrices to measure and control liquidity risk. In terms of Liquidity Matrices we use Liquidity Coverage ratio (LCR) and Net Stable Funding Ratio(NSFR) both monitored on a daily basis. LCR is measuring the ability of a bank's liquid asset resources to absorb stressed net outflows over a 30-day period and NSFR defines the minimum proportion of stable funding that is required in relation to the amount of long term assets held by the Bank. Minimum requirements are 105% for LCR and 95% for NSFR.

On a weekly basis we have established a set of limits to test our survival period under a stress condition. Stress testing is used to understand what can happen in various scenarios to the liquidity of the Bank and provide management with a way of assessing the adequacy of the liquidity buffer. Key matrices are the 3 month SMBCE combined stress scenario and the 30 days SMBC Group idiosyncratic crisis test both of which are reported to the monthly Liquidity Management Committee.

In addition a number of controls are in place to monitor and escalate any issues observed on our liquidity position. Key controls include monitoring our cash flow mismatch, observe market volatility and impact on our liquidity profile and finally observing our funding concentration risk and whether that imposes any threat to our viability.

## Analysis of liquidity risk

Contractual maturity of financial assets and liabilities form an important source of information used by management for the management of liquidity risk. The table below provides details on the contractual maturity of assets and liabilities. Impairment provisions on loans and advances to banks and customers are included in the up to 3 months column.

provisions on loans and advances to banks	and customers	are include	cu iii iiic	up 10 3	months

### (j) Operational and other risks

### Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events including legal risks. Operational risk arises due to the Bank's day to day operations and is relevant to every aspect of the business. The Operational Risk Management Framework (ORMF) uses a standard event type categorisation for operational risk, as per external regulations (Basel 2) and common industry practice. It is consistent with the categorisation also used across SMBC group. Operational Risk management is embedded in the Bank through regular engagement with the business, challenge where required, operational risk reporting and training. In addition, this is further supported by the execution of the following processes to ensure the operational risk profile is understood and managed: operational risk appetite definition and calibration; operational risk identification, assessment, measurement; control and mitigation; reporting and escalation. SMBCE formally indentifies, assesses and manages its operational risk through the following processes and tools:

- Operational risk event reporting this is the reporting and recording of operational risk losses, near misses and other non-monetary events. These events are captured and logged centrally and are analysed to pro-actively manage risk through root cause analysis;
- Risk register (Risk and Control Self Assessment) this process is used to assess the Banks' existing key or expected risks. It assesses the inherent risks, control effectiveness and resultant residual risks of the key risks that the Bank is exposed to and which could negatively impact the achievement of strategic objectives;
- Risk Indicator Governance Framework the Bank has identified a number of Operational Risk KRIs. The monitoring, reporting and escalation (where required) of KRIs is another risk management tool which seeks to alert the Bank to potential deterioration in the operational risk profile;
- Risk Acceptance The first line and department heads are expected to identify risks, risk issues or control failings that need to be mitigated. In certain circumstances, risk mitigation may not be possible or may require a longer period for remediation. In those situations, the risk must be accepted;

- Local Scenario Analysis- this process seeks to identify the high impact, low likelihood but plausible events that could impact the bank and also estimate the respective severities and probabilities used across main risk categories to ensure that the Bank can adequately understand and quantify not only risks as they currently exist, but also those in extreme circumstances. The analysis focuses on high impact, low probability events;
- New product and services process this describes the governance of the "New Product Committee" and the process for new product and services approval, monitoring and post approvals. It ensures adequate risk assessment, compliance with relevant requirements and standards of the regulatory system; while ensuring customer fair treatment is addressed; and
- Third Party Risk Management/ Outsourcing (TPRM) this involves ensuring that the outsourcing business assesses the criticality of the service and performs a risk assessment of the supplier. In addition ongoing monitoring of the performance of the supplier and cyclical reviews of the relationship and a review of the criticality and supplier assessments are required.

The output from the above processes are designed to be analysed in order to give a view of the operational risks that the Bank is exposed to versus its risk appetite, and to result in risk mitigation or risk acceptance (as required) and act as a further input into the business activities and strategy of the Bank.

The operational risk management framework is being enhanced on a continuous improvement basis.

The Bank's operational risk management framework also includes processes for capital calculations and stress testing. The Bank applies the Standardised Approach for calculating its regulatory operational risk capital. A modelling approach is used to calculate economic capital (Pillar 2A). Stress testing is utilized to calculate any additional capital requirement deemed necessary under stressed conditions.

#### Conduct Risk

Conduct risk is the risk of the Bank's behaviour resulting in poor customer outcomes and/or damage to the integrity of the financial markets.

Conduct risk management is integrated with the Bank's wider risk management framework. The Bank identifies and assesses current and emerging conduct risks across its business lines ensuring controls are effectively mitigating these risks. Conduct risks are mitigated through a robust control framework, including the following:

- The Bank's policy and procedure framework that sets requirements for various conduct related risk areas, such as management of conflict of interests, price sensitive information and personal account dealing;
- Monitoring and oversight of the Bank's adherence to the above policy and procedure framework;
- Training modules so that all employees are familiar with the Bank's policy and procedure framework and that employees
  aware of their individual responsibilities in relation to conduct risk;
- Comprehensive processes to mitigate anti-competitive behaviour;
- Product design and sales processes, including post-sale review and customer complaints analysis; and
- A remuneration structure that ensures remuneration is at risk when things go wrong.

The Bank is continually challenging the information it produces in relation to conduct risk so that senior management can make effective decisions regarding conduct risks.

#### 5. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Bank's accounting policy on fair value measurements is disclosed in accounting policy 3(k) Financial Instruments – initial recognition and subsequent measurement.

The Bank measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market price (unadjusted) in an active market for an individual instrument.
- Level 2: Valuation techniques based on observable inputs, either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the
  valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on
  the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar
  instruments where significant unobservable adjustments or assumptions are required to reflect differences between the
  instruments.

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments the Bank determines fair values using valuation techniques.

Valuation techniques include net present value and discounted value models, comparison to similar instruments for which observable market prices exist, Black-Scholes and polynomial option pricing models and binomial valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. All observable data is taken directly from Bloomberg or Reuters screens. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date, which would have been determined by market participants acting at arm's length.

The Bank uses widely recognised models for determining the fair value of common and more simple financial instruments, such as interest rate and currency swaps that use only observable market data and require little management judgement and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities, exchange traded derivatives and simple over the counter derivatives. Availability of observable market prices and model inputs reduces the need for management judgement and estimation and also reduces the uncertainty associated with determination of fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

For some financial instruments at fair value through other comprehensive income the Bank uses discounted cash-flow models created internally and discounted cash-flow models provided by external independent parties which are assessed internally to be acceptable for the purpose of valuation. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of probability of counterparty default and prepayments and selection of appropriate discount rates.

The table below analyses financial instruments measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised.

31 March 2019 USDm	Note	Level 1	Level 2	Level 3
Investment securities	19	282.1	80.5	3.3
Derivative assets	4	-	996.0	· -
		282.1	1,076.5	3.3
Derivative liabilities	4	<u> </u>	870.8	_
31 March 2018 USDm	Note	Level 1	Level 2	Level 3
Investment securities	19	712.4	-	7.9
Derivative assets	4	-	1,568.2	
		712.4	1,568.2	7.9
Derivative liabilities	4		1,621.1	-

There are no significant movements between Level 1, Level 2 or Level 3.

The following table shows a reconciliation from the beginning balances to the ending balances for fair value measurements in Level 3 of the fair value hierarchy:

	2019 USDm Investment securities	2018 USDm Investment securities
	, comments,	
Opening Balance	7.9	11.6
Total gains or losses:		
- in profit or loss	-	1.5
- in other comprehensive income	(0.7)	3.4
Purchases	-	-
Settlements	(4.0)	(7.8)
Impairments	0.1	(0.8)
Transfers into Level 3	· -	-
Transfers out of Level 3	-	-
Closing Balance	3.3	7.9

Although the Bank believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value.

For assets and liabilities which are accounted at fair value under Level 3, the valuations are primarily based on based on Fund Manager valuations and are base on reasonable estimates. Applying reasonable alternative valuations would not lead to a significantly different valuation.

The table below analyses financial instruments not measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which their fair value measurement is categorised.

### 6. HEDGING INSTRUMENTS

As part of its asset and liability management, the Bank uses derivatives as fair value hedges to protect it against changes in the fair value of financial assets and financial liabilities due to movements in exchange rates and interest. Derivatives often involve at their inception only a mutual exchange of promises with little or no transfer of consideration. These instruments frequently involve a high degree of leverage and can be volatile. Due to this, the Bank maintains very tight control over their use and whenever a derivative hedge is used it is imperative that the critical terms of the hedging instrument and the hedged item match.

The Bank applies hedge accounting to manage interest rate and foreign exchange risk. Further details of how these risks arise and how they are managed by the Bank are discussed in Note 4(h).

In order to hedge the risks to which the Bank is exposed, the hedging instruments employed are interest rate and cross currency interest rate swaps. Swaps are contractual agreements between two parties to exchange streams of payments over time based on specified notional amounts, in relation to movements in specified underlying indexes such as an interest rate or foreign currency rate.

Interest rate swaps relate to contracts taken out by the Bank with other financial institutions in which the Bank either receives or pays a floating rate of interest in return for paying or receiving, respectively, a fixed or alternative floating rate of interest. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

In a cross currency interest rate swap, the Bank pays the principal amount in one currency and receives the principal amount in the other currency at the start of the deal with the reverse at the maturity of the deal. Interim cash flows of interest are then exchanged on the same basis as an interest rate swap in that the Bank either receives or pays a floating rate of interest in one currency, in return for paying or receiving, respectively, a fixed rate of interest in the other currency.

The hedging instruments share the same risk exposure as the hedged items, being interest rate and currency risk. Before fair value hedge accounting is applied, the Bank determines whether an economic relationship exists between the hedged item and the hedging instrument based on an evaluation of the qualitative characteristics of these items and the hedged risk and considers whether the critical terms of the hedged item and hedging instrument are closely aligned.

Hedge effectiveness is determined with reference to changes in the fair value of the hedged item compared to the fair value of the hedge on a cumulative basis. The hedge is considered effective if the results are in the range of 80% - 125%.

Sources of hedge ineffectiveness may arise from the following:

- Mismatches between the contractual terms of the hedged item and hedging instrument, including differences in maturities or basis differences between the hedged item and the hedging instrument
- Changes in credit risk of the hedging instrument

#### Fair Value Hedges

The financial instruments hedged for interest rate risk include fixed rate loans and bonds. The Bank uses interest rate swaps to hedge interest rate risk (including currency swaps) and to hedge against specifically identified currency risks. Interest rate risk arises as the Bank holds a portfolio of medium and long-term fixed rate customer loans whose fair value fluctuates due to movements in market interest rates. In such cases changes in the fair values of both the hedging instrument and the hedged item are recognised in profit and loss. The ineffectiveness of these hedges is considered immaterial.

The following table shows the hedging instruments which are carried on the Bank's balance sheet within derivative assets and liabilities:

At 31 March 2019			Carrying amount	Carrying amount	Change in fair value of
		Notional	Derivative	Derivative	hedging
Hedge Type	Risk Category	Amount	Assets	Liabilities	instrument <sup>1</sup>

		2,132.0	6.6	(61.8)

<sup>&</sup>lt;sup>1</sup> The change in fair value shown is used as a basis to determine ineffectiveness and comprises the full fair value change of the hedged item.

<sup>&</sup>lt;sup>2</sup>The hedged risk "interest rate" includes foreign exchange risk.

### Cash Flow Hedges

The Bank does not, in its normal customer business, transact cash flow hedges. The main use of cash flow hedges is to reduce the foreign exchange risk on the Bank's forecast sterling expenses for each financial year. The Bank enters into US Dollar/Sterling foreign exchange forward contracts to manage variability in the Bank's forecast sterling expenses for each month of the financial year. As at 31 March 2018 and 31 March 2018 there were no such foreign exchange forward contracts outstanding and all amounts relating to transactions entered into during the respective financial years have been fully recognised in the statement of comprehensive income.

### 7. ANALYSIS OF THE INCOME STATEMENT BY CLASSIFICATION BASIS

At 31 March 2019 USDm	FVTPL	Amortised Cost	FVOCI	Financial Liabilities at Amortised Cost	Total

Average number of support department employees	610	613
Average number of employees	1,106	1,050

### Deferred shares bonus plan

The Bank has in place a deferred bonus scheme for certain employees. Such employees receive part of their annual bonus as a deferred award comprising 50% in cash and 50% in a scheme pegged to the SMFG share price. Any deferred awards are dependent on future service. Deferred bonus are awarded over a three year period. As at the year end total deferred bonuses were USD 7.3m(2018: USD 5.8m).

~9. OTHER EXPENSES	2019 USDm	2018 USDm
Operating lease payments	12.3	12.2
Other operating expenses	117.6	108.8
	129.9	121.0

Audit related assurance services	0.4	0.3
Other assurance services	0.2	-
Other services		<u> </u>
	1.4	1.3

Audit related assurance services includes worked performed in relation to the group audit and interim review work of SMFG and various regulatory assurance services. Amounts amounting to USD 0.4m (2018: USD 0.1m) were paid by SMBC and SMFG.

### 11. DIRECTORS' EMOLUMENTS

	2019	2018
	USDm	USDm
Directors' fees	0.6	0.5
Directors' emoluments (excluding fees)	3.0	2.4
Post-employment benefits	0.1	-
	3.7	2.9

The highest paid Director received emoluments of USD 901,959.35 (2018: USD 1,146,648).

One Director belonged to the Bank's defined contribution pension scheme with the Bank paying contributions of USD 87,955 (2018: two Directors with contributions of USD 46,693) in the year. These amounts are included within the Directors emoluments figures above. Two Directors received a bonus (2018: Two Directors) and part of this was subject to a deferral period.

Four employees of the parent company were Directors during the year and received remuneration from the Bank as they were subject of secondment agreements.

### 12. PENSION COSTS

The Bank operates a defined benefit scheme, the Sumitomo Mitsui Banking Corporation Europe Limited Pension Scheme. A triennial funding valuation of the defined benefit scheme was undertaken with an effective date of 31 December 2017 and was completed in March 2019. An update of the funding position has been prepared to 31 March 2019 by a qualified independent Actuary. The scheme is funded and per the triennial valuation, there was no deficit in the pension plan.

The principal actuarial assumptions as at 31 March (expressed as weighted averages) were as follows:

		2019	2018
Discount rate at dosing		2.4%	2.6%
Future salary increase (weighted average)		4.4%	4.3%
Future pension increase	•	3.3%	3.2%
Inflation assumption		2.4%	2.3%

The underlying mortality assumption is based upon the standard table known as S3PA Light on year of birth usage with CMI 2018 future improvement factors with a long term annual rate of future improvement of 1.0% (31 March 2018: same except S2PA Light and CMI 2017). This results in the following life expectancies:

- Male age 65 now has a life expectancy of 22.9 years from retirement (previously 23.0 years).
- Female age 65 now has a life expectancy of 24.3 years from retirement (previously 24.0 years).

Cashflow data is used to estimate the amount which the scheme needs to reimburse the Bank at the end of the year. This reimbursement is in respect of benefit payments which the Bank has paid on behalf of the scheme since 31st December 2017 (the scheme has refunded the Bank for benefits payments up until 31 December 2017). The weighted average duration of the defined benefit obligation is about 20 years.

The following table shows a reconciliation from the opening balances to the closing balances for the net defined benefit liability (asset) and its components:

	Defined Obliga		Fair Value of Plan assets		Net defined benef (liability) asset

					2019	2018
Dominion and hon					USDm	USDm
Represented by:					USDm	USDM
Net defined benefit asset (liability)					45.6	50.8

The agreed contributions of Pensionable Salaries in respect of the future service accrual to be paid by the Bank for the year ending 31 March 2019 were 63.3% of Pensionable Earnings. In addition, the Bank is currently paying contributions to cover the cost of pension payments, cash lump sums on retirement, trivial commutation payments and transfer values.

The scheme is run by the Trustees of the Scheme who ensure compliance with the Trust Deed and Rules of the Scheme. The Trustees are required by law to fund the Scheme on prudent funding assumptions under the Trust Deed and Rules of the Scheme. The contributions payable by the Bank to fund the scheme are set by the Trustees after consultation with the Bank.

The Trustees use the attained age funding method which is suitable for funding a scheme open for future accruals but is closed to new entrants.

IFRIC14 is an interpretation of existing paragraph IAS19.65, which deals with the level of net pension asset recognisable on a company's balance sheet. IFRIC14 also requires consideration of minimum funding requirements a company has made to its pension scheme and whether this gives rise to an additional balance sheet liability. Under the Scheme's Trust Deed, the Bank has an unconditional right to a refund of surplus from the scheme in the context of IFRIC14 paragraphs 11(b) and 12. As at 31 March 2019, there is no additional balance sheet liability arising in respect of any funding commitment the Bank has to the Scheme.

The employer pays all the costs of administering the scheme and any levies required by the Pensions Protection Fund and the Pensions Regulator. The expected employer contribution to the Scheme for the year ending 31 March 2019 in respect of future accrual contributions and benefit payments is USD 2.1m.

The following list is not exhaustive but covers the main funding risks for the Scheme:

• Investment Return Risk: If the assets underperform the returns assumed in setting the funding target, additional

contributions may be required

- Investment Matching Risk: The scheme remains partially invested in equity type assets, whereas the solvency target is closely
  related to return on bonds. If equity assets fall in value relative to the matching assets of bonds, additional funding may be
  required.
- Legislative Risk: The Government may introduce over riding legislation leading to an increase in the value of Scheme benefits.
- Solvency Risk: As the funding target is not a solvency target, Scheme assets may not be sufficient to provide all members
  with the full value of their benefits on a Scheme wind-up. The Bank would then be required to pay the funding shortfall.

The Bank expects to pay USD 5.1m in contributions to defined benefit plans in the coming financial year to 31 March 2020.

Scheme assets were made up of the following:

	2019	2018
	USDm	USDm
Equity Securities	24.6	35.0
Government bonds	216.3	214.8
Cash	0.9	0.8
	241.8	250.6
Market Value of Scheme Assets:		
Quoted	241.8	250.6
Unquoted	-	
Cash		
	241.8	250.6

The investment strategy of the Scheme is now aimed at self sufficiency with 10% of the assets still invested in equities and 89% in bonds and gilts, of which 54% is invested in over 15 year gilts and 46% is invested in over 5 year index linked gilts.

### Sensitivity Analysis

The approximate impact on the defined benefit obligation of changes in the significant assumptions is shown below:

	2019	2018
Assumption Varied	% Change in Defined Benefit Obligation	% Change in Defined Benefit Obligation
Discount rate 0.5% p.a. lower	10%	11%
Salary increase rate 1% p.a. lower	(2%)	(3%)
Pension increase (in payment and in deferment) rate 0.5% p.a. lower	(4%)	(5%)
Minimum rate of improvement of mortality 0.5% p.a. lower	(2%)	(2%)

The figures assume that each assumption is changed independently of others. Therefore, the disclosures are only a guide because the effect of changing more than one assumption is not cumulative. The sensitivity analysis was calculated by re-running the figures as at the last formal valuation as at 31 December 2017 adjusted approximately for changes in the membership up to 31 March 2019. Therefore, the analysis is only approximate as at the year end of 31 March 2019.

### 13. INCOME TAX EXPENSE

	(7.5)	1.9	(5.6)	4.3	(1.1)	3.2

UK corporation tax rate of 20% was reduced to 19% (effective from 1 April 2017) and will be further reduced to 17% (effective 1 April 2020) as substantively enacted on 26 October 2015 and 6 September 2016 respectively. In addition, the Finance (No.2) Act 2015 introduced a bank surcharge of 8% on the profits of banking companies, with effect from 1 January 2016. The deferred tax liability has been calculated at 25% at 31 March 2019.

### 14. ANALYSIS OF FINANCIAL ASSETS AND LIABILITIES BY CLASSIFICATION AND FAIR VALUES

Debt securities in issue	-	-	-	4,045.3	4,045.3

There were no positions classified on inception as designated at fair value through the profit and loss during the year.

The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the financial statements.

### Assets for which fair value approximates carrying value

For financial assets and financial liabilities that are liquid or have a short term maturity (less then three months) it is assumed that the carrying amounts approximate to their fair value. This assumption is also applied to demand deposits, savings accounts without a specific maturity, and variable rate financial instruments.

### Fixed rate financial instruments

The fair values of fixed rate financial assets and liabilities carried at amortised cost not hedged through fair value hedges are estimated by comparing market interest rates on initial recognition with current market rates offered for similar financial instruments including any effect of changes in market credit spreads, where material. The estimated fair value of fixed interest bearing deposits is

based on discounted cash flows using prevailing money-market interest rates for debts with similar credit risk and maturity. The fair values of quoted debt instruments issued are calculated based on quoted market prices.

### 15. CASH AND BALANCES AT CENTRAL BANKS

The ECL on the lease receivables is immaterial.

	2019 USDm	2018 USDm
Current account and short term deposits with the Bank of England	9,213.1	14,169.6
Current account and short term deposits with Banque de France	10,457.0	19,485.4
Cash and balances at central banks	19,670.1	33,655.0
The ECL on the above balances is immaterial.		
16. LOANS AND ADVANCES TO BANKS

Net investment in finance leases		
- Less than one year	110.2	10.0
- Between one year and five years	117.9	250.2
	228.1	260.2

#### 18. IMPAIRMENT PROVISIONS

The Bank uses an expected credit loss model for provisioning of financial assets and timely recognition of changes in their credit quality since the initial recognition. Expected credit loss amount and amount of provisions created for a financial asset depends on the change in its credit quality since initial recognition.

At initial recognition and throughout its life, the financial asset is classified by the Bank into one of the following stages:

- Stage 1: 12-months ECL This applies to financial assets with no significant deterioration in their credit quality since origination.
- Stage 2: Lifetime ECL If for financial instruments the credit risk increases significantly since origination then Lifetime ECL is recognized.
- Stage 3: Credit Impaired If the credit risk of a financial asset increases to the point that it is considered credit impaired then Lifetime ECL is recognized.

### Significant increase in credit risk (SICR)

In order to determine whether a significant increase in credit risk of a financial instrument has taken place since its initial recognition, the Bank considers reasonable and verifiable information that is relevant and accessible without excessive cost or effort. The Bank assesses significant increase in credit risk using both quantitative and qualitative information.

#### Determining whether SICR takes place

The Bank uses the quantitative factor of a change in the probability of default based on Grading as well as additional factors (30 days past due) and whether a customer is on the Watch List in order to determine whether a significant increase in the credit risk of a financial instrument has taken place.

The Bank applies a grading based review of each exposure from origination to current reporting date.. The Bank uses relative PD thresholds based on Grading as a quantitative criterion for significant increases in credit risk. Thresholds of relative increase in PD were assessed based on reviews of the historical data.

The Bank uses additional criteria for determining whether a SICR takes place – 30 days past due. The number of days overdue is determined by counting the number of days starting from the first day when the payment was not received in full. Payment dates are determined without taking into account the grace period that can be provided to the borrower. In addition, for customers graded G/J 5 and G/J 6, inclusion in the Credit Alarm System (Watch List) is an indicator of SICR. This is for customers categorised as "Normal" but determined as requiring additional monitoring due to credit deterioration.

#### Recognition of financial assets as impaired (Stage 3)

A financial asset is recognised as impaired, if default has occurred since initial recognition.

### Default definition

The definition of default for the purpose of determining ECL's has been aligned to the Regulatory Capital CRR Article 178 definition of default, to maintain a consistent approach with IFRS 9 and associated regulatory guidance.

The following events generally provide objective evidence of a default situation:

- The management bodies of the borrower/group of borrower decide to reorganise or liquidate the borrower and/or any bankruptcy proceedings or involuntary liquidation in respect to the borrower is initiated (either by the borrower itself or by any third parties) and/or external manager, provisional manager, liquidator or commissioner is appointed;
- Delinquency exceeds 3 months. Delinquency is considered to be caused by the deterioration of business conditions or constrained cash flow (and including cases in which only interest is not paid, but there is no delay in repayment of the principal);
- The loan is restructured towards the more favourable conditions for a borrower, in the absence of which the borrower could not fulfil the obligations towards the Bank properly;
- Breach of financial covenants, which, in the reasonable opinion of the Bank, may result in improper fulfillment of obligations by the borrower;

Any other event happened in relation to borrower/group of borrower that, in the Bank's opinion, can cause improper fulfillment of obligations by the Borrower.

### Improvement of credit quality

If a financial asset classified in Stage 2 shows an improvement in credit quality, then this asset can be classified in Stage 1. No probation period is applied as the latest grading will reflect the customer's current financial credit worthiness with consideration of any near term factors which could impact the customer grade already taken into account. There have been no such movements during the year.

Movement from stage 3 to Stage 2 or 1 is dependent on individual assessment. All relevant factors in relation to the credit worthiness of the customer will be taken into account before a customer is upgraded and moved out of stage 3. There have been no such movements during the year.

#### Grades (credit ratings)

The bank assigns appropriate grades to each exposure based on data that is used to predict the risk of default and by applying expert judgement on credit quality. Ratings are determined based on qualitative and quantitative factors, indicators of the risk of default. These factors vary depending on the type of the borrower and exposure itself.

Grades are determined in a way that the risk of default increases significantly as credit quality deteriorates. For example, the difference between 1 and 2 grades is less than the difference between 2 and 3 grades.

Each exposure is assigned with a particular grade at the date of the initial recognition based on the information available. These exposures are subject to continuous monitoring. So, the grade assigned to the exposure could change since the date of the initial recognition.

Monitoring usually includes the analysis of the following data:

- Information obtained as a result of analysis of the borrowers on a periodic basis: audited financial statements, management accounts, budgets, forecasts and plans.
- · Credit rating agencies' data, publications, and information on changes in external credit ratings.
- Bond and credit default swap quotes, if such information is available.
- Actual and expected significant changes in political, regulatory and technological environments that could influence the borrower's business.

### Probability of default term structure

Grades are main inputs that are used for creation of the PD term structure for positions exposed to credit risk. The bank collects information on the debt service quality and default level of exposures, analyzed depending on jurisdiction or region, type of product and borrower, and also depending on rating of credit risk.

The Bank uses statistical models to analyze the collected data and to obtain estimates of the probability of default for the remaining period for positions exposed to credit risk and expectations of their changes in the future.

This analysis includes the estimation and calibration of correlation between changes in default levels and changes in key macroeconomic factors. The Bank uses dynamics of GDP of the European Union and Japan, change in yield of US corporate bonds and oil price as key macroeconomic factors to determine PD of positions exposed to credit risk.

The Bank uses these forecasts to adjust PD estimates.

### Macroeconomic forecasts

The Bank defines GDP, yield of US corporate bonds and oil price as key macroeconomic factors in the models of probability of default, loss given default (LGD) and exposure at default (EAD).

For each key macroeconomic factor the Bank estimates three scenarios, a base, optimistic and pessimistic scenario. The base scenario is based on third party subject matter expert forecasts. Weightings for each scenario are applied based on the 3rd, 50th and 97th percentile (pessimistic, base and optimistic).

#### Methods of estimation and creation of provision for credit losses

The Bank estimates provisions for credit losses at the transaction level for all financial instruments.

### **Expected Life**

For term loans, the expected life of the transactions are based on contractual maturity

For revolving credit facilities a model linked to the macroeconomic variables is used to predict utilisation rates.

#### Creation of Provisions

The calculation of expected credit losses is based on the following metrics:

- probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD).

The probability of default (PD) is modeled using credit ratings transition matrices that were created based on internal and external statistics. The bank uses two sets of transition matrices to forecast PD, including transition matrices for borrowers whose parent companies are located in Japan and transition matrices for borrowers whose parent companies are residents of other countries. The value of PD is determined based on the macroeconomic forecasts, including the dynamics of GDP and oil price.

The loss given default (LGD) model is a linear model that allows to predict LGD depending on the dynamics of GDP and the type of asset.

Exposure at default (EAD) is defined on the basis of the models that take into account the current and forecasted utilization of financial asset. The projected utilization rate for revolving facilities is determined using forecasts of GDP dynamics and change in yield of US corporate bonds. For single facilities the Bank uses an amortization model.

The credit conversion factor (CCF) is used to adjust drawn and undrawn parts (applied only to committed facilities) of facilities.

The value of CCF that applies to undrawn parts of financial instruments is determined annually at SMBC Group level and is calculated as historical average.

CCF for drawn parts is different for on-balance and off-balance sheet items. For on-balance sheet items CCF is 100%. The value of CCF for off-balance sheet items depends on risk type of financial instrument and is determined at SMBC Group level.

In order to calculate expected credit loss for loans, provided to corporate clients and banks, the Bank adjusts the annual value of PD in proportion to the term of the financial instrument.

### Post Model Adjustments

A post model adjustment of USD 1.9m has been included in the ECL as of 31 March 2019.

### Use of exemptions permitted under IFRS9

The Bank has not applied the low credit risk exemption permitted under IFRS9.

### Movement in impairment provisions

The following tables presents a reconciliation of the opening to closing balance of the exposure and impairment allowance for financial assets at amortised cost.

	Gross Exposure				
At 31 March 2019	Stage 1 USDm	Srage 2 USDm	Stage 3 USDm	Total USDm

### MACROECONOMICS VARIABLES AND SCENARIO WEIGHTINGS

The table below shows the average 3 year macroeconomic variables for each scenario and the respective scenario weights.

	Scenario probability weighting				
	Pessimistic	Base % o	Optimistic %		
Scenario probability weighting as at 31 March 2019	7.6	84.8	7.6		
Scenario probability weighting as at 1 April 2018	7.6 .	84.8	7.6		
	Macroeco	momic variables	·		
	Pessimistic * o	Base %	Optimistic		
As at 31 March 2019					
EU GDP	(2.4)	1.1	4.7		
Oil Price	66.5	66.5	66.5		
JP GDP	0.6	1.7	2.8		
US Yield	0.2	0.0	. (0.1)		
As at 1 April 2018					
EU GDP	(1.8)	1.8	5.4		
Oil Price	62.2	62.2	62.2		
JP GDP	0.8	2.2	3.2		
US Yield	0.0	0.4	0.0		

### SENSITIVITY ANALYSIS

The measurement of ECL involves increased complexity and judgement, including estimation of probabilities of default (PD), loss given default (LGD), range of unbiased future economic scenarios, estimation of expected lives, estimation of exposure at default (EAD) and assessing significant increases in credit risk.

#### **ECL Sensitivity Analysis**

The table below shows the ECL assuming each scenario has been 100% weighted to show the impact of alternative scenarios. The results below do not include the impact of changes in staging under three scenarios, however the impact is not material.

The above results do not include the impact of the post model adjustment.

Amortisation of discounts and premiums	1.3	0.6
At end of year	426.5	751.1

#### 20. INTANGIBLE ASSETS AND GOODWILL

Goodwill acquired in a business combination is allocated, at acquisition, to the cash generating unit (CGU) that is expected to benefit from that business combination. The carrying amount of goodwill of USD 1.9m has been allocated to Specialised Products Department (SPD).

The recoverable amounts of the CGU to which goodwill is allocated is assessed using the value-in use calculation. The bank prepares cashflow forecasts derived from the most recent financial budgets and corporate strategy covering the next three years. The budgets represent Management's best estimate of the results for the coming years which for SPD assumes limited asset and business growth in future years along with a stable economic background. The rate used to discount the forecasted cashflows are based on the company's estimation of the group's cost of capital for this business type. The value in use assumes terminal values after 4 years using a discounted rate of 14.3% (2018: 14.7%) and cash flow growth rate of 2.1% (2018: 2.2%).

The result of the discounted cash flows are in excess of the goodwill and therefore the carrying value of the goodwill remains at USD 1.9m (2018: USD 1.9 m).

### Software

The carrying amount of software is as follows:

•	Internally generated software USDm	Other software USDm	Total USDm
At 1 April 2018	. 11.8	59.7	71.5

	USDm	USDm
Accruals and deferred income	159.4	146.5
Accounts payable to parent	20.3	14.1
Cash collateral received under CSA	42.5	962.6
Other liabilities	. 10.6	4.4
	232.8	1,127.6

#### 26. CONTINGENT LIABILITIES

CALLED ID CHARE CARITAL

The Bank is a defendant in a limited number of LIBOR related class actions alleging certain of our practices and actions were improper. Management believes that the Bank will be successful in resolving these lawsuits to the extent that we are able to assess them. At the reporting date the amount at risk is not reasonably estimable. This is an area of significant judgement and the potential liability could be material to the results at the point they are recognised in future periods.

27. CALLED UP SHARE CAPITAL	USDm
Issued, alloted and fully paid share capital (Ordinary shares of USD 1,000) At 31 March 2018 Additions	3,200.0

The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision and adopted by the Prudential Regulation Authority in supervising banks.

3,200.0

The Bank's capital is managed to ensure the Bank complies with external requirements and, in order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payments to shareholders, return capital or issue capital securities. There were no changes to the objectives, policies or process for the management of capital in the year. During the year there were no breaches of the Bank's capital adequacy requirement which required reporting to the Prudential Regulation Authority.

The Bank's capital with retained profits is managed by Treasury Department as a primary source of funding for the loan asset book.

The Bank's available regulatory capital as at year-end was USD 4,320.3 (2018: USD 4,036.1) calculated as total equity per financial statements less regulatory adjustments as per the requirements laid down in the Capital Requirements Regulation (CRR).

### 28. GUARANTEES

At 31 March 2019

	2019	2018
	Contract	Contract
	amount	amount
	USDm	USDm
	. 2.673.0	4 2 4 0 4
Guarantees and Letters of Credit	 2,673.0	4,349.4

Guarantees and letters of credit commit the Bank to make payments on behalf of customers upon the occurrence of an event, generally related to the import or export of goods. Guarantees and letters of credit carry the same credit risk as loans and are subject to the expected credit loss requirements of IFRS 9, for further details please refer to Note 18.

#### 29. COMMITMENTS

	2019	2018
•	Contract	Contract
	amount	amount
	USDm	USDm
Undrawn formal standby facilities, credit lines and other		
commitments to lend	13,384.9	13,479.2

Commitments to extend credit represent contractual commitments to make loans and revolving credits. Since commitments may expire without being drawn upon, the total contract amounts do not necessarily represent future cash requirements. Commitments are subject to the expected credit loss requirements of IFRS 9, for further details please refer to Note 18.

#### 30. ASSETS PLEDGED

Assets are pledged as collateral to secure liabilities or as security deposits on derivatives. The following table summaries the nature and carrying amount of assets pledged against liabilities held.

	2019 USDm	2018 USDm
Loans and advances to banks	2.7	114.8
Loans and advances to customers	517.5	719.4
Other assets	161.5	491.4
	681.7	1,325.6

The loan and advance to customers were pledged to the Banque de France. These assets allow the bank to draw additional liquidity as of the year end of USD 76.8m (2018: USD 233.6m). The loans and advances to banks and other assets have been pledged as security deposits on derivatives.

### 31. OPERATING LEASE COMMITMENTS

	2019 USDm	2018 USDտ
The future minimum lease payments under non-cancellable operating leases for each of the following period:		
- less than one year	9.6	11.2
- between one and five years	19.2	31.5
- more than five years	160.2	182.3
	189.0	225.0

In January 2018 the Bank entered into an agreement for lease to occupy 184,000 square feet of the property known as 100 Liverpool Street. On completion of construction, lease payments of USD 156.6m will be due after more than 5 years.

#### 32. RELATED PARTIES

Two or more parties are considered to be related when one party has direct or indirect control over the other party; or the parties are subject to common control from the same source; or one party has influence over the financial and operating policies of the other party to the extent that other party might be inhibited from pursuing at all times its own separate interests.

Key management personnel are the directors of the Company. There were no loans or deposits with or to key management personnel (and their connected persons) of the Bank. Key management personnel compensation:

	2019	2018
	USDm	USDm
Short term employee benefits	3.0	2.4
Post-employment benefits	0.1	-
Other long term employee benefits	<b>-</b> ,	-
Termination benefits	•	-
	3.1	2.4

The Bank has entered into a Keep Well Deed under which the Bank and SMBC agree to certain financial arrangements, including the obligation of the parent to maintain tangible net worth in the Bank at all times sufficient to cover the Bank's obligations arising through any of its business activities.

Amounts receivable from related parties of the Bank are as follows:

	201	2019		18		
	Loans and	Loans and Other		ans and Other Loans and		Other
	receivables	receivables assets		assets		
	USDm	USDm	USDm	USDm

Amounts due from other related parties	393.7	73.2	401.3	58.6		
•						
Total	<u>2,787.7</u>	1,054.4	3,284.0	660.1		

Loans and receivables are made in the ordinary course of business and on the same terms as comparable transactions with third parties. Other assets predominantly include derivative assets and other receivables.

Amounts payable to related parties of the Bank are as follows:

	A. Contract of the contract of	2019		18
		Other		Other
•	Deposits	liabilities	Deposits	liabilities
	USDm	USDm	USDm	USDm
Amounts due to parent company	16,791.2	161.4	18,907.3	543.4
Amounts due to other related parties	565.8	42.1	477.5	134.0
	····			
Total	17,357.0	203.5	19,384.8	677.4

The Bank receives collateral consisting of cash (part of Amounts due to parent company) of USD 4,396.2m (2018: USD 4,713.7m), from SMBC, to mitigate large exposures on intra-group positions. Deposits are taken in the ordinary course of business and on the same terms as comparable transactions with third parties.

Guarantees received from related parties of the Bank are as follows:

	2019 USD m	2018 USDm
Guarantees received on customer accounts	2,494.8	2,467.3
Guarantees received on the Bank's liabilities	1,634.6	1,611.4

Other transactions as at 31 March 2019 with related parties of the Bank are as follows:

- On the 25 November 2010 the Bank entered into a USD 1.5 billion revolving multicurrency liquidity facility agreement with the Bank's parent, Sumitomo Mitsui Banking Corporation. This has an indefinite term and is still in existence as at 31 March 2019.
- The Bank received consideration of USD 0.2m from Sumitomo Mitsui Banking Corporation EU AG for the purchase of the business of Milan branch in March 2019. This resulted in a reduction to the Bank's asset position of approximately USD 1.0 billion.

Amounts recognised in the statement of comprehensive income in respect of related party transactions are as follows:

2019	Parent Companies USDm	Other related parties USDm	Total USDm
Interest income	6.8	37.3	44.1
Interest payable	(156.0)	(79.7)	(235.7)

<sup>\*</sup> On 18 March 2019, the assets and liabilities of Milan Branch were transferred to SMBC Bank EU AG and the Branch ceased its operations as part of the Bank on that date.

#### Basis of preparation

#### Activities:

Corporate banking - refers to the activities mentioned on page 1.

Marketing activities - refers to customer facing activities undertaken on behalf of other Bank branches.

- 2. Geographical location the country where the branch is established.
- 3. Turnover includes interest income, interest expense, fees and commissions income, fees and commissions expense, net trading (loss)/income. This is in line with the financial statements.
- 4. Cash tax refers to cash amount of all corporation tax paid in each location during the period 1 April to 31 March each year including group relief.
- 5. Public subsidies refers to direct support by the government. The Bank does not receive any public subsidies.

#### 34. PARENT COMPANIES

The Bank's immediate parent is Sumitomo Mitsui Banking Corporation, a company incorporated in Japan. It has included the Bank in its group financial statements, copies of which are available from its registered office 1-1-2, Marunouchi, Chiyoda-ku, Tokyo 100-0005, Japan.

The Bank's ultimate parent company is Sumitomo Mitsui Financial Group Inc. which is incorporated in Japan. SMFG's consolidated financial statements can be obtained from its registered office at 1-1-2, Marunouchi, Chiyoda-ku, Tokyo 100-0005, Japan.

#### 35. IFRS 9 TRANSITIONAL DISCLOSURES

## CLASSIFICATION OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES ON THE DATE OF INITIAL APPLICATION OF IFRS 9

The table below shows the original measurement categories in accordance with IAS 39 and the new measurement categories under IFRS 9 for the Bank's financial assets and financial liabilities as at 1 April 2018.

			Original
	Original dassification	New dassification	carrying amount
	under IAS 39	under IFRS 9	under IAS 39
	unuel 1213 39	under trikis y	USDm
FINANCIAL ASSETS			CASAIL
Cash and balances at central banks	Loans and receivables	Amortised cost	33,655.0
Settlement balances	Loans and receivables	Amortised cost	57.0
Loans and advances to banks	Loans and receivables	Amortised cost	2,486.4
Loans and advances to customers	Loans and receivables	Amortised cost	20,394.1
Reverse Repurchase Agreements	Loans and receivables	Amortised cost	1,333.6
Investment securities - debt	Loans and receivables	Amortised cost	30.8
Investment securities - debt	Available-for-sale	FVOCI	712.4
Investment securities - debt	Available-for-sale	FVTPL (Mandatory)	1.4
Investment securities - equity	Available-for-sale	FVOCI	6.5
Derivative assets	Trading	FVTPL (Mandatory)	1,568.2
Total financial assets			60,245.4
FINANCIAL LIABILITIES			
Deposits by banks	Financial liabilities at	Financial liabilities at	26,935.6
. ,	amortised cost	amortised cost	
Customer accounts	Financial liabilities at	Financial liabilities at	23,188.4
,	amortised cost	amortised cost	
Debt securities in issue	Financial liabilities at	Financial liabilities at	4,045.3
	amortised cost	amortised cost	•
Derivative liabilities	Trading	FVTPL (Mandatory)	1,621.1
Total financial liabilities			55,790.4

The Bank's accounting policies on the classification of financial instruments under IFRS 9 are set out in Note 3 (k). The application of these policies resulted in the following:

- Loans and receivables and certain debt securities continue to be classified as amortised cost. The Bank considers that these
  assets are held within a business model whose objective is to hold assets to collect contractual cash flows and the
  contractual terms of the financial asset give rise on a specified date to cash flows that are solely payments of principal and
  interest on the principal amount outstanding.
- Debt securities previously held as available-for-sale are primarily classified as fair value through other comprehensive income under IFRS 9. This portfolio of debt securities is held to manage the Bank's day to day liquidity and to achieve such

an objective the Bank will both collect cash flows and if and when required sell financial assets. As the contractual terms of these financial assets give rise on a specified date to cash flows that are solely payments of principal and interest on the principal amount outstanding., they meet the IFRS 9 requirements to classify as fair value through other comprehensive income.

- One debt security position of USD 1.6m did not meet the meet the criteria of cash flows that are solely payments of principal and interest and has been classified at fair value through the profit and loss.
- Derivative assets and liabilities were classified as held-for-trading under IAS39 and were measured at fair value through
  profit and loss. These instruments continue to be classified as fair value through profit or loss (mandatory) under IFRS 9.
- Equity investments were classified as available-for-sale under IAS 39 and were measured at fair value through other comprehensive income. As these investments are not considered by management as part of the Bank's performance, an election has been made to designate as fair value through other comprehensive income under IFRS 9.
- Deposits by banks, customer accounts and debt securities in issue continue to be classified as amortised cost.

## IMPACT ON STATEMENT OF FINANCIAL POSITION

The table below reflects the impact of IFRS 9 on implementation with effect from 1 April 2018 on the Statement of Financial Position.

#### IMPACT ON IMPAIRMENT PROVISIONS

The table below reconciles the closing impairment allowance for financial assets in accordance with IAS 39, and provisions for loan commitments and financial guarantee contracts in accordance with IAS 37 as at 31 March 2018, and the opening impairment allowances determined in accordance with IFRS 9 as at 1 April 2018:

The Bank saw an overall reduction in provisions on adoption of IFRS 9 as the collective provision under IAS 39 was higher than the combined the Stage 1 and 2 provisions under IFRS 9. The main causes for the reduction were:

- Under IAS 39, a management overlay was applied on the Collective Provision in relation to Project Finance assets. Management assessed that the IFRS 9 ECL models methodology adequately covered this risk.
- The IAS 39 collective provision used as its base Regulatory Expected Loss models derived from group models. However, the Bank has updated its models to be IFRS 9 compliant.

	IAS 39 or IAS 37	Impact of IFRS 9	IFRS 9
	Impairment provisions at 31 March 2018 USDm	HRS 9 Re- measurement USDm	Impairment provisions at 1 April 2018 USDm
Loans and advances at amortised cost	156.5	(14.7)	.141.8
	156.5	(14.7)	141.8
Provisions for undrawn loan commitments, guarantees and letters of credit	10.8	(6.1)	4.7
Total impairment and provisions	167.3	(20.8)	146.5

### **36. SUBSEQUENT EVENTS**

Post year-end, the Bank sold its branches in Amsterdam, Dublin, Madrid and Prague to a group company SMBC Bank EU AG. The sale resulted in profit on disposal for the Bank of USD 8.0m.
