Carrier Rental Systems (UK) Limited

Strategic Report

The directors present their Strategic Report for the company for the year ended 31 December 2018.The directors, in preparing this strategic report, have complied with s414C of the Companies Act 2006.

Trading review

The results for the company show a total turnover increase of £13.6 million (46.8%) over the prior year mainly due to the merger with Watkins Hire Limited. As a result of the increased turnover, operating profit grew to £5.2 million (2017: £2.8 million). At the year end, the company had net assets of £32.6 million (2017: £48.9 million), the company cash-flow is supported by an intercompany cash-pooling agreement with HSBC bank and has net amounts owed to group undertakings of £1.7 million (2017 £3.6 million).

What we do and where

Carrier Rental Systems (UK) Limited is a supplier of specialist temporary equipment for hire, and a subsidiary of Carrier Corporation. The core rental services offered to our customers are for temporary and permanent pumps, for temporary temperature control equipment and products and services associated with these core activities. The core rental services of the company are further supported by the provision of temporary power generators and temporary powered water jetting.

We conduct rental activities in pumps, generators and temperature control equipment from 27 operational depots across the United Kingdom providing these services to a broad range of customers. Our business model is focused on customers who require specialist equipment in the short to medium term rather than permanent installations at very short notice.

Our customer base is extremely diverse, operating nationally and locally with key partners in the construction, civil engineering, aggregates, events, facilities management and water utilities sectors. Our rental equipment can operate in each of these market sectors, meaning business risk is managed and not dependent upon a single market. Speed of response is critical to our clients and the locality and geographic spread of our rental branches are a key asset in service delivery.

The market

The rental markets in which the company operates are highly fragmented. Each of the key markets in which the company operates has a mix of local, national and international rental specialists in direct competition. Strong customer focus and good technical application enable the company to continue to compete effectively.

The directors are confident that since the acquisition of the company by Carrier Corporation in December 2006 the company has improved stability and improved equipment purchasing ability. This has enabled the company to broaden and strengthen its rental fleet and to continue to make a variety of investments to maintain and develop the business.

Strategy

The company's primary objective is to increase turnover, return on sales and return on capital employed by a combination of organic growth and acquisitions. The key elements of this strategy are:

- Building a balanced turnover stream throughout the year.
- Continued investment in hire equipment which serves the needs of our customers.
- Operational excellence through the development of a world class quality, environment and health and safety management system.
- Developing a stable and knowledgeable workforce through a reduction in employee attrition, investment in training and development and through improved internal communication.

Carrier Rental Systems (UK) Limited

Strategic Report

Strategy (continued)

Balanced turnover stream
The nature of the company's key rental activities are directly influenced by weather driven demand. To mitigate this key variable factor the company continues to invest in hire equipment that allows niche markets that are less weather driven to be targeted. Complementary opportunities to add products and services continue to be sought to further reduce the risk associated with its revenue streams.

Continued investment in hire equipment
By utilising the purchasing power provided by Carrier Corporation, the directors will ensure that partnerships built with our suppliers will remain in a strong position. We will ensure that we hold a hire fleet which provides our customers with reliable specialist equipment solutions, sustaining and developing our customer base.

Operational excellence
The directors of the company have continued the process of improving operational processes to heighten safety, environmental and operational awareness involving employees at all levels of the company. During 2018 the company maintained ISO certifications and transitioned from OHSAS 18001 to ISO 45001. Significant steps have been taken to make the workplace safer for our employees with substantial investments being made in premises, training, management systems and tools and equipment. This has also resulted in the company maintaining various external accreditations from Achilles, Safe Contractor and Chas.

Developing a stable and knowledgeable workforce
We strongly believe that a stable and knowledgeable workforce is key to the future success of the company. By reducing employee attrition rates we can retain our best employees and provide improved customer service levels. Investment in training and the development of all employees allows the company to add value to our customers. A series of processes such as our quarterly employee communication forums, monthly toolbox talks and bi-annual employee surveys help to ensure that all the employees of the company have the ability to contribute to its continuous improvement.

Key performance indicators

Measure	**2018**	**2017**	**Definition, method of calculation and analysis**
Turnover growth	46.8%	(17.2%)	Year on year sales growth expressed as a percentage
Return on Sales	12.3%	9.7%	Operating profit expressed as a percentage of turnover
Return on Capital employed	(19.9%)	148.0%	Operating profit divided by net current assets
Employee attrition	22.9%	17.4%	The total number of employees voluntarily leaving the company during the year expressed as a percentage of the average total workforce over the financial year.

Carrier Rental Systems (UK) Limited

Strategic Report

Principal risks and uncertainties
The management of the business and the execution of the company's strategy are subject to a number of risks. Risks are formally reviewed by the board of directors and appropriate processes put in place to monitor and mitigate them.

Weather driven demand
Both of the core services of the company are impacted by weather related demand. The level of rainfall can impact demand for our pumps and the temperature can impact the demand for our temperature control products and services. This in turn can impact the supporting service of power generator hire. To mitigate against potential adverse effects the company invests in a range of equipment to allow applications that are more process driven rather than weather driven in demand. The company is also focused on developing markets where demand levels are again less weather driven.

Competition and economy
The company operates in a highly competitive market where rapid availability of the right rental equipment of the right quality and at the right price is critical. To meet the expectations for these high levels of service from our customers we continue to invest in our rental fleet, our people and in our depot structure. This ensures that the company can provide a rapid and quality response to our customers. The company has some exposure to construction activity which can be very cyclical and we continue to develop a broad range of markets that gives the business good balance.

Suppliers
The company has strong relationships with all its principal suppliers. Sister companies of the company manufacture and supply temperature control equipment that leads in its field for technology and reliability. The company also increased its investment in the complementary area of power generators, establishing good supply and support arrangements.

Future developments

Having completed the integration of our 2016 acquisition Watkins Hire Ltd we anticipate future synergies impacting rental fleet utilization and market opportunities. This anticipated improvement combined with continued investment in our specialist rental fleet will place the business in a good position to capture growth opportunities. Ongoing efforts to developing relationships with the other UK based Carrier group companies is also helping to support many of our customers in new and innovative ways such as through the provision of full HVAC solutions covering equipment, installation, and temporary rental services. Our continued focus on safety is key to safeguarding sustainable service delivery to a market with an ever increasing expectation of safety standards.

Approval

Approved by the Board and signed on its behalf by:

S Blaby
Director
Date: 19th November 2019

Ailsa Road, Irvine Industrial Estate, Irvine, Ayrshire, KA12 8LL

Carrier Rental Systems (UK) Limited

Directors report

The directors present their Report and audited financial statements of the company for the year ended 31 December 2018.

Future developments and events after the balance sheet date

As explained in further detail in the strategic report on page 3, in May 2018 the business completed the purchases of the assets and liabilities of Watkins Hire Ltd, an inter-group company which was originally acquired November 2016.

Going concern

The directors have a reasonable expectation that the Company have adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis in preparing the annual financial statements.

Further details regarding the adoption of the going concern basis can be found in the notes to the financial statements.

Financial risk management objectives and policies

The Company's activities expose it to a number of financial risks including credit risk, cash flow risk and liquidity risk. The use of financial derivatives is governed by the Company's policies approved by the board of directors, which provide written principles on the use of financial derivatives to manage these risks.

Cash flow risk

The Company's activities expose it primarily to the financial risks of changes in foreign currency exchange rates and interest rates.

Interest bearing assets and liabilities are held at fixed rate to ensure certainty of cash flows.

Credit risk

The Company's principal financial assets are bank balances and cash, trade and other debtors, and investments.

The Company's credit risk is primarily attributable to its trade debtors. The amounts presented in the balance sheet are net of allowances for doubtful receivables. An allowance for impairment is made where there is an identified loss event which, based on previous experience, is evidence of a reduction in the recoverability of the cash flows.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

The Company has no significant concentration of credit risk, with exposure spread over a large number of counterparties and customers.

Liquidity risk

To maintain liquidity and ensure that sufficient funds are available for ongoing operations and future developments, the company uses a mixture of long-term and short-term debt finance, when necessary.

Directors report

Dividends

The directors do not recommend the payment of a final dividend in respect of the year ended 31 December 2018 (2017: £nil).

Directors

The directors, who served throughout the year and up to the date of signing the financial statements were as follows:

A Z Hungwe
S R H McMullen
S Blaby (appointed 04/09/18)
P R Wright (resigned 04/09/18)

Directors' indemnities

The Company has made qualifying third party indemnity provisions for the benefit of its directors which were made during the year and remain in force at the date of this report.

Disabled employees

Applications for employment by disabled persons are always fully considered, bearing in mind the abilities of the applicant concerned. In the event of members of staff becoming disabled every effort is made to ensure that their employment with the Company continues and that appropriate training is arranged. It is the policy of the Company that the training, career development and promotion of disabled persons should, as far as possible, be identical to that of other employees.

Employee consultation

The Company places considerable value on the involvement of its employees and has continued to keep them informed on matters affecting them as employees and on the various factors affecting the performance of the Company. This is achieved through formal and informal meetings, the Company magazine and a special edition for employees of the annual financial statements. In addition, the Company encourages the involvement of employees by means of employee communication events, where a representative of a cross section of employees raises any questions to senior management on an anonymous basis if required by the employee on a wide range of matters affecting their current and future interests.

Disclosure of information to auditors

Each of the persons who is a director at the date of approval of this report confirms that:

• so far as the director is aware, there is no relevant audit information of which the Company's auditors are unaware; and
• the director has taken all the steps that he/she ought to have taken as a director in order to make himself/herself aware of any relevant audit information and to establish that the company's auditors are aware of that information.

Carrier Rental Systems (UK) Limited

Statement of directors' responsibilities in respect of financial statements

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulation.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 101 "Reduced Disclosure Framework", and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- state whether applicable United Kingdom Accounting Standards, comprising FRS 101, have been followed, subject to any material departures disclosed and explained in the financial statements;
- make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006.

The directors are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Independent Auditors

In the absence of any notice proposing to terminate their appointment, PricewaterhouseCoopers LLP will be deemed to be reappointed for the next financial year. PricewaterhouseCoopers LLP have indicated their willingness to continue in office.

Independent auditors' report to the members of Carrier Rental Systems (UK) Limited

Report on the audit of the financial statements

Opinion

In our opinion, Carrier Rental Systems (UK) Limited's financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2018 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 101 "Reduced Disclosure Framework", and applicable law); and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report and financial statements (the "Annual Report"), which comprise: the balance sheet as at 31 December 2018; the statement of comprehensive income and the statement of changes in equity for the year then ended; and the notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

ISAs (UK) require us to report to you when:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

We have nothing to report in respect of the above matters.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern. For example, the terms on which the United Kingdom may withdraw from the European Union are not clear, and it is difficult to evaluate all of the potential implications on the company's trade, customers, suppliers and the wider economy.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic Report and Directors' Report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (UK) require us also to report certain opinions and matters as described below.

Independent auditors' report to the members of Carrier Rental Systems (UK) Limited

Strategic Report and Directors' Report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic Report and Directors' Report for the year ended 31 December 2018 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic Report and Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of directors' responsibilities in respect of the financial statements set out on page 6, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2006 exception reporting

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the company, or returns adequate for our audit have not been received from branches not visited by us; or
- certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

1. Accounting policies

Carrier Rental Systems (UK) Limited ('the company') is a supplier of specialist temporary equipment for hire in the UK.

The company is a private company and is incorporated and domiciled in the UK. The address of its registered office is Ailsa Road, Irvine Industrial Estate, Irvine, Ayrshire, KA12 8LL.

The principal accounting policies are summarised below. They have all been applied consistently throughout the year and all the years presented, unless otherwise stated.

Basis of accounting

The company meets the definition of a qualifying entity under FRS 100 (Financial Reporting Standard 100) issued by the Financial Reporting Council. These financial statements were prepared in accordance with FRS 101 (Financial Reporting Standard 101) 'Reduced Disclosure Framework' as issued by the Financial Reporting Council, and the Companies Act 2006.

The financial statements have been prepared on the historical cost basis.

Historical cost is generally based on the fair value of the consideration given in exchange for the goods and services.

As permitted by FRS 101, the company has taken advantage of some of the disclosure exemptions available under that standard. The key exemptions taken are as follows:

IAS 1 – Information on management of capital
IAS 7 – statement of cash flows
IAS 8 - disclosures in respect of new standards and interpretations that have been issued but are not yet effective
IAS 24 - disclosure of key management compensation and for related party disclosures entered into between two or more members of a group;
IAS 1 - the requirement to present roll forward reconciliations in respect of share capital and

Where required, the group financial statements of United Technologies Corporation are available to the public and can be obtained as set out in note 24.

The following IFRSs, IASs and IFRS IC interpretations and amendments have been issued but have not been early adopted by the company. The adoption of the below standards and amendments is not expected to have a material impact on the company's financial statements.

Effective for periods beginning on or after 1 January 2018:
IFRS 9 – Financial Instruments
IFRS 15 – Revenue from Contracts with Customers

Annual Improvements to IFRS Standards 2014-2016 cycle
IFRIC 22 – Foreign Currency Transactions and Advance Consideration
Effective from 1 January 2019:
IFRS 3 – Business Combinations – Annual Improvements 2015 -17 Cycle
IFRS 9 – Financial Instruments – Amendments to prepayment features with negative compensation and modifications of financial liabilities
IFRS 11 – Joint Arrangements – Annual Improvements 2015 -17 Cycle

Basis of accounting (continued)

IAS 12 – Income Taxes – Annual Improvements 2015 -17 Cycle
IFRS 16 – Leases
IAS 19 – Employee Benefits – Amendments to plan amendments, curtailments and settlements
IFRIC 2 – Uncertainty over Income Tax Treatments – Clarification of the accounting for uncertainties in income taxes
IAS 23 – Borrowing Costs – Annual Improvements 2015 -17 Cycle
IAS 28 – Investments in Associates and Joint Ventures – Amendments to Long-term interest in associates and joint ventures

Effective from 1 January 2020:
IAS 1 – Presentation of Financial Statements – Amendments to the definition of material
IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors - Amendments to the definition of material
IFRS 3 – Business Combinations – Amendments to clarify the definition of a business

Effective from 1 January 2021:
IFRS 17 – Insurance contracts
Deferred until further notice:
IFRS 10 – Consolidated Financial Statements – Amendments to the sale or contribution of assets between an investor and its associate or joint venture

Going concern

The Company's business activities, together with the factors likely to affect its future development, performance and position are set out in the strategic report.

The Company meets its day to day working capital requirements through a cash pooling arrangement which is centrally managed by UTC Parkview Treasury.

The company has net current liabilities due to amounts owed to its subsidiary undertakings, controlled by the company. The company has also obtained letters confirming that these amounts will not be recalled until the company has the ability to pay these and therefore the directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the annual financial statements.

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

The useful economic lives of intangible assets acquired separately are:

Software - 10 years

1. Accounting Policies (continued)

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

Property, plant and equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost. Depreciation on buildings is charged to the income statement.

Properties in the course of construction for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the company's accounting policy. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use. Freehold land is not depreciated.

Fixtures and equipment are stated at cost less accumulated depreciation and any recognised impairment loss.

Depreciation is provided on all tangible fixed assets, other than freehold land, at rates calculated to write off the cost of each asset, less any residual value, on a straight-line basis over its expected useful life, as follows:

Freehold buildings	2-5%
Long leasehold properties	2%
Short leasehold properties	Over the period of the lease
Plant and machinery	7.5% - 33.3%
Motor vehicles	20% - 25%
Equipment for hire	8% - 25%

Useful lives are reviewed, and adjusted if appropriate, at the end of every reporting period.

1. Accounting Policies (continued)

Impairment of tangible and intangible assets

At each balance sheet date, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

Inventories

Stocks are stated at the lower of cost and net realisable value. Cost includes materials, direct labour and an attributable proportion of manufacturing overheads based on normal levels of activity. Net realisable value is based on estimated selling price, less further costs expected to be incurred to completion and costs to be incurred in marketing, selling and distribution. Provision is made for obsolete, slow-moving or defective items where appropriate.

Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date. The tax currently payable is based on taxable profit for the year. Taxable profit differs from net

profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary

1. Accounting Policies (continued)

Taxation (continued)

difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited in other comprehensive income, in which case the deferred tax is also dealt with in other comprehensive income.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Current tax and deferred tax for the year

Current and deferred tax are recognised in the income statement, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and that the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, net of sales taxes, trade discounts and rebates and estimated customer returns. Revenue is only discounted where the impact of discounting is material. The implementation of IFRS 15 has not had any material impact on the recognition or disclosure of revenue.The business derives revenue from a number of streams and therefore uses a variety of methods for revenue recognition.

Sale of goods

Revenue from the sale of goods is recognised at a point in time. It is recognised when all performance obligations have been met and the risks and rewards of ownership have been transferred to the customer, the amount of revenue can be measured reliably and the recovery of the consideration is considered probable. For product sales with no installation requirements, revenue is recognised when the product is delivered to the customer in accordance with the agreed delivery terms. Where installation is also required, revenue on both the product and installation is recognised once the customer has confirmed its acceptance procedures.

1. Accounting Policies (continued)

Revenue (continued)

On-going service contracts

Revenue is recognised over time in equal instalments over the period that services are provided to the customer. Where amounts are received in advance of services being provided, the amounts are recorded as Deferred income and included as part of Creditors due within one year.

Specific activity service contracts

Where service contracts require the performance of a specific activity, revenue is recognised once this specific activity has been completed to the performance required by the customer.

Rental income

Rental income from operating leases is recognised on a straight line basis over the term of the relevant lease.

Dividend and interest income

Dividend income from investments is recognised when the shareholders' rights to receive payment have been established (provided that it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably).

Interest income is recognised when it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Pension costs

For defined contribution schemes the amount charged to the income statement in respect of pension costs and other post-retirement benefits is the contributions payable in the year. Differences between contributions payable in the year and contributions actually paid are shown as either accruals or prepayments in the balance sheet.

Foreign currency

The financial statements are presented in pounds sterling, which is the currency of the primary economic environment in which the Company operates (its functional currency).

Transactions in currencies other than the functional currency are recorded at the rate of exchange at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are reported at the rates of exchange prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognised in the income statement in the period in which they arise.

1. Accounting Policies (continued)

Leases

The company as lessee

Assets held under finance leases and other similar contracts, which confer rights and obligations similar to those attached to owned assets, are capitalised as tangible fixed assets and are depreciated over the shorter of the lease terms and their useful lives. The capital elements of future lease obligations are recorded as liabilities, while the interest elements are charged to the profit and loss account over the period of the leases to produce a constant rate of charge on the balance of capital repayments outstanding. Hire purchase transactions are dealt with similarly, except that assets are depreciated over their useful lives.

Rentals under operating leases are charged on a straight-line basis over the lease term, even if the payments are not made on such a basis. Benefits received and receivable as an incentive to sign an operating lease are similarly spread on a straight-line basis over the lease term.

The company as lessor

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Finance costs

As explained below, where financial liabilities are measured at amortised cost using the effective interest method, interest expense is recognised on an effective yield basis in the income statement within finance costs.

Finance costs which are directly attributable to the construction of tangible fixed assets are capitalised as part of the cost of those assets. The commencement of capitalisation begins when both finance costs and expenditures for the asset are being incurred and activities that are necessary to get the asset ready for use are in progress. Capitalisation ceases when substantially all the activities that are necessary to get the asset ready for use are complete.

All other borrowing costs are recognised in the income statement in the period in which they are incurred.

Financial instruments

Financial assets and financial liabilities are recognised in the Company's balance sheet when the Company becomes a party to the contractual provisions of the instrument.

Financial Assets

All financial assets are recognised and derecognised on a trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

1. Accounting Policies (continued)

Financial instruments (continued)

Financial Assets

Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Loans and receivables

Trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at each balance sheet date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For all other financial assets objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or

- default or delinquency in interest or principal payments; or

- it becoming probable that the borrower will enter bankruptcy or financial re-organisation.

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Company's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 60 days, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate. The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

1. Accounting Policies (continued)

Financial instruments (continued)

Impairment of Financial Assets (continued)

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Derecognition of financial assets

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities and equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

1. Accounting Policies (continued)

Financial instruments (continued)

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire.

Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions are discounted where the impact of discounting is material.

Restructurings

A restructuring provision is recognised when the Company has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

2. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in note 1 above, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Useful economic lives of properties, plant and equipment

The annual depreciation charge for property, plant and equipment is sensitive to changes in estimated useful economic lives of the assets. The useful lives of the assets are assessed on an annual basis and are amended when necessary to reflect current estimates. See note 12 for the carrying amount for the property, plant and equipment, and note 1 for the useful economic lives for each class of assets.

Inventory provisioning

The company carries a stock of spare parts that are used to maintain the rental fleet in the depot network. Assessments are made in terms of obsolescence for those parts as well as inventory holding levels when calculating the inventory provision. Additionally, the company holds a small amount of pumps and portable temperature control units for resale. These are subject to changing customer demand and technological change. As a result it is necessary to consider the recoverability of the cost of the resale inventory and the associated provisioning required. Management considers the nature and condition of this inventory, as well as applies assumptions around expected future demand for the inventory, when calculating the level of provisioning. See note 14 for the net carrying value of inventory and associated provision.

Impairment of Trade Receivables

The company makes an estimate of the recoverable value of trade and other debtors. When assessing impairment of trade and other receivables, management considers factors including the credit rating of the receivable, the age profile of the receivable and historic experience. See note 15 for the net carrying amount of the receivables and the associated impairment provision.

Dilapidation provision

The company operates out of a number of properties on commercial leases throughout the UK. As part of those lease agreements, there are varying requirements in keeping the properties in a good state before handing back to the landlord. The dilapidation provision is maintained and reviewed with that in mind and costs are estimated in respect of those expected to be incurred at the end of the lease agreements.

3. Revenue

An analysis of the Company's revenue is as follows:

	2018 £'000	2017 £'000
Continuing operations		
Sales of goods	2,122	1,664
Sales of services	40,440	27,334
Total revenue	42,562	28,998

An analysis of the Company's revenue by class of business is set out below:

	2018 £'000	2017 £'000
Revenue:		
Pumps & Power	23,731	21,550
Temperature Control	18,831	7,448
Other Income	-	-
	42,562	28,998

An analysis of the Company's revenue by geographical market is set out below.

	2018 £'000	2017 £'000
Revenue:		
United Kingdom	41,903	28,852
Continental Europe	566	93
North America	-	53
Africa	3	-
Asia	90	-
	42,562	28,998

4. Finance costs

	2018 £'000	2017 £'000
Interest payable:		
Other loans and payables	**(34)**	(41)
	(34)	(41)

Interest is payable on any funds owed to UTC Parkview Treasury which attracts a notional interest in relation to Bank of England base rates. Nil interest (2017: £nil) was received in the year due to the company being in a net borrowing position.

5. Profit before taxation

Profit before taxation is stated after charging/(crediting):

	2018 £'000	2017 £'000
Net foreign exchange losses	**5**	5
Depreciation of tangible fixed assets:		
- owned	**4,333**	3,124
Loss/(profit) on disposal of Plant, property and equipment	**(233)**	(211)
Operating lease charges	**2,784**	2,482
Impairment of inventory	**(20)**	30
Impairment of trade receivables	**232**	89
Amortisation of intangibles	**60**	62
Staff costs (see note 7)	**10,769**	8,695

Costs of operating leases are split £1.29m (2017: £1.111m) on property rental, £58k (2017: £27k) on machinery and £1.436m (2017: £1.344m) on vehicle leasing.

6. Auditors' remuneration

Fees payable to PricewaterhouseCoopers LLP and their associates for the audit of the company's annual financial statements were £40,000 (2017: £28,800).

7. Staff costs

The average monthly number of employees (including executive directors) was:

	2018 Number	2017 Number
Sales & Distribution	223	196
Admin	18	21
	241	217

Their aggregate remuneration comprised:

	2018 £'000	2017 £'000
Wages and salaries	9,496	7,664
Social security costs	963	759
Other pension costs (see note 22)	310	272
	10,769	8,695

'Other pension costs' includes only those items included within operating costs.

8. Directors' remuneration and transactions

	2018 £'000	2017 £'000
Directors' remuneration		
Emoluments	297	231
Company contributions to money purchase pension schemes	9	8
	306	239

	2018 Number	2017 Number
The number of directors who:		
Are members of a money purchase pension scheme	2	2

Directors' remuneration and transactions (continued)

	2018 £'000	2017 £'000
Remuneration of the highest paid director:		
Emoluments and amounts (excluding shares) under long term incentive schemes	**187**	135
Company contributions to money purchase pension schemes	**6**	4

9. Income tax expense

Tax expense included in profit or loss:

	2018 £'000	2017 £'000
Current tax		
Current tax on profits for the year	**814**	330
Adjustment in respect of prior years	**(147)**	
Total current tax	**667**	330
Deferred tax		
Current year	**198**	240
Adjustment in respect of previous periods	**(95)**	22
Effect of changes in tax rates	**(21)**	(28)
Total deferred tax (see note 17)	**82**	234
Total tax on profit on ordinary activities	**749**	564

Carrier Rental Systems (UK) Limited

Notes to the financial statements
For the year ended 31 December 2018

9. Income tax expense (continued)

Factors Affecting Total Tax Charge for the Current Period

The charge for the year can be reconciled to the profit in the profit and loss account as follows:

	2018 £'000	2017 £'000
Profit on ordinary activities before taxation	**5,210**	2,783
Tax on profit before taxation at standard UK corporation tax rate of 19.00% (2017: 19.25%)	990	535
Effects of:		
Expenses not deductible for tax purposes	22	35
Group relief for nil consideration	-	-
Re-measurement of deferred tax – changes in UK tax rates	(21)	(28)
Overseas tax rates	-	-
Adjustments to tax charge in respect of prior years	(242)	22
Total tax charge for the year	**749**	564

The reduction in the UK corporation tax rate from 20% to 19% (effective 1 April 2017) was substantively enacted on 26 October 2015. A further reduction to 17% (from 1 April 2020) was substantively enacted on 6 September 2016. The current tax rate used in the year ended 31 December 2018 is therefore 19% and the rate used for closing deferred tax balances is 17%.

10. Dividends on equity shares

Amounts recognised as distributions to equity holders in the year:

	2018 £'000	2017 £'000
Dividend for the year ended 31 December 2018 of £0.00 (2017:£0.00) per deferred share	-	-
	-	-

11. Intangible assets

Details of the Company's subsidiaries at 31 December 2018 are as follows. Unless otherwise indicated, all ownership interests are in the ordinary share capital of the investee.

Name	Country of registration	Registered Address	Proportion of ordinary shares held	Nature of business
Watkins Hire Limited	England and Wales	Unit B Colima Avenue, Sunderland SR5 3XE	100%	Rental of HVAC equipment
WHL 2013 Limited*	England and Wales	Unit B Colima Avenue, Sunderland SR5 3XE	100%*	Holding company
WHL 2013 Holdings Limited	England and Wales	Unit B Colima Avenue, Sunderland SR5 3XE	100%	Holding company

**Denotes an indirect holding*

The investments in subsidiaries are all stated at cost less provision for impairment.

14. Inventory

	2018 £'000	2017 £'000
Raw materials and consumables	1,239	1,169
Finished goods and goods for resale	462	251
	1,701	1,420

15. Trade and other receivables

Amounts falling due within one year:

	2018 £'000	2017 £'000
Trade receivables	13,386	7,629
Amounts due on construction contracts	-	-
Amounts owed by group undertakings	5,338	170
Amounts owed by subsidiary	-	281
Corporation Tax	230	-
Other receivables	1,052	409
Prepayments and accrued income	610	255
	20,616	8,744

Trade receivables are stated after provision for impairment of £621k (2017: £389k) and provision for credit notes £249k (2017: £136k).

Amounts owed by group undertakings are unsecured, interest free, have no fixed date of repayment and are repayable on demand. The exception being the funds held in UTC Parkview Treasury which earns a notional interest in relation to Bank of England base rates.

16. Creditors – amounts falling due within one year

	2018 £'000	2017 £'000
Trade creditors	**(1,631)**	(711)
Amounts owed to group undertakings	**(7,227)**	(3,562)
Amounts owed to subsidiary	**(69,840)**	(9)
Derivative financial instrument	**-**	(2)
Corporation tax	**-**	(588)
Other taxation and social security	**(997)**	(370)
Accruals and deferred income	**(3,949)**	(3,015)
	(83,644)	(8,257)

Amounts owed to group undertakings are unsecured, interest free, have no fixed date of repayment and are repayable on demand. The exception being the funds owed to UTC Parkview Treasury which attracts a notional interest in relation to Bank of England base rates.

17. Deferred tax asset

The analysis of deferred tax assets is as follows:

	2018 £'000	2017 £'000
Deferred tax assets due within 12 months	**-**	**18**
Deferred tax liabilities due within 12 months	**-**	**-**
Total asset due within 12 months	**-**	**18**
Deferred tax assets due after more than 12 months	**752**	**1,365**

Contracts for future capital expenditure not provided in the financial statements	**715**	797
	715	797

At the balance sheet date, the Company had outstanding commitments for future minimum lease payments under non-cancellable operating leases, which fall due as follows:

	2018 £'000	2017 £'000
Within one year	**2,417**	2,017
Between two and five years	**6,096**	5,567
After five years	**1,119**	1,605
	9,631	9,189

22. Retirement benefit schemes

Defined contribution schemes

The Company operates defined contribution retirement benefit schemes for all qualifying employees. The assets of the schemes are held separately from those of the Company in funds under the control of trustees. Where there are employees who leave the schemes prior to vesting fully in the contributions, the contributions payable by the Company are reduced by the amount of forfeited contributions.

The total cost charged to income of £310,000 (2017: £272,000) represents contributions payable to these schemes by the Company at rates specified in the rules of the plans. As at 31 December 2018, contributions of £67,000 (2017: £51,000) due in respect of the current reporting year had not been paid over to the schemes.

23. Related party transactions

During the year, the company entered into the following trading transactions with related parties:

	Sale of goods		Purchase of goods	
	2018	2017	**2018**	2017
	£'000	£'000	**£'000**	£'000
Toshiba Carrier UK Ltd	**135**	324	**145**	332

The following amounts were outstanding at the balance sheet date:

	Amounts owed to related parties	
	2018	**2017**
	£'000	**£'000**
Toshiba Carrier UK Ltd	**71**	**54**

Sales of goods to related parties were made at the company's usual list prices, less average discounts of 15 per cent. Purchases were made at market price discounted to reflect the quantity of goods purchased and the relationships between the parties.

The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received. No provisions have been made for doubtful debts in respect of the amounts owed by related parties.

24. Controlling party

The company's immediate parent undertaking is Carrier Rental Systems Limited, a company incorporated in England and Wales whose registered office is at Porsham Close, Belliver Industrial Estate, Plymouth, Devon PL6 7DB.

The company's ultimate parent undertaking and controlling party is United Technologies Corporation, a company incorporated in the United States of America.

United Technologies Corporation is the smallest and largest group to consolidate these financial statements.

Copies of the United Technologies Corporation group financial statements are publicly available and can be obtained from www.utc.com
