Forward-Looking Statements

Certain of the statements included in this Annual Report on Form 10-K constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as "expects," "believes," "anticipates," "includes," "plans," "assumes," "estimates," "projects," "intends," "should," "will," "shall" or variations of such words are generally part of forward-looking statements. Forward-looking statements are made based on management's current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. There can be no assurance that future developments affecting Prudential Financial, Inc. and its subsidiaries will be those anticipated by management. These forward-looking statements are not a guarantee of future performance and involve risks and uncertainties, and there are certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements, including, among others: (1) losses on investments or financial contracts due to deterioration in credit quality or value, or counterparty default; (2) losses on insurance products due to mortality experience, morbidity experience or policyholder behavior experience that differs significantly from our expectations when we price our products; (3) changes in interest rates, equity prices and foreign currency exchange rates that may (a) adversely impact the profitability of our products, the value of separate accounts supporting these products or the value of assets we manage, (b) result in losses on derivatives we use to hedge risk or increase collateral posting requirements and (c) limit opportunities to invest at appropriate returns; (4) guarantees within certain of our products which are market sensitive and may decrease our earnings or increase the volatility of our results of operations or financial position; (5) liquidity needs resulting from (a) derivative collateral market exposure, (b) asset/liability mismatches, (c) the lack of available funding in the financial markets or (d) unexpected cash demands due to severe mortality calamity or lapse events; (6) financial or customer losses, or regulatory and legal actions, due to inadequate or failed processes or systems, external events, and human error or misconduct such as (a) disruption of our systems and data, (b) an information security breach, (c) a failure to protect the privacy of sensitive data, (d) reliance on third-parties or (e) labor and employment matters; (7) changes in the regulatory landscape, including related to (a) financial sector regulatory reform, (b) changes in tax laws, (c) fiduciary rules and other standards of care, (d) U.S. state insurance laws and developments regarding group-wide supervision, capital and reserves, (e) insurer capital standards outside the U.S. and (f) privacy and cybersecurity regulation; (8) technological changes which may adversely impact companies in our investment portfolio or cause insurance experience to deviate from our assumptions; (9) an inability to protect our intellectual property rights or claims of infringement of the intellectual property rights of others; (10) ratings downgrades; (11) market conditions that may adversely affect the sales or persistency of our products; (12) competition; (13) reputational damage; (14) the costs, effects, timing, or success of our plans to accelerate our strategy; and (15) costs associated with the acquisition of Assurance IQ, Inc. and its integration into our strategy. Prudential Financial, Inc. does not undertake to update any particular forward-looking statement included in this document. See "Risk Factors" included in this Annual Report on Form 10-K for discussion of certain risks relating to our businesses and investment in our securities.

Throughout this Annual Report on Form 10-K, "Prudential Financial" and the "Registrant" refer to Prudential Financial, Inc., the ultimate holding company for all of our companies. "PICA" refers to The Prudential Insurance Company of America. "Prudential," the "Company," "we" and "our" refer to our consolidated operations.

Overview

Prudential Financial, Inc., a financial wellness leader and premier global investment manager with approximately \$1.551 trillion of assets under management as of December 31, 2019, has operations in the United States, Asia, Europe and Latin America. Through our subsidiaries and affiliates, we offer a wide array of financial products and services, including life insurance, annuities, retirement-related products and services, mutual funds and investment management. We offer these products and services to individual and institutional customers through proprietary and third-party distribution networks. Our principal executive offices are located in Newark, New Jersey, and Prudential Financial's Common Stock is publicly traded on the New York Stock Exchange under the ticker symbol "PRU".

On December 18, 2001, PICA converted from a mutual life insurance company owned by its policyholders to a stock life insurance company and became a wholly-owned subsidiary of Prudential Financial. The demutualization was carried out under PICA's Plan of Reorganization, which required us to establish and operate a regulatory mechanism known as the "Closed Block." The Closed Block includes certain in-force participating insurance and annuity products and corresponding assets that are used for the payment of benefits and policyholders' dividends on these products, as well as certain related assets and liabilities.

Our principal operations are comprised of PGIM (our global investment management business), our U.S. Businesses (consisting of our U.S. Workplace Solutions, U.S. Individual Solutions, and Assurance IQ divisions), our International Businesses, the Closed Block division and our Corporate and Other operations. The U.S. Workplace Solutions division consists of our Retirement and Group Insurance businesses, the U.S. Individual Solutions division consists of our Individual Annuities and Individual Life businesses, and the Assurance IQ division consists of our Assurance IQ business. In October 2019, we completed the acquisition of Assurance IQ, Inc. ("Assurance IQ"), a leading consumer solutions platform that offers a range of solutions that help meet consumers' financial needs (see Note 1 to the Consolidated Financial Statements for additional information). The Closed Block division is accounted for as a divested business that is reported separately from the Divested and Run-off Businesses that are included in Corporate and Other. Divested and Run-off Businesses are comprised of businesses that have been, or will be, sold or exited, including businesses that have been placed in wind down status that do not qualify for "discontinued operations" accounting treatment under generally accepted accounting principles in the United States of America ("U.S. GAAP"). Our Corporate and Other operations include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested or placed in run-off, excluding the Closed Block division. See Note 22 to the Consolidated Financial Statements for revenues, income and loss, and total assets by segment.

Our strategy centers on our mix of high-quality protection, retirement and investment management businesses which creates growth potential due to earnings diversification and the opportunity to provide customers with integrated cross-business solutions, as well as capital benefits from a balanced risk profile. We are well-positioned to meet the needs of customers and tap into significant market opportunities through PGIM, our U.S. Businesses and our International Businesses. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" for additional information.

PGIM

Provides asset management services related to public and private fixed income, public equity and real estate, commercial mortgage origination and servicing, and mutual funds and other retail services to institutional, private and sub-advisory clients (including mutual funds), insurance company separate accounts, government-sponsored entities (e.g., Fannie Mae, the Federal Housing Administration and Freddie Mac) and our general account.

Products

Our products and services are offered through the following eight businesses:

- <u>PGIM Fixed Income</u> provides global active asset management services across all public fixed income markets.
- <u>Jennison Associates</u> provides active fundamental public equity and fixed income asset management services across an array of high-quality fixed income and growth, value, blend, global and specialty equity strategies.
- QMA provides systematic quantitative equity and global multi-asset strategies as well as customized client solutions.
- <u>PGIM Private Capital</u> provides private corporate financing across the risk spectrum including investment grade, high yield and mezzanine, and offers a variety of products to its investors.
- <u>PGIM Real Estate Finance</u> provides commercial mortgage origination and asset management services.
- <u>PGIM Real Estate</u> provides a broad range of public and private real estate equity investment services utilizing deep knowledge of local and regional markets.
- <u>PGIM Investments</u> develops, distributes and services investment management products primarily utilizing PGIM's proprietary asset management expertise in the U.S. and European retail markets and offering a suite of retail investment products covering a wide array of investment styles and objectives.
- <u>PGIM Global Partners</u> operates an asset management business in Taiwan and India, and has interests in asset management operating joint ventures in China and Italy. Each of these businesses offers mutual funds and serves individual and institutional investors and clients.

We hold seed and co-investments in sponsored investment products that invest in a variety of asset classes, including private equity, hedge funds and real estate assets. Investments are generally made for co-investment purposes, to establish a track record or for regulatory purposes.

Marketing and Distribution

We primarily distribute products through the following channels:

<u>Institutional</u>

- Proprietary sales force of each PGIM business with independent marketing and client service teams.
- PGIM's Institutional Relationship Group, which develops relationships with, and introduces PGIM's broad capabilities to, large institutions globally.
- Institutional asset management services through the Retirement segment.

Retail

- Assets under management from distribution channels associated with other Prudential business segments.
- Third-party networks and product manufacturers/distributors who include our investment options in their products and platforms.
- Licensed sales professionals within Prudential Advisors, Prudential's proprietary nationwide sales organization.

General account

 Provide investment management services across a broad array of asset classes for our general account.

PGIM(Continued)

Revenues and Profitability

Our revenues primarily come from:

- Asset management fees which are typically calculated based upon a
 percentage of assets under management. In certain asset management
 arrangements, we also receive performance-based incentive fees when the return
 on the managed assets exceeds certain benchmark returns or other performance
 targets.
- Transaction fees earned as a percentage of the transaction price associated with the sale or purchase of assets in certain funds, primarily related to real estate and private fixed income.
- Investment returns from strategic investing.
- Revenues from commercial mortgage origination and servicing.

Our profitability is substantially impacted by:

- Macro market movements (e.g., interest rates and equity market performance).
- Our ability to achieve investment returns above the target benchmarks.
- Our ability to attract and retain customer investments.

Competition

We compete with numerous asset managers and other financial institutions. For our investment management products, we compete based on a number of factors, including investment performance, strategy and process, talent, organizational stability and client relationships.

We offer products across multiple asset classes, with specialized investment teams that employ approaches designed to add value in each product area or asset class. Our organizational stability and robust institutional and retail businesses have helped attract and retain talent critical to delivering investment results for clients. Our private placement and commercial mortgage businesses compete based on price, terms, execution and the strength of our relationship with the borrower.

U.S. Businesses—U.S. Workplace Solutions Division

Retirement

Develops and distributes retirement investment and income products and services to retirement plan sponsors in the public, private and not-for-profit sectors.

Products

We offer a variety of products and services through the following two businesses:

Full Service

- A broad range of products and services to assist in the design, delivery and administration of defined contribution, defined benefit and non-qualified retirement plans, and retail Individual Retirement Accounts ("IRA").
- Recordkeeping and administrative services, actuarial consulting services, tailored participant education and communication services, comprehensive investment offerings and consulting services to assist retirement plan sponsors in obligation to pay interest at a specified rate and to repay principal at maturity or managing fiduciary obligations.
- General Account and Separate Account Stable Value products generally contain an obligation to credit interest at a specified rate for a specified period of time and to repay account balances over time, or market value upon contract termination. These products are either fully or partially participating with annual or semi-annual rate resets subject to certain contractual minimums, giving effect to previous investment experience and other factors depending on the products.
- Other investment products include fee-based products through which customer funds are held in separate accounts, retail mutual funds, institutional funds or bank collective trusts advised by affiliated and non-affiliated investment managers, as well as synthetic guaranteed investment contracts, and guaranteed minimum withdrawal benefit products.

Institutional Investment Products

- Payout Annuities: products that provide a predictable source of monthly income, generally for the life of the annuitant.
- Pension risk transfer non-participating group annuity insurance contracts issued to pension plan sponsors under which we assume all investment and actuarial risk associated with a group of specified participants within a plan in return for a premium typically paid as a lump-sum at inception.
- · Pension risk transfer longevity reinsurance contracts with counterparties from which we earn a fee for assuming the longevity risk of pension plans that have been insured by third-parties. Premiums for these products are typically paid over the duration of the contract as opposed to a lump-sum at inception.

(continued)

Products (continued)

- Stable Value: products where our obligations are backed by our general account, and we bear some or all of the investment and asset-liability management risk, depending on the product.
- · Investment-only products for use in institutional capital markets and qualified plans primarily including fee-based wraps through which customers' funds are held in a client-owned trust and investment results pass through to the customer. We earn fee revenue for providing a minimum interest rate guarantee backed by the general account.
- Guaranteed Investment Contracts and Funding Agreements contain an following contract termination.
- Other products: include structured settlements and other group annuities.

Marketing and Distribution

We primarily distribute products through the following channels for the two businesses:

Full Service

- Proprietary sales and support teams
- Third-party financial advisors, brokers, benefits consultants, and investment consultants
- Direct to plan sponsors

Institutional Investment Products

- Pension risk transfer through actuarial consultants and third-party brokers.
- Structured settlements through third-party specialized brokers.
- Voluntary income products and other group annuities through the defined contribution portion of our full service business and direct to plan sponsors.
- Stable value products through proprietary sales force and third-party intermediaries.

Retirement (Continued)

Revenues and Profitability

Our revenues primarily come in the form of:

- Premiums associated with insurance and reinsurance contracts and our payout annuities.
- Policy charges and fee income associated with recordkeeping and other administrative services, and investment products (including fee-based stable value) that we offer. Policy charges and fee income are primarily based on account values and/or number of participants.
- Investment income (which contributes to the net spread over interest credited on certain stable value products and related expenses).

Our profitability is substantially impacted by our ability to appropriately price our products. We price our products based on pricing models that consider the investment environment and our risk, fees, expenses, profitability targets, and assumptions for mortality and potential for early retirement. These assumptions may be less predictable in certain markets. Deviations in actual experience from pricing could affect the profitability of these products.

Competition

We compete with other large, well-established insurance companies, asset managers, recordkeepers and diversified financial institutions.

<u>Full Service</u> - we compete primarily based on:

- Pricing
- Breadth of our service and investment offerings
- Expertise of our employees
- Investment performance
- Technology
- Our ability to offer product features to meet the retirement income needs of our clients

While we continue to have heightened pricing pressures (driven by competition, contractual limits on fee income, the influence of intermediaries and regulations requiring more standard and consistent fee disclosures across industry providers), this business has experienced strong persistency in recent years.

Institutional Investment Products - we compete primarily based on:

- Pricing
- Structuring capabilities
- Our ability to offer innovative product solutions and successfully execute large-scale transactions

We are a leader in providing innovative pension risk management solutions to plan sponsors and in the stable value market. We believe the pension risk transfer market continues to offer attractive opportunities that are aligned with our expertise.

U.S. Businesses-U.S. Workplace Solutions Division

Group Insurance

Develops and distributes a full range of group life, long-term and short-term group disability, and group corporate-, bank- and trust-owned life insurance in the U.S. primarily to institutional clients for use in connection with employee and membership benefits plans. Also sells accidental death and dismemberment and other ancillary coverages, and provides plan administrative services in connection with its insurance coverages.

Products

We offer a variety of products and services through the following two businesses:

Group Life Insurance

- Employer-paid and employee-paid coverages for term life insurance, group universal life, group variable universal life, basic and optional accidental death and dismemberment insurance.
- Many of our employee-paid coverages allow employees to retain their coverage when they change employers or retire, and we offer waiver of premium coverage where required premiums are waived in the event the insured suffers a qualifying disability.
- Group corporate-, bank- and trust-owned life insurance products in the form
 of group variable life insurance contracts utilizing separate accounts. These
 products are typically used by large corporations to fund deferred compensation
 plans and benefit plans for retired employees.

Group Disability Insurance

- Short-term and long-term group disability insurance which protects against
 loss of wages due to illness or injury. Short-term disability generally provides
 weekly benefits for three to six months while long-term disability benefits are
 typically paid monthly, following a waiting period and generally continue until
 the insured returns to work or reaches normal retirement age.
- Plan administration and absence management services.

Marketing and Distribution

We primarily distribute products through a proprietary sales force organized around market segments in conjunction with employee benefit brokers and consultants.

Group Insurance (Continued)

Revenues and Profitability

Our revenues primarily come in the form of:

- Premiums and policy charges for our group life and group disability products.
- Investment income (which contributes to the net spread over interest credited on our products and related expenses).

Our profitability is substantially impacted by our ability to appropriately price our products, many of which include multiple year premium rate guarantees. We price our products based on:

- Underwriting practices and rating systems that consider company, industry and/or other experience.
- The expected pay-out of benefits and other costs that we calculate using assumptions for mortality and morbidity rates, interest rates and expenses, depending upon the specific product features.

Competition

We compete with other large, well-established life and health insurance providers in mature markets. We compete primarily based on brand recognition, service capabilities, customer relationships, financial strength, range of product offerings and price. Pricing of group insurance products is reflective of the large number of competitors in the marketplace. The majority of our premiums are derived from large corporations, affinity groups or other organizations having over 5,000 insured individuals, which we refer to as the National segment. We are also seeking to grow our client base with institutions that have between 100 and 5,000 individuals, which we refer to as the Premier segment. Employee-paid coverage is important as employers attempt to control costs and shift benefit decisions and funding to employees who continue to value benefits offered at the workplace. Our profitability is dependent, in part, on the voluntary coverage marketplace, which will be affected by future employment and compensation rates.

U.S. Businesses—U.S. Individual Solutions Division Individual Annuities

Develops and distributes individual variable and fixed annuity products, primarily to U.S. mass affluent (households with investable assets or annual income in excess of \$100,000) and affluent (households with investable assets in excess of \$250,000) customers with a focus on innovative product design and risk management strategies.

Products

We offer a variety of products to serve different retirement needs and goals.

Variable Annuities

- The Prudential Premier® Retirement Variable Annuity with Highest Daily Lifetime Income ("HDI") offers lifetime income based on the highest daily account value plus a compounded deferral credit.
- Prudential Defined Income® ("PDI") Variable Annuity provides for guaranteed lifetime withdrawal payments, but restricts contractholder investment to a single bond sub-account within the separate accounts. PDI includes a living benefit rider which provides for a specified lifetime income withdrawal rate applied to total purchase payments made to the contracts, subject to annual roll-up increases until lifetime withdrawals commence, but does not have a highest daily benefit feature as discussed above.
- Prudential Premier[®] Investment Variable Annuity ("PPI") offers tax-deferred asset accumulation, annuitization options and an optional death benefit that guarantees the contractholder's beneficiary a return of total purchase payments made to the contract, adjusted for any partial withdrawals, upon death.
- Prudential Premier® Retirement Variable Annuity with Legacy Protection Plus ("LPP") provides an optional enhanced death benefit based on the purchase payments rolling up at a preset rate on an annual basis until certain events occur, such as the death of the first owner (or annuitant if entity-owned) or the roll-up cap is reached. LPP cannot be elected together with any of the other optional living or death benefits we offer.
- MyRockSM Advisors, a fee-based variable annuity launched in August 2019, offers
 an elective Defined Income Benefit ("DIB") rider which provides for specified lifetime
 income withdrawal rates applied to the purchase payments made to the contracts,
 subject to annual roll-up increases until lifetime withdrawals commence. In addition,
 the product offers both a basic death benefit, or a Return of Purchase Payment Death
 Benefit ("ROP"). Both the DIB and the ROP are available for an additional fee.

Fixed Annuities

• PruSecure® (launched in January 2018), and SurePathSM and SurePathSM Income (launched in July 2019), single premium fixed index annuities, offer flexibility to allocate account balances between an index-based strategy and a fixed rate strategy. The index-based strategy provides interest or an interest component linked to, but not an investment in, the selected index, and its performance over the elected term (i.e., 1, 3 or 5 years for PruSecure® and 1 or 3 years for SurePathSM and SurePathSM Income), subject to certain contractual minimums and maximums. The fixed rate strategy, not associated with an index, offers a guaranteed growth at a set interest rate for one year and can be renewed annually. (continued)

Products (continued)

Fixed Annuities (continued)

Additionally, SurePathSM Income offers a benefit which provides for guaranteed lifetime withdrawal payments.

• Prudential Immediate Income Annuity ("PIIA"), a single premium immediate annuity, provides a regular stream of benefit payments. The payments are guaranteed and cannot be changed, and are higher than those guaranteed on products that provide liquidity.

Marketing and Distribution

Our distribution efforts, which are supported by a network of internal and external wholesalers, are executed through a diverse group of distributors including:

- Third-party broker-dealers
- Banks and wirehouses
- Independent financial planners
- Financial professionals, including those associated with Prudential Advisors, Prudential's proprietary nationwide sales organization
- Independent Marketing Organizations ("IMO") (specifically for SurePathSM and SurePathSM Income)
- LINK by Prudential, a direct-to-consumer advisory platform, that connects to customers, with the help of insurance professionals, through various channels (online, phone, video chat, or in person)

Individual Annuities (Continued)

Revenues and Profitability

Our revenues primarily come in the form of:

- Fee income from asset management fees, as well as service fees, representing administrative service and distribution fees from many of our proprietary and non-proprietary mutual funds. The asset management fees are determined as a percentage of the average assets of our proprietary mutual funds in our variable annuity products (net of sub-advisory expenses related to non-proprietary sub-advisors).
- Policy charges and fee income representing mortality, expense and other fees for various insurance-related options and features based on the average daily net asset value of the annuity separate accounts, account value, premium, or guaranteed value, as applicable.
- Investment income (which contributes to the net spread over interest credited on certain of our products and related expenses).

Our profitability is substantially impacted by our ability to appropriately price our products. We price our products based on:

- An evaluation of the risks assumed and consideration of applicable risk management strategies, including hedging and reinsurance costs.
- Assumptions regarding investment returns and contractholder behavior, including persistency (the probability that a contract will remain in force), benefit utilization and the timing and efficiency of withdrawals for contracts with living benefit features, as well as other assumptions.

Competition

We are among the industry's largest providers of individual annuities and we compete with other providers of retirement savings and accumulation products, including large, well-established insurance and financial services companies. We believe our competitive advantage lies primarily in our innovative product features and our risk management strategies as well as brand recognition, financial strength, the breadth of our distribution platform and our customer service capabilities.

U.S. Businesses—U.S. Individual Solutions Division Individual Life

Develops and distributes variable life, universal life and term life insurance products primarily to U.S. mass middle (households with investable assets in excess of \$25,000 or annual income in excess of \$50,000), mass affluent (households with investable assets or annual income in excess of \$100,000) and affluent (households with investable assets in excess of \$250,000) customers with a focus on providing life insurance solutions to protect individuals, families and businesses and to support estate and wealth transfer planning.

Products

We offer a variety of products that serve different protection needs and goals.

Variable Life - permanent coverage for life with potential to accumulate policy cash value based on underlying investment options

- Our variable life policies offer flexibility in how much and when the policyholder pays premiums and the potential to accumulate cash value through a choice of over 50 underlying investment options or a fixed rate option.
- We offer three types of variable life policies that, in addition to the death benefit, are tailored to prioritize different goals such as protection with moderate risk, growth with higher risk or legacy giving.

Universal Life - permanent coverage for life with the potential to accumulate policy cash value

- Our universal life policies offer flexibility in how much and when the
 policyholder pays premiums and the potential to accumulate cash value in an
 account that earns interest based on a crediting rate determined by the Company
 subject to contractual minimums.
- Guaranteed universal life policies provide a guarantee that the policy will remain in force when it would otherwise lapse due to insufficient cash value.
- Indexed universal life policies provide interest credited to the cash value that is linked to, but not an investment in, the S&P 500[®] index performance over a 1-year period subject to certain participation rates and contractual minimums/maximums.

Term Life - coverage for a specified number of years with a guaranteed taxadvantaged death benefit

- Most of our term life policies offer an income tax-free death benefit, guaranteed premiums that will stay the same during the level-premium period and access to the death benefit while the policyholder is still alive to help them if they become terminally ill.
- Most of our term life policies offer a conversion option that allows the
 policyholder to convert the policy into a permanent policy that can potentially
 cover the insured for life.

Marketing and Distribution

Our distribution efforts, which are supported by a network of internal and external wholesalers, are executed through a diverse group of distributors including:

- Third-party distribution
 - · Independent brokers
 - · Banks and wirehouses
 - · General agencies and producer groups

Prudential Advisors

- Prudential's proprietary nationwide sales organization that distributes
 Prudential life insurance, annuities and investment products with proprietary and non-proprietary investment options as well as select insurance, annuities and investment products from other carriers.
- Offers certain retail brokerage and retail investment advisory services (through our dually registered broker-dealer and investment advisor, Pruco Securities, LLC) including brokerage accounts, discretionary and nondiscretionary investment advisory programs and financial planning services.
- Continues to execute a solutions-oriented business model centered around client relationships, while strengthening and driving Prudential's brand promise across the country.
- Receives a market based allowance from other Prudential business segments for distributing their products which is eliminated between the segments in consolidation.
- <u>LINK by Prudential</u>, a direct-to-consumer advisory platform, that connects to customers, with the help of insurance professionals, through various channels (online, phone, video chat, or in person).

Individual Life (Continued)

Revenues and Profitability

Our revenues primarily come in the form of:

- Premiums that are fixed or flexible in accordance with the terms of the policies.
- Policy charges and fee income consisting of in-force policy- and/or assetbased fees.
- Investment income (which contributes to the net spread over interest credited on our products and related expenses).

Our profitability is substantially impacted by our ability to appropriately price our products. We price our products based on:

 Our assumptions of mortality and morbidity, persistency, interest rates, expenses, premium payment patterns, separate account fund performance, product generated tax deductions, as well as the level, cost and availability of financing for certain statutory reserves.

Competition

We compete with other large, well-established life insurance companies in a mature market. We compete primarily based on price, service, including the speed and ease of underwriting, distribution channel relationships, brand recognition and financial strength. Due to the large number of competitors, pricing is competitive. We periodically adjust product prices and features based on the market and our strategy, with a goal of managing our Individual Life business for steady, consistent sales growth across a balanced product portfolio and to avoid over-concentration in any one product type.

U.S. Businesses—Assurance IQ Division Assurance IQ

Assurance IQ leverages data science and technology to distribute third-party life, health, Medicare and property and casualty products directly to retail shoppers primarily through its digital and independent agent channels. Additionally, Assurance IQ may help customers fulfill financial wellness needs by matching them with other product providers or intermediaries.

Products

Assurance IQ primarily distributes the following products:

- <u>Life</u> third-party life insurance products including term life, final expense, and whole life protection. Some carriers' products allow for accelerated underwriting to enable faster policy placement.
- <u>Health Under 65</u> third-party primary and supplemental health insurance that cover an individual's medical and prescription expenses, including product coverage provided under the Affordable Care Act.
- <u>Medicare</u> third-party Medicare Supplement and Medicare Advantage for qualifying Medicare beneficiaries.
- <u>Property and Casualty</u> third-party auto and home insurance coverage that indemnifies customers for loss caused by accidents, theft, natural disasters and other events where property damage or financial loss may occur.

Marketing and Distribution

The Assurance IQ business model relies primarily on digital marketing and data science to reach prospective customers ("shoppers") to, in turn, drive traffic to its distribution platform. Digital marketing includes traffic from various sources such as search, email, and social media. To a lesser extent, we also use traditional forms of marketing such as print and TV.

We primarily distribute products through the following four channels:

- On Demand Agents Commission-based, independent agents are located across the United States. They work remotely, and collectively are licensed to sell various products in all 50 states.
- <u>Third-Party Agent Call Centers</u> Assurance IQ may contract with licensed agent call centers as a means of serving shoppers, especially during periods of peak shopper demand (e.g., Medicare annual election period in the fourth quarter).
- <u>Digital</u> Shoppers can price and purchase many of Assurance IQ's offerings completely online, without the involvement of an agent.
- <u>Third-Party Case Referrals</u> Assurance IQ transfers shoppers in the form of calls, clicks and leads to selected marketing partners, including when it does not have a distribution agreement that would allow it to meet a shopper's specific need.

Assurance IQ (Continued)

Revenue

Our revenues primarily come in the form of:

- Commissions received from product manufacturers.
- Case referral revenues earned from marketing partners related to the transfer of calls, clicks or leads.

Competition

We compete with large and small life, health and property and casualty retail distributors, third-party brokers, as well as other FinTech and Insurtech companies. We compete based on several factors, including marketing reach and effectiveness, ability to effectively match shoppers to the right products and solutions using data science, our capacity to meet shoppers' demands, and the quality of our technology platform, which optimizes the customer experience and enables independent agents to efficiently service shoppers.

International Businesses

Develops and distributes life insurance, retirement products and certain accident and health products with fixed benefits to the mass affluent and affluent customers through our Life Planner operations in Japan, Korea, Taiwan, Brazil, Argentina and Mexico. Also provides similar products to the broad middle income and mass affluent customers across Japan, our joint ventures in Chile, Malaysia, India and Indonesia, and our strategic investment in Ghana through multiple distribution channels including banks, independent agencies and Life Consultants associated with our Gibraltar Life and Other operations.

Products

Our products are classified into the following four categories:

<u>Life Insurance Protection Products</u> - include various traditional whole life products that provide either level or increasing coverage, and that offer limited or lifetime premium payment options. We also offer increasing, decreasing and level benefit term insurance products that provide coverage for a specified time period, as well as protection-oriented variable universal life products. Some of these protection products are denominated in U.S. dollars and some are sold as bundled products which, in addition to death protection, include health benefits or savings elements.

Retirement Products - include retirement income products which combine insurance protection similar to term life with a lifetime income stream which commences at a predefined age, savings-oriented variable universal life products which provide a non-guaranteed return linked to an underlying investment portfolio of equity and fixed income funds selected by the customer, and endowments which provide payment of the face amount on the earlier of death or policy maturity.

Annuity Products - primarily represented by U.S. dollar- and Australian dollar-denominated fixed annuities sold by our Gibraltar Life operations in Japan, and Korean won- and U.S. dollar-denominated variable annuities sold by our Life Planner operation in Korea. Sales and surrenders of non-yen products in Japan can be sensitive to foreign currency relationships which are impacted by, among other things, the comparative interest rates in the respective countries. Most of our fixed annuity products impose a market value adjustment if the contract is not held to maturity.

Accident and Health Products - provide benefits to cover accidental death and dismemberment, hospitalization, surgeries, and cancer and other dread diseases, often sold as supplementary riders and not as stand-alone products. We also offer waiver of premium coverage where required premiums are waived in the event the customer suffers a qualifying disability.

Marketing and Distribution

Proprietary agent models:

- Life Planners focuses on selling protection-oriented life insurance products on a needs basis to mass affluent and affluent customers, as well as retirement-oriented products to small businesses. We believe that our recruiting and selection process, training programs and compensation packages are key to the Life Planner model and have helped our Life Planner operations achieve higher levels of agent retention, agent productivity and policy persistency.
- Life Consultants is a proprietary distribution force for products offered by our Gibraltar Life operations. Their focus is to provide individual protection products to the broad middle income market, primarily in Japan, particularly through relationships with affinity groups. Our Life Consultant operation is based on a variable compensation plan designed to improve productivity and persistency that is similar to compensation plans in our Life Planner operations.

Third-party channels:

- Bank Distribution Channel sells primarily life insurance products intended to provide savings features, premature death protection and estate planning benefits as well as fixed annuity products primarily denominated in U.S. dollars and Australian dollars. We view the bank distribution channel as an adjunct to our core Life Planner and Life Consultant distribution channels. A significant portion of our sales in Japan through our bank distribution channel are derived through a single Japanese mega-bank; however, we have relationships with each of Japan's four largest banks as well as many regional banks, and we continue to explore opportunities to expand our distribution capabilities through this channel, as appropriate.
- Independent Agency Distribution Channel sells protection products and high cash value products for retirement benefits through the corporate market and also sells a variety of other products including protection and fixed annuity products through the individual market. Our focus is to maintain a diverse mix of independent agency relationships including corporate agencies and other independent agencies with a balanced focus on individual and corporate markets.

International Businesses (Continued)

Revenues and Profitability

Our revenues primarily come in the form of:

- Premiums that are fixed or flexible in accordance with the terms of the policies.
- Policy charges and fee income consisting of in-force policy- and/or assetbased fees.
- Investment income (which contributes to the net spread over interest credited on our products and related expenses).

Our profitability is substantially impacted by our ability to appropriately price our products. We price our products based on:

- Local regulation that is generally more restrictive for product offerings, pricing and structure than U.S. insurance regulation. Each international insurance operation has its own underwriting department that employs variations of U.S. practices in underwriting individual policy risks. To the extent permitted by local regulation, we base premiums and policy charges for our products on expected death and morbidity benefits, surrender benefits, expenses, required reserves, interest rates, policy persistency and premium payment patterns. In setting underwriting limits, we also consider local industry standards to prevent adverse selection and to stay abreast of industry trends. In addition, we set underwriting limits together with each operation's reinsurers.
- Achieving a targeted rate of return for each country operation, taking into account the country-specific costs of capital, risks, and competitive environment. The profitability of our products is impacted by differences between actual mortality, morbidity, expense, and investment experience and the related assumptions used in pricing these policies. As a result, the profitability of our products can fluctuate from period to period. Changes in local tax laws may also affect profitability.

Competition

The life insurance markets in Japan and Korea are mature and pricing is competitive. Rather than competing primarily based on price, we generally compete on the basis of customer service, including our needs-based approach to selling, the quality and diversity of our distribution capabilities, and our financial strength. Demographic trends in Asia suggest an increasing opportunity for product innovation, introducing insurance products that allow for savings and income as a growing portion of the population prepares for retirement. The ability to sell through multiple and complementary distribution channels is also a competitive advantage; however, competition for sales personnel, as well as access to third-party distribution channels, is intense.

Corporate and Other

Includes corporate items and initiatives that are not allocated to our business segments and businesses that have been or will be divested or placed in run-off, except for the Closed Block. Results of the Closed Block, along with certain related assets and liabilities, are reported separately from the Divested and Run-off Businesses included in Corporate and Other.

Corporate Operations - consist primarily of: (1) capital that is not deployed in any business segment; (2) investments not allocated to business segments, including debt-financed investment portfolios, and tax credit and other tax-enhanced investments financed by business segments; (3) capital debt that is used or will be used to meet the capital requirements of the Company and the related interest expense; (4) our qualified and non-qualified pension and other employee benefit plans, after allocations to business segments; (5) corporate-level activities, after allocations to business segments, including strategic expenditures, acquisition costs, corporate governance, corporate advertising, philanthropic activities, deferred compensation, and costs related to certain contingencies and enhanced regulatory supervision; (6) expenses associated with the multi-year plan of programs that span across our businesses and the functional areas that support those businesses; (7) our ownership interest in a life insurance joint venture in China; (8) certain retained obligations relating to pre-demutualization policyholders; (9) our Risk Appetite Framework; (10) the foreign currency income hedging program used to hedge certain non-U.S. dollar denominated earnings in our International Businesses segment; (11) intercompany arrangements with our PGIM segment to translate certain non-U.S. dollar-denominated earnings at fixed currency exchange rates; and (12) transactions with and between other segments, including the elimination of intercompany transactions for consolidation purposes.

Divested and Run-off Businesses - reflect the results of businesses that have been, or will be, sold or exited, including businesses that have been placed in wind down status that do not qualify for "discontinued operations" accounting treatment under U.S. GAAP. We exclude these results from our adjusted operating income. Divested and Run-off Businesses include:

- Long-Term Care in 2012, we discontinued sales of our individual and group long-term care insurance products. We establish reserves for these products in accordance with U.S. GAAP. We use best estimate assumptions as of the most recent loss recognition date when establishing reserves for future policyholder benefits and expenses, including assumptions for morbidity, mortality, mortality improvement, persistency, expenses and investment returns. Our assumptions also include our estimate of the timing and amount of anticipated future premium rate increases and policyholder benefit reductions which will require approval by state regulatory authorities.
- Other recent transactions include: (1) in 2019, we sold our Pramerica of Italy subsidiary; (2) in 2018, we sold our Pramerica of Poland subsidiary; and (3) in 2018, we exited our PGIM Brazil operations including the sale of our minority interest in a Brazilian asset management joint venture.

Closed Block Division

In connection with the demutualization in 2001, we ceased offering domestic participating individual life insurance and annuity products, under which policyholders are eligible to receive policyholder dividends reflecting experience. The liabilities for our individual in-force participating products were segregated, together with assets to be used exclusively for the payment of benefits and policyholder dividends, expenses and taxes with respect to these products, in the Closed Block. We selected the amount of assets that were expected to generate sufficient cash flow, together with anticipated revenues from the Closed Block policies, over the life of the Closed Block to fund payments of all policyholder benefits, expenses and taxes, and to provide for the continuation of the policyholder dividend scales in effect in 2000, assuming experience underlying such scales continued. No policies sold after demutualization have been added to the Closed Block, and its in-force business is expected to decline as we pay policyholder benefits in full.

The results of the Closed Block, along with certain related assets and liabilities, are treated as a divested business under our definition of adjusted operating income and reported separately from the other Divested and Run-off Businesses that are included in our Corporate and Other.

As discussed in Note 15 to the Consolidated Financial Statements, if the performance of the Closed Block is more or less favorable than we originally assumed in funding, total dividends paid to Closed Block policyholders in the future may be greater or less than the total dividends that would have been paid to these policyholders if the policyholder dividend scales in effect in 2000 had been continued. Any experience in excess of amounts assumed may be available for distribution over time to Closed Block policyholders as part of policyholder dividends unless offset by future Closed Block experience that is less favorable than expected. This excess experience will not be available to shareholders. If the Closed Block has insufficient funds to make guaranteed policy benefit payments, such payments will be made from PICA's assets outside of the Closed Block. A policyholder dividend obligation liability is established for any excess experience. Each year, the Board of Directors of PICA determines the dividends payable on participating policies for the following year based on the experience of the Closed Block, including investment income, net realized and unrealized investment gains and losses, mortality experience and other factors. See Note 22 to the Consolidated Financial Statements for revenues, income and loss, and total assets of the Closed Block division.

Our strategy is to maintain the Closed Block as required by our Plan of Reorganization over the time period of its gradual diminution as policyholder benefits are paid in full. We are permitted under the Plan of Reorganization, with the prior consent of the Commissioner of Banking and Insurance for the State of New Jersey, to enter into agreements to transfer all or any part of the risks under the Closed Block policies.

Seasonality of Key Financial Items

The following chart summarizes our key areas of seasonality in our results of operations:

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
PGIM	Higher compensation expense(1)			Other related revenues tend to be higher(2)
Retirement	Reserve gains higher(3)	Reserve gains higher(3)	Reserve gains lower(3)	Reserve gains lower(3)
Group Insurance	Lowest underwriting gains			
Individual Annuities				
Individual Life	Lowest underwriting gains		Highest underwriting gains	
Assurance IQ	Lowest revenue			Higher revenue driven by annual Medicare enrollment
International Businesses	Highest premiums	Lowest premiums		
Corporate & Other	Higher compensation expense(1)			
All Businesses		Impact of annual assumption update(4)		Higher expenses(5)

⁽¹⁾ Long-term compensation expense for retirement eligible employees is recognized when awards are granted, typically in the first quarter of each year.

⁽²⁾ Other related revenues include incentive fees, transaction fees, strategic investing results and commercial mortgage revenues.

⁽³⁾ Reserve gains are typically higher/lower than the quarterly average. Exclude the impact of annual reviews and update of assumptions and other refinements and market experience updates.

⁽⁴⁾ Impact of annual reviews and update of assumptions and other refinements. Excludes PGIM and Assurance IQ.

⁽⁵⁾ Expenses are typically higher than the quarterly average in the fourth quarter.

Reinsurance

We regularly enter into reinsurance agreements as either the ceding entity or the assuming entity. As a ceding entity, exposure to the risks reinsured is reduced by transferring certain rights and obligations of the underlying insurance product to a counterparty. As an assuming entity, exposure to the risks reinsured is increased by assuming certain rights and obligations of the underlying insurance products from a counterparty. We enter into reinsurance agreements as the ceding entity for a variety of reasons but primarily to reduce exposure to loss, reduce risk volatility, provide additional capacity for future growth and for capital management purposes. Under ceded reinsurance, we remain liable to the underlying policyholder if a third-party reinsurer is unable to meet its obligations. On a Company-wide basis, we evaluate the financial condition of reinsurers and monitor the concentration of counterparty risk and maintain collateral, as appropriate, to mitigate this exposure. We enter into reinsurance agreements as the assuming entity as part of our normal product offerings (e.g., certain pension risk transfer products in the Retirement segment) or in order to facilitate an acquisition of a block of business.

The following table summarizes our use of reinsurance in each of our insurance reporting segments.

Segment	Primary type of reinsurance	Purpose
Retirement	Assumed	Assumed reinsurance as part of our longevity reinsurance pension risk transfer product and in conjunction with our 2004 acquisition of CIGNA's defined benefit and defined contribution business.
Group Insurance	Ceded	Ceded reinsurance on most products to limit losses from large claims, in response to client requests and for capital management purposes.
Individual Annuities	Ceded/Assumed	Ceded reinsurance with both third-party reinsurers and affiliates. The third-party reinsurance includes the following products: • A portion of HDI v.3.0 variable annuity business issued between April 1, 2015 to
		 December 31, 2016; and Certain fixed indexed annuity business (specifically for PruSecure® and SurePathSM) issued effective October 15, 2019. Under U.S. GAAP, this agreement is accounted for under deposit accounting.
		Assumed reinsurance in conjunction with our 2006 acquisition of The Allstate Corporation ("Allstate") variable annuity business as well as internal ceded and assumed reinsurance as part of our risk and capital management activities.
Individual Life	Ceded/Assumed	Ceded reinsurance with both third-party reinsurers and affiliates covering a variety of products to mitigate mortality risk and for capital management purposes. On policies sold since 2000, we have reinsured a significant portion of our mortality risk externally, with that portion varying over time depending on market factors and strategic objectives.
		Assumed reinsurance in conjunction with our 2013 acquisition of The Hartford's individual life insurance business.
International Businesses	Ceded	Ceded reinsurance with both third-party reinsurers and affiliates to mitigate mortality and morbidity risk for certain products and for capital management purposes.
Closed Block	Ceded	PICA cedes substantially all of the outstanding liabilities of the Closed Block into a statutory guaranteed separate account of a wholly-owned subsidiary, Prudential Legacy Insurance Company of New Jersey ("PLIC"), primarily on a coinsurance basis. The reinsurance transaction provides a long-term and comprehensive capital framework for the Closed Block.

Intangible and Intellectual Property

We capture and protect the innovation in our financial services products by applying for federal business method patents and implementing trade secret controls, as appropriate. We also use numerous federal, state, common law and foreign servicemarks, including in particular "Prudential", the "Prudential logo", our "Rock" symbol and "PGIM". We believe that the value associated with many of our patents and trade secrets, and the goodwill associated with many of our servicemarks are significant competitive assets.

Since 2004, we have had an agreement with Prudential plc of the United Kingdom ("U.K."), with whom we have no affiliation, concerning the parties' respective rights worldwide to use the names "Prudential" and "Pru." Since 2019, the agreement has also included M&G plc of the U.K., the parent of The Prudential Assurance Company Limited, following its demerger from Prudential plc. The agreement restricts use of the "Prudential" and "Pru" name and mark in a number of countries outside the Americas, including Europe and most parts of Asia. Where these limitations apply, we combine our "Rock" symbol with alternative word marks. We believe that these limitations do not materially affect our ability to operate or expand internationally.

Regulation

Overview

Our businesses are subject to comprehensive regulation and supervision. The purpose of these regulations is primarily to protect our customers and the overall financial system and not necessarily our shareholders or debt holders. Many of the laws and regulations to which we are subject are regularly re-examined. Existing or future laws and regulations may become more restrictive or otherwise adversely affect our operations or profitability, increase compliance costs, or increase potential regulatory exposure. In recent years we have experienced, and expect to continue to experience, extensive changes in the laws and regulations, and regulatory frameworks applicable to our businesses in the U.S. and internationally. We cannot predict how current or future initiatives will further impact existing laws, regulations and regulatory frameworks.

In our international businesses, regulations may apply heightened requirements to non-domestic companies, which can reduce our flexibility as to intercompany transactions, investments and other aspects of business operations and adversely affect our liquidity and profitability. In some instances, regulators of a particular country may impose different, or more rigorous laws and requirements than in the U.S. or other countries to protect customers or their financial system from perceived systemic risk, including regulations governing privacy, consumer protection, employee protection, corporate governance and capital adequacy. In addition, certain of our international operations face political, legal, operational and other risks that we do not face in the U.S., including the risk of discriminatory regulation, labor issues in connection with independent contractor or franchisee status, workers' associations and trade unions, nationalization or expropriation of assets, price controls and currency exchange controls or other restrictions that limit our ability to transfer funds from these operations out of the countries in which they operate or to convert local currencies we hold into U.S. dollars or other currencies. Some jurisdictions in which we operate joint ventures restrict our maximum percentage of ownership, which exposes us to additional operational, compliance, legal and joint venture partner risks and limits our array of potential remedies in the event of a breach by a partner.

The primary regulatory frameworks applicable to the Company are described further below under the following section headings:

- Dodd-Frank Wall Street Reform and Consumer Protection Act
 - Rescission of Designation
 - Initiatives Regarding Dodd-Frank and Financial Regulation
- ERISA
- · Fiduciary Rules and other Standards of Care
- U.S. State Insurance Holding Company Regulation
- U.S. Insurance Operations
 - State Insurance Regulation
 - U.S. Federal and State Securities Regulation Affecting Insurance Operations
 - U.S. Federal and State Health Insurance Plan Regulation
- International Insurance Regulation
- U.S. Investment and Retirement Products and Investment Management Operations
- U.S. Securities and Commodity Operations
- International Investment and Retirement Products and Investment Management Operations
- Derivatives Regulation
- Privacy and Cybersecurity Regulation
- Anti-Money Laundering and Anti-Bribery Laws
- Environmental Laws and Regulations
- · Unclaimed Property Laws
- Taxation
 - U.S. Taxation
 - International Taxation
- International and Global Regulatory Initiatives

Several of our domestic and foreign regulators participate in an annual supervisory college facilitated by the New Jersey Department of Banking and Insurance ("NJDOBI"). The purpose of the supervisory college is to promote ongoing supervisory coordination, facilitate the sharing of information among regulators and enhance each regulator's understanding of the Company's risk profile. The most recent supervisory college was held in October 2019.

Existing and future accounting rules may also impact our results of operations or financial condition. For a discussion of accounting pronouncements and their potential impact on our business, including Accounting Standards Update ("ASU") 2018-12, Financial Services - Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts, see Note 2 to the Consolidated Financial Statements.

Dodd-Frank Wall Street Reform and Consumer Protection Act

Rescission of Designation

In October 2018 the Financial Stability Oversight Council (the "Council") rescinded the Company's designation as a non-bank financial company (a "Designated Financial Company") subject to supervision by the Board of Governors of the Federal Reserve System ("FRB") under the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank"). As a result of the Council's rescission of the Company's Designated Financial Company status, the Company is no longer subject to supervision and examination by the FRB or to the prudential standards applicable to Designated Financial Companies under Dodd-Frank. Accordingly, the Company will no longer incur FRB supervisory fees or certain consulting and other costs associated with FRB supervision.

The Council maintains the authority to designate entities, including the Company, for FRB supervision if it determines that either (i) material financial distress at the entity, or (ii) the nature, scope, size, scale, concentration, interconnectedness, or mix of the entity's activities, could pose a threat to domestic financial stability. The Company continues to believe it does not meet the standards for designation.

Initiatives Regarding Dodd-Frank and Financial Regulation

In November 2017, the U.S. Department of the Treasury released a report titled "Financial Stability Oversight Council Designations," with recommendations on the Council's standards and processes for the designation and continued designation of Designated Financial Companies. In addition, in October 2017, the U.S. Department of the Treasury released a report titled "A Financial System That Creates Economic Opportunities - Asset Management and Insurance" which recommended, among other things, that primary federal and state regulators should focus on potential systemic risks arising from products and activities, and on implementing regulations that strengthen the asset management and insurance industries as a whole, rather than focus on an entity-based regulatory regime. The report also affirmed the role of the U.S. state-based system of insurance regulation. In December 2019 FSOC adopted interpretive guidance regarding Designated Financial Company determinations. The guidance describes the approach FSOC intends to take in prioritizing its work to identify and address potential risks to U.S. financial stability using an activities-based approach, and enhancing the analytical rigor and transparency in the processes FSOC intends to follow if it were to consider making a Designated Financial Company determination. From time to time Congress has also introduced legislation which if enacted, would amend certain provisions of Dodd-Frank, including by requiring the Council to prioritize the use of an activities-based approach to mitigate identified systemic risks.

We cannot predict whether the Treasury reports, interpretive guidance, new legislation or other initiatives aimed at revising Dodd-Frank and regulation of the financial system will ultimately form the basis for changes to laws or regulations impacting the Company.

ERISA

The Employee Retirement Income Security Act ("ERISA") is a comprehensive federal statute that applies to U.S. employee benefit plans sponsored by private employers and labor unions. Plans subject to ERISA include pension and profit sharing plans and welfare plans, including health, life and disability plans. ERISA provisions include reporting and disclosure rules, standards of conduct that apply to plan fiduciaries and prohibitions on transactions known as "prohibited transactions," such as conflict-of-interest transactions and certain transactions between a benefit plan and a party in interest. ERISA also provides for civil and criminal penalties and enforcement. Our insurance, investment management and retirement businesses provide services to employee benefit plans subject to ERISA, including services where we may act as an ERISA fiduciary. In addition to ERISA regulation of businesses providing products and services to ERISA plans, we become subject to ERISA's prohibited transaction rules for transactions with those plans, which may affect our ability to enter transactions, or the terms on which transactions may be entered,

with those plans, even in businesses unrelated to those giving rise to party in interest status.

Fiduciary Rules and Other Standards of Care

The Company and our distributors are subject to rules regarding the standard of care applicable to sales of our products and the provision of advice to our customers. In recent years, many of these rules have been revised or reexamined, as described below. We cannot predict whether any proposed or new amendments to the existing regulatory framework will ultimately become applicable to our businesses. Any new standards issued by the U.S. Department of Labor ("DOL"), the Securities and Exchange Commission ("SEC"), the National Association of Insurance Commissioners ("NAIC") or state regulators may affect our businesses, results of operations, cash flows and financial condition.

DOL Fiduciary Rules

In June 2018, a Fifth Circuit Court of Appeals decision became effective that vacated rules issued by the DOL that redefined who would be considered a "fiduciary" for purposes of transactions with qualified plans, plan participants and Individual Retirement Accounts ("IRAs"), and generally provided that investment advice to a plan participant or IRA owner would be treated as a fiduciary activity. Prior to being vacated, the rules adversely impacted sales in our annuities and retirement businesses and resulted in increased compliance costs. We cannot predict whether the DOL will issue any new fiduciary rules or what impact they would have on the Company.

SEC Best Interest Regulation

In June 2019, the SEC adopted a package of rulemakings and interpretative guidance that, among other things, requires broker-dealers to act in the best interest of retail customers when recommending securities transactions or investment strategies to them. The guidance also clarifies the SEC's views of the fiduciary duty that investment advisers owe to their clients. The new best interest standards will become effective on June 30, 2020. We are evaluating the impacts of the new standards and have begun to implement them. We believe that the new standards will apply to recommendations to purchase certain products offered by our PGIM, Retirement, Individual Annuities and Individual Life businesses, and will result in increased compliance costs, in particular in our Prudential Advisors distribution system, which we include in the results of our Individual Life segment.

U.S. State Standard of Care Regulation

In February 2020, the NAIC adopted revisions to the model suitability rule applicable to the sale of annuities. The revised model regulation states the insurance salesperson must act "without placing the producer's or the insurer's financial interest ahead of the consumer's interest." The model rule will become applicable to us as it is adopted in each state. In addition, certain state regulators and legislatures have adopted or are considering adopting best interest standards. For example, in July 2018, the New York State Department of Financial Services ("NY DFS") issued an amendment to its suitability regulations which imposes a best-interest standard on the sale of annuity and life insurance products in New York. The amendments became effective for annuity products on August 1, 2019 and for life insurance products on February 1, 2020, and the Company has taken steps we believe are necessary to comply with the rules. In addition, in October 2018 the New Jersey Bureau of Securities issued a proposal that would impose a fiduciary standard on all New Jersey investment professionals.

Japan Standard of Care Regulation

Outside the U.S., in 2017 the Japanese Financial Services Agency ("FSA") announced the "Principles of Fiduciary Duty," a set of recommended general principles for businesses to adopt when performing client related financial services. The principles have been adopted by The Prudential Life Insurance Company Ltd. ("Prudential of Japan"), Gibraltar Life, and Prudential Gibraltar Financial Life Insurance Company, Ltd. ("PGFL"). The FSA encourages voluntary adoption of these fiduciary principles as a best practice, but adoption is not required by regulation. Companies' policies regarding their fiduciary duties can be tailored based on their specific business, such as target clients and complexity of products. Once companies adopt the principles and establish a policy, they are required to implement measures to ensure their employees fulfill their fiduciary duties, and periodically assess the measures' effectiveness.

U.S. State Insurance Holding Company Regulation

We are subject to the insurance holding company laws in the states where our insurance subsidiaries are domiciled, which currently include New Jersey, Arizona, Connecticut and Indiana, or are treated as commercially domiciled, such as New York. These laws generally require each insurance company directly or indirectly owned by the holding company to register with the insurance department in the insurance company's state of domicile and to furnish annually financial and other information about

the operations of companies within the holding company system, including an assessment of the group's risk management and current and future solvency position. Generally, all transactions affecting the insurers in the holding company system must be fair and reasonable and, if material, require prior notice and approval or non-disapproval by the state's insurance department.

Change of Control

Most states, including the states in which our U.S. insurance companies are domiciled, have insurance laws that require regulatory approval of a direct or indirect change of control of an insurer or an insurer's holding company. Laws such as these that apply to us prevent any person from acquiring control of Prudential Financial or of our insurance subsidiaries unless that person has filed a statement with specified information with the insurance regulators and has obtained their prior approval. Under most states' statutes, acquiring 10% or more of the voting stock of an insurance company or its parent company is presumptively considered a change of control, although such presumption may be rebutted. Accordingly, any person who acquires 10% or more of the voting securities of Prudential Financial without the prior approval of the insurance regulators of the states in which our U.S. insurance companies are domiciled will be in violation of these states' laws and may be subject to injunctive action requiring the disposition or seizure of those securities by the relevant insurance regulator or prohibiting the voting of those securities and to other actions determined by the relevant insurance regulator. In addition, many state insurance laws require prior notification to state insurance departments of a change in control of a non-domiciliary insurance company doing business in that state.

Group-Wide Supervision

NJDOBI acts as the group-wide supervisor of Prudential Financial pursuant to New Jersey legislation that authorizes group-wide supervision of internationally active insurance groups ("IAIGs"). The law, among other provisions, authorizes NJDOBI to examine Prudential Financial and its subsidiaries, including by ascertaining the financial condition of the insurance companies for purposes of assessing enterprise risk. In accordance with this authority, NJDOBI receives information about the Company's operations beyond those of its New Jersey domiciled insurance subsidiaries.

Additional areas of focus regarding group-wide supervision of insurance holding companies include the following:

- Group Capital Calculation. The NAIC has formed a working group to develop a U.S. group capital calculation using a risk-based capital ("RBC") aggregation methodology. In constructing the calculation, the working group is considering group capital developments undertaken by the FRB and the International Association of Insurance Supervisors ("IAIS"). The working group field tested a proposed calculation in 2019, and may seek to adopt a final version in 2020.
- *Macroprudential Framework*. The NAIC has established a new initiative to develop a macroprudential framework intended to: (1) improve state insurance regulators' ability to monitor and respond to the impact of external financial and economic risks on insurers; (2) better monitor and respond to risk emanating from or amplified by insurers that might be transmitted externally; and (3) increase public awareness of NAIC/state monitoring capabilities regarding macroprudential trends. As part of this initiative, the areas identified by the NAIC for potential enhancement include liquidity reporting and stress testing, resolution and recovery, capital stress testing, and counterparty exposure and concentration. The NAIC is currently developing a liquidity stress testing framework.
- Examination. State insurance departments conduct periodic examinations of the books and records, financial reporting, policy filings and market conduct of insurance companies domiciled in their states, generally once every three to five years. Examinations are generally carried out in cooperation with the insurance departments of other states under guidelines promulgated by the NAIC. As group-wide supervisor, NJDOBI, along with our other insurance regulators, has expanded the periodic examinations to cover Prudential and all of its subsidiaries. In June 2018, NJDOBI, along with the insurance regulators of Arizona, Connecticut and Indiana, completed their first global consolidated group-wide examination of Prudential and its subsidiaries for the five-year period ended December 31, 2016 and had no reportable findings.

We cannot predict what, if any, additional requirements and compliance costs any new group-wide standards will impose on Prudential Financial.

U.S. Insurance Operations

State insurance laws regulate all aspects of our U.S. insurance businesses. State insurance departments in the fifty states, the District of Columbia and various U.S. territories and possessions monitor our insurance operations. PICA is domiciled in New Jersey and its principal insurance regulatory authority is the NJDOBI. Our other U.S. insurance companies are principally regulated

by the insurance departments of the states in which they are domiciled. Generally, our insurance products must be approved by the insurance regulators in the state in which they are sold. Our insurance products are substantially affected by federal and state tax laws.

State Insurance Regulation

State insurance authorities have broad administrative powers with respect to all aspects of the insurance business including: (1) licensing to transact business; (2) licensing agents; (3) admittance of assets to statutory surplus; (4) regulating premium rates for certain insurance products; (5) approving policy forms; (6) regulating unfair trade and claims practices; (7) establishing reserve requirements and solvency standards; (8) fixing maximum interest rates on life insurance policy loans and minimum accumulation or surrender values; (9) regulating the type, amounts and valuations of investments permitted; (10) regulating reinsurance transactions, including the role of captive reinsurers; and (11) other matters.

State insurance laws and regulations require our U.S. insurance companies to file financial statements with state insurance departments everywhere they do business in accordance with accounting practices and procedures prescribed or permitted by these departments. The operations of our U.S. insurance companies and accounts are subject to examination by those departments at any time.

Financial Regulation

Dividend Payment Limitations. New Jersey insurance law and the insurance laws of the other states in which our insurance companies are domiciled regulate the amount of dividends that may be paid by PICA and our other U.S. insurance companies. See Note 16 to the Consolidated Financial Statements for additional information.

Risk-Based Capital. We are subject to RBC requirements that are designed to enhance regulation of insurers' solvency. The RBC calculation, which regulators use to assess the sufficiency of an insurer's statutory capital, measures the risk characteristics of a company's assets, liabilities and certain off-balance sheet items. In general, RBC is calculated by applying factors to various asset, premium, claim, expense and reserve items. Within a given risk category, these factors are higher for those items with greater underlying risk and lower for items with lower underlying risk. Insurers that have less statutory capital than required are considered to have inadequate capital and are subject to varying degrees of regulatory action depending upon the level of capital inadequacy.

Areas of the RBC framework that have recently been subject to reexamination or revision include the following:

- Bond Factors. The NAIC's Investment Risk-Based Capital Working Group is developing updates to the RBC factors for invested assets including expanding, for RBC purposes, the current NAIC designations from six to twenty.
- Longevity/Mortality Risk. The NAIC's Longevity Risk Subgroup of the Life Insurance and Annuities Committee and Financial Condition Committee is developing recommendations to recognize longevity risk in statutory reserves and/or risk-based capital related to annuities. The Company assumes this longevity risk primarily in its Retirement and Individual Annuities businesses. The NAIC is also developing updates to the existing mortality risk factors in RBC. In 2019 the American Academy of Actuaries issued a report at the request of the NAIC recommending implementation of a new longevity risk factor concurrently with a correlation adjustment for mortality risk.
- Operational Risk. In 2018, the NAIC adopted operational risk charges that became effective for year-end 2018 RBC formulas and is continuing to consider whether to add an explicit growth risk charge to the RBC formula. The operational risk charges did not materially impact our 2018 RBC ratios given that we hold statutory capital consistent with or in excess of the thresholds established through these new charges.

Due to the ongoing nature of the NAIC's activities regarding RBC, we cannot determine the ultimate timing of the proposed changes or their impact on RBC or on our financial position.

Insurance Reserves and Regulatory Capital. State insurance laws require us to analyze the adequacy of our reserves annually. The respective appointed actuaries for each of our life insurance companies must each submit an opinion that our reserves, when considered in light of the assets we hold with respect to those reserves, make adequate provision for our contractual obligations and related expenses.

The reserving framework for certain of our products and the regulatory capital requirements applicable to our business have

undergone reexamination and revision in recent years, including in the following areas:

• Principle-Based Reserving for Life Insurance Products. In 2016, the NAIC adopted a principle-based reserving approach for life insurance products. Principle-based reserving replaces the reserving methods for life insurance products for which the former formulaic basis for reserves may not accurately reflect the risks or costs of the liability or obligations of the insurer. The principle-based reserving approach had a three-year phase-in period. Principle-based reserving will not affect reserves for policies in force prior to January 1, 2017.

The Company has introduced updated versions of its individual life products in conjunction with the requirement to adopt principle-based reserving by January 1, 2020. These updated products are currently priced to support the principle-based statutory reserve level without the need for reserve financing. Certain elements of the implementation of principle-based reserving are yet to be finalized by the NAIC and may have a material impact on statutory reserves. The Company continues to assess the impact of the implementation of principle-based reserving on projected statutory reserve levels, product pricing and the use of financing.

- Variable Annuities Framework for Change. In 2019, the NAIC adopted final revisions to the Valuation Manual (VM-21), Actuarial Guideline 43 ("AG 43"), and risk-based capital instructions to implement a new variable annuity statutory framework for 2020. Changes include: (i) aligning economically-focused hedge assets with liability valuations; (ii) reforming standard scenarios for AG 43 and C3 Phase II; and (iii) standardizing capital market assumptions and aligning total asset requirements and reserves. The Company does not expect material impacts to target capital levels from the revised framework. The NAIC is considering further changes to the Valuation Manual for future years.
- New York Variable Annuity and Life Insurance Product Reserves. As a result of an agreement with the NY DFS regarding our reserving methodologies for certain variable annuity and life insurance products, certain of our New York licensed insurance subsidiaries hold additional statutory reserves on a New York basis, which reduces their New York statutory surplus. None of our U.S. operating insurance companies are domiciled in New York, and these changes do not impact statutory reserves reported in our insurance subsidiaries' states of domicile, or any states other than New York, and therefore do not impact RBC ratios; however, the agreed reserve methodologies may require us to increase our additional New York statutory reserves in the future. If we were required to establish material additional reserves on a New York statutory accounting basis or post material amounts of additional collateral with respect to annuity or insurance products, our ability to deploy capital held within our U.S. domestic insurance subsidiaries for other purposes could be affected.
- Reinsurance. In 2019, the NAIC's Statutory Accounting Principles Working Group revised the statutory accounting rules regarding reinsurance credit with respect to the risk transfer requirements for yearly renewable term reinsurance agreements. The Company does not expect the revisions to have a material impact on reinsurance credit for yearly renewable term reinsurance in the group life insurance business.

The NAIC's Life Actuarial Task Force is also evaluating changes to its Valuation Manual in respect of yearly renewable term reinsurance. Certain changes currently under consideration could adversely impact statutory reserve credit. The NAIC has adopted interim changes effective in 2020 that are expected to adversely impact statutory reserve credit for yearly renewable term reinsurance related to our individual life insurance products being reserved using a principle-based approach though the final Valuation Manual revisions are still being developed.

During 2019 the NAIC approved revisions to the Credit for Reinsurance Model Law and Credit for Reinsurance Model Regulation to make the models consistent with the provisions of the U.S.'s bilateral covered agreements with the European Union ("E.U.") and United Kingdom ("U.K.") with respect to reinsurance collateral requirements. The revisions eliminate reinsurance collateral requirements applicable to E.U. and U.S. reinsurers meeting certain minimum requirements. The revisions also eliminate the requirements to maintain a local presence to do business in the E.U. or U.K. or post collateral in any E.U. jurisdiction or the U.K. The amended model law will become applicable to the Company as it is adopted by each domiciliary state. Each E.U. jurisdiction and the U.K. must also enact the provisions of the covered agreements into local law/regulation.

• Surplus Notes. The NAIC's Statutory Accounting Principles Working Group is evaluating changes to the accounting rules regarding surplus notes with linked assets. This change could result in the classification of the surplus notes as debt instead of surplus and require linked assets to be treated as non-admitted assets. These changes

would materially adversely impact the statutory financial position of the Company's captive reinsurance subsidiaries that use credit-linked note structures to finance Regulation XXX and Guideline AXXX reserves. During 2019 the working group approved a data call to obtain surplus note financing information from insurers.

Captive Reinsurance Companies.

We use captive reinsurance subsidiaries to finance the portion of the statutory reserves for term and universal life policies that we consider to be non-economic for policies written prior to the implementation of principle-based reserving. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Capital—Financing Activities—Term and Universal Life Reserve Financing" for a discussion of our life product reserves and reserve financing.

Market Conduct Regulation

State insurance laws and regulations include numerous provisions governing the marketplace activities of insurers, including provisions governing the form and content of disclosure to consumers, illustrations, advertising, sales practices and complaint handling. State regulatory authorities generally enforce these provisions through periodic market conduct examinations.

Long-Term Care Rate Regulation

During 2019 the NAIC established a new Long-Term Care Insurance Task Force under the Executive Committee. It is charged with (1) developing a consistent national approach for reviewing long-term care insurance rates that result in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization, and (2) ensuring consumers are provided with meaningful options to modify their contract benefits in situations where the premiums are no longer affordable due to rate increases. The task force has in turn identified several workstreams regarding these and other related issues, including guaranty funds and reserving. We cannot predict whether this initiative will ultimately result in changes to the regulations applicable to our long-term care business, or how those changes will impact the Company.

Data and Underwriting

During 2019 the NAIC Big Data Working Group began reviewing accelerated or non-traditional underwriting models and predictive elements in the context of life insurance. In 2019 the NAIC also formed the Accelerated Underwriting Working Group, which is charged with studying key issues and, if appropriate, drafting guidance for states. It will review insurers' use of external data and data analytics in accelerated underwriting.

Insurance Guaranty Association Assessments

Each state has insurance guaranty association laws under which insurers doing business in the state are members and may be assessed by state insurance guaranty associations for certain obligations of insolvent insurance companies to policyholders and claimants. Typically, states assess each member insurer in an amount related to the member insurer's proportionate share of the business written by all member insurers in the state. Many states offer a reimbursement of such assessments in the form of credits against future years' premium taxes. For the years ended December 31, 2019, 2018 and 2017, we paid \$2 million, \$2.3 million and \$12.6 million, respectively, in assessments pursuant to state insurance guaranty association laws. The 2017 assessments reflected the Penn Treaty Network America Insurance Company insolvency, which liquidated on March 1, 2017. While we cannot predict the amount and timing of future assessments on our U.S. insurance companies under these laws, we have established estimated reserves totaling approximately \$31 million as of December 31, 2019, for future assessments relating to insurance companies that are currently subject to insolvency proceedings including Penn Treaty Network America Insurance Company, Executive Life of California and Lincoln Memorial Life Insurance Company.

In 2017, the NAIC approved amendments to the Life and Health Insurance Guaranty Association Model Act to address issues relating to long-term care insurance-related insolvencies. The amendments will spread costs from future long-term care insurance-related insolvencies across the entire health and life insurance industry, resulting in increased assessments for life insurers. The amended model law will become applicable to us as it is adopted by each state. Prior insolvencies will not be included under these amendments. Given our current market share of the impacted lines of business, we expect our cost related to future insolvencies, net of premium tax credits available under current state laws, would be a small percentage of the gross industry liability.

U.S. Federal and State Securities Regulation Affecting Insurance Operations

Our variable life insurance, variable annuity and mutual fund products generally are "securities" within the meaning of federal securities laws and may be required to be registered under the federal securities laws and subject to regulation by the SEC and the Financial Industry Regulatory Authority ("FINRA"). Certain of our insurance subsidiaries are subject to SEC public reporting and disclosure requirements based on offerings of these products. Federal and some state securities regulation similar to that discussed below under "—Investment Products and Investment Management Operations" and "—Securities and Commodities Regulation" affect investment advice, sales and related activities with respect to these products.

Our mutual funds, and in certain states our variable life insurance and variable annuity products, are also "securities" within the meaning of state securities laws. As securities, these products are subject to filing and certain other requirements. Also, sales activities with respect to these products generally are subject to state securities regulation. Such regulation may affect investment advice, sales and related activities for these products.

Federal Insurance Office

Dodd-Frank established a Federal Insurance Office ("FIO") within the Department of the Treasury headed by a director appointed by the Secretary of the Treasury. While the FIO does not have general supervisory or regulatory authority over the business of insurance, the FIO director performs various functions with respect to insurance, including serving as a non-voting member of the Council, monitoring the insurance sector and representing the U.S. on prudential aspects of international insurance matters, including at the IAIS.

U.S. Federal and State Health Insurance Plan Regulation

The Patient Protection and Affordable Care Act ("PPACA") and The Health Care and Education Reconciliation Act (together, the "Affordable Care Act"), as well as state insurance laws, include numerous provisions governing the marketing and sale of health insurance plans. Congress from time to time considers health care reform that could decrease or increase the attractiveness of health insurance products sold by Assurance IQ, or have an unfavorable or favorable effect on our ability to earn revenues from sales of these products.

International Insurance Regulation

Our international insurance operations are principally supervised by regulatory authorities in the jurisdictions in which they operate, including the Japanese Ministry of Finance and the Japanese FSA, the financial services regulator in Japan. In addition to Japan, we operate insurance companies in Argentina, Bermuda, Brazil, Korea, Mexico and Taiwan, and have insurance operations in China, India, Indonesia and Malaysia through joint ventures, and in Ghana through a strategic investment. The insurance regulatory bodies for these businesses typically oversee such issues as: (1) company licensing; (2) the licensing of insurance sales staff; (3) insurance product approvals; (4) sales practices; (5) claims payment practices; (6) permissible investments; (7) solvency and capital adequacy; and (8) insurance reserves, among other items. In some jurisdictions, for certain products, regulators will also mandate premium rates (or components of pricing) or minimum guaranteed interest rates. Periodic examinations of insurance company books and records, financial reporting requirements, market conduct examinations and policy filing requirements are among the techniques used by these regulators to supervise our non-U.S. insurance businesses. Finally, insurance regulatory authorities in the various jurisdictions in which our insurance companies are domiciled, including Japan, must approve any change of control of Prudential Financial or the insurance companies organized under their laws.

Solvency Regulation

In order to monitor insurers' solvency, regulatory authorities in the jurisdictions in which we operate outside the U.S. generally establish some form of minimum solvency requirements for insurance companies, similar in concept to the RBC ratios that are employed by U.S. insurance regulators. These solvency ratios are used by regulators to assess the sufficiency of an insurer's capital and claims-paying ability and include the impact of transactions with affiliated entities. Certain jurisdictions require the disclosure of solvency ratios to the public. Insurers that have lower solvency ratios than the regulators require are considered to have inadequate capital and are subject to varying degrees of regulatory action depending upon the level of capital inadequacy.

Japan Capital and Solvency Regulation. Our Japan insurance operations are subject to a capital standard known as the Solvency Margin Ratio framework ("SMR"). This standard prescribes the manner in which an insurance company's capital is calculated and is meant to respond to changes in financial markets, improve risk management practices of insurers and consider risks associated with the insurer's subsidiaries. In 2016, 2018 and 2019, the FSA conducted a field test of a potential market based alternative to the SMR framework that closely aligned with components of the IAIS' Risk-based Global Insurance Capital Standard ("ICS"), which is described below under "—Other International and Global Regulatory Initiatives." The FSA will continue to explore potential alternatives or revisions to the existing SMR framework. We cannot predict whether changes to the SMR will

be adopted, or if they will result in additional capital requirements and compliance costs.

Korea Accounting Standards, Capital and Solvency Regulation. In 2017, the International Accounting Standards Board ("IASB") released a new International Financial Reporting Standard ("IFRS") for accounting for insurance contracts, which will apply to our operations in Korea and certain other jurisdictions. The new IFRS was initially scheduled to go into effect in 2021; however, in 2018 the IASB deferred the effective date to 2022. Korea's Financial Supervisory Service ("FSS") and Financial Services Commission ("FSC") announced plans to enhance the liability adequacy test ("LAT") in June 2017 as part of its adoption effort. The enhancements require life insurers to set aside additional policy reserves in phases to support the transition to IFRS, which is expected to lead to an increase in the level of reserves insurers must hold. In October 2019, the FSC decided to further defer the implementation of enhanced LAT requirements. However, the FSC is requiring insurers to set aside reserves equal to the deferred LAT reserve requirements which will prevent insurers from paying out these reserves as a dividend. In Japan, changes in IFRS do not currently impact our operations as they are not required to report under IFRS.

Our Korea insurance operation is subject to RBC requirements that are based in part on financial statements prepared in accordance with current accounting requirements. In 2017, 2018 and 2019, the FSS conducted a field test of a potential market based alternative to the RBC framework that closely aligned with components of the IAIS' ICS. The FSS will continue to explore potential alternatives or revisions to the existing RBC framework with the intention of implementing changes in parallel with its implementation of the new IFRS standards for accounting for insurance contracts. We cannot predict whether changes to the RBC framework will ultimately be adopted, or if they will result in additional capital requirements and compliance costs.

Dividend Payment Limitations

The insurance regulatory bodies in some of the countries where our international insurance businesses are located regulate the amount of dividends that they can pay to shareholders. See Note 16 to the Consolidated Financial Statements for additional information regarding the ability of our international subsidiaries to pay dividends to Prudential Financial.

Insurance Guaranty Fund Assessments

Certain of our international insurance operations, including those in Japan, may be subject to assessments, generally based on their proportionate share of business written in the relevant jurisdiction, for certain obligations of insolvent insurance companies to policyholders and claimants. As we cannot predict the timing of future assessments, they may materially affect the results of operations of our international insurance operations in particular quarterly or annual periods. Under the Japanese insurance guaranty law, all licensed life insurers in Japan are required to be members of and are assessed, on a pre-funded basis, by the Japan Policyholders Protection Corporation ("PPC"). These assessments generate a collective fund which is used to satisfy certain obligations of insolvent insurance companies to policyholders and claimants. The PPC assesses each member in an amount related to its proportionate share of new business written by all member insurers. For the years ended December 31, 2019, 2018 and 2017, we paid approximately \$23 million, \$22 million and \$21 million, respectively, based on fixed currency exchange rates, in assessments pursuant to Japanese insurance guaranty association laws.

U.S. Investment and Retirement Products and Investment Management Operations

Our investment products and services are subject to federal and state securities, fiduciary, including ERISA, and other laws and regulations. The SEC, FINRA, the Commodity Futures Trading Commission ("CFTC"), National Futures Association ("NFA"), state securities commissions, state banking and insurance departments and the DOL are the principal U.S. regulators that regulate our investment management operations. In some cases our domestic U.S. investment operations are also subject to non-U.S. securities laws and regulations.

Some of the separate account, mutual fund and other pooled investment products offered by our businesses, in addition to being registered under the Securities Act, are registered as investment companies under the Investment Company Act of 1940, as amended, and the shares of certain of these entities are qualified for sale in some states and the District of Columbia. Separate account investment products are also subject to state insurance regulation as described above. We also have several subsidiaries that are registered as broker-dealers under the Securities Exchange Act of 1934 ("Exchange Act"), as amended, and are subject to federal and state regulation. In addition, we have subsidiaries that are investment advisers registered under the Investment Advisers Act of 1940, as amended. Our third-party advisors and licensed sales professionals within Prudential Advisors and other employees, insofar as they sell products that are securities, are subject to the Exchange Act and to examination requirements and regulation by the SEC, FINRA and state securities commissioners. Regulation and examination requirements also extend to various Prudential entities that employ or control those individuals.

Congress from time to time considers pension reform legislation that could decrease or increase the attractiveness of certain

of our retirement products and services to retirement plan sponsors and administrators, or have an unfavorable or favorable effect on our ability to earn revenues from these products and services. Over time, these changes could hinder our sales of defined benefit pension products and services and cause sponsors to discontinue existing plans for which we provide investment management, administrative, or other services, but could increase the attractiveness of certain products we offer in connection with pension plans.

In December 2019, Congress enacted the Setting Every Community up for Retirement Enhancement ("SECURE") Act. The SECURE Act is expected to help promote retirement plan coverage by expanding access to and use of Multiple Employer Plans; facilitate access to lifetime income disclosures for plan participants to better understand how their retirement savings translate into monthly lifetime income in retirement; improve upon the current annuity selection safe harbor; and provide lifetime income portability. The SECURE Act made significant changes to provisions of existing law governing retirement plans and IRAs. These changes, which involve both ERISA and the Internal Revenue Code, include:

- increasing the required minimum distribution age from 70 ½ to 72;
- allowing contributions to traditional IRAs after attaining age 70 ½;
- allowing up to \$5,000 of withdrawals from a defined contribution plan or IRA for the birth or adoption of a child;
- allowing completely unrelated small employers to participate in an open Multiple Employer Plan;
- facilitating portability of lifetime income products held in retirement plans;
- requiring defined contribution plans to provide an annual lifetime income disclosure;
- limiting the ability of plan and IRA beneficiaries to stretch benefits over their life; and
- creating a statutory safe harbor in ERISA for a retirement plan's selection of an annuity provider.

Some of the changes in law made by the SECURE Act are complex and unclear in application. Moreover, many of the provisions were effective on January 1, 2020, while other provisions are effective on later dates, including some that are not effective until action is taken to modify underlying retirement plan documents. We cannot predict what impact the SECURE Act will ultimately have on our businesses.

Finally, Federal and state banking laws also generally require regulatory approval for a change in control of Prudential Financial, Prudential Bank & Trust, FSB ("PB&T") or Prudential Trust Company. The U.S. federal securities laws could also require reapproval or consent by customers of our investment advisory contracts upon a change of control, including for mutual funds included in variable annuity products.

U.S. Securities and Commodity Operations

We have subsidiaries that are broker-dealers, investment advisers, commodity pool operators or commodity trading advisers. The SEC, the CFTC, state securities authorities, FINRA, the NFA, the Municipal Securities Rulemaking Board, and similar authorities are the principal regulators of these subsidiaries.

Our broker-dealer and commodities affiliates are members of, and are subject to regulation by, "self-regulatory organizations," including FINRA and the NFA. Self-regulatory organizations conduct examinations of, and have adopted rules governing, their members. In addition, state securities and certain other regulators have regulatory and oversight authority over our registered broker-dealers. Broker-dealers and their sales forces in the U.S. and in certain other jurisdictions are subject to regulations that cover many aspects of the securities business, including sales methods and trading practices. The regulations cover the suitability of investments for individual customers, use and safekeeping of customers' funds and securities, capital adequacy, recordkeeping, financial reporting and the conduct of directors, officers and employees. The SEC, CFTC and other governmental agencies and self-regulatory organizations, as well as state securities commissions in the U.S. and non-U.S. regulatory agencies, have the power to conduct administrative proceedings that can result in censure, fine, the issuance of cease-and-desist orders or suspension, termination or limitation of the activities of a broker-dealer, an investment adviser or commodities firm or its employees. Our U.S. registered broker-dealer subsidiaries are subject to federal net capital requirements that may limit the ability of these subsidiaries to pay dividends to Prudential Financial.

International Investment and Retirement Products and Investment Management Operations

Our non-insurance international operations are supervised primarily by regulatory authorities in the countries in which they operate. We operate investment-related businesses in, among other jurisdictions, Japan, Taiwan, the U.K., Ireland, Hong Kong, Mexico, Germany, Luxembourg, China and Singapore, and participate in investment-related joint ventures in India, Italy and China and a retirement related joint venture in Chile. These businesses may provide products such as investment management products and services, mutual funds, separately managed accounts and retirement products. The regulatory authorities for these businesses typically oversee such issues as: (1) company licensing; (2) the licensing of investment product sales staff; (3) sales

practices; (4) solvency and capital adequacy; (5) mutual fund product approvals and related disclosures; and (6) securities, commodities and related laws, among other items. In some cases, our international investment operations are also subject to U.S. securities laws and regulations.

On January 31, 2020, the U.K. exited the E.U. following a non-binding referendum in June 2016, with a transition period in relation to existing laws and regulations until December 31, 2020. There is still a high degree of uncertainty regarding the outcome of negotiations between the U.K. and E.U. on trade and the on-going relationship between the U.K. and E.U. beyond 2020. The transition period could be extended subject to agreement between the U.K. and E.U. by July 2020. The outcome of the negotiations will determine the ultimate impact of the exit on our operations and investments in those jurisdictions and may lead to volatility in currency exchange rates and asset prices, as well as changes in regulation. In the event the exit results in future restrictions on cross-border trade in financial services and products between the U.K. and the E.U., PGIM may incur additional expenses and operational burdens in order to ensure compliance with such restrictions. In anticipation of the exit, PGIM has implemented a number of steps to minimize disruption to its existing business, including forming new legal entities and securing licenses and permissions in certain E.U. countries, and engaging in client communications.

Derivatives Regulation

Prudential Financial and our subsidiaries use derivatives for various purposes, including hedging interest rate, foreign currency and equity market exposures. Dodd-Frank established a framework for regulation of the over-the-counter derivatives markets. This framework sets out requirements regarding the clearing and reporting of derivatives transactions, as well as collateral posting requirements for uncleared swaps. Affiliated swaps entered into between our subsidiaries are generally exempt from most of these requirements.

We continue to monitor the potential hedging cost impacts of new initial margin requirements that we will be required to comply with in 2020, and increased capital requirements for derivatives transactions that may be imposed on banks that are our counterparties. Additionally, the increased need to post cash collateral in connection with mandatorily cleared swaps may also require the liquidation of higher yielding assets for cash, resulting in a negative impact on investment income.

Privacy and Cybersecurity Regulation

We are subject to laws, regulations and directives that require financial institutions and other businesses to protect the security and confidentiality of personal information, including health-related and customer information, and to notify their customers and other individuals of their policies and practices relating to the collection and disclosure of health-related and customer information. In addition, we must comply with international privacy laws, regulations, and directives concerning the cross border transfer or use of employee and customer personal information. These laws, regulations and directives also:

- provide additional protections regarding the use and disclosure of certain information such as national identifier numbers (e.g., social security numbers);
- require notice to affected individuals, regulators and others if there is a breach of the security of certain personal information;
- require financial institutions and creditors to implement effective programs to detect, prevent, and mitigate identity theft;
- regulate the process by which financial institutions make telemarketing calls and send e-mail, text, or fax messages to consumers and customers;
- · require oversight of third parties that have access to, and handle, personal information; and
- prescribe the permissible uses of certain personal information, including customer information and consumer report information.

Some countries have also instituted laws requiring in-country data processing and/or in-country storage of the personal data of its citizens. Compliance with such laws could result in higher technology, administrative and other costs for us and could affect how products and services are offered or require us to structure our businesses, operations and systems in less efficient ways.

Regulatory and legislative activity in the areas of privacy, data protection and information and cybersecurity continues to increase worldwide. Financial regulators in the U.S. and international jurisdictions in which we operate continue to focus on data privacy and cybersecurity, including in proposed rulemaking, and have communicated heightened expectations and have increased emphasis in this area in their examinations of regulated entities. For example, the E.U.'s General Data Protection Regulation ("GDPR"), which became effective in May 2018, confers additional privacy rights on individuals in the E.U. and establishes significant penalties for violations. In addition, in the U.S. the Federal government has proposed a number of sweeping privacy laws. In California the California Consumer Privacy Act will be effective in 2020 and confers numerous privacy rights on

individuals and corresponding obligations on businesses. Internationally, a number of countries such as Brazil and Argentina have enacted or are considering enacting GDPR-like regulations.

In October 2017, the NAIC adopted the Insurance Data Security Model Law. The model law requires that insurance companies establish a cybersecurity program and includes specific technical safeguards as well as requirements regarding governance, incident planning, data management, system testing, vendor oversight and regulator notification. New York implemented a similar law in March 2017 and other states have either implemented the Model Law or are anticipated to implement it in the near future.

The Company is monitoring regulatory guidance and rulemaking in these areas, and may be subject to increased compliance costs and regulatory requirements. In order to respond to the threat of security breaches and cyber-attacks, we have developed a program overseen by the Chief Information Security Officer and the Information Security Office that is designed to protect and preserve the confidentiality, integrity, and continued availability of all information owned by, or in the care of the Company. As part of this program, we also maintain an incident response plan. The program provides for the coordination of various corporate functions and governance groups, and serves as a framework for the execution of responsibilities across businesses and operational roles. The program establishes security standards for our technological resources, and includes training for employees, contractors and third parties. As part of the program, we conduct periodic exercises and a response readiness assessment with outside advisors to gain a third-party independent assessment of our technical program and our internal response preparedness. We regularly engage with the outside security community and monitor cyber threat information.

Anti-Money Laundering and Anti-Bribery Laws

Our businesses are subject to various anti-money laundering and financial transparency laws and regulations that seek to promote cooperation among financial institutions, regulators and law enforcement entities in identifying parties that may be involved in terrorism or money laundering. In addition, under current U.S. law and regulations we may be prohibited from dealing with certain individuals or entities in certain circumstances and we may be required to monitor customer activities, which may affect our ability to attract and retain customers. We are also subject to various laws and regulations relating to corrupt and illegal payments to government officials and others, including the U.S. Foreign Corrupt Practices Act and the U.K.'s Anti-Bribery Law. The obligation of financial institutions, including the Company, to identify their clients, to monitor for and report suspicious transactions, to monitor dealings with government officials, to respond to requests for information by regulatory authorities and law enforcement agencies, and to share information with other financial institutions, has required the implementation and maintenance of internal practices, procedures and controls.

Environmental Laws and Regulations

Federal, state and local environmental laws and regulations apply to our ownership and operation of real property. Inherent in owning and operating real property are the risks of hidden environmental liabilities and the costs of any required clean-up. Although unexpected environmental liabilities can always arise, we seek to minimize this risk by undertaking environmental assessments, among other measures prior to taking title to real estate.

Unclaimed Property Laws

We are subject to the laws and regulations of states and other jurisdictions concerning the identification, reporting and escheatment of unclaimed or abandoned funds, and we are subject to audit and examination for compliance with these requirements. For additional discussion of these matters, see Note 23 to the Consolidated Financial Statements.

Taxation

U.S. Taxation

The Company and certain domestic subsidiaries file a consolidated federal income tax return that includes both life insurance companies and non-life insurance companies. Certain other domestic subsidiaries file separate tax returns. The principal differences between the Company's actual income tax expense and the applicable statutory federal income tax rate are generally deductions for non-taxable investment income, including the Dividends Received Deduction ("DRD"), foreign taxes applied at a different tax rate than the U.S. rate and certain tax credits. For tax years prior to 2018, the applicable statutory federal tax rate was 35%. For tax years starting in 2018, the applicable statutory federal income tax rate is 21%. In addition, as discussed further below, the tax attributes of our products may impact both the Company's and our customers' tax positions. See "Income Taxes" in Note 2 to the Consolidated Financial Statements and Note 16 to the Consolidated Financial Statements for a description of the Company's tax position. As discussed further below, new tax legislation and other potential changes to the tax law may impact the Company's tax position and the attractiveness of our products.

The Tax Act of 2017 was enacted into law on December 22, 2017 and was generally effective starting in 2018. The Tax Act of 2017 changed the taxation of businesses and individuals by lowering tax rates and broadening the tax base through the acceleration of taxable income and the deferral or elimination of certain deductions, as well as changing the system of taxation of earnings of foreign subsidiaries. The most significant changes for the Company were: (1) the reduction of the corporate tax rate from 35% to 21%; (2) revised methodologies for determining deductions for tax reserves and the DRD; (3) an increased capitalization and amortization period for acquisition costs related to certain products; and (4) the change from a worldwide deferred taxation system to a modified territorial system of taxation on applicable earnings of foreign subsidiaries, which includes (a) a new tax on earnings of foreign subsidiaries (the Global Intangible Low-Taxed Income ("GILTI") provision) and (b) a new alternative tax with respect to payments to non-U.S. affiliates that are at least 25% owned (the Base Erosion Anti-Abuse Tax ("BEAT")).

The GILTI provision applies a minimum U.S. tax to earnings of foreign subsidiaries in excess of a 10% deemed return on tangible assets of consolidated foreign subsidiaries by imposing the U.S. tax rate to 50% of earnings of such foreign affiliates and provides for a partial foreign tax credit for foreign income taxes. The amount of tax in any period on GILTI can depend on annual differences between U.S. taxable income recognition rules and taxable income recognition rules in the country of operations and the overall taxable income of U.S. operations, as well as U.S. expense allocation rules which limit the amount of foreign tax credits that can be applied to reduce the U.S. tax on the GILTI. Under certain circumstance the taxable income of U.S. operations may cause more than 50% of earnings of foreign affiliates to be subject to the GILTI provision. In years that the U.S. consolidated PFI group incurs a net operating loss or has a loss from domestic businesses, the GILTI provision would operate to cause a loss of U.S. tax benefits for some or all of those losses, effectively increasing the tax on foreign earnings.

The BEAT provision could, under certain conditions, increase our tax expense. The BEAT is an alternative tax implicated if tax deductible payments from U.S. companies to foreign affiliates that are at least 25% owned exceed 3% of total U.S. tax deductions. If implicated, the BEAT taxes modified taxable income at a rate of 10% in 2019, increasing to 12.5% in 2026 and is due if the calculated BEAT tax amount that is determined without the benefit of foreign and certain other tax credits is greater than the regular corporate tax in any given year. In general, modified taxable income is calculated by adding back to a taxpayer's regular taxable income the amount of certain "base erosion tax benefits" with respect to payments to foreign affiliates, as well as the "base erosion percentage" of any net operating loss deductions. It is possible that benefit and claim payments made by our U.S. insurance business to our foreign affiliates on reinsurance assumed by the U.S. affiliates could be considered base erosion payments and, in the future, cause the U.S. consolidated PFI group to be subject to the BEAT.

During 2018 and 2019 the Treasury Department and the Internal Revenue Service ("IRS") promulgated Proposed and Final Regulations on a number of provisions within or impacted by the Tax Act of 2017 including GILTI, foreign tax credits, net interest deductibility and the BEAT. The Treasury and IRS have requested comments on the Proposed Regulations. Our analysis of these Proposed Regulations is on-going and further guidance may be needed from the Treasury Department and the IRS to fully understand and implement several provisions. Other life insurance and financial services companies may benefit more or less from these tax law changes, which could impact the Company's overall competitive position. Notwithstanding the enactment of the Tax Act of 2017, the President, Congress, as well as state and local governments, may continue to consider from time to time legislation that could increase the amount of corporate taxes we pay, thereby reducing earnings.

The U.S. federal tax law provides that an election may be made pursuant to Internal Revenue Code Section 952 (the "952 election") to subject earnings from certain insurance operations to tax in the U.S. in the tax year earned, net of related foreign tax credits. The Company made the 952 election effective for the 2017 and later tax years with respect to its affiliates incorporated in Brazil. In October 2019 the IRS issued a legal memorandum applicable to all taxpayers in which the IRS argues that the election became inoperable in 1998. The Company disagrees with the IRS's position and intends to defend its position. If the Company is ultimately not successful, it will not be able to claim a U.S. tax credit for the Brazil taxes in excess of the U.S. tax rate, and thus will have a higher tax expense over time. For additional information on the 952 Election, see Note 16 to the Consolidated Financial Statements.

The Company has a number of subsidiaries incorporated under the laws of non-U.S. jurisdictions. Those non-U.S. subsidiaries intend to operate in a manner that will not cause any to be treated as being engaged in a trade or business within the U.S. or subject to current U.S. federal income taxation on their net income. However, because there is uncertainty as to when a foreign corporation is engaged in a trade or business within the United States, as the determination is highly factual and must be made annually, there can be no assurance that the IRS will not assert that a non-U.S. Company is engaged in a trade or business in the U.S. If a non-U.S. Company were considered to be engaged in a trade or business in the U.S., it could be subject to U.S. federal income taxation and possible state taxation on a net basis on its income that is effectively connected with such U.S. trade or business (including branch profits tax on the portion of its earnings and profits that is attributable to such income). Any such taxation could result in substantial tax liabilities.

U.S. federal tax law generally permits tax deferral on the inside build-up of investment value of certain retirement savings, annuities and life insurance products until there is a contract distribution and, in general, excludes from taxation the death benefit paid under a life insurance contract. The Tax Act of 2017 did not change these rules, though it is possible that some individuals with overall lower effective tax rates could be less attracted to the tax deferral aspect of the Company's products. The general reduction in individual tax rates and elimination of certain individual deductions may also impact the Company depending on whether current and potential customers have more or less after-tax income to save for retirement and manage their mortality and longevity risk through the purchase of the Company's products. Congress from time to time may enact other changes to the tax law that could make our products less attractive to consumers, including legislation that would modify the tax favored treatment of retirement savings, life insurance and annuities products.

The products we sell have different tax characteristics and, in some cases, generate tax deductions and credits for the Company. Changes in either the U.S. or foreign tax laws may negatively impact the deductions and credits available to the Company, including the ability of the Company to claim foreign tax credits with respect to taxes withheld on our investments supporting separate account products. These changes would increase the Company's actual tax expense and reduce its consolidated net income.

The profitability of certain products is significantly dependent on these characteristics and our ability to continue to generate taxable income, which is taken into consideration when pricing products and is a component of our capital management strategies. Accordingly, changes in tax law, our ability to generate taxable income, or other factors impacting the availability or value of the tax characteristics generated by our products, could impact product pricing, increase our tax expense or require us to reduce our sales of these products or implement other actions that could be disruptive to our businesses.

International Taxation

Our international businesses are subject to the tax laws and regulations of the countries in which they are organized and in which they operate. Foreign governments from time to time consider legislation that could impact the amount of taxes that we pay or impact the sales of our products. For example, the Organization of Economic Cooperation and Development ("OECD") continues to study model global base erosion tax options that may be considered and adopted by foreign governments. Among the possible recommendations being considered by the OECD is a global minimum tax and the disallowance of a tax deduction for certain payments made to affiliates. Such changes could negatively impact sales of our products or reduce our profits if those items are adopted by countries in which our international businesses operate.

On December 19, 2017, South Korea enacted a 2018 tax reform bill that adds a new 25% corporate income tax bracket for taxable income in excess of \\$300 billion for tax years beginning on or after January 1, 2018. Taxable income in excess of \\$20 billion but less than \\$300 billion continues to be subject to a 22% corporate income tax. In addition, corporations continue to be subject to a local income surtax of 10% of the computed corporate income tax (e.g., 2.5% for the tax base in excess of \\$300 billion, 2.2% for the tax base between \\$20 billion and \\$300 billion). After taking into account this 10% local income tax surcharge on corporate tax, the 2018 tax reform bill increased the top corporate income tax rate in South Korea from 24.2% to 27.5%.

The Japan national corporate tax rate is 23.4% for tax years beginning on or after April 1, 2016, and 23.2% for tax years beginning on or after April 1, 2018. In addition, there are local income taxes that are applied to our income earned in Japan. The Japanese consumption tax rate was increased from 8% to 10% on October 1, 2019. Insurance commissions paid to our Life Planners and Life Consultants are subject to consumption tax for individuals exceeding certain earnings thresholds; however, the tax is not charged on employee compensation (other than commissions) or insurance premiums.

In July 2019, the Japan National Tax Authority issued rules limiting policyholders' tax deductions for premiums paid on certain corporate insurance products. For information on sales of corporate insurance products within our international insurance operations, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations by Segment—International Businesses."

International and Global Regulatory Initiatives

In addition to the adoption of Dodd-Frank in the United States, lawmakers around the world are actively exploring steps to avoid future financial crises. In many respects, this work is being led by the Financial Stability Board ("FSB"), which consists of representatives of national financial authorities of the G20 nations. The G20, the FSB and related bodies have developed proposals to address such issues as financial group supervision, capital and solvency standards, systemic economic risk, corporate governance including executive compensation, and a host of related issues.

In July 2013, we along with eight other global insurers, were designated by the FSB as a global systemically important insurer ("G-SII") through a quantitative methodology developed and implemented by the IAIS. We remained designated as a G-

SII until November 2018, at which point the FSB announced that it would not engage in an identification of G-SIIs based on the IAIS' progress with development of the Holistic Framework for Systemic Risk in the Insurance Sector ("Holistic Framework"). The Holistic Framework, which was adopted by the IAIS in November 2019, focuses on employing an Activities Based approach ("ABA") to assessing and managing potential sources of systemic risk through enhancements to IAIS policy measures pertaining to macroprudential surveillance, enterprise risk management, liquidity management, crisis management and recovery planning. In addition to the ABA elements, the Holistic Framework preserves the IAIS' annual data collection and monitoring process. Upon the IAIS' adoption of the Holistic Framework, the FSB announced that it has suspended the annual identification of G-SIIs until November 2022, when it will review the need to either discontinue or re-establish the annual process based on the initial years of implementation of the Holistic Framework.

In addition to its post financial crisis work on systemic risk, the IAIS developed the Common Framework for the Supervision of Internationally Active Insurance Groups ("ComFrame"). Through ComFrame, the IAIS seeks to promote effective and globally consistent supervision of the insurance industry through uniform standards for insurer corporate governance, enterprise risk management and other control functions, group-wide supervision and group capital adequacy. The non-capital related components of ComFrame were adopted by the IAIS in November 2019. Development of the ICS, which is the capital adequacy component of ComFrame, remains underway and will enter a five-year monitoring phase beginning in 2020. During the monitoring phase, IAIGs are encouraged to report ICS results to their group supervisory authorities to support the IAIS' efforts to obtain feedback on the appropriateness of the framework. The IAIS will use input from supervisory authorities and IAIGs as well as stakeholder feedback on a public consultation and the results of an economic impact assessment to further improve the ICS. The IAIS is scheduled to adopt a final version of the ICS, which it expects its member supervisory authorities to implement, in 2025.

As a standard setting body, the IAIS does not have direct authority to require insurance companies to comply with the policy measures it develops, including the ICS and proposed policy measures within the Holistic Framework. However, we could become subject to these policy measures if they were adopted by either our group supervisor or supervisors of our international operations or companies, which could impact the manner in which we deploy our capital, structure and manage our businesses, and otherwise operate both within the U.S. and abroad.

Employees

As of December 31, 2019, we had 51,511 employees and sales associates, including 30,412 located outside of the United States. We believe our relations with our employees and sales associates are satisfactory.

Available Information

Prudential Financial files periodic and current reports, proxy statements and other information with the SEC. Such reports, proxy statements and other information may be obtained through the SEC's website (www.sec.gov).

You may also access our press releases, financial information and reports filed with the SEC (for example, our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q, our Current Reports on Form 8-K and any amendments to those Forms) online at www.investor.prudential.com. Copies of any documents on our website are available without charge, and reports filed with or furnished to the SEC will be available as soon as reasonably practicable after they are filed with or furnished to the SEC. The information found on our website is not part of this or any other report filed with or furnished to the SEC.

Information About our Executive Officers

The names of the executive officers of Prudential Financial and their respective ages and positions, as of February 14, 2020, were as follows:

Name	Age	Title	Other Public Directorships
Charles F. Lowrey	62	Chairman, Chief Executive Officer and President	None
Robert M. Falzon	60	Vice Chair	None
Timothy P. Harris	59	Executive Vice President and General Counsel	None
Kenneth Y. Tanji	53	Executive Vice President and Chief Financial Officer	None
Scott G. Sleyster	60	Executive Vice President and Head of International Businesses	None
Andrew F. Sullivan	49	Executive Vice President and Head of U.S. Businesses	None
Lucien A. Alziari	60	Executive Vice President and Chief Human Resources Officer	C&J Clark International Ltd.
Stacey Goodman	57	Executive Vice President and Chief Information Officer	None
Candace J. Woods	59	Senior Vice President and Chief Actuary	None
Nicholas C. Silitch	58	Senior Vice President and Chief Risk Officer	None
Timothy L. Schmidt	61	Senior Vice President and Chief Investment Officer	None

Biographical information about Prudential Financial's executive officers is as follows:

Charles F. Lowrey was elected Chairman of Prudential Financial in April 2019 and Chief Executive Officer, President and Director of Prudential Financial and PICA in December 2018. Previously, he served as Executive Vice President and Chief Operating Officer, International Businesses, of Prudential Financial and PICA from March 2014 to November 2018. He served as Executive Vice President and Chief Operating Officer, U.S. Businesses, of Prudential Financial and PICA from February 2011 to March 2014. He also served as Chief Executive Officer and President of Prudential Investment Management, Inc. from January 2008 to February 2011, and as Chief Executive Officer of Prudential Real Estate Investors, our real estate investment management and advisory business from February 2002 to January 2008. He joined the Company in March 2001, after serving as a managing director and Head of the Americas for J.P. Morgan's Real Estate and Lodging Investment Banking group, where he began his investment banking career in 1988. He also spent four years as a managing partner of an architecture and development firm he founded in New York City.

Robert M. Falzon was elected Director of Prudential Financial in August 2019 and has served as Vice Chair of Prudential Financial and PICA since December 2018. Previously, he served as Executive Vice President and Chief Financial Officer of Prudential Financial and PICA from March 2013 to November 2018. Mr. Falzon has been with Prudential since 1983, serving in various positions. He served as Senior Vice President and Treasurer of Prudential Financial and PICA from 2010 to 2013. Previously he had been a managing director at Prudential Real Estate Investors ("PREI"), Head of PREI's Global Merchant Banking Group and Chief Executive Officer of its European business; a managing director at Prudential Securities; and regional vice president at Prudential Capital Group.

Timothy P. Harris was elected Executive Vice President and General Counsel for Prudential Financial and PICA in October 2015. He served as the Deputy General Counsel and Chief Legal Officer, U.S. Businesses, from 2008 to 2015. He has served in various supervisory positions since 1999, including Chief Investment Counsel from 2005 to 2008, Chief Legal Officer of Prudential Annuities and Chief Legal Officer for Retirement Services and Prudential Asia. Mr. Harris was the Chief Risk Officer for Prudential Investments from 1999 to 2003. Prior to joining Prudential, he was associated with Cadwalader, Wickersham & Taft in New York, where he provided transactional and regulatory advice to investment banks, broker-dealers, banks and commodities firms.

Kenneth Y. Tanji was elected Executive Vice President and Chief Financial Officer of Prudential Financial and PICA in December 2018. Prior to this role, he was Senior Vice President and Treasurer of Prudential Financial and PICA from March 2013 to November 2018. In 2013, he served as Chief Financial Officer of Prudential's International Businesses. Previously, he was Senior Financial Officer of Prudential Annuities and was Prudential's business representative for its retail brokerage joint venture with Wachovia Securities from 2003 through 2009. He also served as Vice President of Finance for Prudential's asset management business and held various positions with Prudential Securities' Private Client and Debt Capital Markets Groups. Mr. Tanji joined Prudential in 1988.

Scott G. Sleyster was elected Executive Vice President and Head of International Businesses of Prudential Financial and PICA in December 2018. Previously, he served as Senior Vice President and Chief Investment Officer of PICA and Prudential Financial. Mr. Sleyster has been with Prudential since 1987, serving in a variety of positions, including Head of Prudential's Full Service Retirement business, President of Prudential's Guaranteed Products business, Chief Financial Officer for Prudential's Employee Benefits Division, and has held roles in Prudential's Treasury, Derivatives and Investment Management units.

Andrew F. Sullivan was elected Executive Vice President and Head of U.S. Businesses in December 2019. Previously, he served as CEO of Prudential's Workplace Solutions Group, which consists of Prudential Retirement and Prudential Group Insurance.

Before joining Prudential in 2011, he served as Senior Vice President at CareFirst BlueCross BlueShield. Previously, he spent eight years at Cigna where he held of a number of senior leadership positions. He also held management roles at Diamond Technology Partners and DaimlerChrysler.

Lucien A. Alziari is Executive Vice President and Chief Human Resources Officer for Prudential Financial and PICA. Starting in June 2017, he served as Senior Vice President and Chief Human Resources Officer for Prudential Financial and PICA. From 2012 to 2017, Mr. Alziari served as Executive Vice President and Chief Human Resources Officer of A.P. Moller-Maersk. From 2004 to 2012, he was the Chief Human Resources Officer and Head of Corporate Responsibility for Avon Products, Inc. Prior to Avon Products, Inc., Mr. Alziari held roles with Mars Confectionary in the United Kingdom and PepsiCo Inc. in New York, Vienna and Dubai.

Stacey Goodman was elected Executive Vice President and Chief Information Officer of Prudential Financial and Prudential Insurance in July 2019. Previously, she served as the Chief Information Officer at Freddie Mac, where she was responsible for the technology division, and served as a member of the Senior Operating Committee. Prior to Freddie Mac, Ms. Goodman was Executive Vice President and Chief Information and Operations officer for CIT Group, Inc., where she was a member of the Executive Management Committee. Previously, Ms. Goodman was the Divisional Chief Information Officer of Global Technology and Operations at Bank of America. She also held global leadership positions at UBS and PaineWebber. Ms. Goodman began her career at Salomon Brothers.

Candace J. Woods was elected Senior Vice President and Chief Actuary of Prudential Financial and PICA in November 2017. Prior to her current role, Ms. Woods served as Vice President and Chief Actuary for the Actuarial Center of Excellence within PICA. Also, Ms. Woods served as Vice President and Actuary from 2012 to 2013 and Vice President and Chief Actuary from 2013 to 2017 for Prudential's International Businesses.

Nicholas C. Silitch was elected Senior Vice President and Chief Risk Officer of Prudential Financial and PICA in May 2012. He joined Prudential in 2010 as Chief Credit Officer and Head of investment risk management. Prior to joining Prudential, Mr. Silitch held the position of Chief Risk Officer of the Alternative Investment Services, Broker Dealer Services and Pershing businesses within Bank of New York Mellon.

Timothy L. Schmidt was elected Senior Vice President and Chief Investment Officer of Prudential Financial and PICA in December 2018. Previously, Mr. Schmidt was the Head of Global Portfolio Management for Prudential from 2012 to 2018 and he was responsible for the overall asset/liability management for Prudential's Retirement and Group Insurance businesses from 2010 to 2012. Prior to joining Prudential in July 2010, he served as Chief Financial Officer for MetLife's Individual Business and had headed MetLife's Wealth Strategy Group. Earlier in his 25-year tenure at MetLife, Schmidt held various positions in the investment organization, including Head of MetLife's Portfolio Management Unit, as well as its Structured Finance and Government Securities unit.

ITEM 1A. RISK FACTORS

You should carefully consider the following risks. These risks are not exclusive, and additional risks to which we are subject include, but are not limited to, the factors mentioned under "Forward-Looking Statements" above and the risks of our businesses described elsewhere in this Annual Report on Form 10-K. Many of these risks are interrelated and could occur under similar business and economic conditions, and the occurrence of certain of them may in turn cause the emergence or exacerbate the effect of others. Such a combination could materially increase the severity of the impact of these risks on our businesses, results of operations, financial condition and liquidity.

Overview

The Company's risk management framework documents the definition, potential manifestation, and management of its risks. The Company has categorized its risks into tactical and strategic risks. Tactical risks may cause damage to the Company, and the Company seeks to manage and mitigate them through models, metrics and the overall risk framework. The Company's tactical risks include investment, insurance, market, liquidity, and operational risk. Strategic risks can cause the Company's fundamental business model to change, either through a shift in the businesses in which it is engaged or a change in execution. The Company's strategic risks include regulatory, technological changes and other external factors. These risks, as well as the sub-risks that may impact the Company, are discussed below. The Company's risk management framework is described under "Management's Discussion and Analysis of Financial Condition and Results of Operations—Risk Management."

Investment Risk

Our investment portfolios are subject to the risk of loss due to default or deterioration in credit quality or value.

We are exposed to investment risk through our investments, which primarily consist of public and private fixed maturity securities, commercial mortgage and other loans, equity securities and alternative assets including private equity, hedge funds and real estate. For a discussion of our general account investments, see "Management's Discussion and Analysis of Financial Condition and Results of Operations-General Account Investments." We are also exposed to investment risk through a potential counterparty default.

Investment risk may result from (1) economic conditions, (2) adverse capital market conditions, including disruptions in individual market sectors or a lack of buyers in the marketplace, (3) volatility, (4) credit spread changes, (5) benchmark interest rate changes, (6) changes in foreign currency exchange rates and (7) declines in value of underlying collateral. These factors may impact the credit quality, liquidity and value of our investments and derivatives, potentially resulting in higher capital charges and unrealized or realized losses. Also, certain investments we hold, regardless of market conditions, are relatively illiquid and our ability to promptly sell these assets for their full value may be limited. Additionally, our valuation of investments may include methodologies, inputs and assumptions which are subject to change and different interpretation and could result in changes to investment valuations that may materially impact our results of operations or financial condition. For information about the valuation of our investments, see Note 6 to the Consolidated Financial Statements.

Our investment portfolio is subject to credit risk, which is the risk that an obligor (or guarantor) is unable or unwilling to meet its contractual payment obligations on its fixed maturity security, loan or other obligations. Credit risk may manifest in an idiosyncratic manner (i.e., specific to an individual borrower or industry) or through market-wide credit cycles. Financial deterioration of the obligor increases the risk of default and may increase the capital charges required under such regimes as the NAIC RBC, the FSA SMR or other constructs to hold the investment and in turn, potentially limit our overall capital flexibility. Credit defaults (as well as credit impairments, realized losses on credit-related sales, and increases in credit related reserves) may result in losses which adversely impact earnings, capital and our ability to appropriately match our liabilities and meet future obligations.

Some of our insurance operations are in emerging markets where we may be required to hold capital in local sovereign obligations. Investment risk is heightened in these markets, in particular for obligations that are not denominated in the local currency. For example, during 2019 Argentina implemented currency controls and sought to restructure certain of its obligations, which adversely impacted our local sovereign investments.

Our Company is subject to counterparty risk, which is the risk that the counterparty to a transaction could default or deteriorate in creditworthiness before or at the final settlement of a transaction. In the normal course of business, we enter into financial contracts to manage risks (such as derivatives to manage market risk and reinsurance treaties to manage insurance risk), improve the return on investments (such as securities lending and repurchase transactions) and provide sources of liquidity or financing (such as credit agreements, securities lending agreements and repurchase agreements). These transactions expose the Company to counterparty risk. Counterparties include commercial banks, investment banks, broker-dealers and insurance and reinsurance companies. In the event of a counterparty deterioration or default, the magnitude of the losses will depend on then current market conditions and the length of time required to enter into a replacement transaction with a new counterparty. Losses are likely to be higher under stressed conditions.

Our investment portfolio is subject to equity risk, which is the risk of loss due to deterioration in market value of public equity or alternative assets. We include public equity and alternative assets (including private equity, hedge funds and real estate) in our portfolio constructions, as these asset classes can provide returns over longer periods of time, aligning with the long-term nature of certain of our liabilities. Public equity and alternative assets have varying degrees of price transparency. Equities traded on stock exchanges (public equities) have significant price transparency, as transactions are often required to be disclosed publicly. Assets for which price transparency is more opaque include private equity (joint ventures/limited partnerships) and direct real estate. As these investments typically do not trade on public markets and indications of realizable market value may not be readily available, valuations can be infrequent and/or more volatile. A sustained decline in public equity and alternative markets may reduce the returns earned by our investment portfolio through lower than expected dividend income, property operating income, and capital gains, thereby adversely impacting earnings, capital, and product pricing assumptions. These assets may also produce volatility in earnings as a result of uneven distributions on the underlying investments.

Insurance Risk

We have significant liabilities for policyholders' benefits which are subject to insurance risk. Insurance risk is the risk that actual experience deviates adversely from our insurance assumptions, including mortality, morbidity, and policyholder behavior assumptions.

We provide a variety of insurance products, on both an individual and group basis, that are designed to help customers protect against a variety of financial uncertainties. Our insurance products protect customers against their potential risk of loss by transferring those risks to the Company, where those risks can be managed more efficiently through pooling and diversification over a larger number of independent exposures. During this transfer process, we assume the risk that actual losses experienced in our insurance products deviates significantly from what we expect. More specifically, insurance risk is concerned with the deviations that impact our future liabilities. Our profitability may decline if mortality experience, morbidity experience or policyholder behavior experience differ significantly from our expectations when we price our products. In addition, if we experience higher than expected claims our liquidity position may be adversely impacted, and we may incur losses on investments if we are required to sell assets in order to pay claims. If it is necessary to sell assets at a loss, our results of operations and financial condition could be adversely impacted. For a discussion of the impact of changes in insurance assumptions on our financial condition, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Accounting Policies and Pronouncements—Application of Critical Accounting Estimates—Insurance Liabilities."

Certain of our insurance products are subject to mortality risk, which is the risk that actual deaths experienced deviate adversely from our expectations. Mortality risk is a biometric risk that can manifest in the following ways:

- Mortality calamity is the risk that mortality rates in a single year deviate adversely from what is expected as the result of pandemics, natural or manmade disasters, military actions or terrorism. A mortality calamity event will reduce our earnings and capital and we may be forced to liquidate assets before maturity in order to pay the excess claims. Mortality calamity risk is more pronounced in respect of specific geographic areas (including major metropolitan centers, where we have concentrations of customers, including under group and individual life insurance), concentrations of employees or significant operations, and in respect of countries and regions in which we operate that are subject to a greater potential threat of military action or conflict. Ultimate losses would depend on several factors, including the rates of mortality and morbidity among various segments of the insured population, the collectability of reinsurance, the possible macroeconomic effects on our investment portfolio, the effect on lapses and surrenders of existing policies, as well as sales of new policies and other variables.
- Mortality trend is the risk that mortality improvements in the future deviate adversely from what is expected. Mortality trend is a long-term risk in that it can emerge gradually over time. Longevity products, such as annuities, pension risk transfer and long-term care, may experience adverse impacts due to higher-than-expected mortality improvement. Mortality products, such as life insurance, experience adverse impacts due to lower-than-expected mortality improvement. If this risk were to emerge, the Company would update assumptions used to calculate reserves for in-force business, which may result in additional assets needed to meet the higher expected annuity claims or earlier expected life claims. An increase in reserves due to revised assumptions has an immediate impact on our results of operations and financial condition; however, economically the impact is generally long term as the excess outflow is paid over time.
- *Mortality base* is the risk that actual base mortality deviates adversely from what is expected in pricing and valuing our products. Base mortality risk can arise from a lack of credible data on which to base the assumptions.

We use a variety of strategies to manage our mortality risks, including the use of reinsurance and derivative instruments. These strategies, however, may not be fully effective and may lead to payments to counterparties in excess of recoveries depending on how actual mortality experience emerges. We may also benefit from offsetting impacts between our mortality and longevity products in adverse mortality or longevity scenarios, however the extent of this offset may vary.

Certain of our insurance products are subject to morbidity risk, which is the risk that either incidence or continuation experience deviates adversely from what is expected. Morbidity risk is a biometric risk that can manifest in the following ways:

- *Morbidity incidence* is the risk that the rate at which policyholders become unhealthy (and qualify for benefits under insurance policies) deviates adversely from what is expected. We are primarily exposed to morbidity incidence risk through short-term disability products, long-term care products, and the accident and health products we sell in Japan, Korea and Taiwan.
- *Morbidity continuation* is the risk that the length of time for which policyholders remain unhealthy deviates adversely from what is expected. This risk is primarily in our disability and long-term care products.

In each case, an increase in claims, or an increase in reserves due to revised morbidity assumptions can have an immediate impact on our results of operations and financial condition; however, economically the impact of morbidity risk for products that pay out for ongoing illness or disability generally emerges over the longer term as the morbidity claims are paid.

Certain of our insurance products are subject to policyholder behavior risk, which is the risk that actual policyholder behavior deviates adversely from what is expected. Policyholder behavior risk includes the following components:

- Lapse calamity is the risk that lapse rates over the short-term deviate adversely from what is expected, for example, surrenders of certain insurance products may increase following a downgrade of our financial strength ratings or adverse publicity. Only certain products are exposed to this risk. Products that offer a cash surrender value that resides in the general account, such as general account stable value products, could pose a potential short-term lapse calamity risk. Surrender of these products can impact liquidity, and it may be necessary in certain market conditions to sell assets to meet surrender demands. Lapse calamity can also impact our earnings through its impact on estimated future profits.
- Policyholder behavior efficiency is the risk that the behavior of our customers or policyholders deviates adversely from what is expected. Policyholder behavior efficiency risk arises through product features which provide some degree of choice or flexibility for the policyholder, which can impact the amount and/or timing of claims. Such choices include surrender, lapse, partial withdrawal, policy loan utilization, and premium payment rates for contracts with flexible premiums. While some behavior is driven by macro factors such as market movements, policyholder behavior at a fundamental level is driven primarily by policyholders' individual needs, which may differ significantly from product to product depending on many factors including the features offered, the approach taken to market each product, and competitor pricing. For example, persistency (the probability that a policy or contract will remain in force) within our annuities business may be significantly impacted by the value of guaranteed minimum benefits contained in many of our variable annuity products being higher than current account values in light of poor market performance as well as other factors. Many of our products also provide our customers with wide flexibility with respect to the amount and timing of premium deposits and the amount and timing of withdrawals from the policy's value. Results may vary based on differences between actual and expected premium deposits and withdrawals for these products, especially if these product features are relatively new to the marketplace. The pricing of certain of our variable annuity products that contain certain living benefit guarantees is also based on assumptions about utilization rates, or the percentage of contracts that will utilize the benefit during the contract duration, including the timing of the first withdrawal. Results may vary based on differences between actual and expected benefit utilization. We may also be impacted by customers seeking to sell their benefits. In particular, the development of a secondary market for life insurance, including life settlements or "viaticals" and investor owned life insurance, and third-party investor strategies in the annuities business, could adversely affect the profitability of existing business and our pricing assumptions for new business. Policyholder behavior efficiency is generally a long-term risk that emerges over time. An increase in reserves due to revised assumptions has an immediate impact on our results of operations and financial condition; however, from an economic or cash flow perspective, the impact is generally long term as the excess outflow is paid over time.

Our ability to reprice products is limited and may not compensate for deviations from our expected insurance assumptions. Although some of our products permit us to increase premiums or adjust other charges and credits during the life of the policies or contract, the adjustments permitted under the terms of the policies or contracts may not be sufficient to maintain profitability or may cause the policies or contracts to lapse. For example, for our long-term care insurance products, our assumptions for reserves for future policy benefits have factored in an estimate of the timing and amount of anticipated and yet-to-be-filed premium rate increases which will require state approval. Our actual experience obtaining pricing increases could be materially different than what we have assumed, resulting in further policy liability increases which could be material. Many of our products do not permit us to increase premiums or adjust other charges and credits or limit those adjustments during the life of the policy or contract. Even if permitted under the policy or contract, we may not be able or willing to raise premiums or adjust other charges sufficiently, or at all. Accordingly, significant deviations in actual experience from our pricing assumptions could have an adverse effect on the profitability of our products.

Market Risk

The profitability of many of our insurance and annuity products, as well as the fees we earn in our investment management business, are subject to market risk. Market risk is the risk of loss from changes in interest rates, equity prices and foreign currency exchange rates.

The profitability of many of our insurance and annuity products depends in part on the value of the separate accounts supporting these products, which can fluctuate substantially depending on market conditions. Market conditions resulting in

reductions in the value of assets we manage has an adverse effect on the revenues and profitability of our investment management business, which depends on fees related primarily to the value of assets under management, and could decrease the value of our strategic investments.

Derivative instruments we use to hedge and manage foreign exchange, interest rate and equity market risks associated with our products and businesses, and other risks might not perform as intended or expected, resulting in higher than expected realized losses and stresses on liquidity. Market conditions can limit availability of hedging instruments, require us to post additional collateral, and further increase the cost of executing product related hedges and such costs may not be recovered in the pricing of the underlying products being hedged.

Market risk may limit opportunities for investment of available funds at appropriate returns, including due to the current low interest rate environment, or other factors, with possible negative impacts on our overall results. Limited opportunities for attractive investments may lead to holding cash for long periods of time and increased use of derivatives for duration management and other portfolio management purposes. The increased use of derivatives may increase the volatility of our U.S. GAAP results and our statutory capital.

Our investments, results of operations and financial condition may also be adversely affected by developments in the global economy, in the U.S. economy (including as a result of actions by the Federal Reserve with respect to monetary policy, and adverse political developments), and in the Japanese economy (including due to the effects of inflation or deflation, interest rate volatility, changes in the Japanesovereign credit rating, and material changes in the value of the Japanese yen relative to the U.S. dollar). Global, U.S. or Japanese economic activity and financial markets may in turn be negatively affected by adverse developments or conditions in specific geographical regions.

For a discussion of the impact of changes in market conditions on our financial condition see "Quantitative and Qualitative Disclosures About Market Risk."

Our insurance and annuity products and certain of our investment products, and our investment returns, are subject to interest rate risk, which is the risk of loss arising from asset/liability duration mismatches within our general account investments as well as invested assets of other entities and operations. The risk of mismatch in asset/liability duration is mainly driven by the specific dynamics of product liabilities. Some product liabilities are expected to have only modest risk related to interest rates because cash flows can be matched by available assets in the investable space. The interest rate risk emerges primarily from their tail cash flows (30 years or more), which cannot be matched by assets for sale in the marketplace, exposing the Company to future reinvestment risk. In addition, certain of our products provide for recurring premiums which may be invested at interest rates lower than the rates included in our pricing assumptions. Market-sensitive cash flows exist with other product liabilities including products whose cash flows can be linked to market performance through secondary guarantees, minimum crediting rates, and/or changes in insurance assumptions.

Our exposure to interest rates can manifest over years as in the case of earnings compression or in the short term by creating volatility in both earnings and capital. For example, some of our products expose us to the risk that changes in interest rates will reduce the spread between the amounts that we are required to pay under contracts and the rate of return we are able to earn on our general account investments supporting these contracts. When interest rates decline or remain low, as they have in recent years, we must invest in lower-yielding instruments, potentially reducing net investment income and constraining our ability to offer certain products. This risk is increased as more policyholders may retain their policies in a low rate environment. Since many of our policies and contracts have guaranteed minimum crediting rates or limit the resetting of crediting rates, the spreads could decrease or go negative.

Alternatively, when interest rates rise, we may not be able to replace the assets in our general account with the higher-yielding assets as quickly as needed to fund the higher crediting rates necessary to keep these products and contracts competitive. It is possible that fewer policyholders may retain their policies and annuity contracts as they pursue higher crediting rates, which could expose the Company to losses and liquidity stress. In addition, rising interest rates could cause a decline in the market value of fixed income assets the Company manages which in turn could result in lower asset management fees earned.

Our mitigation efforts with respect to interest rate risk are primarily focused on maintaining an investment portfolio with diversified maturities that has a key rate duration profile that is approximately equal to the key rate duration profile of our liability and surplus benchmarks; however, these benchmarks are based on estimates of the liability cash flow profiles which are complex and could turn out to be inaccurate, especially when markets are volatile. In addition, there are practical and capital market limitations on our ability to accomplish this matching. Due to these and other factors we may need to liquidate investments prior to maturity at a loss in order to satisfy liabilities or be forced to reinvest funds in a lower rate environment.

Our significant business operations outside the U.S. subject us to foreign exchange risk, which is the risk of loss arising from assets that are invested in a different currency than the related liability, as well as the unhedged portion of the Company's earnings from, and capital supporting, operations in a foreign currency. As a U.S.-based company with significant business operations outside of the U.S., particularly in Japan, we are exposed to foreign currency exchange rate risk related to these operations, as well as in our investment portfolio. Fluctuations in foreign currency exchange rates could adversely affect our profitability, financial condition and cash flows, as well as increase the volatility of our results of operations under U.S. GAAP. In the short-term, solvency margins in our Japan businesses can also be impacted by fluctuations in exchange rates.

For our International Businesses' operations, our Retirement segment's earnings on non-U.S. dollar-denominated longevity reinsurance contracts and PGIM's investment activities based in currencies other than the U.S. dollar, changes in foreign currency exchange rates create risk that we may experience volatility in the U.S. dollar-equivalent earnings and equity of these operations. We seek to manage this risk through various hedging strategies, including the use of foreign currency hedges and through holding U.S. dollar-denominated securities in the investment portfolios of certain of these operations. Additionally, our Japanese insurance operations offer a variety of non-Japanese yen denominated products. We seek to mitigate this risk by holding investments in corresponding currencies. For certain of our international insurance operations outside of Japan, we elect to not hedge the risk of changes in our subsidiary equity investments due to foreign exchange rate movements.

For our domestic investment portfolios supporting our U.S. insurance operations and other proprietary investment portfolios, our foreign currency exchange rate risk arises primarily from investments that are denominated in foreign currencies. We manage this risk by hedging substantially all domestic foreign currency-denominated fixed-income investments into U.S. dollars. We generally do not hedge all of the foreign currency risk of our investments in equity securities of unaffiliated foreign entities. The value and liquidity of our foreign currency investments could be adversely affected by local market, economic and financial conditions. For example, our investments denominated in euro could be adversely affected by unfavorable economic conditions in Europe, including due to potential changes in the euro or to the structure or membership of the European Union, and in 2016 we experienced volatility in U.K. and other European Union related investments as a result of the U.K. 's referendum to exit the European Union. The outcome of the negotiations between the U.K. and the European Union on the terms of the exit will determine the ultimate impact of the exit on our European operations and investments in those jurisdictions and may lead to volatility in currency exchange rates and asset prices, as well as changes in regulation.

There can be no assurance that our hedging and other strategies will effectively mitigate foreign exchange risk. For a discussion of our hedging program and the impact of foreign currency exchange rates on our business, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Impact of Foreign Currency Exchange Rates." For a discussion of the impact of the U.K.'s exit from the European Union on our operations, see "Business—Regulation—International Investment and Retirement Products and Investment Management Operations."

Guarantees within certain of our products, in particular our variable annuities and to a lesser extent certain individual life and international insurance products, are market sensitive and may decrease our earnings or increase the volatility of our results of operations or financial position under U.S. GAAP. Certain of our products, particularly our variable annuity products and to a lesser extent certain individual life and international insurance products, include guarantees of minimum surrender values or income streams for stated periods or for life, which may be in excess of account values. Downturns in equity markets, increased equity volatility, increased credit spreads, or (as discussed above) reduced interest rates could result in an increase in the valuation of liabilities associated with such guarantees, resulting in increases in reserves and reductions in net income. We use a variety of hedging and risk management strategies, including product features, to mitigate these risks in part and we may periodically change our strategies over time. These strategies may, however, not be fully effective. In addition, we may be unable or may choose not to fully hedge these risks. Hedging instruments may not effectively offset the costs of guarantees or may otherwise be insufficient in relation to our obligations. Hedging instruments also may not change in value correspondingly with associated liabilities due to equity market or interest rate conditions, non-performance risk or other reasons. We may choose to hedge these risks on a basis that does not correspond to their anticipated or actual impact upon our results of operations or financial position under U.S. GAAP. Changes from period to period in the valuation of these policy benefits, and in the amount of our obligations effectively hedged, will result in volatility in our results of operations and financial position under U.S. GAAP and the statutory capital levels of our insurance subsidiaries. Estimates and assumptions we make in connection with hedging activities may fail to reflect or correspond to our actual longterm exposure from our guarantees. Further, the risk of increases in the costs of our guarantees not covered by our hedging and other capital and risk management strategies may become more significant due to changes in policyholder behavior driven by market conditions or other factors. The above factors, individually or collectively, may have a material adverse effect on our results of operations, financial condition or liquidity.

Our valuation of the liabilities for the minimum benefits contained in many of our variable annuity products requires us to consider the market perception of our risk of non-performance, and a decrease in our own credit spreads resulting from ratings

upgrades or other events or market conditions could cause the recorded value of these liabilities to increase, which in turn could adversely affect our results of operations and financial position.

Liquidity Risk

As a financial services company, we are exposed to liquidity risk, which is the risk that the Company is unable to meet near-term obligations as they come due.

Liquidity risk is a manifestation of events that are driven by other risk types (market, insurance, investment, operational). A liquidity shortfall may arise in the event of insufficient funding sources or an immediate and significant need for cash or collateral. In addition, it is possible that expected liquidity sources, such as our credit facilities, may be unavailable or inadequate to satisfy the liquidity demands described below.

The Company has four primary sources of liquidity exposure and associated drivers that trigger material liquidity demand. Those sources are:

- Derivative collateral market exposure: Abrupt changes to interest rate, equity, and/or currency markets may increase collateral requirements to counterparties and create liquidity risk for the Company.
- Asset liability mismatch: There are liquidity risks associated with liabilities coming due prior to the matching asset cash flows. Structural maturities
 mismatch can occur in activities such as securities lending, where the liabilities are effectively overnight open transactions used to fund longer term
 assets.
- Wholesale funding: The Company depends upon the financial markets for funding (such as through the issuance of commercial paper, securities lending and repurchase arrangements and other forms of borrowings in the capital markets). These sources might not be available during times of stress, or may only be available on unfavorable terms, which can result in a decrease in our profitability and a significant reduction in our financial flexibility.
- Insurance cash flows: The Company faces potential liquidity risks from unexpected cash demands due to severe mortality calamity, customer withdrawals or lapse events. If such events were to occur, the Company may face unexpectedly high levels of claim payments to policyholders.

For a discussion of the Company's liquidity and sources and uses of liquidity, including information about legal and regulatory limits on the ability of our subsidiaries to pay dividends, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Liquidity."

Operational Risk

Our operations are exposed to the risk of loss resulting from inadequate or failed processes or systems, human error or misconduct, and as a result of external events.

An operational risk failure may result in one or more actual or potential impacts to the Company. Operational risk may be elevated as a result of organizational changes.

Operational Risk Types

- Processes: Processing failure; failure to safeguard or retain documents/records; errors in valuation/pricing models and processes; project management or execution failures; improper sales practices; improper administration of our products; failure to adhere to clients' investment guidelines.
- Systems: Failures during the development and implementation of new systems; systems failures.
- People: Internal fraud, breaches of employment law, unauthorized activities; loss or lack of key personnel, inadequate training; inadequate supervision.
- External Events: External crime; cyber-attack, outsourcing risk; vendor risk; natural and other disasters; changes in laws/regulations.
- Legal: Legal and regulatory compliance failures.

Potential Impacts

- Financial losses: The Company experiences a financial loss. This loss may originate from various causes including, but not limited to, transaction processing errors and fraud.
- Customer impacts: The Company may not be able to service customers. This may result if the Company is unable to continue operations during a business continuation event or if systems are compromised due to malware or virus.

- Regulatory fines or sanctions: When the Company fails to comply with applicable laws or regulations, regulatory fines or sanctions may be imposed. In addition, possible restrictions on business activities may result.
- Legal actions: Failure to comply with laws and regulations also exposes the Company to litigation risk. This may also result in financial losses.

Liabilities we may incur as a result of operational failures are described further under "Contingent Liabilities" in Note 23 to the Consolidated Financial Statements. In addition, certain pending regulatory and litigation matters affecting us, and certain risks to our businesses presented by such matters, are discussed in Note 23 to the Consolidated Financial Statements. We may become subject to additional regulatory and legal actions in the future.

Key Enterprise Operational Risks - Key enterprise operational risks include the following:

We are subject to business continuation risk, which is the risk that our systems and data may be disrupted. We depend heavily on our telecommunication, information technology and other operational systems and on the integrity and timeliness of data we use to run our businesses and service our customers. These systems may fail to operate properly or become disabled as a result of events or circumstances wholly or partly beyond our control. Further, we face the risk of operational and technology failures by others, including clearing agents, exchanges and other financial intermediaries and of vendors and parties to which we outsource the provision of services or business operations. We may experience a business continuation event as a result of:

- Severe pandemic, either naturally occurring or intentionally manipulated pathogens.
- Geo-political risks, including armed conflict and civil unrest.
- Terrorist events.
- Significant natural or accidental disasters.
- Cyber-attacks.

We are subject to the risk that we may not adequately maintain information security. There continues to be significant and organized cyber-attack activity against western organizations, including but not limited to the financial services sector and no organization is fully immune to cyber-attacks. Risks related to cyber-attack arise in the following areas:

- Protecting both "structured" and "unstructured" sensitive information is a constant need. However, some risks cannot be fully mitigated using technology or otherwise.
- Unsuspecting employees represent a primary avenue for external parties to gain access to our network and systems. Many attacks, even from sophisticated
 actors, include rudimentary techniques such as coaxing an internal user to click on a malicious attachment or link to introduce malware or steal their
 username and password.
- Insurance and retirement services companies are increasingly being targeted by hackers and fraudulent actors seeking to monetize personally identifiable information or extort money.
- Nation-state sponsored organizations are engaged in cyber-attacks but not only for monetization purposes. Nation states appear to be motivated by the
 desire to gain information about foreign citizens and governments or to influence or cause disruptions in commerce or political affairs.
- We have also seen an increase in non-technical attempts to commit fraud or solicit information via call centers and interactive voice response systems, and we anticipate the attempts will become more common.
- We rely on third-parties to provide services as described further below. While we maintain certain standards for all vendors that provide us services, our vendors, and in turn, their own service providers, may become subject to a security breach, including as a result of their failure to perform in accordance with contractual arrangements.

We may not adequately ensure the privacy of sensitive data. In the course of our ordinary business we collect, store and share with various third-parties (e.g., service providers, reinsurers, etc.) substantial amounts of private and confidential information, including in some instances sensitive health-related information. We are subject to the risk that the privacy of this information may be compromised, including as a result of an information security breach described above. Any compromise or perceived compromise of our security by us or by one of our vendors could damage our reputation, cause the termination of relationships with distributors, government-run health insurance exchanges, marketing partners and insurance carriers, reduce demand for our services and subject us to significant liability and expense as well as regulatory action and lawsuits, which would harm our business, operating results and financial condition.

Third-parties (outsourcing providers, vendors and suppliers and joint venture partners) present added operational risk to our enterprise. The Company's business model relies heavily on the use of third-parties to deliver contracted services in a broad range of areas. This presents the risk that the Company is unable to meet legal, regulatory, financial or customer obligations because third-parties fail to deliver contracted services, or that the Company is exposed to reputational damage because third-parties operate in a poorly controlled manner. We use affiliates and third-party vendors located outside the U.S. to provide certain services and

functions, which also exposes us to business disruptions and political risks as a result of risks inherent in conducting business outside of the U.S. In our investments in which we hold a minority interest, or that are managed by third-parties, we lack management and operational control over operations, which may subject us to additional operational, compliance and legal risks and prevent us from taking or causing to be taken actions to protect or increase the value of those investments. In those jurisdictions where we are constrained by law from owning a majority interest in jointly owned operations, our remedies in the event of a breach by a joint venture partner may be limited (e.g., we may have no ability to exercise a "call" option).

Affiliate and third-party distributors of our products present added regulatory, competitive and other risks to our enterprise. Our products are sold primarily through our captive/affiliated distributors and third-party distributing firms. We also distribute third-parties' products through our captive/affiliated distributors, including as part of our Assurance IQ business. Our captive/affiliated distributors are made up of large numbers of decentralized sales personnel who are compensated based on commissions. The third-party distributing firms generally are not dedicated to us exclusively and may frequently recommend and/or market products of our competitors. Accordingly, we must compete intensely for their services. Our sales could be adversely affected if we are unable to attract, retain or motivate third-party distributing firms or if we do not adequately provide support, training, compensation, and education to this sales network regarding our products, or if our products are not competitive and not appropriately aligned with consumer needs. While third-party distributing firms have an independent regulatory accountability, some regulators have been clear with expectations that product manufacturers retain significant sales risk accountability.

The Company and our distributors are subject to rules regarding the standard of care applicable to sales of our products and the provision of advice to our customers, and in recent years many of these rules have been revised or re-examined. In addition, there have been a number of investigations regarding the marketing practices of brokers and agents selling annuity and insurance products and the payments they receive. Furthermore, sales practices and investor protection have increasingly become areas of focus in regulatory examinations. These investigations and examinations have resulted in enforcement actions against companies in our industry and brokers and agents marketing and selling those companies' products. Enforcement actions could result in penalties and the imposition of corrective action plans and/or changes to industry practices, which could adversely affect our ability to market our products. If our products are distributed in an inappropriate manner, or to customers for whom they are unsuitable, or distributors of our products otherwise engage in misconduct, we may suffer reputational and other harm to our business and be subject to regulatory action, penalties or damages. Our business may also be harmed if captive/affiliate distributors engage in inappropriate conduct in connection with the sale of third-party products.

Additionally, certain of our affiliated distributors engage in direct marketing to consumers through telemarketing, email marketing and other lead generation activities that subject us to various federal and state telemarketing regulations, including the Telephone Consumer Protection Act. Violations of these regulations could subject our affiliated distributors to litigation and regulatory inquiries that result in penalties or damages.

Many of our distribution personnel are independent contractors or franchisees. From time to time, their status has been challenged in courts and by government agencies, and various legislative or regulatory proposals have been introduced addressing the criteria for determining the status of independent contractors' classification as employees for, among other things, employment tax purposes or other employment benefits. The costs associated with potential changes with respect to these independent contractor and franchisee classifications have impacted our results previously and could have a material adverse effect on our business in the future.

Although we distribute our products through a wide variety of distribution channels, we do maintain relationships with certain key distributors. For example, a significant amount of our sales in Japan through banks is derived through a single major Japanese bank and a significant portion of our sales in Japan through Life Consultants is derived through a single association relationship. We periodically negotiate the terms of these relationships, and there can be no assurance that such terms will remain acceptable to us or such third-parties. An interruption in certain key relationships could materially affect our ability to market our products and could have a material adverse effect on our business, operating results and financial condition. Distributors may elect to reduce or terminate their distribution relationships with us, including for such reasons as adverse developments in our business, adverse rating agency actions or concerns about market-related risks. We are also at risk that key distribution partners may merge, change their business models in ways that affect how our products are sold, or terminate their distribution contracts with us, or that new distribution channels could emerge and adversely impact the effectiveness of our distribution efforts. An increase in bank and broker-dealer consolidation activity could increase competition for access to distributors, result in greater distribution expenses and impair our ability to market products through these channels. Consolidation of distributors and/or other industry changes may also increase the likelihood that distributors will try to renegotiate the terms of any existing selling agreements to terms less favorable to us. Finally, we also may be challenged by new technologies and marketplace entrants that could interfere with our existing relationships.

As a financial services company, we are exposed to model risk, which is the risk of financial loss or reputational damage or adverse regulatory impacts caused by model errors or limitations, incorrect implementation of models, or misuse of or overreliance upon models. Models are utilized by our businesses and corporate areas primarily to project future cash flows associated with pricing products, calculating reserves and valuing assets, as well as in evaluating risk and determining capital requirements, among other uses. These models may not operate properly and may rely on assumptions and projections that are inherently uncertain. As our businesses continue to grow and evolve, the number and complexity of models we utilize expands, increasing our exposure to error in the design, implementation or use of models, including the associated input data and assumptions.

We may not be able to protect our intellectual property and may be subject to infringement claims. We rely on a combination of contractual rights with employees and third-parties and on copyright, trademark, patent and trade secret laws to establish and protect our intellectual property. Although we endeavor to protect our rights, third-parties may infringe or misappropriate our intellectual property. We may have to litigate to enforce and protect our copyrights, trademarks, patents, trade secrets and know-how or to determine their scope, validity or enforceability. This would represent a diversion of resources that may be significant, and our efforts may not prove successful. The inability to secure or protect our intellectual property assets could have a material adverse effect on our business and our ability to compete.

We may be subject to claims by third-parties for (i) copyright, trademark or patent infringement; (ii) breach of copyright, trademark or license usage rights; or (iii) misappropriation of trade secrets. Any such claims and any resulting litigation could result in significant expense and liability for damages. If we were found to have infringed or misappropriated a third-party patent or other intellectual property right, we could in some circumstances be enjoined from providing certain products or services to our customers or from utilizing and benefiting from certain methods, processes, copyrights, trademarks, trade secrets or licenses. Alternatively, we could be required to enter into costly licensing arrangements with third-parties or implement a costly work around. Any of these scenarios could have a material adverse effect on our business and results of operations.

Strategic Risk

We are subject to the risk of events that can cause our fundamental business model to change, either through a shift in the businesses in which we are engaged or a change in our execution.

In addition, tactical risks may become strategic risks. For example, we must consider the impact of the prolonged low interest rate environment on new product development and continued sales of interest sensitive products.

Changes in the regulatory landscape may be unsettling to our business model. New laws and regulations are being considered in the U.S. and our other countries of operation at an increasing pace, as there has been greater scrutiny on financial regulation over the past several years. Proposed or unforeseen changes in law or regulation may adversely impact our business. See "Business-Regulation" for a discussion of certain recently enacted and pending proposals by international, federal and state regulatory authorities and their potential impact on our business, including in the following areas:

- Financial sector regulatory reform.
- U.S. federal, state and local and non-U.S. tax laws, including BEAT and GILTI.
- Fiduciary rules and other standards of care.
- Our regulation under U.S. state insurance laws and developments regarding group-wide supervision and capital standards, accounting rules, RBC factors for invested assets and reserves for life insurance, variable annuities and other products.
- Insurer capital standards in Japan, Korea and other non-U.S. jurisdictions.
- Privacy and cybersecurity regulation.

Changes in accounting rules applicable to our business may also have an adverse impact on our results of operations or financial condition. For a discussion of accounting pronouncements and their potential impact on our business, including Accounting Standards Update ("ASU") 2018-12, Financial Services - Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts, see Note 2 to the Consolidated Financial Statements.

Changes in technology and other external factors may be unsettling to our business model. We believe the following aspects of technological and other changes would significantly impact our business model. There may be other unforeseen changes in technology and the external environment which may have a significant impact on our business model.

- Interaction with customers. Technology is moving rapidly and as it does, it puts pressure on existing business models. Some of the changes we can anticipate are increased choices about how customers want to interact with the Company or how they want the Company to interact with them. Evolving customer preferences may drive a need to redesign products. Our distribution channels may change to become more automated, at the place and time of the customer's choosing. Such changes clearly have the potential to disrupt our business model.
- *Investment Portfolio*. Technology may have a significant impact on the companies in which the Company invests. For example, environmental concerns spur scientific inquiry which may re-position the relative attractiveness of wind or sun power over oil and gas. The transportation industry may favor alternative modes of conveyance of goods which may shift trucking or air transport out of favor. Consumers may change their purchasing behavior to favor online activity which would change the role of malls and retail properties.
- Medical Advances. The Company is exposed to the impact of medical advances in two major ways. Genetic testing and the availability of that
 information unequally to consumers and insurers can bring anti-selection risks. Specifically, data from genetic testing can give our prospective
 customers a clearer view into their future, allowing them to select products protecting them against likelihoods of mortality or longevity with more
 precision. Also, technologies that extend lives will challenge our actuarial assumptions especially in the annuity-based businesses.

The following items are examples of other factors which could have a meaningful impact on our business.

- We may not realize or sustain the expected benefits from programs we have announced, and these efforts could have a materially adverse effect on our business, operations, financial condition, results of operations and competitive position. In 2019, we began implementing a multi-year plan of programs designed to accelerate margin growth. If we do not successfully manage and execute these programs, or if they are inadequate or ineffective, we may fail to meet our financial goals and achieve anticipated benefits, improvements may be delayed, not sustained or not realized and our business, operations and competitive position could be adversely affected. These programs could result in unintended consequences or unforeseen costs, including distraction of our management and employees, attrition, inability to attract or retain key personnel, and reduced employee productivity, which could adversely affect our business, financial condition, and results of operations.
- We are subject to risks relating to the acquisition, and post-acquisition operations, of Assurance IQ, Inc. ("Assurance IQ"). In October 2019, we completed the acquisition of Assurance IQ (the "Acquisition"). For a description of Assurance IQ and the Acquisition, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Overview" and Note 1 to the Consolidated Financial Statements. We are subject to certain risks relating to the Acquisition and the ongoing operations of Assurance IQ, and these risks could adversely affect, possibly materially, our business, results of operations, financial position or liquidity or prevent us from realizing the expected benefits from the Acquisition. These risks include the following:
 - We may not realize the growth, earnings, cost savings, efficiencies or synergies that we anticipate. This may result in the need to recognize
 an impairment of goodwill which could adversely affect our results of operations and financial condition.
 - There is the risk that we will be exposed to obligations and liabilities of Assurance IQ that are not adequately covered, in amount, scope or duration, by the indemnification provisions in the merger agreement or representation and warranty insurance policy, or reflected or reserved for in the financial statements of Assurance IQ.
 - There is the risk that Assurance IQ will lose key personnel or experience higher than expected employee attrition rates that would adversely affect the performance of the business. In addition, there is the risk that product manufacturers and independent agents on the Assurance IQ platform will choose to stop doing business with Assurance IQ.
 - Pursuant to the merger agreement, the Company has agreed to take, or refrain from taking, certain actions with respect to Assurance IQ prior to 2023, and a violation of this agreement may accelerate payment of the full amount of contingent payments.
 - We may experience difficulties in integrating Assurance IQ into our strategy and the process may take longer than expected. The integration will require the dedication of significant management resources, which may distract management's attention from day-to-day business operations.

- Changes to the policies and procedures the Company uses to locate guaranteed group annuity customers and establish related reserves may adversely impact our results of operations and financial position. The Company's retirement business provides guaranteed group annuity benefits under group annuity and structured settlement contracts. In the normal course of business, at any given time, there are a small number of customers that we cannot locate. Under our policies and procedures, we use internal and external tools and resources to locate customers covered by our guaranteed group annuity benefits. We also have policies on the development of our reserve estimates, and we believe that we are complying with our policies and procedures and meeting our obligations to customers. In recent years the Company has reviewed this issue closely and made enhancements to its policies and procedures. In addition, the Company continues to regularly review, test and enhance the processes and tools used to locate customers, and over time, such processes and tools have continued to evolve. Ultimately, we could see greater standardization of what may currently be divergent practices across the industry. Further changes to the policies and procedures the Company uses to locate customers and establish related reserves may result in increased operational expenses and complexity, and increases in reserves, which could adversely impact our results of operations and financial position.
- A downgrade in our financial strength or credit ratings could potentially, among other things, adversely impact our business prospects, results of operations, financial condition and liquidity. For a discussion of our ratings and the potential impact of a ratings downgrade on our business, see "Management's Discussion and Analysis of Financial Condition and Results of Operations-Liquidity and Capital Resources-Ratings." We cannot predict what additional actions rating agencies may take, or what actions we may take in response to the actions of rating agencies, which could adversely affect our business. Our ratings could be downgraded at any time and without notice by any rating agency. In addition, a sovereign downgrade could result in a downgrade of our subsidiaries operating in that jurisdiction, and ultimately of Prudential Financial and our other subsidiaries. For example, in September 2015, S&P downgraded Japan's sovereign rating to A+ with a 'Stable' outlook citing uncertainties around the strength of economic growth and weak fiscal positions. As a result, S&P subsequently lowered the ratings of a number of institutions in Japan, including our Japanese insurance subsidiaries. It is possible that Japan's sovereign rating could be subject to further downgrades, which would result in further downgrades of our insurance subsidiaries in Japan. Given the importance of our operations in Japan to our overall results, such downgrades could lead to a downgrade of Prudential Financial and our domestic insurance companies.
- The elimination of London Inter-Bank Offered Rate ("LIBOR") may adversely affect certain derivatives and floating rate securities we hold and floating rate securities we have issued, certain real estate lending and other activities conducted in PGIM, and any other assets or liabilities whose value is tied to LIBOR. Actions by regulators have resulted in the establishment of alternative reference rates to LIBOR in most major currencies. It is expected that the U.K. Financial Conduct Authority will stop persuading or compelling banks to submit LIBOR rates after 2021. However, it remains unclear if, how and in what form, LIBOR will continue to exist. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve's Alternative Reference Rate Committee (constituted of major derivative market participants and their regulators), has begun publishing a Secured Overnight Funding Rate ("SOFR") which is intended to replace U.S. dollar LIBOR, and SOFR-based investment products have been issued in the U.S. Proposals for alternative reference rates for other currencies have also been announced or have already begun publication. Markets are slowly developing in response to these new rates and questions around liquidity in these rates and how to appropriately adjust these rates to eliminate any economic value transfer at the time of transition remain a significant concern for us and others in the marketplace. The effect of any changes or reforms to LIBOR or discontinuation of LIBOR on new or existing financial instruments to which we have exposure or the activities in our businesses will vary depending on (1) existing fallback provisions in individual contracts and (2) whether, how, and when industry participants develop and widely adopt new reference rates and fallbacks for both legacy and new products or instruments. Accordingly, it is difficult to predict the full impact of the transition away from LIBOR on certain derivatives and floating rate securities we hold, securities we have issued, real estate lending, and other activities we conduct in PGIM, and any other assets or liabilities, as well as contractual rights and obligations, whose value is tied to LIBOR. The value or profitability of these products and instruments may be adversely affected.

- The changing competitive landscape may adversely affect the Company. In each of our businesses, we face intense competition from insurance companies, asset managers and diversified financial institutions, both for the ultimate customers for our products and, in many businesses, for distribution through non-affiliated distribution channels. Technological advances, changing customer expectations, including related to digital offerings, access to customer data, or other changes in the marketplace may present opportunities for new or smaller companies without established products or distribution channels to meet consumers' increased expectations more efficiently than us. Fintech and insurtech companies and companies in other industries with greater access to customers and data have the potential to disrupt industries globally, and many participants have been partially funded by industry players. For example, in PGIM, we expect to see continued pressure on fees given the focus on passive investment and the growth of the robo-advice channel.
- Climate change may increase the severity and frequency of calamities, or adversely affect our investment portfolio. Climate change may increase the frequency and severity of weather related disasters and pandemics. In addition, climate change regulation may affect the prospects of companies and other entities whose securities we hold, or our willingness to continue to hold their securities. It may also impact other counterparties, including reinsurers, and affect the value of investments, including real estate investments we hold or manage for others. We cannot predict the long-term impacts on us from climate change or related regulation.
- Market conditions and other factors may adversely impact product sales or increase expenses. Examples include:
 - A change in market conditions, such as high inflation and high interest rates, could cause a change in consumer sentiment and behavior adversely affecting sales and persistency of our savings and protection products. Conversely, low inflation and low interest rates could cause persistency of these products to vary from that anticipated and adversely affect profitability. Similarly, changing economic conditions and unfavorable public perception of financial institutions can influence customer behavior, including increasing claims or surrenders in certain products.
 - Sales of our investment-based and asset management products and services may decline, and lapses and surrenders of certain insurance
 products and withdrawals of assets from investment products may increase if a market downturn, increased market volatility or other
 market conditions result in customers becoming dissatisfied with their investments or products.
 - Changes in our discount rate, expected rate of return, life expectancy, health care cost and assumptions regarding compensation increases for our pension and other postretirement benefit plans may result in increased expenses and reduce our profitability.
- Our reputation may be adversely impacted if any of the risks described in this section are realized. Reputational risk could manifest from any of the risks as identified in the Company's risk identification process. Failure to effectively manage risks across a broad range of risk issues exposes the Company to reputational harm. If the Company were to suffer a significant loss in reputation, both policyholders and counterparties could seek to exit existing relationships. Additionally, large changes in credit worthiness, especially credit ratings, could impact access to funding markets while creating additional collateral requirements for existing relationships. The mismanagement of any such risks may potentially damage our reputational asset. Our business is anchored in the strength of our brand, our alignment to our values, and our proven commitment to keep our promises to our customers. Any negative public perception, founded or otherwise, can be widely and rapidly shared over social media or other means, and could cause damage to our reputation.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We own our headquarters building located at 751 Broad Street, Newark, New Jersey. Excluding our headquarters building and properties used by our International Businesses and the international investment operations of PGIM, which are discussed below, as of December 31, 2019, we conduct our business and home office functions in both owned and leased locations throughout the U.S. We also conduct back-office functions in leased properties outside the U.S.

For our International Businesses, as of December 31, 2019, we own and lease home offices located in Japan, Argentina, Brazil, Korea, Mexico, Malaysia and Taiwan. We also conduct our business in owned and leased properties, primarily field offices, located throughout these same countries. For PGIM's international investment operations, as of December 31, 2019, we lease home offices located in Japan and Taiwan. We also lease principal properties and other branch and field offices in other countries where PGIM does business.

We believe our properties are adequate and suitable for our business as currently conducted and are adequately maintained. The above properties do not include properties we own solely for investment purposes.

At our domestic home office properties, we are developing programs to reduce emissions. These programs include seeking ways to expand energy efficiency. For home office properties in the U.S., Brazil, Taiwan and Korea, we are also developing waste diversion measures including internal recycling and composting infrastructures and availing ourselves of third-party waste diversion programs. Our Prudential Tower home office property in Newark, New Jersey and our data center located in Plymouth, Minnesota have been awarded LEED Gold Certification from the U.S. Green Building Council.

ITEM 3. LEGAL PROCEEDINGS

See Note 23 to the Consolidated Financial Statements under "—Litigation and Regulatory Matters" for a description of certain pending litigation and regulatory matters affecting us, and certain risks to our businesses presented by such matters.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

General

Prudential Financial's Common Stock trades on the New York Stock Exchange under the symbol "PRU." On January 31, 2020, there were 1,199,060 registered holders of record for the Common Stock and 397 million shares outstanding.

Unregistered Sales of Equity Securities and Use of Proceeds

(a) Sale of securities by the Company during the year ended December 31, 2019 that were not registered under the Securities Act of 1933, as amended (the "Securities Act").

In August 2019, the Company issued approximately 6.2 million shares of its Common Stock in connection with the exchange of \$500 million of exchangeable surplus notes due September 2019. The exchange was effected in accordance with the terms of the notes, which provides that the surplus notes be exchanged at the option of the holder, in whole but not in part, for shares of Prudential Financial's Common Stock. The exchange rate for the surplus notes was 12.3877 shares of Common Stock per each \$1,000 principal amount of surplus notes. The Company's obligations under the surplus notes are now satisfied. The shares were issued in reliance upon the exemption from registration under Section 4(a)(2) of the Securities Act for an issuance not involving a public offering.

In October 2019, the Company issued approximately 5.5 million shares of restricted common stock to the selling shareholders as part of the consideration for the Assurance IQ acquisition. The shares were issued in reliance upon the exemption from registration under Section 4(a)(2) of the Securities Act and Regulation D promulgated thereunder for an issuance not involving a public offering. See Note 1 to the Consolidated Financial Statements for additional information about the acquisition.

Issuer Purchases of Equity Securities

(c) The following table provides information about purchases by the Company during the three months ended December 31, 2019, of its Common Stock.

<u>Period</u>	Total Number of Shares Purchased(1)	P	Average rice Paid er Share	Total Number of Shares Purchased as Part of Publicly Announced Program(2)	Approximate Dollar Value of Shares that May Yet Be Purchased under the Program(2)
October 1, 2019 through October 31, 2019	1,868,914	\$	89.32	1,865,952	
November 1, 2019 through November 30, 2019	1,794,334	\$	93.06	1,790,949	
December 1, 2019 through December 31, 2019	1,786,545	\$	93.37	1,785,026	
Total	5,449,793	\$	91.88	5,441,927	\$ 0

⁽¹⁾ Includes shares of Common Stock withheld from participants for income tax withholding purposes whose shares of restricted stock units vested during the period. Such restricted stock units were originally issued to participants pursuant to the Prudential Financial Inc. Omnibus Incentive Plan.

In December 2019, Prudential Financial's Board of Directors authorized the Company to repurchase, at management's discretion, up to \$2.0 billion of its outstanding Common Stock during the period from January 1, 2020 through December 31, 2020.

ITEM 6. SELECTED FINANCIAL DATA

We derived the selected consolidated income statement data for the years ended December 31, 2019, 2018 and 2017 and the selected consolidated balance sheet data as of December 31, 2019 and 2018, from the Consolidated Financial Statements included elsewhere herein. We derived the selected consolidated income statement data for the years ended December 31, 2016 and 2015, and the selected consolidated balance sheet data as of December 31, 2017, 2016 and 2015, from consolidated financial statements not included herein.

Prior to January 1, 2018, the Company's Gibraltar Life Insurance Company, Ltd. ("Gibraltar Life") consolidated operations used a November 30 fiscal year end for purposes of inclusion in the Company's Consolidated Financial Statements. The result of this reporting date difference was a one-month reporting lag for Gibraltar Life. As a result, the Company's consolidated balance sheet as of December 31 previously included the assets and liabilities of Gibraltar Life as of November 30 for each respective year, and the Company's consolidated income statement data for the years ended December 31 included Gibraltar Life's results of operations for the twelve months ended November 30 for each respective year.

Effective January 1, 2018, the Company converted its Gibraltar Life operations to a December 31 fiscal year end. This action eliminated the one-month reporting lag so that the reporting dates and periods of financial balances and results of Gibraltar Life are consistent with those of the Company. The establishment of a new fiscal year end for Gibraltar Life is considered a change in accounting principle to a preferable method and requires retrospective application. The Company believes this change in accounting principle is preferable given that it aligns the reporting dates of Prudential Financial and its subsidiaries, which allows for a more timely and consistent basis of reporting the financial position and results of Gibraltar Life. In order to effect this elimination, the Company restated prior periods' equity which increased "Retained Earnings" by approximately \$167 million as of December 31, 2015, 2016 and 2017. The impact to the Statements of Operations, Statements of Cash Flows, Statements of Comprehensive Income and other balance sheet captions, as a result of the elimination of the reporting lag, was not material for any of the periods presented.

This selected consolidated financial information should be read in conjunction with our MD&A and Consolidated Financial Statements included elsewhere herein.

⁽²⁾ In December 2018, Prudential Financial's Board of Directors authorized the Company to repurchase, at management's discretion, up to \$2.0 billion of its outstanding Common Stock during the period from January 1, 2019 through December 31, 2019. In September 2019, the Board of Directors authorized a \$500 million increase to this authorization for calendar year 2019. As a result, the Company's aggregate share repurchase authorization for calendar year 2019 is \$2.5 billion.

Certain of the statements included in this section constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements are made based on management's current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. Prudential Financial, Inc.'s actual results may differ, possibly materially, from expectations or estimates reflected in such forward-looking statements. Certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements can be found in the "Risk Factors" and "Forward-Looking Statements" sections herein.

Pursuant to the FAST Act Modernization and Simplification of Regulation S-K, discussions related to the results of operations for the year ended December 31, 2018 in comparison to the year ended December 31, 2017 have been omitted. For such omitted discussions, refer to Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018.

Overview

Our principal operations are comprised of PGIM (our global investment management business), our U.S. Businesses (consisting of our U.S. Workplace Solutions, U.S. Individual Solutions, and Assurance IQ divisions), our International Businesses, the Closed Block division, and our Corporate and Other operations. The U.S. Workplace Solutions division consists of our Retirement and Group Insurance businesses, the U.S. Individual Solutions division consists of our Individual Annuities and Individual Life businesses, and the Assurance IQ division consists of our Assurance IQ business. In October 2019, we completed the acquisition of Assurance IQ, Inc. ("Assurance IQ"), a leading consumer solutions platform that offers a range of solutions that help meet consumers' financial needs (see Note 1 to the Consolidated Financial Statements for additional information). The Closed Block division is accounted for as a divested business that is reported separately from the Divested and Run-off Businesses that are included in Corporate and Other. Our Corporate and Other operations include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested or placed in run-off, excluding the Closed Block division. See "Business" for a description of our sources of revenue and details on how our profitability is impacted. In addition, our profitability is impacted by our ability to effectively deploy capital, utilize our tax capacity and manage expenses.

Management expects that results in 2020 will continue to benefit from our differentiated mix of market-leading businesses that complement each other to provide competitive advantages, earnings diversification and capital benefits from a balanced risk profile. While challenges exist in the form of a low interest rate environment (see "Impact of a Low Interest Rate Environment"), fee compression in certain of our businesses and other market factors, we expect that our businesses will produce appropriate returns for the current market environment. We believe we are well-positioned to tap into market opportunities to meet the evolving needs of individual customers, workplace clients, and society at large. Our mix of high-quality protection, retirement and investment management businesses enables us to offer solutions that cover a broad range of financial needs and to engage with our clients through multiple channels. The Assurance IQ acquisition accelerates our ability to sell solutions across a broad socio-economic spectrum. We aim to expand our addressable market, build deeper and longer-lasting relationships with customers and clients, and make a meaningful difference in the financial wellness of their lives.

In order to further increase our competitive advantage, we are working to enhance the experience of our customers and the capabilities of our businesses, which we expect will also help us realize improved margins. In 2019, we announced programs we have launched in pursuit of these objectives that will result in multi-year investments in technology, systems and employee reskilling, as well as severance and related charges. Over the next several years, we will also see significant expense efficiencies resulting from these investments. During 2019, we incurred significant implementation costs related to these programs, which reflected an acceleration of spending that the Company announced in December 2019 that brought forward a portion of the expected implementation costs and is also expected to drive faster realization of projected margin improvement. Implementation costs were approximately \$365 million in the fourth quarter of 2019, and approximately \$400 million for the full year 2019, including a charge related to the Company's Voluntary Separation Program offered to certain eligible U.S.-based employees. The voluntary separation program excluded senior executives and employees in certain roles (including employees in our PGIM investment businesses). The employment end dates for the employees that applied to participate in the program and whose applications were accepted by management are expected to occur between February and September of 2020.

Outlook

We feel confident about our prospects for the future supported by our integrated and complementary businesses. Specific outlook considerations for each of our businesses include the following:

• PGIM. Our global investment management business, PGIM, is focused on maintaining strong investment performance while leveraging the scale of its approximately \$1.308 trillion of assets under management through its distinctive multi-manager model. In addition to providing solutions for its third-party clients, PGIM provides our U.S. and International Businesses with a competitive advantage through its investment expertise across a broad array of asset classes. PGIM is making targeted investments to further diversify its product offerings, expand its global investment and distribution footprint, selectively acquire new investment capabilities (see "—Results of Operations by Segment" below for information on our strategic acquisitions), and further strengthen external recognition as a leading global asset manager. These capabilities will enable PGIM to continue to meet our clients' evolving needs and, in turn, to generate flows across multiple asset classes, client segments and geographies. Underpinning our growth strategy is our ability to continue to deliver robust investment performance, and to attract and retain high-caliber investment talent. While we are experiencing fee pressures in some strategies, our average fee yield has remained relatively flat due to new flows coming into higher fee yielding strategies within fixed income, equities and alternatives such as real estate and private fixed income, and because of our diverse business profile.

• U.S. Businesses:

U.S. Workplace Solutions. In our Retirement business, we continue to provide products that respond to the needs of plan sponsors to manage risk and control their benefit costs, while ensuring we maintain appropriate pricing and return expectations under changing market conditions. We expect to continue to be a market leader in pension risk transfer because of our differentiated capabilities and demonstrated execution in this business. We expect, however, that growth will not be linear given the episodic nature of larger cases. In addition, while we foresee continuation of the spread and fee compression that we have been experiencing in our full-service business, we believe these are manageable headwinds and we have experienced strong deposits and sales in recent years. In our Group Insurance business, we are focused on expanding our Premier market segment and affinity relations, while maintaining a leadership position in the National segment. Our continued pricing discipline has resulted in improvements to our benefits ratio. In both Retirement and Group Insurance, we believe our integrated solutions for helping to improve the financial wellness of individuals at the workplace differentiates us in the market and helps us build deeper customer relationships. Over time, this should result in accelerated revenue growth.

- U.S. Individual Solutions. Our Individual Annuities business remains focused on helping its customers meet their investment and retirement needs. We remain focused on offering a broad range of solutions that enable us to realize appropriate returns for the current environment and provide a strong value proposition for our customers. As we execute on our product diversification strategy, we expect a natural reduction in average fee rates due to the maturation of the existing block and due to sales of newer products which generally have lower rate structures. Our Individual Life business is continuing to execute on its product diversification strategy in order to maintain a diversified product mix and an attractive risk profile. We continue to deepen relationships with distribution partners while developing a more customer-oriented experience. As we grow our business, we are remaining disciplined in our pricing. In the longer term, we believe our ability to provide additional solutions to the employees of our Workplace Solutions businesses and to other retail customers should increase revenues in our Individual Solutions businesses. We also expect to offer Individual Solutions products on the Assurance IQ platform over time.
- Assurance IQ. In October 2019, we completed the acquisition of Assurance IQ. Launched in 2016, Assurance IQ leverages data science and technology to distribute third-party life, health, Medicare and property and casualty products directly to retail shoppers primarily through its digital and independent agent channels. We expect that the acquisition of Assurance IQ will enhance the growth of our U.S. Businesses and generate cost synergies. We also believe that Assurance IQ has the potential to enhance the growth of our International Businesses over time. See Note 1 to the Consolidated Financial Statements for additional information about the acquisition, including the purchase consideration. See "Business" for a description of the business and "Risk Factors" for a description of the risks associated with the acquisition.
- International Businesses. Our International Businesses includes our world-class Japanese life insurance operation as well as other operations in select markets. We continue to concentrate on deepening our presence in Japan and other existing markets, while also expanding our presence in select highgrowth markets. We continue to focus on protection solutions and we innovate as clients' needs evolve. The returns on our death protection products are largely driven by mortality margins which mitigates the exposure of results to the current low interest rate environment. Over the last few years, our sales mix in Japan has shifted to U.S. dollar-denominated products and we expect this trend to continue in the near-term. We are also focused on achieving scale in select growth markets outside of Japan. We regularly review our existing businesses and may seek to deploy capital in support of our strategy or to exit an operation if it is determined that it no longer aligns with our broader strategy. We continue to invest in our businesses and assess acquisition

opportunities to build scale, complement our businesses, and support our long-term growth aspirations. For additional information on our strategic acquisitions and dispositions, see "—Results of Operations by Segment" below.

Industry Trends

Our U.S. and International Businesses are impacted by financial markets, economic conditions, regulatory oversight, and a variety of trends that affect the industries in which we compete.

Financial and Economic Environment.

<u>U.S. Businesses</u> - As discussed further under "Impact of a Low Interest Rate Environment" below, interest rates in the U.S. remain lower than historical levels, which may continue to negatively impact our portfolio income yields and our net investment spread results among other factors. In addition, we are subject to financial impacts associated with movements in equity markets and the evolution of the credit cycle as discussed in "Segment Results of Operations" where applicable and more broadly in "Risk Factors".

International Businesses - Our International Businesses' operations, especially in Japan, continue to operate in a low interest rate environment. Although the local market in Japan has operated in a low interest rate environment for years, as discussed under "Impact of a Low Interest Rate Environment" below, the current reinvestment yields for certain blocks of business are now generally lower than the current portfolio yields supporting these blocks of business, which may negatively impact our net investment spread results. The continued level of interest rates in the U.S., along with their relation to interest rates in Japan, may impact the relative attractiveness of U.S. dollar-denominated products compared to yen-denominated products in Japan. In addition, we are subject to financial impacts associated with movements in foreign currency rates, particularly the Japanese yen. Fluctuations in the value of the yen can impact the relative attractiveness to customers of both yen-denominated and non-yen denominated products. In addition, we are subject to financial impacts associated with movements in equity markets and the evolution of the credit cycle as discussed in "Segment Results of Operations" where applicable and more broadly in "Risk Factors".

Demographics.

<u>U.S. Businesses</u> - Customer demographics continue to evolve and new opportunities present themselves in different consumer segments such as the millennial and multicultural markets. Consumer expectations and preferences are changing. We believe existing customers and potential customers are increasingly looking for cost-effective solutions that they can easily understand and access through technology-enabled devices. At the same time, income protection, wealth accumulation and the needs of retiring baby boomers are continuing to shape the insurance industry. A persistent retirement security gap exists in terms of both savings and protection. Despite the ongoing phenomenon of the risk and responsibility of retirement savings shifting from employers to employers are becoming increasingly focused on the financial wellness of the individuals they employ.

International Businesses - Japan has an aging population as well as a large pool of household assets invested in low-yielding deposit and savings vehicles. The aging of Japan's population, along with strains on government pension programs, have led to a growing demand for insurance products with a significant savings element to meet savings and retirement needs as the population prepares for retirement. We are seeing a similar shift to retirement-oriented products across other Asian markets, including Korea and Taiwan, each of which also has an aging population.

Regulatory Environment. See "Business—Regulation" for a discussion of regulatory developments that may impact the Company and the associated risks.

Competitive Environment. See "Business—" for a discussion of the competitive environment and the basis on which we compete in each of our segments.

Impact of a Low Interest Rate Environment

As a global financial services company, market interest rates are a key driver of our results of operations and financial condition. Changes in interest rates can affect our results of operations and/or our financial condition in several ways, including favorable or adverse impacts to:

- investment-related activity, including: investment income returns, net interest margins, net investment spread results, new money rates, mortgage loan prepayments and bond redemptions;
- insurance reserve levels, market experience true-ups and amortization of both deferred policy acquisition costs ("DAC") and value of business acquired ("VOBA");

- customer account values, including their impact on fee income;
- fair value of, and possible impairments on, intangible assets such as goodwill;
- product offerings, design features, crediting rates and sales mix; and
- policyholder behavior, including surrender or withdrawal activity.

For more information on interest rate risks, see "Risk Factors—Market Risk".

See below for discussions related to the current interest rate environments in our two largest markets, the U.S. and Japan; the composition of our insurance liabilities and policyholder account balances; and the hypothetical impacts to our investment results if these interest rate environments are sustained.

U.S. Operations excluding the Closed Block Division

Interest rates in the U.S. have experienced a sustained period of historically low levels. While market conditions and events make uncertain the timing, amount and impact of any monetary policy decisions by the Federal Reserve, changes in interest rates may impact our reinvestment yields, primarily for our investments in fixed maturity securities and commercial mortgage loans. As interest rates rise, our reinvestment yield may exceed the overall portfolio yield resulting in a favorable impact to earnings. Conversely, if interest rates were to decline, our reinvestment yield may be below our overall portfolio yield, resulting in an unfavorable impact to earnings.

For the general account supporting our U.S. Individual Solutions division, U.S. Workplace Solutions division and our Corporate and Other operations, we estimate annual principal payments and prepayments that we would be required to reinvest to be approximately 6.4% of the fixed maturity security and commercial mortgage loan portfolios through 2021. The portion of the general account attributable to these operations has approximately \$222 billion of such assets (based on net carrying value) as of December 31, 2019. The average portfolio yield for fixed maturity securities and commercial mortgage loans is approximately 4.2%, as of December 31, 2019.

Included in the \$222 billion of fixed maturity securities and commercial mortgage loans are approximately \$146 billion that are subject to call or redemption features at the issuer's option and have a weighted average interest rate of approximately 4%. Of this \$146 billion, approximately 58% contain provisions for prepayment premiums. If we reinvest scheduled payments or prepayments (not subject to a prepayment fee) at rates below the current portfolio yield, including in some cases at rates below those guaranteed under our insurance contracts, future operating results will be impacted to the extent we do not, or are unable to, reduce crediting rates on in-force blocks of business, or effectively utilize other asset/liability management strategies described below, in order to maintain current net interest margins.

The following table sets forth the insurance liabilities and policyholder account balances of our U.S. Operations excluding the Closed Block Division, by type, for the date indicated:

		As of nber 31, 2019
	(in	billions)
Long-duration insurance products with fixed and guaranteed terms	\$	136
Contracts with adjustable crediting rates subject to guaranteed minimums		58
Participating contracts where investment income risk ultimately accrues to contractholders		15
Total	\$	209

The \$136 billion above relates to long-duration products such as group annuities, structured settlements and other insurance products that have fixed and guaranteed terms, for which underlying assets may have to be reinvested at interest rates that are lower than portfolio rates. We seek to mitigate the impact of a prolonged low interest rate environment on these contracts through asset/liability management, as discussed further below.

The \$58 billion above relates to contracts with crediting rates that may be adjusted over the life of the contract, subject to guaranteed minimums. Although we may have the ability to lower crediting rates for those contracts above guaranteed minimums, our willingness to do so may be limited by competitive pressures. The following table sets forth the related account values by range of guaranteed minimum crediting rates and the related range of the difference, in basis points ("bps"), between rates being credited to contractholders as of December 31, 2019, and the respective guaranteed minimums.

Account Values v	with Adjustable Credit	ng Rates Subject to	Guaranteed Minimums:

	At aranteed inimum	1-49 bps above guaranteed minimum	50-99 bps above guaranteed minimum	g I	100-150 ops above uaranteed minimum	Greater than 150 bps above guaranteed minimum	Total
Range of Guaranteed Minimum Crediting Rates:			(\$ in 1	billions))		
Less than 1.00%	\$ 0.7	\$ 1.2	\$ 0.5	\$	0.1	\$ 0.0	\$ 2.5
1.00% - 1.99%	1.0	4.0	11.2		2.4	1.0	19.6
2.00% - 2.99%	1.2	0.9	0.5		2.7	1.1	6.4
3.00% - 4.00%	26.3	2.0	0.1		0.2	0.0	28.6
Greater than 4.00%	0.9	0.0	0.0		0.0	0.0	0.9
Total(1)	\$ 30.1	\$ 8.1	\$ 12.3	\$	5.4	\$ 2.1	\$ 58.0
Percentage of total	52%	 14%	21%		9%	 4%	100%

⁽¹⁾ Includes approximately \$0.66 billion related to contracts that impose a market value adjustment if the invested amount is not held to maturity.

The remaining \$15 billion of insurance liabilities and policyholder account balances in these operations relates to participating contracts for which the investment income risk is expected to ultimately accrue to contractholders. The crediting rates for these contracts are periodically adjusted based on the return earned on the related assets.

Assuming a hypothetical scenario where the average 10-year U.S. Treasury rate is 1.85% (which is reasonably consistent with recent rates) for the period from January 1, 2020 through December 31, 2020 (and credit spreads remain unchanged from levels as of December 31, 2019), we estimate that the unfavorable impact to net investment income of reinvesting activities, including scheduled maturities and estimated prepayments of fixed maturities and commercial mortgage and other loans (excluding assets supporting participating contracts) would be between \$40 million and \$60 million for the period from January 1, 2020 through December 31, 2020.

In order to mitigate the unfavorable impact that a low interest rate environment has on our net interest margins, we employ a proactive asset/liability management program, which includes strategic asset allocation and hedging strategies within a disciplined risk management framework. These strategies seek to match the characteristics of our products, and to closely approximate the interest rate sensitivity of the assets with the estimated interest rate sensitivity of the product liabilities. Our asset/liability management program also helps manage duration gaps, currency and other risks between assets and liabilities through the use of derivatives. We adjust this dynamic process as products change, as customer behavior changes and as changes in the market environment occur. As a result, our asset/liability management process has permitted us to manage the interest rate risk associated with our products through several market cycles. Our interest rate exposure is also mitigated by our business mix, which includes lines of business for which fee-based and insurance underwriting earnings play a more prominent role in product profitability.

Closed Block Division

Substantially all of the \$60 billion of general account assets in the Closed Block division support obligations and liabilities relating to the Closed Block policies only. See Note 15 to the Consolidated Financial Statements for further information on the Closed Block.

International Insurance Operations

While our international insurance operations have experienced a low interest rate environment for many years, the current reinvestment yields for certain blocks of business in our international insurance operations are generally lower than the current portfolio yield supporting these blocks of business. In recent years, the Bank of Japan's monetary policy has resulted in even lower and, at times, negative yields for certain tenors of government bonds. Our international insurance operations employ a proactive asset/liability management program in order to mitigate, to the extent possible, the unfavorable impact that the current interest rate environment has on our net interest margins. In conjunction with this program, we have not purchased negative yielding assets to support the portfolio and we continue to purchase long-term bonds with tenors of 30 years or greater. Additionally, our diverse product portfolio in terms of currency mix and premium payment structure allows us to further mitigate the negative impact from this low interest rate environment. We regularly examine our product offerings and their profitability. As a result, we have repriced certain products, adjusted commissions for certain products and have discontinued sales of other products that do not meet our profit expectations. The impact of these actions and the introduction of certain new products, has resulted in an increase in sales

of U.S. dollar-denominated products relative to products denominated in other currencies. For additional information on sales within our international insurance operations, see "—International Businesses—Sales Results," below.

The following table sets forth the insurance liabilities and policyholder account balances of our Japanese operations, by type, for the date indicated:

		As of ber 31, 2019
	(in	billions)
Insurance products with fixed and guaranteed terms	\$	127
Contracts with a market value adjustment if invested amount is not held to maturity		26
Contracts with adjustable crediting rates subject to guaranteed minimums		11
Total	\$	164

Of the \$127 billion above, \$126 billion is comprised of long-duration insurance products that have fixed and guaranteed terms, for which underlying assets may have to be reinvested at interest rates that are lower than current portfolio yields. The remaining insurance liabilities and policyholder account balances include \$26 billion related to contracts that impose a market value adjustment if the invested amount is not held to maturity and \$11 billion related to contracts with crediting rates that may be adjusted over the life of the contract, subject to guaranteed minimums. Most of the current crediting rates on these contracts, however, are at or near contractual minimums. Although we have the ability in some cases to lower crediting rates for those contracts that are above guaranteed minimum crediting rates, the majority of this business has interest crediting rates that are determined by formula.

Assuming a hypothetical scenario where the average 30-year Japanese Government Bond yield is 0.40% and the 10-year U.S. Treasury rate is 1.85% (which is reasonably consistent with recent rates) for the period from January 1, 2020 through December 31, 2020 (and credit spreads remain unchanged from levels as of December 31, 2019), we estimate that the unfavorable impact to net investment income of reinvesting activities, including scheduled maturities and estimated prepayments of fixed maturities and commercial mortgage and other loans (excluding assets supporting participating contracts) would be between \$40 million and \$60 million for the period from January 1, 2020 through December 31, 2020.

Results of Operations

Consolidated Results of Operations

The following table summarizes net income (loss) for the periods presented.

	 Ye	ear enc	ded December	· 31,	
	 2019		2018		2017
		(i	n millions)		
Revenues	\$ 64,807	\$	62,992	\$	59,689
Benefits and expenses	59,722		58,158		53,202
Income (loss) before income taxes and equity in earnings of operating joint ventures	 5,085		4,834		6,487
Income tax expense (benefit)	947		822		(1,438)
Income (loss) before equity in earnings of operating joint ventures	4,138		4,012		7,925
Equity in earnings of operating joint ventures, net of taxes	100		76		49
Net income (loss)	4,238		4,088		7,974
Less: Income attributable to noncontrolling interests	52		14		111
Net income (loss) attributable to Prudential Financial, Inc.	\$ 4,186	\$	4,074	\$	7,863

2019 to 2018 Annual Comparison. The \$112 million increase in "Net income (loss) attributable to Prudential Financial, Inc." reflected the following notable items:

• \$1,624 million favorable variance, on a pre-tax basis, from adjustments to reserves as well as DAC and other costs, reflecting the impact of our annual reviews and update of assumptions and other refinements. This excludes the impact associated with the variable annuity hedging program discussed below (see "—Results of Operations by Segment—U.S. Businesses—U.S. Individual Solutions Division—Individual Annuities" for additional information);

- \$954 million favorable variance, on a pre-tax basis, from unrealized gains (losses) from equity securities recorded within "Other income (loss)" for PFI excluding our Divested and Run-off Businesses; and
- \$642 million net favorable variance, on a pre-tax basis, primarily from income in the current period from our Divested and Run-off Businesses compared to a loss in the prior period, excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above.

Partially offsetting these increases in "Net income (loss) attributable to Prudential Financial, Inc." were the following items:

- \$1,492 million unfavorable variance from net pre-tax realized investment gains and losses for PFI excluding our Divested and Run-off Businesses, and excluding the impact of the hedging program associated with certain variable annuities discussed below (see "—General Account Investments" for additional information);
- \$1,169 million unfavorable variance, on a pre-tax basis, reflecting the net impact from changes in the value of our embedded derivatives and related hedge positions associated with certain variable annuities (see "—Results of Operations by Segment—U.S. Businesses—U.S. Individual Solutions Division—Individual Annuities—Variable Annuity Risks and Risk Mitigants" for additional information);
- \$272 million unfavorable variance, on a pre-tax basis, driven by market experience updates; and
- \$125 million unfavorable variance from higher income tax expense primarily due to the impact of tax reform and certain other tax matters on the prior year period (see Note 16 to the Consolidated Financial Statements for additional information).

Segment Results of Operations

We analyze the performance of our segments and Corporate and Other operations using a measure of segment profitability called adjusted operating income. See "—Segment Measures" for a discussion of adjusted operating income and its use as a measure of segment operating performance.

Shown below are the adjusted operating income contributions of each segment and Corporate and Other operations for the periods indicated and a reconciliation of this segment measure of performance to "Income (loss) before income taxes and equity in earnings of operating joint ventures" as presented in our Consolidated Statements of Operations.

	 Yea	ır end	led Decembe	r 31,

- (1) Assurance IQ was acquired by the Company in October 2019. See Note 1 to the Consolidated Financial Statements and "—Assurance IQ" for additional information.
- (2) Represents "Realized investment gains (losses), net," and related adjustments. See "—General Account Investments" and Note 22 to the Consolidated Financial Statements for additional information. Prior period amounts have been updated to conform to current period presentation.
- (3) Includes charges that represent the impact of realized investment gains (losses), net, on the amortization of DAC and other costs, and on changes in reserves. Also includes charges resulting from payments related to market value adjustment features of certain of our annuity products and the impact of realized investment gains (losses), net, on the amortization of Unearned Revenue Reserves ("URR").
- (4) Represents the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which are excluded from adjusted operating income beginning with the second quarter of 2019. The Company had historically recognized these impacts in adjusted operating income. See Note 22 to the Consolidated Financial Statements for additional information.
- (5) Represents the contribution to income (loss) of Divested and Run-off Businesses that have been or will be sold or exited, including businesses that have been placed in wind down, but that did not qualify for "discontinued operations" accounting treatment under U.S. GAAP. See "—Divested and Run-off Businesses" for additional information.
- (6) Represents adjustments not included in the above reconciling items. "Other adjustments" include certain components of the consideration for the Assurance IQ acquisition, which are recognized as compensation expense over the requisite service periods, as well as changes in the fair value of contingent consideration. See Note 22 to the Consolidated Financial Statements.
- (7) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from "Income (loss) before income taxes and equity in earnings of operating joint ventures" as they are reflected on an after-tax U.S. GAAP basis as a separate line in the Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but included in "Income (loss) before income taxes and equity in earnings of operating joint ventures" as they are reflected on a U.S. GAAP basis as a separate line in the Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represent the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

Segment results for 2019 presented above reflect the following:

PGIM. Results for 2019 increased in comparison to 2018, primarily reflecting higher asset management fees and other related revenues, partially offset by higher expenses.

Retirement. Results for 2019 increased in comparison to 2018, primarily reflecting a favorable comparative net impact from our annual reviews and update of assumptions and other refinements, and higher net investment spread results. This increase was partially offset by higher expenses and less favorable reserve experience.

Group Insurance. Results for 2019 increased in comparison to 2018, primarily reflecting more favorable underwriting results, higher net investment spread results and lower expenses, partially offset by an unfavorable comparative net impact from our annual reviews and update of assumptions and other refinements.

Individual Annuities. Results for 2019 decreased in comparison to 2018, inclusive of an unfavorable comparative net impact from our annual reviews and update of assumptions and other refinements. Excluding this item, the results decreased primarily driven by lower fee income, net of distribution expenses and other associated costs, and higher expenses, partially offset by higher net investment spread results, and an unfavorable impact from changes in market conditions on the estimates of profitability in the prior period, which beginning with the second quarter of 2019 is excluded from adjusted operating income (see Note 22 to the Consolidated Financial Statements for further information).

Individual Life. Results for 2019 decreased in comparison to 2018, primarily reflecting unfavorable comparative net impacts from our annual reviews and update of assumptions and other refinements.

Assurance IQ. Results for the period from October 10, 2019 ("acquisition date") to December 31, 2019 were \$(9) million. This reflects the starting period of Assurance IQ's earnings with Prudential and includes net revenues more than offset by operating expenses as well as amortization expenses related to intangible assets recognized as part of purchase accounting (see Note 1 and Note 10 to the Consolidated Financial Statements for additional information).

International Businesses. Results for 2019 increased in comparison to 2018, inclusive of favorable net impacts from foreign currency exchange rates and favorable comparative net impacts from our annual reviews and update of assumptions and other refinements. Excluding these items, the results decreased primarily reflecting higher expenses, partially offset by favorable impacts from business growth, more favorable underwriting results, and higher net investment spread results.

Corporate and Other. Results for 2019 reflected increased losses in comparison to 2018, driven by higher corporate expenses, including implementation costs for certain programs that are expected to result in margin improvements (see "—Overview" above), higher capital debt interest expense and lower income from our qualified pension plan, partially offset by higher net investment income.

Closed Block Division. Results for 2019 increased in comparison to 2018, primarily driven by an increase in net realized investment gains and related activity, higher net investment income, and an increase in net insurance activity including dividends to policyholders, partially offset by an increase on the policyholder dividend obligation.

Segment Measures

Adjusted Operating Income. In managing our business, we analyze our segments' operating performance using "adjusted operating income." Adjusted operating income does not equate to "Income (loss) before income taxes and equity in earnings of operating joint ventures" or "Net income (loss)" as determined in accordance with U.S. GAAP, but is the measure of segment profit or loss we use to evaluate segment performance and allocate resources, and consistent with authoritative guidance, is our measure of segment performance. The adjustments to derive adjusted operating income are important to an understanding of our overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and our definition of adjusted operating income may differ from that used by other companies. However, we believe that the presentation of adjusted operating income as we measure it for management purposes enhances the understanding of our results of operations by highlighting the results from ongoing operations and the underlying profitability of our businesses. See Note 22 to the Consolidated Financial Statements for further information on the presentation of segment results and our definition of adjusted operating income.

Annualized New Business Premiums. In managing our Individual Life, Group Insurance and International Businesses, we analyze annualized new business premiums, which do not correspond to revenues under U.S. GAAP. Annualized new business premiums measure the current sales performance of the business, while revenues primarily reflect the renewal persistency of policies written in prior years and net investment income, in addition to current sales. Annualized new business premiums include 10% of first year premiums or deposits from single pay products. No other adjustments are made for limited pay contracts.

The amount of annualized new business premiums for any given period can be significantly impacted by several factors, including but not limited to: addition of new products, discontinuation of existing products, changes in credited interest rates for certain products and other product modifications, changes in premium rates, changes in tax laws, changes in regulations or changes in the competitive environment. Sales volume may increase or decrease prior to certain of these changes becoming effective, and then fluctuate in the other direction following such changes.

Assets Under Management. In managing our PGIM business, we analyze assets under management (which do not correspond directly to U.S. GAAP assets) because the principal source of revenues is fees based on assets under management. Assets under management represent the fair market value or account value of assets which we manage directly for institutional clients, retail clients, and for our general account, as well as assets invested in our products that are managed by third-party managers.

Account Values. In managing our Individual Annuities and Retirement businesses, we analyze account values, which do not correspond to U.S. GAAP assets. Net sales (redemptions) in our Individual Annuities business and net additions (withdrawals) in our Retirement business do not correspond to revenues under U.S. GAAP, but are used as a relevant measure of business activity.

Impact of Foreign Currency Exchange Rates

Foreign currency exchange rate movements and related hedging strategies

As a U.S.-based company with significant business operations outside the U.S., particularly in Japan, we are subject to foreign currency exchange rate movements that could impact our U.S. dollar ("USD")-equivalent earnings and shareholder return on equity. Our USD-equivalent earnings could be materially affected by currency fluctuations from period to period, even if earnings on a local currency basis are relatively constant. Our USD-equivalent equity is impacted as the value of our investment in international operations may also fluctuate based on changes in foreign currency exchange rates. We seek to mitigate these impacts through various hedging strategies, including the use of derivative contracts and by holding USD-denominated assets in certain of our foreign subsidiaries.

In order to reduce earnings volatility from foreign currency exchange rate movements, we enter into forward currency derivative contracts to effectively fix the currency exchange rates for a portion of our prospective non-USD-denominated earnings streams. This forward currency hedging program is primarily associated with our insurance operations in Japan and Korea.

In order to reduce equity volatility from foreign currency exchange rate movements, we primarily utilize a yen hedging strategy that calibrates the hedge level to preserve the relative contribution of our yen-based business to the Company's overall return on equity on a leverage neutral basis. We implement this hedging strategy utilizing a variety of instruments, including USD-denominated assets, foreign currency derivative contracts, and dual currency and synthetic dual currency investments held locally in our Japanese insurance subsidiaries. The total hedge level may vary based on our periodic assessment of the relative contribution of our yen-based business to the Company's overall return on equity.

The table below presents the aggregate amount of instruments that serve to hedge the impact of foreign currency exchange movements on our USD-equivalent shareholder return on equity from our Japanese insurance subsidiaries as of the dates indicated.

	 Decen	nber 31	1,
	2019		2018
	(in b	illions))
Foreign currency hedging instruments:			
Hedging USD-equivalent earnings:			
Forward currency contracts (notional amount outstanding)	\$ 0.6	\$	1.3
Hedging USD-equivalent equity:			
USD-denominated assets held in yen-based entities(1)	13.1		13.5
Dual currency and synthetic dual currency investments(2)	0.6		0.6
Total USD-equivalent equity foreign currency hedging instruments	13.7		14.1
Total foreign currency hedges	\$ 14.3	\$	15.4

⁽¹⁾ Includes USD-denominated fixed maturities at amortized cost plus any related accrued investment income, as well as USD notional amount of foreign currency derivative contracts outstanding. Note this amount represents only those USD assets serving to hedge the impact of foreign currency volatility on equity. Separate from this program, our Japanese operations also have \$57.8 billion and \$48.9 billion as of December 31, 2019 and 2018, respectively, of USD-denominated assets supporting USD-denominated liabilities related to USD-denominated products.

⁽²⁾ Dual currency and synthetic dual currency investments are held by our yen-based entities in the form of fixed maturities and loans with a yen-denominated principal component and USD-denominated interest income. The amounts shown represent the present value of future USD-denominated cash flows.

The USD-denominated investments that hedge the impact of foreign currency exchange rate movements on USD-equivalent earnings and shareholder return on equity from our Japanese insurance operations are reported within yen-based entities and, as a result, foreign currency exchange rate movements will impact their value reported within our yen-based Japanese insurance entities. We seek to mitigate the risk that future unfavorable foreign currency exchange rate movements will decrease the value of these USD-denominated investments reported within our yen-based Japanese insurance entities, and therefore negatively impact their equity and regulatory solvency margins, by having our Japanese insurance operations enter into currency hedging transactions. Those hedges are with a subsidiary of Prudential Financial. These hedging strategies have the economic effect of moving the change in value of these USD-denominated investments due to foreign currency exchange rate movements from our Japanese yen-based entities to our USD-based entities.

These USD-denominated investments also pay a coupon which is generally higher than what a similar yen-denominated investment would pay. The incremental impact of this higher yield on our USD-denominated investments, as well as our dual currency and synthetic dual currency investments, will vary over time, and is dependent on the duration of the underlying investments as well as interest rate environments in both the U.S. and Japan at the time of the investments.

Impact of intercompany foreign currency exchange rate arrangements on segment results of operations

The financial results of our International Businesses and PGIM reflect the impact of intercompany arrangements with our Corporate and Other operations pursuant to which certain of these segments' non-USD-denominated earnings are translated at fixed currency exchange rates. The financial results of our Retirement segment reflected the impact of an intercompany foreign currency exchange arrangement with our Corporate and Other operations in 2017 prior to its termination effective January 1, 2018. This foreign currency exchange risk is now managed within our Retirement segment using a strategy that may include external hedges. Results of our Corporate and Other operations include any differences between the translation adjustments recorded by the segments at the fixed currency exchange rate versus the actual average rate during the period. In addition, specific to our International Businesses segment where we hedge certain currencies, the results of our Corporate and Other operations also include the impact of any gains or losses recorded from the forward currency contracts that settled during the period, which include the impact of any over or under hedging of actual earnings that differ from projected earnings.

For International Businesses, the fixed currency exchange rates are generally determined in connection with a foreign currency income hedging program designed to mitigate the impact of exchange rate changes on the segment's USD-equivalent earnings. Pursuant to this program, our Corporate and Other operations execute forward currency contracts with third parties to sell the net exposure of projected earnings for certain currencies in exchange for USD at specified exchange rates. The maturities of these contracts correspond with the future periods (typically on a three-year rolling basis) in which the identified non-USD-denominated earnings are expected to be generated. In establishing the level of non-USD-denominated earnings that will be hedged through this program, we exclude the anticipated level of USD-denominated earnings that will be generated by USD-denominated products and investments. For the year ended December 31, 2019, approximately 12% of the segment's earnings were yen-based and, as of December 31, 2019, we have hedged 100%, 72% and 28% of expected yen-based earnings for 2020, 2021 and 2022, respectively. To the extent currently unhedged, our International Businesses' future expected USD-equivalent of yen-based earnings will be impacted by yen exchange rate movements.

As a result of these arrangements, our International Businesses segment's results for 2019, 2018 and 2017 reflect the impact of translating yen-denominated earnings at fixed currency exchange rates of 105, 111, and 112 yen per USD, respectively, and Korean won-denominated earnings at fixed currency exchange rates of 1,110, 1,150, and 1,130 Korean won per USD, respectively. We expect our 2020 results to reflect the impact of translating yen-denominated earnings at a fixed currency exchange rate of 104 yen per USD and Korean won-denominated earnings at a fixed currency exchange rate of 1,090 won per USD. Since determination of the fixed currency exchange rates for a given year is impacted by changes in foreign currency exchange rates over time, the segment's future earnings will ultimately be impacted by these changes in exchange rates.

For PGIM and certain other currencies within our International Businesses, the fixed currency exchange rates for the current year are predetermined during the third quarter of the prior year using forward currency exchange rates.

The table below presents, for the periods indicated, the increase (decrease) to revenues and adjusted operating income for the International Businesses, PGIM and Retirement segments and for Corporate and Other operations, reflecting the impact of these intercompany arrangements.

	Year ended December 31,					
	2019		2018		2017	
	(in millions)					
Segment impacts of intercompany arrangements:						
International Businesses	\$	49	\$	10	\$	3
PGIM		6		0		0
Retirement(1)		0		0		2
Impact of intercompany arrangements(2)	'	55		10		5
Corporate and Other:						
Impact of intercompany arrangements(2)		(55)		(10)		(5)
Settlement gains (losses) on forward currency contracts(3)		67		(13)		(16)
Net benefit (detriment) to Corporate and Other		12		(23)		(21)
Net impact on consolidated revenues and adjusted operating income	\$	67	\$	(13)	\$	(16)

⁽¹⁾ Effective January 1, 2018 the intercompany arrangement between our Corporate and Other operations and Retirement was terminated and this risk is now managed within our Retirement segment using a strategy that may include external hedges.

Impact of products denominated in non-local currencies on U.S. GAAP earnings

While our international insurance operations offer products denominated in local currency, several also offer products denominated in non-local currencies, most notably our Japanese operations, which offer USD- and Australian dollar ("AUD")-denominated products. The non-local currency-denominated insurance liabilities related to these products are supported by investments denominated in corresponding currencies, including a significant portion designated as available-for-sale. While the impact from foreign currency exchange rate movements on these non-local currency-denominated assets and liabilities is economically matched, differences in the accounting for changes in the value of these assets and liabilities due to changes in foreign currency exchange rate movements have historically resulted in volatility in U.S. GAAP earnings.

In 2015 we implemented a structure in Gibraltar Life's operations that disaggregated the USD- and AUD-denominated businesses into separate divisions, each with its own functional currency that aligns with the underlying products and investments. The result of this alignment was to reduce differences in the accounting for changes in the value of these assets and liabilities that arise due to changes in foreign currency exchange rate movements. For the USD- and AUD-denominated assets that were transferred under this structure, the net cumulative unrealized investment gains associated with foreign exchange remeasurement that were recorded in "Accumulated other comprehensive income (loss)" ("AOCI") totaled \$2.7 billion and \$3.2 billion as of December 31, 2019 and 2018, respectively, and will be recognized in earnings within "Realized investment gains (losses), net" over time as these assets mature or are sold. Absent the sale of any of these assets prior to their stated maturity, approximately 14% of the \$2.7 billion balance as of December 31, 2019 will be recognized in 2020, approximately 12% will be recognized in 2021, and the remaining balance will be recognized from 2022 through 2051.

Highly inflationary economy in Argentina

Our insurance operations in Argentina, Prudential of Argentina ("POA"), have historically utilized the Argentine peso as the functional currency given it is the currency of the primary economic environment in which the entity operates. During 2018, Argentina experienced a cumulative inflation rate that exceeded 100% over a 3-year period. As a result, Argentina's economy was deemed to be highly inflationary resulting in reporting changes effective July 1, 2018. Under U.S. GAAP, the financial statements of a foreign entity in a highly inflationary economy are to be remeasured as if its functional currency (formerly the Argentine peso) is the reporting currency of its parent reporting entity (the USD) on a prospective basis. While this changed how the results of POA are remeasured and/or translated into USD, the impact to our financial statements was not material nor is it expected to be material in future periods given the relative size of our POA operations. It should also be noted that due to the macroeconomic environment in Argentina, substantially all of POA's balance sheet consists of USD-denominated product liabilities supported by USD-denominated assets. As a result, this accounting change serves to reduce the remeasurement impact reflected in net income given that the functional currency and currency in which the assets and liabilities are denominated will be more closely aligned.

⁽²⁾ Represents the difference between non-USD-denominated earnings translated on the basis of weighted average monthly currency exchange rates versus fixed currency exchange rates determined in connection with the foreign currency income hedging program.

⁽³⁾ As of December 31, 2019, 2018 and 2017, the notional amounts of these forward currency contracts within our Corporate and Other operations were \$1.9 billion, \$2.6 billion, and \$2.8 billion, respectively, of which \$0.6 billion, \$1.3 billion and \$1.5 billion, respectively, were related to our Japanese insurance operations.

Accounting Policies & Pronouncements

Application of Critical Accounting Estimates

The preparation of financial statements in conformity with U.S. GAAP requires the application of accounting policies that often involve a significant degree of judgment. Management, on an ongoing basis, reviews estimates and assumptions used in the preparation of financial statements. If management determines that modifications in assumptions and estimates are appropriate given current facts and circumstances, the Company's results of operations and financial position as reported in the Consolidated Financial Statements could change significantly.

The following sections discuss the accounting policies applied in preparing our financial statements that management believes are most dependent on the application of estimates and assumptions and require management's most difficult, subjective, or complex judgments.

Insurance Assets

Deferred Policy Acquisition Costs and Deferred Sales Inducements

We capitalize costs that are directly related to the acquisition or renewal of insurance and annuity contracts. These costs primarily include commissions, as well as costs of policy issuance and underwriting and certain other expenses that are directly related to successfully negotiated contracts. We have also deferred costs associated with sales inducements related to our variable and fixed annuity contracts primarily within our Individual Annuities segment. Sales inducements are amounts that are credited to the policyholders' account balances mainly as an inducement to purchase the contract. For additional information about sales inducements, see Note 13 to the Consolidated Financial Statements. We generally amortize DAC and deferred sales inducements ("DSI") over the expected lives of the contracts, based on our estimates of the level and timing of gross premiums, gross profits, or gross margins, depending on the type of contract. As described in more detail below, in calculating DAC and DSI amortization, we are required to make assumptions about investment returns, mortality, persistency, and other items that impact our estimates of the level and timing of gross margins, gross profits, or gross premiums. We also periodically evaluate the recoverability of our DAC and DSI. For certain contracts, this evaluation is performed as part of our premium deficiency testing, as discussed further below in "—Insurance Liabilities —Future Policy Benefits." As of December 31, 2019, DAC and DSI for PFI excluding the Closed Block division were \$19.7 billion and \$0.9 billion, respectively, and DAC in our Closed Block division was \$235 million.

Amortization methodologies

Gross Premiums. DAC associated with the non-participating term life policies of our Individual Life segment and the whole life, term life, endowment and health policies of our International Businesses segment is primarily amortized in proportion to gross premiums. Gross premiums are defined as the premiums charged to a policyholder for an insurance contract.

Gross Profits. DAC and DSI associated with the variable and universal life policies of our Individual Life and International Businesses segments and the variable and fixed annuity contracts of our Individual Annuities and International Businesses segments are generally amortized over the expected lives of these policies in proportion to total gross profits. Total gross profits include both actual gross profits and estimates of gross profits for future periods. Gross profits are defined as: i) amounts assessed for mortality, contract administration, surrender charges, and other assessments plus amounts earned from investment of policyholder balances, less ii) benefits in excess of policyholder balances, costs incurred for contract administration, the net cost of reinsurance for certain businesses, interest credited to policyholder balances and other credits. If significant negative gross profits are expected in any periods, the amount of insurance in force is generally substituted as the base for computing amortization. U.S. GAAP gross profits and amortization rates also include the impacts of the embedded derivatives associated with certain of the optional living benefit features of our variable annuity contracts, and index-linked crediting features of indexed universal life and fixed indexed annuity contracts and related hedging activities. For additional information on the significant inputs to the valuation models for these embedded derivatives including capital market assumptions and actuarially determined assumptions, see below "—Insurance Liabilities—Future Policy Benefits." In calculating amortization expense, we estimate the amounts of gross profits that will be included in our U.S. GAAP results and in adjusted operating income, and utilize these estimates to calculate distinct amortization rates and expense amounts. We also regularly evaluate and adjust the related DAC and DSI balances with a corresponding charge or credit to current period earnings for the impact of actual gross profits and changes in our projections of estimated future gross profits on our DAC and DSI amortization rates. Adjustments to the DAC and DSI balances include the impact to our estimate of total gross profits of the annual review of assumptions, our quarterly adjustments for current period experience, and our quarterly adjustments for market performance. Each of these adjustments is further discussed below in "-Annual assumptions review and quarterly adjustments."

Gross Margins. DAC associated with the traditional participating products of our Closed Block is amortized over the expected lives of these contracts in proportion to total gross margins. Total gross margins are defined as: i) amounts received from premiums, earned from investment of policyholder balances and other assessments, less ii) benefits paid, costs for contract administration, changes in the net level premium reserve for death and endowment benefits, annual policyholder dividends and other credits. We evaluate our estimates of future gross margins and adjust the related DAC balance with a corresponding charge or credit to current period earnings for the effects of actual gross margins and changes in our expected future gross margins. DAC adjustments for these participating products generally have not created significant volatility in our results of operations since many of the factors that affect gross margins are also included in the determination of our dividends to these policyholders and, during most years, the Closed Block has recognized a cumulative policyholder dividend obligation expense in "Policyholders' dividends," for the excess of actual cumulative earnings over expected cumulative earnings as determined at the time of demutualization. However, if actual cumulative earnings fall below expected cumulative earnings in future periods, thereby eliminating the cumulative policyholder dividend obligation expense, changes in gross margins and DAC amortization would result in a net impact to the Closed Block results of operations. As of December 31, 2019, the excess of actual cumulative earnings over the expected cumulative earnings was \$2,816 million.

The amortization methodologies for products not discussed above primarily relate to less significant DAC and DSI balances associated with products in our Group Insurance and Retirement segments, which comprised approximately 2% of the Company's total DAC and DSI balances as of December 31, 2019.

Annual assumptions review and quarterly adjustments

Annually, we perform a comprehensive review of the assumptions used in estimating gross profits for future periods. Over the last several years, the Company's most significant assumption updates resulting in a change to expected future gross profits and the amortization of DAC and DSI have been related to lapse and other contractholder behavior assumptions, mortality, and revisions to expected future rates of returns on investments. These assumptions may also cause potential significant variability in amortization expense in the future. The impact on our results of operations of changes in these assumptions can be offsetting and we are unable to predict their movement or offsetting impact over time.

The quarterly adjustments for current period experience referred to above reflect the impact of differences between actual gross profits for a given period and the previously estimated expected gross profits for that period. To the extent each period's actual experience differs from the previous estimate for that period, the assumed level of total gross profits may change. In these cases, we recognize a cumulative adjustment to all previous periods' amortization, also referred to as an experience true-up adjustment.

The quarterly adjustments for market performance referred to above reflect the impact of changes to our estimate of total gross profits to reflect actual fund performance and market conditions. A significant portion of gross profits for our variable annuity contracts and, to a lesser degree, our variable life contracts are dependent upon the total rate of return on assets held in separate account investment options. This rate of return influences the fees we earn on variable annuity and variable life contracts, costs we incur associated with the guaranteed minimum death and guaranteed minimum income benefit features related to our variable annuity contracts and expected claims to be paid on variable life contracts, as well as other sources of profit. Returns that are higher than our expectations for a given period produce higher than expected account balances, which increase the future fees we expect to earn on variable annuity and variable life contracts and decrease the future costs we expect to incur associated with the guaranteed minimum death and guaranteed minimum income benefit features related to our variable annuity contracts and expected claims to be paid on variable life contracts. The opposite occurs when returns are lower than our expectations. The changes in future expected gross profits are used to recognize a cumulative adjustment to all prior periods' amortization.

The weighted average rate of return assumptions used in developing estimated market returns consider many factors specific to each product type, including asset durations, asset allocations and other factors. With regard to equity market assumptions, the near-term future rate of return assumption used in evaluating DAC and other costs for our domestic variable annuity and domestic and international variable life insurance products is derived using a reversion to the mean approach, a common industry practice. Under this approach, we consider historical equity returns and adjust projected equity returns over an initial future period of five years (the "near-term") so that equity returns converge to the long-term expected rate of return. If the near-term projected future rate of return is greater than our near-term maximum future rate of return of 15.0%, we use our maximum future rate of return. As of December 31, 2019, our domestic variable annuities and variable life insurance businesses assume an 8.0% long-term equity expected rate of return and a 3.1% near-term mean reversion equity expected rate of return, and our international variable life insurance business assumes a 4.8% long-term equity expected rate of return and a 2.2% near-term mean reversion equity expected rate of return.

With regard to interest rate assumptions used in evaluating DAC and DSI, we update the long-term and near-term future rates used to project fixed income returns annually and quarterly, respectively. As a result of our 2019 annual reviews and update

of assumptions and other refinements, we kept our long-term expectation of the 10-year U.S. Treasury rate and 10-year Japanese Government Bond yields unchanged and continue to grade to rates of 3.75% and 1.30%, respectively, over ten years. As part of our quarterly market experience updates, we update our near-term projections of interest rates to reflect changes in current rates.

Value of Business Acquired

In addition to DAC and DSI, we also recognize an asset for VOBA. VOBA is an intangible asset which represents an adjustment to the stated value of acquired in-force insurance contract liabilities to present them at fair value, determined as of the acquisition date. VOBA is amortized over the expected life of the acquired contracts using the same methodology and assumptions used to amortize DAC and DSI (see "—Deferred Policy Acquisition Costs and Deferred Sales Inducements" above for additional information). VOBA is also subject to recoverability testing. As of December 31, 2019, VOBA was \$1.1 billion, and included \$0.8 billion related to the acquisition from American International Group ("AIG") of AIG Star Life Insurance Co., Ltd, AIG Edison Life Insurance Company, AIG Financial Assurance Japan K.K. and AIG Edison Service Co., Ltd. (collectively, the "Star and Edison Businesses") in 2011. The remaining \$0.3 billion primarily relates to previously-acquired traditional life, deferred annuity, defined contribution and defined benefit businesses. The VOBA associated with the in-force contracts of the Star and Edison Businesses is less sensitive to assumption changes, as the majority is amortized in proportion to gross premiums which are more predictably stable compared to gross profits.

Insurance Liabilities

Future Policy Benefits

Future Policy Benefit Reserves, including Unpaid Claims and Claim Adjustment Expenses

We establish reserves for future policy benefits to, or on behalf of, policyholders using methodologies prescribed by U.S. GAAP. The reserving methodologies used include the following:

- For most long-duration contracts, we utilize a net premium valuation methodology in measuring the liability for future policy benefits. Under this methodology, a liability for future policy benefits is accrued when premium revenue is recognized. The liability, which represents the present value of future benefits to be paid to or on behalf of policyholders and related expenses less the present value of future net premiums (portion of the gross premium required to provide for all benefits and expenses), is estimated using methods that include assumptions applicable at the time the insurance contracts are made with provisions for the risk of adverse deviation, as appropriate. Original assumptions continue to be used in subsequent accounting periods to determine changes in the liability for future policy benefits (often referred to as the "lock-in concept") unless a premium deficiency exists. The result of the net premium valuation methodology is that the liability at any point in time represents an accumulation of the portion of premiums received to date expected to be needed to fund future benefits (i.e., net premiums received to date), less any benefits and expenses already paid. The liability does not necessarily reflect the full policyholder obligation the Company expects to pay at the conclusion of the contract since a portion of that obligation would be funded by net premiums received in the future and would be recognized in the liability at that time. We perform premium deficiency tests using best estimate assumptions as of the testing date without provisions for adverse deviation. If the liabilities determined based on these best estimate assumptions are greater than the net reserves (i.e., GAAP reserves net of any DAC, DSI or VOBA asset), the existing net reserves are adjusted by first reducing these assets by the amount of the deficiency or to zero through a charge to current period earnings. If the deficiency is more than these asset balances for insurance contracts, we then increase the net reserves by the excess, again through a charge to current period earnings. If a premium deficiency is recognized, the assumptions as of the premium deficiency test date are locked-in and used in subsequent valuations and the net reserves continue to be subject to premium deficiency testing. In addition, for limited-payment contracts, future policy benefit reserves also include a deferred profit liability representing gross premiums received in excess of net premiums. The deferred profits are generally recognized in revenue in a constant relationship with insurance in force or with the amount of expected future benefit payments.
- For certain contract features, such as those related to guaranteed minimum death benefits ("GMDB"), guaranteed minimum income benefits ("GMIB") and no-lapse guarantees, a liability is established when associated assessments (which include all policy charges including charges for administration, mortality, expense, surrender, and other, regardless of how characterized) are recognized. This liability is established using current best estimate assumptions and is based on the ratio of the present value of total expected excess payments (e.g., payments in excess of account value) over the life of the contract divided by the present value of total expected assessments (i.e., benefit ratio). The liability equals the current benefit ratio multiplied by cumulative assessments recognized to date, plus interest, less cumulative excess payments to date. The result of the benefit ratio method is that the liability at any point in time represents an accumulation of the portion of assessments received to date expected to be needed to fund future excess payments, less any excess payments already paid. The liability does not necessarily reflect the full policyholder obligation the Company expects to pay at the

conclusion of the contract since a portion of that excess payment would be funded by assessments received in the future and would be recognized in the liability at that time. Similar to as described above for DAC, the reserves are subject to adjustments based on annual reviews of assumptions and quarterly adjustments for experience, including market performance. These adjustments reflect the impact on the benefit ratio of using actual historical experience from the issuance date to the balance sheet date plus updated estimates of future experience. The updated benefit ratio is then applied to all prior periods' assessments to derive an adjustment to the reserve recognized through a benefit or charge to current period earnings.

• For certain product guarantees, primarily certain optional living benefit features of the variable annuity products in our Individual Annuities segment including guaranteed minimum accumulation benefits ("GMAB"), guaranteed minimum withdrawal benefits ("GMWB") and guaranteed minimum income and withdrawal benefits ("GMIWB"), the benefits are accounted for as embedded derivatives using a fair value accounting framework. The fair value of these contracts is calculated as the present value of expected future benefit payments to contractholders less the present value of assessed rider fees attributable to the embedded derivative feature. Under U.S. GAAP, the fair values of these benefit features are based on assumptions a market participant would use in valuing these embedded derivatives. Changes in the fair value of the embedded derivatives are recorded quarterly through a benefit or charge to current period earnings. For additional information regarding the valuation of these embedded derivatives, see Note 6 to the Consolidated Financial Statements.

The assumptions used in establishing reserves are generally based on the Company's experience, industry experience and/or other factors, as applicable. We update our actuarial assumptions, such as mortality, morbidity, retirement and policyholder behavior assumptions, annually, unless a material change is observed in an interim period that we feel is indicative of a long-term trend. Generally, we do not expect trends to change significantly in the short-term and, to the extent these trends may change, we expect such changes to be gradual over the long-term. In a sustained low interest rate environment, there is an increased likelihood that the reserves determined based on best estimate assumptions may be greater than the net liabilities.

The following paragraphs provide additional details about the reserves we have established:

International Businesses. The reserves for future policy benefits of our International Businesses, which as of December 31, 2019, represented 45% of our total future policy benefit reserves, primarily relate to non-participating whole life and term life products and endowment contracts, and are generally calculated using the net premium valuation methodology, as described above. The primary assumptions used in determining expected future benefits and expenses include mortality, lapse, morbidity, investment yield and maintenance expense assumptions. Reserves also include claims reported but not yet paid, and claims incurred but not yet reported. In addition, future policy benefit reserves for certain contracts also include amounts related to our deferred profit liability, as described above.

Retirement. The reserves for future policy benefits of our Retirement segment, which as of December 31, 2019, represented 23% of our total future policy benefit reserves, primarily relate to our non-participating life contingent group annuity and structured settlement products and are generally calculated using the net premium valuation methodology, as described above. The primary assumptions used in establishing these reserves include mortality, retirement, maintenance expense and investment yield assumptions. In addition, future policy benefit reserves for certain contracts also include amounts related to our deferred profit liability, as described above.

Individual Annuities. The reserves for future policy benefits of our Individual Annuities segment, which as of December 31, 2019, represented 5% of our total future policy benefit reserves, primarily relate to reserves for the GMDB and GMIB features of our variable annuities, and for the optional living benefit features that are accounted for as embedded derivatives. As discussed above, in establishing reserves for GMDBs and GMIBs, we utilize current best estimate assumptions. The primary assumptions used in establishing these reserves generally include annuitization, lapse, withdrawal and mortality assumptions, as well as interest rate and equity market return assumptions. Lapse rates are adjusted at the contract level based on the in-the-moneyness of the benefit and reflect other factors, such as the applicability of any surrender charges. Lapse rates are reduced when contracts are more in-the-money. Lapse rates are also generally assumed to be lower for the period where surrender charges apply. For life contingent payout annuity contracts, we establish reserves using best estimate assumptions with provisions for adverse deviations as of inception or best estimate assumptions as of the most recent loss recognition event.

The reserves for certain optional living benefit features, including GMAB, GMWB and GMIWB are accounted for as embedded derivatives at fair value, as described above. This methodology could result in either a liability or contra-liability balance, given changing capital market conditions and various actuarial assumptions. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally-developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, and the general uncertainty around the timing and amount of future cash flows. The significant inputs to the valuation models for these embedded derivatives include capital market assumptions, such as interest rate levels and volatility assumptions,

the Company's market-perceived risk of its own non-performance risk ("NPR"), as well as actuarially determined assumptions, including mortality rates and contractholder behavior, such as lapse rates, benefit utilization rates and withdrawal rates. Capital market inputs and actual contractholders' account values are updated each quarter based on capital market conditions as of the end of the quarter, including interest rates, equity markets and volatility. In the risk neutral valuation, the initial swap curve drives the total returns used to grow the contractholders' account values. The Company's discount rate assumption is based on the London Inter-Bank Offered Rate swap curve adjusted for an additional spread, which includes an estimate of NPR. Actuarial assumptions, including contractholder behavior and mortality, are reviewed at least annually, and updated based upon emerging experience, future expectations and other data, including any observable market data, such as available industry studies or market transactions such as acquisitions and reinsurance transactions. For additional information regarding the valuation of these optional living benefit features, see Note 6 to the Consolidated Financial Statements.

Individual Life. The reserves for future policy benefits of our Individual Life segment, which as of December 31, 2019, represented 6% of our total future policy benefit reserves, primarily relate to term life, universal life and variable life products. For term life contracts, the future policy benefit reserves are generally calculated using the net premium valuation methodology, as described above. The primary assumptions used in determining expected future benefits and expenses include mortality, lapse, investment yield and maintenance expense assumptions. For variable and universal life products, which include universal life contracts that contain no-lapse guarantees, reserves for future policy benefits are primarily established using the reserving methodology for GMDB and GMIB contracts. As discussed above, in establishing reserves for GMDBs and GMIBs, we utilize current best estimate assumptions. The primary assumptions used in establishing these reserves generally include mortality, lapse, and premium pattern, as well as interest rate and equity market return assumptions. Reserves also include claims reported but not yet paid, and claims incurred but not yet reported.

Group Insurance. The reserves for future policy benefits of our Group Insurance segment, which as of December 31, 2019, represented 2% of our total future policy benefit reserves, primarily relate to reserves for group life and disability benefits. For short-duration contracts, a liability is established when the claim is incurred. The reserves for group life and disability benefits also include a liability for unpaid claims and claim adjustment expenses, which relates primarily to the group long-term disability product. This liability represents our estimate of future disability claim payments and expenses as well as estimates of claims that have been incurred, but have not yet been reported, as of the balance sheet date. The liability is determined as the present value of expected future claim payments and expenses. The primary assumptions used in determining expected future claim payments are claim termination factors, an assumed interest rate and expected Social Security offsets. The remaining reserves for future policy benefits for group life and disability benefits relate primarily to our group life business, and include reserves for Waiver of Premium, Claims In Course of Settlement and Claims Incurred But Not Reported. The Waiver of Premium reserve is calculated as the present value of future benefits and utilizes assumptions such as expected mortality and recovery rates. The Claims In Course of Settlement reserve is based on the inventory of claims that have been reported but not yet paid. The Claims Incurred But Not Reported reserve is estimated using expected patterns of claims reporting.

Corporate and Other. The reserves for future policy benefits of our Corporate & Other operations, which as of December 31, 2019, represented 3% of our total future policy benefit reserves, primarily relate to our long-term care products and are generally calculated using the net premium valuation methodology, as described above. Most contracts reflect assumptions updated in 2018 due to recognition of a premium deficiency. The primary assumptions used in establishing these reserves include interest rate, morbidity, mortality, lapse, premium rate increase and maintenance expense assumptions. In addition, certain less significant reserves for our long-term care products, such as our disabled life reserves, are established using current best estimate actuarial assumptions.

Closed Block Division. The future policy benefit reserves for the traditional participating life insurance products of the Closed Block division, which as of December 31, 2019, represented 16% of our total future policy benefit reserves are determined using the net premium valuation methodology, as described above. Under this method, the future policy benefit reserves are accrued as a level proportion of the premium paid by the policyholder. In applying this method, we use mortality assumptions to determine our expected future benefits and expected future premiums, and apply an interest rate to determine the present value of both of these amounts. The mortality assumptions are based on standard industry mortality tables that were used to determine the cash surrender value of the policies, and the interest rates used are the interest rates used to calculate the cash surrender value of the policies.

Profits Followed by Losses

In certain instances, the policyholder liability for a particular line of business may not be deficient in the aggregate to trigger loss recognition, but the pattern of earnings may be such that profits are expected to be recognized in earlier years followed by losses in later years. In these situations, accounting standards require that an additional liability (Profits Followed by Losses or "PFL" liability) be recognized by an amount necessary to sufficiently offset the losses that would be recognized in later years. The PFL liability is based on our current estimate of the present value of the amount necessary to offset losses anticipated in future

periods. Because the liability is measured on a discounted basis, there will also be accretion into future earnings through an interest charge, and the liability will ultimately be released into earnings as an offset to future losses. Historically, the Company's PFL liabilities have been predominantly associated with certain universal life contracts that measure net GAAP reserves using current best estimate assumptions and accordingly, have been updated each quarter using current inforce and market data and as part of the annual assumption update. At the target accrual date (i.e., date of peak deficiency), the PFL liability transitions to a premium deficiency reserve and, for universal life products, will continue to be updated each quarter using current in-force and market data and as part of the annual assumption update.

Policyholders' Account Balances

Policyholders' account balances liability represents the contract value that has accrued to the benefit of the policyholder as of the balance sheet date. This liability is primarily associated with the account deposits, plus interest credited, less policyholder withdrawals and other charges assessed against the account balance, as applicable. Our unearned revenue reserve ("URR") also reported as a component of "Policyholders' account balances" primarily relates to the variable and universal life products within our Individual Life and International Businesses segments and represents policy charges for services to be provided in future periods. The charges are deferred as unearned revenue and are generally amortized over the expected life of the contract in proportion to the product's estimated gross profits, similar to DAC and DSI as discussed above. Policyholders' account balances also include amounts representing the fair value of embedded derivative instruments associated with the index-linked features of certain universal life and fixed annuity products. For additional information regarding the valuation of these embedded derivatives, see Note 6 to the Consolidated Financial Statements.

Sensitivities for Insurance Assets and Liabilities

The following table summarizes the impact that could result on each of the listed financial statement balances for the specified businesses from changes in certain key assumptions. The information below is for illustrative purposes and includes only the hypothetical direct impact on December 31, 2019 balances of changes in a single assumption and not changes in any combination of assumptions. The figures below are presented in aggregate for those businesses that are expected to experience a significant positive or negative impact as a result of the corresponding assumption change. Changes in current assumptions and the related impact that could result in the listed financial statement balances that are in excess of the amounts illustrated may occur in future periods. A description of the estimates and assumptions used in the preparation of each of these financial statement balances is provided further above. For traditional long duration and limited payment contracts, U.S. GAAP requires the original assumptions used when the contracts are issued to be locked-in and that those assumptions be used in all future liability calculations as long as the resulting liabilities are adequate to provide for the future benefits and expenses (i.e., there is no premium deficiency). Therefore, these products are not reflected in the sensitivity table below unless the hypothetical change in assumption would result in an adverse impact that would cause a premium deficiency. Similarly, the impact of any favorable change in assumptions for traditional long-duration and limited-payment contracts is not reflected in the table below given that the current assumption is required to remain locked-in, and instead the positive impacts would be recognized into net income over the life of the policies in force.

The impacts presented within this table exclude the following:

- The impacts of our asset liability management strategy which seeks to offset the changes in the balances presented within this table and is primarily comprised of investments and derivatives. See further below for a discussion of the estimates and assumptions involved with the application of U.S. GAAP accounting policies for these instruments and "Quantitative and Qualitative Disclosures about Market Risk" for hypothetical impacts on related balances as a result of changes in certain significant assumptions.
- The impacts of our Long-Term Care business, a component of our Divested and Run-off Businesses within our Corporate and Other operations. Long-Term Care business sensitivities are presented separately in the immediately following table (see "—Sensitivities for the Long-Term Care business within our Corporate and Other operations"). While the accounting for long-term care products primarily follows the locked-in assumptions model described above, as a result of our 2018 annual review and update of assumptions this business recognized a premium deficiency and unlocked and updated the previously locked-in assumptions used in the valuation model. Sensitivities are presented separately in order to provide stand-alone and supplementary information.

December 31, 2019

- (1) Includes GMDB/GMIB reserves, embedded derivative liabilities for certain living benefit guaranteed features, reserves for products with a premium deficiency, PFL liability, and URR.
- (2) Represents the impact of a parallel shift in the long-term interest rate yield curve for the Individual Life business and the Japanese insurance operations.
- (3) Represents the impact of an increase or decrease in the long-term equity expected rate of return for the Individual Annuities business.
 (4) Represents the impact of an increase or decrease in the NPR credit spread for the Individual Annuities and Individual Life businesses.
- (5) Represents the impact of an increase or decrease in mortality rates for the Individual Annuities and Individual Life businesses.
- (6) Represents the impact of an increase or decrease in lapse rates for the Individual Annuities and Individual Life businesses.

Sensitivities for the Long-Term Care business within Corporate and Other

The following table summarizes certain significant assumptions made in establishing reserves for long-term care products and the net impact that could result from changes in these assumptions should they occur. Under U.S. GAAP, reserves for long-term care products are primarily calculated using the locked-in assumptions concept described above. As such, the adverse hypothetical impacts illustrated in the table below are those that would increase our best estimate reserves and, when compared to our GAAP reserves, may cause a premium deficiency that would require us to unlock and update our assumptions and record a charge to net income. The favorable hypothetical impacts in the table below would decrease our best estimate reserves but they would not result in an immediate decrease to our GAAP reserves (given that we would be required to leave the current assumptions locked-in) and instead the positive impacts would be recognized into net income over the life of the policies in force.

The information below is for illustrative purposes and includes the impacts of changes in a single assumption and not changes in any combination of assumptions. As a result of emerging experience, changes in current assumptions and the related impact that could result in the listed financial statement balances that are in excess of the amounts illustrated may occur in future periods.

December 31, 2019

Assumption	Current Assumption	Assumption Change	Increase (Decrease) in Best Estimate Reserve (in millions)
Mortality Improvement	1% per year for 20 years	Decrease the duration of the 1% improvement per year: 10 years to none	(\$325) - (\$750)
Expected Future Claim Payments / Base Morbidity	Based on Company and industry experience. No reflection of future claim management efficiencies	Increase / decrease in expected future claim payments: +5% to -5%	\$525 - (\$525)
Average Ultimate Lapse Rate	Individual: 0.8% Group: 0.6%	-10 basis points to +10 basis points	\$100 - (\$100)
Investment Rate(1)	Weighted average of 5.04%	-25 basis points to +25 basis points	\$425 - (\$425)
Expected Future Premium Rate Increase Approvals	Approximately \$0.8 billion for the rate increase program(2)	Decrease / increase unapproved rate increases by: -10% to +10%	\$80 - (\$80)

⁽¹⁾ Investment rate reflects the expected investment yield over the life of the block of business, and is derived from the portfolio yield, current reinvestment rates and our intermediate and long-term assumption for investment yields.

Goodwill

As of December 31, 2019, our goodwill balance of \$3,013 million is primarily reflected in the following reporting units: \$2,128 million for Assurance IQ, \$455 million for Retirement's Full Service business, \$254 million for PGIM, \$156 million for Gibraltar Life and Other, and \$10 million for Life Planner.

We test goodwill for impairment on an annual basis, as of December 31 of each year, or more frequently if events or circumstances indicate the potential for impairment is more likely than not. The goodwill impairment analysis is performed at the reporting unit level which is equal to or one level below our operating segments. We performed a qualitative assessment of goodwill reflected in the Assurance IQ reporting unit and concluded there were no circumstances since the October 2019 acquisition that indicated the need for a further quantitative assessment. Our other reporting units elected to perform the quantitative two step test. For additional information on goodwill and the process for testing goodwill for impairment, see Note 2 and Note 10 to the Consolidated Financial Statements.

Life Planner, Gibraltar Life and Other, and PGIM completed a quantitative impairment analysis using an earnings multiple approach. The earnings multiple approach derives the value of a business based on comparison to publicly-traded comparable companies in similar lines of business. Each comparable company is analyzed based on various factors, including, but not limited to, financial risk, size, geographic diversification, profitability, adequate financial data, and an actively traded stock price. A multiple of price to earnings is developed for the comparable companies using independent analysts' consensus estimates for each company's 2020 forecasted earnings. The multiples are then aggregated and a mean and median multiple is calculated for the group. The lower of the mean or median multiple is then applied to the 2020 forecasted earnings of the reporting unit to develop a value. A control premium is then added to determine a total estimated fair value for the reporting unit.

In Retirement's Full Service business, the quantitative impairment analysis was completed using a discounted cash flow approach. This approach calculates the value of a business by applying a discount rate reflecting a market expected rate of return of the reporting unit to its projected future cash flows. These projected future cash flows were based on our internal forecasts, an expected growth rate and a terminal value. The reporting unit expected rate of return represents the required rate of return on its total capitalization. The process of deriving reporting unit specific required rates of return begins with the calculation of an overall Company Weighted Average Cost of Capital, which includes the calculation of the required return on equity using a Capital Asset Pricing Model ("CAPM"). The CAPM is a generally accepted method for estimating an equity investor's return requirement, and hence a company's cost of equity capital. The calculation using the CAPM begins with the long-term risk-free rate of return, then applies a market risk premium for large company common stock, as well as company specific adjustments to address volatility versus the market. The Company then determines reporting unit specific required rates of return based on their relative volatilities, benchmarks results against reporting unit comparable companies, and ensures that the sum of the reporting unit required returns (after considering the impact of unallocated Corporate costs and capital) add up to the overall Company required return. This

⁽²⁾ Includes expected future premium rate increases and benefit reductions in lieu of rate increases, not yet approved.

process results in reporting unit specific discount rates which are then applied to the expected future cash flows of Retirement's Full Service business to estimate fair value

After completion of the first step of the quantitative tests, the fair values exceeded the carrying amounts for each of the four reporting units tested and we concluded there was no impairment as of December 31, 2019. PGIM, Life Planner, Gibraltar Life and Other, and Retirement's Full Service business had estimated fair values that exceeded their carrying amounts by a weighted average of 223%. Completion of the second step of the quantitative analysis is therefore not necessary.

Estimating the fair value of reporting units is a subjective process that involves the use of significant estimates by management. For all reporting units tested, market declines or other events impacting the fair value of these businesses, including discount rates, interest rates and growth rate assumptions or increases in the level of equity required to support these businesses, could result in goodwill impairments, resulting in a charge to income.

Valuation of Investments, Including Derivatives, and the Recognition of Other-than-Temporary Impairments

Our investment portfolio consists of public and private fixed maturity securities, commercial mortgage and other loans, equity securities, other invested assets, and derivative financial instruments. Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or the values of securities or commodities. Derivative financial instruments we generally use include swaps, futures, forwards and options and may be exchange-traded or contracted in the over-the-counter ("OTC") market. We are also party to financial instruments that contain derivative instruments that are "embedded" in the financial instruments. Management believes the following accounting policies related to investments, including derivatives, are most dependent on the application of estimates and assumptions. Each of these policies is discussed further within other relevant disclosures related to investments and derivatives, as referenced below:

- Valuation of investments, including derivatives;
- Recognition of other-than-temporary impairments ("OTTI"); and
- Determination of the valuation allowance for losses on commercial mortgage and other loans.

We present at fair value in the statements of financial position our debt security investments classified as available-for-sale, investments classified as trading such as our assets supporting experience-rated contractholder liabilities and certain fixed maturities, equity securities, and certain investments within "Other invested assets," such as derivatives. For additional information regarding the key estimates and assumptions surrounding the determination of fair value of fixed maturity and equity securities, as well as derivative instruments, embedded derivatives and other investments, see Note 6 to the Consolidated Financial Statements and "—Valuation of Assets and Liabilities—Fair Value of Assets and Liabilities."

For our investments classified as available-for-sale, the impact of changes in fair value is recorded as an unrealized gain or loss in AOCI, a separate component of equity. For our investments classified as trading, equity securities, and derivatives, the impact of changes in fair value is recorded within "Other income (loss)." In addition, investments classified as available-for-sale, as well as those classified as held-to-maturity, are subject to impairment reviews to identify when a decline in value is other-than-temporary. For a discussion of our policies regarding other-than-temporary declines in investment value and the related methodology for recording OTTI of fixed maturity securities, see Note 2 to the Consolidated Financial Statements.

Commercial mortgage and other loans are carried primarily at unpaid principal balances, net of unamortized deferred loan origination fees and expenses and unamortized premiums or discounts and a valuation allowance for losses. For a discussion of our policies regarding the valuation allowance for commercial mortgage and other loans, see Note 2 to the Consolidated Financial Statements.

Pension and Other Postretirement Benefits

We sponsor pension and other postretirement benefit plans covering employees who meet specific eligibility requirements. Our net periodic costs for these plans consider an assumed discount (interest) rate, an expected rate of return on plan assets, expected increases in compensation levels, mortality and trends in health care costs. Of these assumptions, our expected rate of return assumptions and our discount rate assumptions have historically had the most significant effect on our net period costs associated with these plans.

We determine our expected rate of return on plan assets based upon a building block approach that considers plan asset mix, risk free rates, inflation, real return, term premium, credit spreads, equity risk premium and capital appreciation as well as expenses, the effect of active management and the effect of rebalancing for the equity, debt and real estate asset mix applied on a weighted average basis to our pension asset portfolio. See Note 18 to the Consolidated Financial Statements for our actual asset allocations by asset category and the asset allocation ranges prescribed by our investment policy guidelines for both our pension and other

postretirement benefit plans. Our assumed long-term rate of return for 2019 was 6.25% for our domestic pension plans and 7.00% for our other postretirement benefit plans. Given the amount of plan assets as of December 31, 2018, the beginning of the measurement year, if we had assumed an expected rate of return for both our domestic pension and other domestic postretirement benefit plans that was 100 bps higher or 100 bps lower than the rates we assumed, the change in our net periodic costs would have been as shown in the table below. The information provided in the table below considers only changes in our assumed long-term rate of return given the level and mix of invested assets at the beginning of the measurement year, without consideration of possible changes in any of the other assumptions described above that could ultimately accompany any changes in our assumed long-term rate of return.

	For the year ended December 31, 2019					
		Increase/(Decrease) in Net Periodic Pension Cost		Increase/(Decrease) in Net Periodic Other Postretirement Cost		
			(in millions))		
Increase in expected rate of return by 100 bps	\$	(123)	\$	(14)		
Decrease in expected rate of return by 100 bps	\$	123	\$	14		

Foreign pension plans represent 5% of plan assets at the beginning of 2019. An increase in expected rate of return by 100 bps would result in a decrease in net periodic pension costs of \$6 million; conversely, a decrease in expected rate of return by 100 bps would result in an increase in net periodic pension costs of \$5 million.

We determine our discount rate, used to value the pension and postretirement benefit obligations, based upon rates commensurate with current yields on high quality corporate bonds. See Note 18 to the Consolidated Financial Statements for information regarding the December 31, 2018 methodology we employed to determine our discount rate for 2019. Our assumed discount rate for 2019 was 4.30% for our domestic pension plans and 4.30% for our other domestic postretirement benefit plans. Given the amount of pension and postretirement obligations as of December 31, 2018, the beginning of the measurement year, if we had assumed a discount rate for both our domestic pension and other postretirement benefit plans that was 100 bps higher or 100 bps lower than the rates we assumed, the change in our net periodic costs would have been as shown in the table below. The information provided in the table below considers only changes in our assumed discount rate without consideration of possible changes in any of the other assumptions described above that could ultimately accompany any changes in our assumed discount rate.

	 For the year ended December 31, 2019						
	 Increase/(Decrease) in Net Periodic Pension Cost		/(Decrease) in Net er Postretirement Cost				
		(in millions)					
Increase in discount rate by 100 bps	\$ (114)	\$	(8)				
Decrease in discount rate by 100 bps	\$ 135	\$	7				

Foreign pension plans represent 15% of plan obligations at the beginning of 2019. An increase in discount rate by 100 bps would result in a decrease in net periodic pension costs of \$12 million; conversely, a decrease in discount rate by 100 bps would result in an increase in net periodic pension costs of \$10 million.

Given the application of the authoritative guidance for accounting for pensions, and the deferral and amortization of actuarial gains and losses arising from changes in our assumed discount rate, the change in net periodic pension cost arising from an increase in the assumed discount rate by 100 bps would not always be expected to equal the change in net periodic pension cost arising from a decrease in the assumed discount rate by 100 bps.

For a discussion of our expected rate of return on plan assets and discount rate for our qualified pension plan in 2019, see "—Results of Operations by Segment—Corporate and Other."

For purposes of calculating pension income from our own qualified pension plan for the year ended December 31, 2020, we will decrease the discount rate to 3.30% from 4.30% in 2019. The expected rate of return on plan assets will decrease to 6.00% in 2020 from 6.50% in 2019, and the assumed rate of increase in compensation will remain unchanged at 4.5%.

In addition to the effect of changes in our assumptions, the net periodic cost or benefit from our pension and other postretirement benefit plans may change due to factors such as actual experience being different from our assumptions, special benefits to terminated employees, or changes in benefits provided under the plans.

At December 31, 2019, the sensitivity of our domestic and foreign pension and postretirement obligations to a 100 basis point change in discount rate was as follows:

	D	ecember 31, 2019)
	Increase/(Decrease) in Pension Benefits Obligation		rease/(Decrease) in ullated Postretirement enefits Obligation
		(in millions)	
Increase in discount rate by 100 bps	\$ (1,576)	\$	(188)
Decrease in discount rate by 100 bps	\$ 1,839	\$	208

Taxes on Income

Our effective tax rate is based on income, non-taxable and non-deductible items, tax credits, statutory tax rates and tax planning opportunities available in the various jurisdictions in which we operate. Inherent in determining our annual tax rate are judgments regarding business plans, planning opportunities and expectations about future outcomes. The Dividend Received Deduction ("DRD") is a major reason for the difference between the Company's effective tax rate and the U.S. federal statutory rate. The DRD is an estimate that incorporates the prior and current year information, as well as the current year's equity market performance. Both the current estimate of the DRD and the DRD in future periods can vary based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from underlying fund investments, changes in the account balances of variable life and annuity contracts, and the Company's taxable income before the DRD.

In December 2017, Securities and Exchange Commission ("SEC") staff issued "Staff Accounting Bulletin 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act" ("SAB 118"), which allowed the registrants to record provisional amounts during a 'measurement period' not to extend beyond one year. Under the relief provided by SAB 118, a company could recognize provisional amounts when it did not have the necessary information available, prepared or analyzed in reasonable detail to complete its accounting for the change in tax law. See Note 16 to the Consolidated Financial Statements for a discussion of provisional amounts related to The United States Tax Cuts and Jobs Act of 2017 ("Tax Act of 2017") included in "Total income tax expense (benefit) before equity in earnings of operating joint ventures" in 2017 and adjustments to provisional amounts recorded in 2018.

The Tax Act of 2017 includes a provision causing post-1986 unremitted foreign earnings of at least 10% owned non-U.S. affiliates to be included in the Company's U.S. income tax base, with an election to pay the associated tax on an eight-year installment basis. Unremitted foreign earnings from certain operations in foreign jurisdictions that impose a withholding tax on dividends are considered to be permanently reinvested for purposes of determining the applicable withholding tax expense. See Note 16 to the Consolidated Financial Statements for a discussion of unremitted earnings for which the Company provides U.S. income taxes.

An increase or decrease in our effective tax rate by one percentage point would have resulted in a decrease or increase in our 2019 "Total income tax expense (benefit)" of \$58 million.

Contingencies

A contingency is an existing condition that involves a degree of uncertainty that will ultimately be resolved upon the occurrence of future events. Under U.S. GAAP, accruals for contingencies are required to be established when the future event is probable and its impact can be reasonably estimated, such as in connection with an unresolved legal matter. The initial reserve reflects management's best estimate of the probable cost of ultimate resolution of the matter and is revised accordingly as facts and circumstances change and, ultimately, when the matter is brought to closure.

Other Accounting Policies

For digital insurance brokerage placement services, the Company earns both initial and renewal commissions as compensation for the placement of insurance policies with insurance carriers. At the effective date of the policy, the Company records within "Other income" the expected lifetime revenue for the initial and renewal commissions considering estimates of the timing of future policy cancelations. These estimates are reassessed each reporting period and any changes in estimates are reflected in the current period.

Adoption of New Accounting Pronouncements

ASU 2018-12, Financial Services - Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts, was issued by the Financial Accounting Standards Board ("FASB") on August 15, 2018 and is expected to have a significant impact on the Consolidated Financial Statements and Notes to the Consolidated Financial Statements. In October 2019, the FASB issued ASU 2019-09, Financial Services - Insurance (Topic 944): Effective Date to affirm its decision to defer the effective date of ASU 2018-12 to January 1, 2022 (with early adoption permitted), representing a one year extension from the original effective date of January 1, 2021. This ASU will impact, at least to some extent, the accounting and disclosure requirements for all long-duration insurance and investment contracts issued by the Company. In addition to the impacts to the balance sheet upon adoption, the Company also expects an impact to how earnings emerge thereafter. See Note 2 to the Consolidated Financial Statements for a more detailed discussion of ASU 2018-12, as well as other accounting pronouncements issued but not yet adopted and newly adopted accounting pronouncements.

Results of Operations by Segment

PGIM

Business Update

- In the first quarter of 2019, we completed the acquisition of Wadhwani Asset Management LLP, a London-based quantitative macro-focused investment management firm, and renamed the firm QMA Wadhwani LLP, which now operates as part of our QMA business with an independent investment platform.
- In the third quarter of 2019, we completed the acquisition of our joint venture partner's share of our India-based asset management joint venture, DHFL
 Pramerica Asset Managers, and re-named the business PGIM India Asset Management.

Operating Results

The following table sets forth PGIM's operating results for the periods indicated.

	Year ended December 31,					
		2019	2018			2017
			(ir	n millions)		
Operating results(1):						
Revenues	\$	3,589	\$	3,294	\$	3,355
Expenses		2,591		2,335		2,376
Adjusted operating income		998		959		979
Realized investment gains (losses), net, and related adjustments		(1)		(10)		(4)
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests		8		(21)		95
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$	1,005	\$	928	\$	1,070

⁽¹⁾ Certain of PGIM's investment activities are based in currencies other than the U.S. dollar and are therefore subject to foreign currency exchange rate risk. The financial results of PGIM include the impact of an intercompany arrangement with our Corporate and Other operations designed to mitigate the impact of exchange rate changes on PGIM's U.S. dollar-equivalent earnings. For more information related to this intercompany arrangement, see "—Results of Operations—Impact of Foreign Currency Exchange Rates," above.

Adjusted Operating Income

2019 to 2018 Annual Comparison. Adjusted operating income increased \$39 million. The increase reflected higher asset management fees due to an increase in average assets under management as a result of market appreciation and fixed income flows, partially offset by higher related expenses including certain long-term employee compensation plans driven by equity market performance. Also contributing to the increase were higher other related revenues, net of associated expenses, primarily driven by higher net performance-based incentive fees and higher strategic investing results due to favorable investment performance. These increases were partially offset by an increase in non-compensation related expenses, including those supporting business growth and charges associated with a joint venture.

Revenues and Expenses

The following table sets forth PGIM's revenues, presented on a basis consistent with the table above under "—Operating Results," by type.

	<u> </u>	Year ended December 31,			
		2019	2018		2017
			(in millions)		
Revenues by type:					
Asset management fees by source:					
Institutional customers	\$	1,283	\$ 1,204	\$	1,147
Retail customers(1)		878	867		800
General account		521	471		470
Total asset management fees	_	2,682	2,542		2,417
Other related revenues by source:					
Incentive fees		169	59		197
Transaction fees		22	33		27
Strategic investing		79	57		88
Commercial mortgage(2)		110	121		127
Total other related revenues(3)		380	270		439
Service, distribution and other revenues(4)	_	527	482		499
Total revenues	\$	3,589	\$ 3,294	\$	3,355

⁽¹⁾ Consists of fees from: individual mutual funds and variable annuities and variable life insurance separate account assets; funds invested in proprietary mutual funds through our defined contribution plan products; and third-party sub-advisory relationships. Revenues from fixed annuities and the fixed-rate accounts of variable annuities and variable life insurance are included in the general account.

2019 to 2018 Annual Comparison. Revenues increased \$295 million. Asset management fees increased primarily reflecting an increase in average assets under management as a result of market appreciation and fixed income flows. Other related revenues increased primarily driven by higher gross performance-based incentive fees and higher strategic investing results due to favorable investment performance. These increases were partially offset by charges associated with a joint venture.

Expenses increased \$256 million, primarily reflecting higher compensation expenses attributable to growth in incentive fees and higher earnings, and costs for certain long-term employee compensation plans, as discussed above. Also contributing to the increase were higher non-compensation expenses including those supporting business growth initiatives and increased commissions related to higher sales of our retail products.

Assets Under Management

The following table sets forth assets under management by asset class and source as of the dates indicated.

⁽²⁾ Includes mortgage origination and spread lending revenues from our commercial mortgage origination and servicing business.

⁽³⁾ Future revenues will be impacted by the level and diversification of our strategic investments, the commercial real estate market, and other domestic and international markets.

⁽⁴⁾ Includes payments from Wells Fargo under an agreement dated as of July 30, 2004, implementing arrangements with respect to money market mutual funds in connection with the combination of our retail securities brokerage and clearing operations with those of Wells Fargo. The agreement extended for ten years from the Wachovia Securities joint venture termination date of December 31, 2009 to December 31, 2019. The revenue from Wells Fargo under this agreement was \$60 million, \$70 million and \$80 million for the years ended December 31, 2019, 2018 and 2017, respectively.

		December 31,

Total PFI assets under management	\$	1,550.9	\$	1,377.3	\$	1,393.6

⁽¹⁾ Consists of third-party institutional assets and group insurance contracts.

2019 to 2018 Annual Comparison. PGIM's assets under management increased \$147 billion to \$1.308 trillion in 2019, primarily reflecting market appreciation and higher fixed income flows driven by strong retail sales and institutional flows.

The following table sets forth the component changes in PGIM's assets under management by asset source for the periods indicated.

⁽²⁾ Consists of: individual mutual funds and variable annuities and variable life insurance separate account assets; funds invested in proprietary mutual funds through our defined contribution plan products; and third-party sub-advisory relationships. Fixed annuities and the fixed-rate accounts of variable annuities and variable life insurance are included in the general account.

⁽³⁾ These amounts primarily include certain assets related to annuity and variable life products in our U.S. Individual Solutions division, retirement and group life products in our U.S. Workplace Solutions division, and certain general account assets of our International Businesses. These assets are not directly managed by PGIM, but rather are invested in non-proprietary funds or are managed by either the divisions themselves or our Chief Investment Officer Organization.

⁽¹⁾ Represents assets that PGIM manages for the benefit of other reporting segments within the Company. Additions and withdrawals of these assets are attributable to third-party product inflows and outflows in other reporting segments.

Strategic Investments

The following table sets forth PGIM's strategic investments at carrying value (including the value of derivative instruments used to mitigate equity market and currency risk) by asset class and source as of the dates indicated.

	1	December 31,
	2019	2018
		(in millions)
Co-Investments:		
Real estate	\$	176 \$ 207
Fixed income	4	179 438
Seed Investments:		
Real estate		60 50
Public equity		770 738
Fixed income	3	333 272
Total	\$ 1,5	\$ 1,705

The increase of \$113 million in strategic investments was primarily driven by strong fixed income investment performance.

⁽²⁾ Includes income reinvestment, where applicable.

⁽³⁾ Includes the effect of foreign exchange rate changes, net money market activity and the impact of acquired business. The impact from foreign currency fluctuations, which primarily impact the general account, resulted in gains of \$0.6 billion, \$1.2 billion and \$4.7 billion for the years ended December 31, 2019, 2018 and 2017, respectively.

U.S. Businesses

Operating Results

The following table sets forth the operating results for our U.S. Businesses for the periods indicated.

	 Year ended December 31,				
	 2019 2018		2017		
		(in m	illions)		
Adjusted operating income before income taxes:					
U.S. Businesses:					
U.S. Workplace Solutions division:					
Retirement	\$ 1,301	\$	1,049	\$	1,244
Group Insurance	285		229		253
Total U.S. Workplace Solutions division	 1,586		1,278		1,497
U.S. Individual Solutions division:					
Individual Annuities	1,843		1,925		2,198
Individual Life	87		223		(191)
Total U.S. Individual Solutions division	1,930		2,148		2,007
Assurance IQ division:					
Assurance IQ	(9)		0		0
Total Assurance IQ division	 (9)		0		0
Total U.S. Businesses	3,507		3,426		3,504
Reconciling Items:					
Realized investment gains (losses), net, and related adjustments(1)	(1,881)		88		(991)
Charges related to realized investment gains (losses), net	(58)		(333)		588
Market experience updates(2)	(408)		0		0
Other adjustments(3)	(47)		0		0
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests	2		(1)		0
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$ 1,115	\$	3,180	\$	3,101

⁽¹⁾ Prior period numbers have been reclassified to conform to current period presentation.

2019 to 2018 Annual Comparison. Adjusted operating income for our U.S. Businesses increased by \$81 million primarily due to:

- Higher net investment spread results driven by continued business growth and higher income on non-coupon investments and higher prepayment fee
 income;
- An unfavorable impact from changes in market conditions on estimates of profitability in the prior period, which beginning with the second quarter of 2019 is excluded from adjusted operating income (see Note 22 to the Consolidated Financial Statements for additional information); and
- A favorable comparative net impact from our annual reviews and update of assumptions and other refinements.

Partially offsetting these increases were the following items:

- Higher expenses, including costs associated with business growth and business initiatives;
- · Lower fee income, net of distribution expenses and other associated costs, in our Individual Annuities business; and
- Lower underwriting results in our Individual Life business.

⁽²⁾ Represents the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which are excluded from adjusted operating income beginning with the second quarter of 2019. The Company had historically recognized these impacts in adjusted operating income. See Note 22 to the Consolidated Financial Statements for additional information.

⁽³⁾ Represents adjustments not included in the above reconciling items. "Other adjustments" include certain components of the consideration for the Assurance IQ acquisition, which are recognized as compensation expense over the requisite service periods, as well as changes in the fair value of contingent consideration. See Note 22 to the Consolidated Financial Statements for additional information.

U.S. Businesses—U.S. Workplace Solutions Division

Retirement

Operating Results

The following table sets forth Retirement's operating results for the periods indicated.

	Year ended December 31,			
	2019	2018	2	2017
		(in millions)		
Operating results(1):				
Revenues	\$ 15,064	\$ 16,825	\$	13,843
Benefits and expenses	13,763	15,776		12,599
Adjusted operating income	1,301	1,049		1,244
Realized investment gains (losses), net, and related adjustments(2)	332	(402)		123
Charges related to realized investment gains (losses), net	4	(5)		(90)
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests	2	(1)		0
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$ 1,639	\$ 641	\$	1,277

⁽¹⁾ Certain of Retirement's non-U.S. dollar-denominated earnings are from longevity reinsurance contracts, which are denominated in British pounds sterling, and are therefore subject to foreign currency exchange rate risk. For the year ended December 31, 2017, Retirement's financial results include the impact of an intercompany arrangement with Corporate and Other designed to mitigate the impact of exchange rate changes on Retirement's U.S. dollar-equivalent earnings. Effective January 1, 2018 this intercompany arrangement was terminated and the foreign currency exchange rate risk is now managed within Retirement using a strategy that may include external hedges. The impact of the agreement and the termination was not significant to Retirement's results. For more information related to this intercompany arrangement, see "—Results of Operations—Impact of Foreign Currency Exchange Rates," above.

2) Prior period amounts have been updated to conform to current period presentation.

Adjusted Operating Income

2019 to 2018 Annual Comparison. Adjusted operating income increased \$252 million. Results for 2019 included a net benefit of \$154 million from our annual reviews and update of assumptions and other refinements primarily driven by a reduction in expected benefit payments, while results for 2018 included a net charge of \$68 million from these updates, primarily driven by updates to our assumptions for benefit payments. Excluding these impacts, adjusted operating income increased \$30 million, primarily driven by higher net investment spread results, partially offset by higher expenses and less favorable reserve experience. The increase in net investment spread results primarily reflected higher income on non-coupon investments, higher prepayment fee income and higher asset balances within our pension risk transfer business, partially offset by the impact from higher crediting rates on full service account values. The increase in expenses was primarily driven by higher costs supporting business growth initiatives. The lower contribution from reserve experience primarily reflected lower mortality gains on a comparative basis within our pension risk transfer business.

Revenues, Benefits and Expenses

2019 to 2018 Annual Comparison. Revenues decreased \$1,761 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, revenues decreased \$1,755 million. This decrease primarily reflected lower funded pension risk transfer premiums with corresponding offsets in policyholders' benefits, as discussed below. The decrease was partially offset by higher net investment income, primarily reflecting higher income on non-coupon investments, higher prepayment fee income and higher asset balances within our pension risk transfer business.

Benefits and expenses decreased \$2,013 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, benefits and expenses decreased \$1,785 million. Policyholders' benefits, including the change in policy reserves, decreased primarily related to the decrease in premiums discussed above, driven by lower comparative funded pension risk transfer premiums. The decrease was partially offset by an increase in interest credited to policyholders' account balances, including the impact of higher crediting rates on experience-rated account balances and higher account values.

Account Values

Account values are a significant driver of our operating results, and are primarily driven by net additions (withdrawals) and the impact of market changes. The income we earn on most of our fee-based products varies with the level of fee-based account values, since many policy fees are determined by these values. The investment income and interest we credit to policyholders on

our spread-based products varies with the level of general account values. To a lesser extent, changes in account values impact our pattern of amortization of DAC and VOBA and general and administrative expenses. The following table shows the changes in the account values and net additions (withdrawals) of Retirement's products for the periods indicated. Net additions (withdrawals) are plan sales and participant deposits or additions, as applicable, minus plan and participant withdrawals and benefits. Account values include both internally- and externally-managed client balances as the total balances drive revenue for the Retirement business. For more information on internally-managed balances, see "—PGIM."

	 Year ended December 31,					
	 2019		2018		2017	
		(i	n millions)			
Full Service:						
Beginning total account value	\$ 231,669	\$	234,616	\$	202,802	
Deposits and sales	36,394		33,116		29,527	
Withdrawals and benefits	(35,706)		(26,429)		(24,811)	
Change in market value, interest credited and interest income and other activity	40,091		(9,634)		27,098	
Ending total account value	\$ 272,448	\$	231,669	\$	234,616	
Institutional Investment Products:				-		
Beginning total account value	\$ 200,759	\$	194,492	\$	183,376	
Additions(1)	31,101		21,310		21,630	
Withdrawals and benefits	(16,743)		(15,409)		(17,406)	
Change in market value, interest credited and interest income	9,089		3,303		5,190	
Other(2)	3,390		(2,937)		1,702	
Ending total account value	\$ 227,596	\$	200,759	\$	194,492	

⁽¹⁾ Additions primarily include: group annuities calculated based on premiums received; longevity reinsurance contracts calculated as the present value of future projected benefits; and investment-only stable value contracts calculated as the fair value of customers' funds held in a client-owned trust.

2019 to 2018 Annual Comparison. The increase in full service account values primarily reflected the favorable changes in the market value of customer funds and positive net plan sales.

The increase in institutional investment products account values primarily reflected net additions from funded pension risk transfer transactions and the favorable changes in the market value of account assets.

Group Insurance

Operating Results

The following table sets forth Group Insurance's operating results and benefits and administrative operating expense ratios for the periods indicated.

^{(2) &}quot;Other" activity includes the effect of foreign exchange rate changes associated with our British pounds sterling denominated longevity reinsurance business and changes in asset balances for externally-managed accounts. For the years ended December 31, 2019 and 2018, "Other" activity also includes \$3,804 million in receipts offset by \$3,104 million in payments and \$3,497 million in receipts offset by \$3,457 million in payments, respectively, related to funding agreements backed by commercial paper which typically have maturities of less than 90 days.

	 Year ended December 31, 2019 2018 2017 (in millions)					
	 2019		2018		2017	
		(iı	n millions)			
Operating results:						
Revenues	\$ 5,750	\$	5,685	\$	5,471	
Benefits and expenses	5,465		5,456		5,218

Realized investment gains (losses), net, and related adjustments	(20)		(38)		(53)	
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$ 265	\$	191	\$	200	
Benefits ratio(1):						
Group life(2)	87.4%		87.2%		88.9%	
Group disability(2)	75.4%		75.8%		71.8%	
Total Group Insurance(2)	84.7%		84.9%		85.8%	
Administrative operating expense ratio(3):						
Group life	12.7%		12.2%		11.2%	
Group disability	24.1%		27.1%		29.4%	
Total Group Insurance	15.2%		15.1%		14.6%	

(1) Ratio of policyholder benefits to earned premiums plus policy charges and fee income.

(3) Ratio of general and administrative expenses (excluding commissions) to gross premiums plus policy charges and fee income.

Adjusted Operating Income

2019 to 2018 Annual Comparison. Adjusted operating income increased \$56 million, including an unfavorable comparative net impact from our annual reviews and update of assumptions and other refinements. Results for both 2019 and 2018 included a net benefit from this update of \$9 million and \$31 million, respectively. Excluding this item, adjusted operating income increased \$78 million, primarily driven by more favorable underwriting results in our group disability and group life businesses, higher net investment spread results driven by higher income on non-coupon investments, and lower expenses driven by the absence of costs related to the termination of a third-party underwriting service provider contract in 2018. The more favorable underwriting results were driven by favorable claim experience on long-term products in our group disability business and favorable claim experience on non-experience rated contracts in our group life business.

Revenues, Benefits and Expenses

2019 to 2018 Annual Comparison. Revenues increased \$65 million. Excluding an unfavorable comparative impact of \$10 million resulting from our annual reviews and update of assumptions and other refinements, as discussed above, revenues increased \$75 million. The increase primarily reflected higher premiums and policy charges and fee income driven by growth in our group disability business, with offsets in policyholders' benefits and changes in reserves, as discussed below, and higher net investment income driven by higher income on non-coupon investments.

Benefits and expenses increased \$9 million. Excluding an unfavorable comparative impact of \$12 million resulting from our annual reviews and update of assumptions and other refinements, as discussed above, benefits and expenses decreased \$3 million. The decrease primarily reflected lower general and administrative expenses driven by the absence of costs related to the termination of a third-party underwriting service provider contract in 2018, as discussed above. This decrease was partially offset by higher policyholders' benefits and changes in reserves in our group disability business driven by business growth, with offsets in premiums and policy charges and fee income, as discussed above. The higher policyholders' benefits and changes in reserves were partially offset by favorable claim experience in both our group life and disability businesses.

Sales Results

The following table sets forth Group Insurance's annualized new business premiums, as defined under "—Segment Measures" above, for the periods indicated.

⁽²⁾ Benefits ratios reflect the impacts of our annual reviews and update of assumptions and other refinements. Excluding these impacts, the group life, group disability and total Group Insurance benefits ratios were 87.0%, 77.7% and 84.9% for 2019, respectively, 87.4%, 77.8% and 85.5% for 2018, respectively, and 88.7%, 78.9% and 86.9% for 2017, respectively.

	 Yea	r ende	d Decemb	er 31,	r 31,		
	 2019		2018		2017		
		(in	millions)				
Annualized new business premiums(1):							
Group life	\$ 254	\$	376	\$	287		
Group disability	159		183		153		
Total	\$ 413	\$	559	\$	440		

⁽¹⁾ Amounts exclude new premiums resulting from rate changes on existing policies, from additional coverage under our Servicemembers' Group Life Insurance contract and from excess premiums on group universal life insurance that build cash value but do not purchase face amounts.

2019 to 2018 Annual Comparison. Total annualized new business premiums decreased \$146 million compared to 2018, primarily driven by large life client sales in the prior year period.

U.S. Businesses—U.S. Individual Solutions Division

Individual Annuities

Our Individual Annuities business includes both fixed and variable annuities which may include optional guaranteed living benefits riders (e.g., GMIB, GMAB, GMWB and GMIWB), and/or optional death benefit riders (e.g., GMDB). We also offer fixed annuities that provide a guarantee of principal and interest credited at rates we determine (subject to certain contractual minimums) or at rates based upon the performance of an index (subject to caps or participation rates). The drivers of our business results are generally included in adjusted operating income, with exceptions related to certain guarantees, as discussed below.

The U.S. GAAP accounting and our adjusted operating income treatment for our guarantees differ depending upon the specific contractual features. Under U.S. GAAP, the reserves for GMIB and GMDB are accounted for in accordance with an insurance fulfillment accounting framework and the results are included in adjusted operating income in a manner generally consistent with U.S. GAAP.

In contrast, certain of our guaranteed living benefit riders (e.g., GMAB, GMWB and GMIWB) are accounted for under U.S. GAAP as embedded derivatives and reported using a fair value accounting framework. For purposes of measuring segment performance, adjusted operating income excludes the changes in fair value and instead reflects the performance of these riders using an insurance fulfillment accounting framework. Under this framework, adjusted operating income recognized each period reflects the rider fees earned during the period, less the portion of such fees estimated to be required to cover future benefit payments and hedging costs. For more information on how we determine the portion of fees needed to cover estimated future benefit payments and hedging costs, see "—Risks and Risk Mitigants" below.

Operating Results

The following table sets forth Individual Annuities' operating results for the periods indicated.

	Year ended December 31,					
		2019	2	2018		2017
			(in n	nillions)		
Operating results:						
Revenues	\$	4,995	\$	4,966	\$	5,110
Benefits and expenses		3,152		3,041		2,912
Adjusted operating income		1,843		1,925		2,198
Realized investment gains (losses), net, and related adjustments		(2,551)		846		(1,157)
Charges related to realized investment gains (losses), net		59		(407)		577
Market experience updates(1)		(100)		0		0
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$	(749)	\$	2,364	\$	1,618

⁽¹⁾ Represents the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which are excluded from adjusted operating income beginning with the second quarter of 2019. The Company had historically recognized these impacts in adjusted operating income. See Note 22 to the Consolidated Financial Statements for additional information.

Adjusted Operating Income

2019 to 2018 Annual Comparison. Adjusted operating income decreased \$82 million, including an unfavorable comparative net impact from our annual reviews and update of assumptions and other refinements. Results from the annual reviews included a net charge of \$12 million and a net benefit of \$10 million in 2019 and 2018, respectively. Excluding this item, adjusted operating income decreased \$60 million primarily driven by lower fee income, net of distribution expenses and other associated costs, and higher expenses, partially offset by higher net investment spread results and an unfavorable impact from changes in market conditions on the estimates of profitability in the prior period.

Fee income, net of distribution expenses and other associated costs, declined due to certain products reaching contractual milestones for fee tier reduction, unfavorable impacts from our living benefit guarantees as a result of declining interest rates, lower average account values resulting from net outflows which were partially offset by market appreciation, and higher capital hedge costs reflecting the impacts of equity market performance. The increase in expenses was primarily driven by initiatives to generate business growth. The increase in net investment income was primarily due to a higher level of invested assets. The unfavorable impact on the estimates of profitability in the prior period was driven by market conditions, and beginning with the second quarter of 2019, this activity is excluded from adjusted operating income (see Note 22 to the Consolidated Financial Statements for further information).

Revenues, Benefits and Expenses

2019 to 2018 Annual Comparison. Revenues increased \$29 million. Excluding the impact from our annual reviews and update of assumptions and other refinements, discussed above, revenues increased \$47 million. The increase was driven by higher net investment income primarily reflecting a higher level of invested assets, and higher premiums mostly reflecting an increase in single premium immediate annuity sales, with offsets in policyholders' benefits as discussed below. These increases were partially offset by lower policy charges and fee income reflecting certain products reaching contractual milestones for fee tier reduction, unfavorable impacts from our living benefit guarantees as a result of declining interest rates, and lower average account values resulting from net outflows which were partially offset by market appreciation. Also contributing to the decrease were lower asset management and service fees and other income primarily due to higher capital hedge costs reflecting the impacts of equity market performance.

Benefits and expenses increased \$111 million. Excluding the impact from our annual reviews and update of assumptions and other refinements, discussed above, benefits and expenses increased \$107 million primarily driven by policyholders' benefits, including changes in reserves, due to higher reserve provisions resulting from an increase in single premium immediate annuity sales, with offsets in premiums, as discussed above.

Account Values

Account values are a significant driver of our operating results. Since most fees are determined by the level of separate account assets, fee income varies primarily based on the level of account values. Additionally, our fee income generally drives other items such as the pattern of amortization of DAC and other costs. Account values are driven by net flows from new business sales, surrenders, withdrawals and benefit payments, policy charges and the impact of positive or negative market value changes. The annuity industry's competitive and regulatory landscapes, which have been dynamic over the last few years, may impact our net flows, including new business sales. The following table sets forth account value information for the periods indicated.

	 Yea	ar en	ded Decembe	r 31,	
	2019		2018		2017
		(i	n millions)		
Cotal Individual Annuities(1):					
Beginning total account value	\$ 151,080	\$	168,626	\$	156,783
Sales	9,720		8,270		5,894
Full surrenders and death benefits(2)	(9,374)		(8,958)		(7,372)
Sales, net of full surrenders and death benefits(2)	 346		(688)		(1,478)
Partial withdrawals and other benefit payments(2)	(5,163)		(4,814)		(4,322)
Net flows	 (4,817)		(5,502)		(5,800)
Change in market value, interest credited and other activity	27,072		(8,341)		21,355
Policy charges	(3,654)		(3,703)		(3,712)
Ending total account value	\$ 169,681	\$	151,080	\$	168,626

- (1) Includes gross variable and fixed annuities sold as retail investment products. Investments sold through defined contribution plan products are included with such products within our Retirement business. Variable annuity account values were \$164.9 billion, \$147.3 billion and \$165.1 billion as of December 31, 2019, 2018 and 2017, respectively. Fixed annuity account values were \$4.8 billion, \$3.7 billion and \$3.5 billion as of December 31, 2019, 2018 and 2017, respectively.
- (2) Prior period amounts have been reclassified to conform to current period presentation.

2019 to 2018 Annual Comparison. The increase in account values during 2019 was primarily driven by favorable changes in the market value of contractholder funds, partially offset by net outflows and policy charges.

Sales, net of full surrenders and death benefits, for 2019 increased compared to 2018, primarily due to an increase in sales attributable to product design and pricing actions implemented to enhance product competitiveness in both our variable and fixed annuity products.

Risks and Risk Mitigants

Fixed Annuity Risks and Risk Mitigants. The primary risk exposure of our fixed annuity products relates to investment risks we bear for providing customers a minimum guaranteed interest rate required to be credited to the customer's account value, interest rate fluctuations and/or sustained periods of low interest rates, and credit risk related to the underlying investments. We manage these risk exposures primarily through a combination of product design features and external reinsurance. Our product design features include rate resetting subject to the guaranteed interest rate as well as surrender charges applied during the early years of the policy that help to provide protection for premature withdrawals. In addition, a portion our fixed products have a market value adjustment provision that provides protection of lapse in the case of rising interest rates. For information on our external reinsurance agreements, refer to the "Business" section.

Variable Annuity Risks and Risk Mitigants. The primary risk exposures of our variable annuity contracts relate to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including capital markets assumptions such as equity market returns, interest rates and market volatility, along with actuarial assumptions such as contractholder mortality, the timing and amount of annuitization and withdrawals, and contract lapses. For these risk exposures, achievement of our expected returns and profitability is subject to the risk that actual experience will differ from the assumptions used in the original pricing of these products. We currently manage our exposure to certain risks driven by fluctuations in capital markets primarily through a combination of i) Product Design Features, ii) Asset Liability Management Strategy, and iii) Capital Hedge Program as discussed below. We also manage these risk exposures through external reinsurance. For information on our external reinsurance agreements, refer to the "Business" section and Note 14 to the Consolidated Financial Statements.

i. Product Design Features:

A portion of the variable annuity contracts that we offer include an automatic rebalancing feature, also referred to as an asset transfer feature. This feature is implemented at the contract level, and transfers assets between certain variable investment sub-accounts selected by the annuity contractholder and, depending on the benefit feature, a fixed-rate account in the general account or a bond fund sub-account within the separate accounts. The automatic rebalancing feature associated with currently-sold variable annuity products with the highest daily benefit uses a designated bond fund sub-account within the separate accounts. The transfers are based on a static mathematical formula used with the particular benefit which considers a number of factors, including, but not limited to, the impact of investment performance on the contractholder's total account value. The objective of the automatic rebalancing feature is to reduce our exposure to equity market risk and market volatility. Other product design features we utilize include, among others, asset allocation restrictions, minimum issuance age requirements and certain limitations on the amount of contractholder deposits, as well as a required minimum allocation to our general account for certain of our products. We continue to introduce products that diversify our risk profile and have incorporated provisions in product design allowing frequent revisions of key pricing elements for certain of our products. In addition, there is diversity in our fee arrangements, as certain fees are primarily based on the benefit guarantee amount, the contractholder account value and/or premiums, which helps preserve certain revenue streams when market fluctuations cause account values to decline.

ii. Asset Liability Management ("ALM") Strategy (including fixed income instruments and derivatives):

We employ an ALM strategy that utilizes a combination of both traditional fixed income instruments and derivatives to help defray potential claims associated with our variable annuity living benefit guarantees. The economic liability we manage with this ALM strategy consists of expected living benefit claims under less severe market conditions, which are managed through the accumulation of fixed income instruments, and potential living benefit claims resulting from more severe market conditions, which are hedged using derivative instruments. For our Prudential Defined Income ("PDI") variable annuity, we utilize fixed income instruments to help defray potential claims. For the portion of our ALM strategy executed with derivatives, we enter into a range of exchange-traded and OTC equity and interest rate derivatives, including, but not limited to: equity and treasury futures; total return and interest rate swaps; and options, including equity options, swaptions, and floors and caps. The intent of this strategy is to more efficiently manage the capital and liquidity associated with these products while continuing to mitigate fluctuations in net income due to movements in capital markets.

Under our ALM strategy, adjusted operating income includes the fees earned that are in excess of the estimated portion of fees required to cover expected claims and hedge costs for the economic liability. The portion of fees required to cover such costs is updated quarterly to reflect revised estimates and actual experience. The effectiveness of our hedging program is measured by comparing the change in value of our hedging assets to the change in value of the liability we are attempting to hedge and is reflected in adjusted operating income over time through the inclusion of actual hedge costs. Expected costs are updated periodically along with our expectation of claims. For adjusted operating income purposes, DAC and other costs are fully amortized over the life of the contracts proportional to our actual and estimated gross profits under the adjusted operating income framework described above.

The following table provides a reconciliation between the liability reported under U.S. GAAP and the economic liability we manage through our ALM strategy as of the periods indicated.

	Decem	ber 31	1,
	 2019		2018
	(in mi	llions)
U.S. GAAP liability (including non-performance risk)	\$ 12,697	\$	8,860
Non-performance risk adjustment	3,437		4,619
Subtotal	16,134		13,479
Adjustments including risk margins and valuation methodology differences	(4,385)		(4,084)
Economic liability managed through the ALM strategy	\$ 11,749	\$	9,395

As of December 31, 2019, our fixed income instruments and derivative assets exceed the economic liability within the entities in which the risks reside.

Under our ALM strategy, we expect differences in the U.S. GAAP net income impact between the changes in value of the fixed income instruments and derivatives, as compared to the changes in the embedded derivative liability these assets support. These differences can be primarily attributed to three distinct areas:

- Different valuation methodologies in measuring the liability we intend to cover with fixed income instruments and derivatives versus the liability reported under U.S. GAAP—The valuation methodology utilized in estimating the economic liability we intend to defray with fixed income instruments and derivatives is different from that required to be utilized to measure the liability under U.S. GAAP. Additionally, the valuation of the economic liability excludes certain items that are included within the U.S. GAAP liability, such as NPR (in order to maximize protection irrespective of the possibility of our own default), as well as risk margins (required by U.S. GAAP but not included in our best estimate).
- Different accounting treatment between liabilities and assets supporting those liabilities—Under U.S. GAAP, changes in value of the embedded derivative liability and derivative instruments used to hedge a portion of the economic liability are immediately reflected in net income. In contrast, changes in fair value of fixed income instruments that support a portion of the economic liability are designated as available-for-sale and are recorded as unrealized gains (losses) in other comprehensive income versus net income.

• General hedge results—For the derivative portion of the ALM strategy, the net hedging impact (the extent to which the changes in value of the hedging instruments offset the change in value of the portion of the economic liability we are hedging) may be impacted by a number of factors including: cash flow timing differences between our hedging instruments and the corresponding portion of the economic liability we are hedging, basis differences attributable to actual underlying contractholder funds to be hedged versus hedgeable indices, rebalancing costs related to dynamic rebalancing of hedging instruments as markets move, certain elements of the economic liability that may not be hedged (including certain actuarial assumptions), and implied and realized market volatility on the hedge positions relative to the portion of the economic liability we seek to hedge.

The following table illustrates the net impact to our Consolidated Statements of Operations from changes in the U.S. GAAP embedded derivative liability and hedge positions under the ALM strategy, and the related amortization of DAC and other costs, that are excluded from adjusted operating income for the periods indicated:

	Year ended December 31,					
		2019	2	2018		2017
			(in mi	llions)(1)		
Excluding impact of assumption updates and other refinements:						
Net hedging impact(2)	\$	(199)	\$	(234)	\$	620
Change in portions of U.S. GAAP liability, before NPR(3)		(254)		(959)		2,477
Change in the NPR adjustment		(1,064)		1,472		(3,890)
Net impact from changes in the U.S. GAAP embedded derivative and hedge positions		(1,517)		279		(793)
Related benefit (charge) to amortization of DAC and other costs		247		(190)		159
Net impact of assumption updates and other refinements		17		(173)		(85)
Net impact from changes in the U.S. GAAP embedded derivative and hedge positions, after the impact of NPR, DAC and other costs	\$	(1,253)	\$	(84)	\$	(719)

⁽¹⁾ Positive amount represents income; negative amount represents a loss.

For 2019, the loss of \$1,253 million primarily reflected the impact of a \$1,517 million net charge from the changes in the U.S. GAAP embedded derivative and hedge positions. This net charge was primarily driven by the impacts of declining interest rates and credit spreads tightening, partially offset by the favorable equity market performance. This net charge was partially offset by a benefit related to the amortization of DAC and other costs of \$247 million.

For 2018, the loss of \$84 million primarily reflected the impact of a \$173 million charge from our annual review and update of assumptions, driven by modifications to both our actuarial assumptions, including updates to expected withdrawal rates, as well as to economic assumptions. These charges were largely offset by changes in the U.S. GAAP embedded derivative and hedge positions as a result of credit spreads widening, partially offset by declining interest rates and unfavorable equity market performance.

For information regarding the Risk Appetite Framework ("RAF") we use to evaluate and support the risks of the ALM strategy, see "—Liquidity and Capital Resources—Capital."

iii. Capital Hedge Program:

We employ a capital hedge program to hedge equity market impacts. The program is intended to protect a portion of the overall capital position of the variable annuities business against its exposure to the equity markets. The capital hedge program is conducted using equity derivatives which include equity call and put options, total return swaps and futures contracts. The changes in value of these derivatives are recognized in adjusted operating income over the expected duration of the capital hedge program.

Product Specific Risks and Risk Mitigants

⁽²⁾ Net hedging impact represents the difference between the change in fair value of the risk we seek to hedge using derivatives and the change in fair value of the derivatives utilized with respect to that risk.

⁽³⁾ Represents risk margins and valuation methodology differences between the economic liability managed by the ALM strategy and the U.S. GAAP liability.

For certain living benefits guarantees, claims will primarily represent the funding of contractholder lifetime withdrawals after the cumulative withdrawals have first exhausted the contractholder account value. Due to the age of the in-force block, limited claim payments have occurred to date, and they are not expected to increase significantly within the next five years, based upon current assumptions. The timing and amount of future claims will depend on actual returns on contractholder account value and actual contractholder behavior relative to our assumptions. The majority of our current living benefits guarantees provide for guaranteed lifetime contractholder withdrawal payments inclusive of a "highest daily" contract value guarantee. Our Prudential Defined Income ("PDI") variable annuity complements our variable annuity products with the highest daily benefit and provides for guaranteed lifetime contractholder withdrawal payments, but restricts contractholder asset allocation to a single bond fund sub-account within the separate accounts.

The majority of our variable annuity contracts with living benefits guarantees, and all new contracts sold with our highest daily living benefits feature, include risk mitigants in the form of an automatic rebalancing feature and/or inclusion in our ALM strategy. We may also utilize external reinsurance as a form of additional risk mitigation. The risks associated with the guaranteed benefits of certain legacy products that were sold prior to our development of the automatic rebalancing feature are also managed through our ALM strategy. Certain legacy GMAB products include the automatic rebalancing feature but are not included in the ALM strategy.

For our GMDBs, we provide a benefit payable in the event of death. Our base GMDB is generally equal to a return of cumulative deposits adjusted for any partial withdrawals. Certain products include an optional enhanced GMDB based on the greater of a minimum return on the contract value or an enhanced value. We have retained the risk that the total amount of death benefit payable may be greater than the contractholder account value; however, a substantial portion of the account values associated with GMDBs are subject to an automatic rebalancing feature because the contractholder also selected a living benefit guarantee which includes an automatic rebalancing feature. All of the variable annuity account values with living benefit guarantees also contain GMDBs. The living and death benefit features for these contracts cover the same insured life and, consequently, we have insured both the longevity and mortality risk on these contracts.

The following table sets forth the risk management profile of our living benefit guarantees and GMDB features as of the periods indicated.

					Decem	ber 31,

				_			_		

¹⁾ All contracts with living benefit guarantees also contain GMDB features, which cover the same insured contract.

Individual Life

Operating Results

The following table sets forth Individual Life's operating results for the periods indicated.

⁽²⁾ Contracts with living benefits that are included in our ALM strategy and that have an automatic rebalancing feature.

⁽³⁾ Excludes PDI which is presented separately within this table.

⁽⁴⁾ Represents contracts subject to a reinsurance transaction with an external counterparty covering certain new HDI v.3.0 business for the period April 1, 2015 through December 31, 2016. These contracts with living benefits also have an automatic rebalancing feature. See Note 14 to the Consolidated Financial Statements for additional information.

⁽⁵⁾ Includes contracts that have a GMDB feature and do not have an automatic rebalancing feature.

	Year ended December 31, 2019 2018 2017						
	 2019		2018		2017		
		(iı	n millions)				
Operating results:							
Revenues	\$ 6,115	\$	5,831	\$	4,974		
Benefits and expenses	6,028		5,608		5,165		
Adjusted operating income	87		223		(191)		
Realized investment gains (losses), net, and related adjustments	358		(318)		96		
Charges related to realized investment gains (losses), net	(121)		79		101		
Market experience updates(1)	(308)		0		0		
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$ 16	\$	(16)	\$	6		

⁽¹⁾ Represents the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which are excluded from adjusted operating income beginning with the second quarter of 2019. The Company had historically recognized these impacts in adjusted operating income. See Note 22 to the Consolidated Financial Statements for additional information.

Adjusted Operating Income

2019 to 2018 Annual Comparison. Adjusted operating income decreased \$136 million, primarily reflecting an unfavorable comparative net impact from our annual reviews and update of assumptions and other refinements. Results for 2019 included a \$208 million net charge from this annual review, mainly driven by unfavorable impacts related to mortality rate assumptions. Results for 2018 included a \$65 million net charge from this annual review, mainly driven by unfavorable impacts related to lapse and mortality rate assumptions. Excluding this item, adjusted operating income increased \$7 million, primarily reflecting a higher contribution from net investment spread results driven by higher income on non-coupon investments and higher prepayment fee income, and an unfavorable impact from changes in market conditions on estimates of profitability in the prior period. Beginning with the second quarter of 2019, the impact from this activity is excluded from adjusted operating income (see Note 22 to the Consolidated Financial Statements for additional information). These increases were mostly offset by lower underwriting results, driven by an unfavorable impact from mortality experience, net of reinsurance, and the unfavorable ongoing impact of our annual reviews and update of assumptions and other refinements, and higher expenses.

Revenues, Benefits and Expenses

2019 to 2018 Annual Comparison. Revenues increased \$284 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, revenues increased \$321 million. This increase was primarily driven by an increase in net investment income from higher average invested assets resulting from business growth, higher income on non-coupon investments and higher prepayment fee income, and higher investment income from unaffiliated reserve financing activity that resulted in a corresponding increase in interest expense, as discussed below. Also contributing to the increase was higher policy charges and fee income driven by business growth and equity market appreciation.

Benefits and expenses increased \$420 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, benefits and expenses increased \$314 million. This increase was primarily driven by higher policyholders' benefits and interest credited to account balances attributable to an unfavorable impact from mortality experience, net of reinsurance, the unfavorable ongoing impact of the assumption update and other refinements, as discussed above, and business growth. Also contributing to the increase was higher reserve financing costs, as discussed above.

Sales Results

The following table sets forth Individual Life's annualized new business premiums, as defined under "—Results of Operations—Segment Measures" above, by distribution channel and product, for the periods indicated.

		20	19		2018							2017							
	dential visors		Third Party	 Total	_	Prudential Advisors		Third Party		Total		Prudential Advisors		Third Party		Гotal			
						(in mi	llions)											
Term Life	\$ 27	\$	173	\$ 200	\$	28	\$	185	\$	213	\$	30	\$	183	\$	213			
Guaranteed Universal Life(1)	8		87	95		8		89		97		16		140		156			
Other Universal Life(1)	38		117	155		45		105		150		37		88		125			
Variable Life	78		200	278		54		109		163		35		95		130			
Total	\$ 151	\$	577	\$ 728	\$	135	\$	488	\$	623	\$	118	\$	506	\$	624			

⁽¹⁾ Single pay life premiums and excess (unscheduled) premiums are included in annualized new business premiums based on a 10% credit and represented approximately 4%, 7% and 15% of Guaranteed Universal Life and 0%, 0% and 1% of Other Universal Life annualized new business premiums for the years ended December 31, 2019, 2018 and 2017, respectively.

2019 to 2018 Annual Comparison. Total annualized new business premiums increased \$105 million, primarily reflecting higher sales of variable life products driven by product design and pricing actions implemented in September 2018.

U.S. Businesses—Assurance IO Division

Assurance IQ

Business Update

• In October 2019, we completed the acquisition of Assurance IQ, a leading consumer solutions platform that offers a range of solutions that help meet consumers' financial needs (see "Business" and Note 1 to the Consolidated Financial Statements for additional information).

Operating Results

The following table sets forth Assurance IQ's operating results for the period indicated.

	For Period Beginning on O and Ending on Decemb	
	(in millions))
Operating results:		
Revenues		101
Expenses		110
Adjusted operating income		(9)
Other adjustments(1)		(47)
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$	(56)

^{(1) &}quot;Other adjustments" include certain components of the consideration for the Assurance IQ acquisition, which are recognized as compensation expense over the requisite service periods, as well as changes in the fair value of contingent consideration. See Note 22 to the Consolidated Financial Statements.

Adjusted Operating Income

For the period from October 10, 2019 ("acquisition date") to December 31, 2019, adjusted operating income was \$(9) million. Adjusted operating income reflects the starting period of Assurance IQ's earnings with Prudential and includes revenues, net of marketing and distribution expenses, related to seasonal enrollments within our health (Health Under 65 and Medicare) product line, which are generally most significant in the fourth quarter. Results also include operating expenses and amortization expenses related to intangible assets recognized as part of purchase accounting (see Note 1 and Note 10 to the Consolidated Financial Statements for additional information).

Revenues and Expenses

Revenues were \$101 million, primarily reflecting commissions and marketing referral revenues from our health (Health Under 65 and Medicare), life insurance, and property and casualty product lines. Expenses were \$110 million driven by marketing and distribution costs, general and administrative operating expenses, and amortization expenses related to intangible assets.

International Businesses

Business Update

- In December 2019, our joint venture in Chile, Administradora de Fondos de Pensiones Habitat S.A. ("AFP Habitat"), acquired Administradora de Fondos de Pensiones Colfondos S.A. ("AFP Colfondos"), a leading provider of retirement services in Colombia.
- The Company is exploring strategic options for its Korean insurance business.

Operating Results

The results of our International Businesses' operations are translated on the basis of weighted average monthly exchange rates, inclusive of the effects of the intercompany arrangement discussed in "—Results of Operations—Impact of Foreign Currency Exchange Rates" above. To provide a better understanding of operating performance within International Businesses, where indicated below, we have analyzed our results of operations excluding the effect of the year over year change in foreign currency exchange rates. Our results of operations, excluding the effect of foreign currency fluctuations, were derived by translating foreign currencies to USD at uniform exchange rates for all periods presented, including for constant dollar information discussed below. The exchange rates used were Japanese yen at a rate of 105 yen per USD and Korean won at a rate of 1,110 won per USD, both of which were determined in connection with the foreign currency income hedging program discussed in "—Results of Operations—Impact of Foreign Currency Exchange Rates" above. In addition, for constant dollar information discussed below, activity denominated in USD is generally reported based on the amounts as transacted in USD. Annualized new business premiums presented on a constant exchange rate basis in the "Sales Results" section below reflect translation based on these same uniform exchange rates.

The following table sets forth International Businesses' operating results for the periods indicated.

	 Year ended December 2019 2018 (in millions)				r 31,

⁽¹⁾ Prior period amounts have been updated to conform to current period presentation.

Adjusted Operating Income

⁽²⁾ Represents the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which are excluded from adjusted operating income beginning with the second quarter of 2019. The Company had historically recognized these impacts in adjusted operating income. See Note 22 to the Consolidated Financial Statements for additional information.

2019 to 2018 Annual Comparison. Adjusted operating income from our Life Planner operations increased \$90 million including a net favorable impact of \$19 million from currency fluctuations, inclusive of the currency hedging program discussed above. Both periods also include the impact of our annual reviews and update of assumptions and other refinements, which resulted in a \$1 million net benefit in 2019 compared to a \$49 million net charge in 2018. The net charge in 2018 was primarily driven by the impact from unfavorable economic assumption updates driven by a lower long-term interest rate assumption in Japan.

Excluding these items, adjusted operating income from our Life Planner operations increased \$21 million, primarily reflecting business growth in Japan, higher underwriting results driven by a favorable impact from mortality experience and policyholders' behavior, and higher net investment spread results driven by higher income on non-coupon investments and higher prepayment fee income. Also contributing to the increase was an unfavorable impact from changes in market conditions on estimates of profitability in the prior period. Beginning in the second quarter of 2019, the impact from this activity is excluded from adjusted operating income (see Note 22 to the Consolidated Financial Statements for additional information). These increases were partially offset by higher expenses driven by updates to legal reserves, as well as higher costs including those related to business growth and business initiatives.

Adjusted operating income from our Gibraltar Life and Other operations increased \$3 million including a net favorable impact of \$14 million from currency fluctuations, inclusive of the currency hedging program discussed above. Both periods also include the impact of our annual reviews and update of assumptions and other refinements, which resulted in a \$7 million net benefit in 2019 compared to a \$32 million net charge in 2018. The net benefit in 2019 reflected a net positive impact primarily related to updates to lapse assumptions. The net charge in 2018 was primarily driven by the impact from unfavorable economic assumption updates driven by a lower long-term interest rate assumption in Japan, as well as other refinements.

Excluding these items, adjusted operating income from our Gibraltar Life and Other operations decreased \$50 million, primarily reflecting higher expenses related to costs associated with business growth and business initiatives, including enhancements to sales processes and distribution. Also contributing to the decrease were lower underwriting results driven by an unfavorable impact from mortality experience and policyholders' behavior. These decreases were partially offset by the favorable impact from growth of business in force, higher net investment spread results driven by higher income on non-coupon investments and higher prepayment fee income, and higher other income driven by a favorable impact from our joint venture investments.

Revenues, Benefits and Expenses

2019 to 2018 Annual Comparison. Revenues from our Life Planner operations increased \$688 million including a net unfavorable impact of \$98 million from currency fluctuations and a net charge of \$16 million from our annual reviews and update of assumptions and other refinements. Excluding these items, revenues increased \$802 million, primarily driven by higher premiums related to the business growth, and higher net investment spread results driven by higher income on non-coupon investments and higher prepayment fee income.

Benefits and expenses from our Life Planner operations increased \$598 million including a net favorable impact of \$117 million from currency fluctuations and a net benefit of \$66 million from our annual review and update of assumptions and other refinements. Excluding these items, benefits and expenses increased \$781 million, primarily reflecting higher policyholders' benefits, including changes in reserves, driven by business growth, and higher expenses driven by updates to legal reserves, as well as higher costs including those related to business growth and business initiatives.

Revenues from our Gibraltar Life and Other operations increased \$273 million, including a net favorable impact of \$30 million from currency fluctuations. Excluding this item, revenues increased \$243 million, primarily reflecting higher net investment results driven by higher income on non-coupon investments and higher prepayment fee income, and higher other income driven by a favorable impact from our joint venture investments.

Benefits and expenses from our Gibraltar Life and Other operations increased \$270 million including a net unfavorable impact of \$16 million from currency fluctuations and a net benefit of \$39 million from our annual reviews and update of assumptions and other refinements. Excluding these items, benefits and expenses increased \$293 million, primarily driven by an increase in policyholders' benefits, including changes in reserves, driven by growth of business in force, and higher expenses related to costs associated with business growth and business initiatives, including enhancements to sales processes and distribution.

Sales Results

The following table sets forth annualized new business premiums, as defined under "—Results of Operations—Segment Measures" above, on an actual and constant exchange rate basis for the periods indicated.

	 Year ended December 31,						
	 2019		2018		2017		
		(in	millions)				
Annualized new business premiums:							
On an actual exchange rate basis:							
Life Planner	\$ 1,392	\$	1,257	\$	1,391		
Gibraltar Life and Other	1,213		1,483		1,595		
Total	\$ 2,605	\$	2,740	\$	2,986		
On a constant exchange rate basis:							
Life Planner	1,420		1,262		1,402		
Gibraltar Life and Other	1,219		1,490		1,619		
Total	\$ 2,639	\$	2,752	\$	3,021		

The amount of annualized new business premiums and the sales mix in terms of types and currency denomination of products for any given period can be significantly impacted by several factors, including but not limited to: the addition of new products, discontinuation of existing products, changes in credited interest rates for certain products and other product modifications, changes in premium rates, changes in interest rates or fluctuations in currency markets, changes in tax laws, changes in life insurance regulations or changes in the competitive environment. Sales volume may increase or decrease prior to certain of these changes becoming effective, and then fluctuate in the other direction following such changes.

Our diverse product portfolio in Japan, in terms of currency mix and premium payment structure, allows us to adapt to changing market and competitive dynamics, including the extremely low interest rate environment. We regularly examine our product offerings and their related profitability and, as a result, we have repriced or discontinued sales of certain products that do not meet our profit expectations. The impact of these actions, coupled with the introduction of certain new products, has generally resulted in an increase in sales of products denominated in USD relative to products denominated in other currencies.

2019 to 2018 Annual Comparison. The table below presents annualized new business premiums on a constant exchange rate basis, by product category and distribution channel, for the periods indicated.

	Year Ended December 31, 2019										Year Ended December 31, 2018

⁽¹⁾ Includes retirement income, endowment and savings variable universal life.

Annualized new business premiums, on a constant exchange rate basis, from our Life Planner operations increased \$158 million driven by growth in Life Planner headcount, as discussed below, as well as higher average premium sizes in our Japan, Korea and Brazil operations.

Annualized new business premiums, on a constant exchange rate basis, from our Gibraltar Life and Other operations decreased \$271 million. Life Consultants sales decreased \$177 million, primarily reflecting lower sales of USD-denominated fixed annuity products driven by declines in crediting rates, a lower Life Consultant headcount, as discussed below, and prioritization of our strategy to focus on recurring pay protection products. Bank channel sales decreased \$52 million, primarily from lower sales of

⁽²⁾ Single pay life annualized new business premiums, which include 10% of first year premiums, and 3-year limited pay annualized new business premiums, which include 100% of new business premiums, represented 1% and 66%, respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the year ended December 31, 2019, and 0% and 71%, respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the year ended December 31, 2018.

protection products and lower sales of USD-denominated products due to increased competition. Independent Agency sales decreased \$42 million, primarily driven by the suspension of corporate term products in the first quarter of 2019 (see "Business—Regulation—International Taxation") and declines in crediting rates for fixed annuity products.

Sales Force

The following table sets forth the number of Life Planners and Life Consultants for the periods indicated.

	A	As of December 31,					
	2019	2018	2017				
Life Planners:							
Japan	4,356	4,183	3,941				
All other countries	4,062	3,786	3,890				
Gibraltar Life Consultants	7,403	7,964	8,326				
Total	15,821	15,933	16,157				

2019 to 2018 Comparison. The number of Life Planners increased by 449, driven by an increase of 173 in Japan as a result of recruiting efforts and fewer terminations. Life Planners increased by 276 in other operations, primarily due to increases in Brazil and Korea as a result of recruiting efforts. The number of Gibraltar Life Consultants decreased by 561, primarily reflecting more selective recruiting efforts and retention standards.

Corporate and Other

Corporate and Other includes corporate operations, after allocations to our business segments, and Divested and Run-off Businesses other than those that qualify for "discontinued operations" accounting treatment under U.S. GAAP.

	Year ended December 31,					
	2019			2018		2017
			(in ı	millions)		
Operating results:						
Capital debt interest expense	\$	(787)	\$	(726)	\$	(705)

Adjusted operating income		(1,766)		(1,283)		(1,437)
Realized investment gains (losses), net, and related adjustments		(193)		216		(407)
Charges related to realized investment gains (losses), net		(53)		7		(26)
Market experience updates(2)		(10)		0		0
Divested and Run-off Businesses		452		(1,535)		38
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests		(6)		4		(19)
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$	(1,576)	\$	(2,591)	\$	(1,851)

⁽¹⁾ Includes consolidating adjustments.

⁽²⁾ Represents the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which are excluded from adjusted operating income beginning with the second quarter of 2019. The Company had historically recognized these impacts in adjusted operating income. See Note 22 to the Consolidated Financial Statements for additional information.

2019 to 2018 Annual Comparison. The loss from Corporate and Other operations, on an adjusted operating income basis, increased \$483 million. Net charges from other corporate activities increased \$461 million, primarily reflecting implementation costs for certain programs that are expected to result in margin improvements, including a charge related to the Company's Voluntary Separation Program (see "—Overview" above). The increase also reflected higher costs for long-term and deferred compensation plans tied to Company stock and equity market performance, and certain acquisition costs in the current period, partially offset by lower enhanced supervision costs and decreases in other corporate charges. Capital debt interest expense increased \$61 million, reflecting higher average debt balances. Results for investment income, net of operating debt interest expense, increased \$85 million, driven by an increase in net investment income driven by higher average invested assets and higher income on highly liquid assets. Beginning in the fourth quarter of 2019, the Company implemented certain changes that are expected to reduce market-based earnings volatility on the long-term and deferred compensation plans.

Results from pension and employee benefits were less favorable by \$46 million, primarily reflecting lower income from our qualified pension plan, due to higher interest costs on plan obligations driven by the increase in interest rates in 2018.

For purposes of calculating pension income from our qualified pension plan for the year ended December 31, 2020, we will decrease the discount rate from 4.30% to 3.30% as of December 31, 2019. The expected rate of return on plan assets will decrease from 6.50% in 2019 to 6.00% in 2020. The assumed rate of increase in compensation will remain unchanged at 4.50%. Giving effect to the foregoing assumptions and other factors, we expect income from our qualified pension plan in 2020 to be approximately \$25 million to \$30 million higher than 2019 levels. The increase is driven by higher expected returns on plan assets due to higher than expected plan fixed income asset growth in 2019 as well as lower interest costs on the plan obligation due to the lower discount rate.

For purposes of calculating postretirement benefit expenses for the year ended December 31, 2020, we will decrease the discount rate from 4.30% to 3.25% as of December 31, 2019. The expected rate of return on plan assets will decrease from 7.00% in 2019 to 6.75% in 2020. Giving effect to the foregoing assumptions and other factors, we expect postretirement benefit expenses in 2020 to be approximately \$20 million to \$25 million lower than 2019 levels. The decrease in expenses is driven by higher expected returns on plan assets due to higher than expected asset growth in 2019, as well as lower interest costs on the plan obligation due to the lower discount rate.

In 2020, pension and other postretirement benefit service costs related to active employees will continue to be allocated to our business segments. For further information regarding our pension and postretirement plans, see Note 18 to the Consolidated Financial Statements.

Divested and Run-off Businesses

Divested and Run-off Businesses Included in Corporate and Other

Income from our Divested and Run-off Businesses includes results from several businesses that have been or will be sold or exited, including businesses that have been placed in wind down status that do not qualify for "discontinued operations" accounting treatment under U.S. GAAP. The results of these Divested and Run-off Businesses are reflected in our Corporate and Other operations, but are excluded from adjusted operating income. A summary of the results of the Divested and Run-off Businesses reflected in our Corporate and Other operations is as follows for the periods indicated:

	Year ended December 31,						
	2019			2018	2	2017	
			(in	millions)			
Long-Term Care	\$	469	\$	(1,458)	\$	42	
Other		(17)		(77)		(4)	
Total Divested and Run-off Businesses income (loss) excluded from adjusted operating income	\$	452	\$	(1,535)	\$	38	

Long-Term Care. Results for the year ended December 31, 2019 increased compared to 2018, primarily reflecting a favorable comparative net impact from our annual reviews and update of assumptions and other refinements. Results for 2019 included a \$9 million net charge from these updates and results for 2018 included a \$1,458 million net charge from these updates, including the removal of our assumption of expected future morbidity improvement, reflecting unfavorable morbidity experience relative to prior expectations. Excluding these items, results for 2019 increased compared to 2018, reflecting net realized investment gains in the current period compared to net realized investment losses in the prior year period, driven by the favorable comparative

change in the market value of derivatives used for duration management. The increase also reflects the favorable comparative change in the market value of investments in equity securities.

Other. Results for the year ended December 31, 2019 reflect less unfavorable results in comparison to the prior year period primarily reflecting lower comparative losses in 2019 related to the sale of our Pramerica of Italy subsidiary, which closed in December 2019, and the exit of our PGIM Brazil operations in 2018, partially offset by the absence of a gain related to the sale of our Pramerica of Poland subsidiary in 2018.

Closed Block Division

The Closed Block division includes certain in-force traditional domestic participating life insurance and annuity products and assets that are used for the payment of benefits and policyholder dividends on these policies (collectively, the "Closed Block"), as well as certain related assets and liabilities. We no longer offer these traditional domestic participating policies. See Note 15 to the Consolidated Financial Statements for additional details.

Each year, the Board of Directors of The Prudential Insurance Company of America ("PICA") determines the dividends payable on participating policies for the following year based on the experience of the Closed Block, including investment income, net realized and unrealized investment gains (losses), mortality experience and other factors. Although Closed Block experience for dividend action decisions is based upon statutory results, at the time the Closed Block was established, we developed, as required by U.S. GAAP, an actuarial calculation of the timing of the maximum future earnings from the policies included in the Closed Block. If actual cumulative earnings in any given period are greater than the cumulative earnings we expected, we record this excess as a policyholder dividend obligation. We will subsequently pay this excess to Closed Block policyholders as an additional dividend unless it is otherwise offset by future Closed Block performance that is less favorable than we originally expected. The policyholder dividends we charge to expense within the Closed Block division will include any change in our policyholder dividend obligation that we recognize for the excess of actual cumulative earnings in any given period over the cumulative earnings we expected in addition to the actual policyholder dividends declared by the Board of Directors of PICA.

As of December 31, 2019, the excess of actual cumulative earnings over the expected cumulative earnings was \$2,816 million, which was recorded as a policyholder dividend obligation. Actual cumulative earnings, as required by U.S. GAAP, reflect the recognition of realized investment gains and losses in the current period, as well as changes in assets and related liabilities that support the Closed Block policies. Additionally, the accumulation of net unrealized investment gains that have arisen subsequent to the establishment of the Closed Block has been reflected as a policyholder dividend obligation of \$3,332 million at December 31, 2019, to be paid to Closed Block policyholders unless offset by future experience, with a corresponding amount reported in AOCI.

Operating Results

The following table sets forth the Closed Block division's results for the periods indicated.

	 Year ended December 31,					
	2019		2018		2017	
	 (in millions)					
U.S. GAAP results:						
Revenues	\$ 5,642	\$	4,678	\$	5,826	
Benefits and expenses	5,606		4,740		5,781	
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$ 36	\$	(62)	\$	45	

Income (loss) Before Income Taxes and Equity in Earnings of Operating Joint Ventures

2019 primarily reflected an increase in net realized investment gains and related activity primarily driven by gains from sales of fixed maturities and favorable changes in the value of equity securities. Net investment income increased primarily due to higher income on non-coupon investments and higher prepayment fee income, partially offset by lower income on fixed income investments. Net insurance activity results increased primarily as a result of a decrease in the 2020 dividend scale, partially offset by a decrease in premiums as a result of runoff of policies in force and higher benefit payments. As a result of the above and other variances, a \$564 million increase in the policyholder dividend obligation was recorded in 2019, compared to a \$508 million reduction in 2018. If actual cumulative earnings fall below expected cumulative earnings in future periods, earnings volatility in the Closed Block division, which is primarily due to changes in investment results, may not be offset by changes in the cumulative earnings policyholder dividend obligation. For a discussion of the Closed Block division's realized investment gains (losses), net, see "—General Account Investments."

Revenues, Benefits and Expenses

2019 to 2018 Annual Comparison. Revenues increased \$964 million primarily driven by an increase in net realized investment gains and related activity, and net investment income, as discussed above.

Benefits and expenses increased \$866 million, primarily driven by an increase in dividends to policyholders, reflecting an increase in the policyholder dividend obligation expense due to changes in cumulative earnings, as discussed above.

Income Taxes

The differences between income taxes expected at the U.S. federal statutory income tax rate of 21% applicable for 2019 and 2018 and 35% applicable for 2017, and the reported income tax (benefit) expense are provided in the following table:

	 Year Ended December 31,							
	 2019		2018		2017			
		(i	n millions)					
Expected federal income tax expense (benefit) at federal statutory rate	\$ 1,068	\$	1,015	\$	2,270			
Non-taxable investment income	(270)		(246)		(369)			
Foreign taxes at other than U.S. rate	225		349		(249)			
Low-income housing and other tax credits	(118)		(112)		(126)			
Changes in tax law	0		(321)		(2,858)			
Other	42		137		(106)			
Reported income tax expense (benefit)	\$ 947	\$	822	\$	(1,438)			
Effective tax rate	 18.6%		17.0%		(22.2)%			

Effective Tax Rate

The effective tax rate is the ratio of "Total income tax expense (benefit)" divided by "Income before income taxes and equity in earnings of operating joint ventures." Our effective tax rate for fiscal years 2019, 2018 and 2017 was 18.6%, 17.0%, and (22.2)%, respectively. For a detailed description of the nature of each significant reconciling item, see Note 16 to the Consolidated Financial Statements. The increase in the effective tax rate from (22.2)% in 2017 to 17.0% in 2018, and to 18.6% in 2019 was primarily driven by the impacts of the Tax Act of 2017 in 2017 and 2018.

Unrecognized Tax Benefits

The Company's liability for income taxes includes the liability for unrecognized tax benefits and interest that relate to tax years still subject to review by the Internal Revenue Service or other taxing authorities. The completion of review or the expiration of the Federal statute of limitations for a given audit period could result in an adjustment to the liability for income taxes. The total unrecognized benefit as of December 31, 2019, 2018 and 2017 was \$18 million, \$20 million and \$45 million, respectively. We do not anticipate any significant changes within the next twelve months to our total unrecognized tax benefits related to tax years for which the statute of limitations has not expired.

Income Tax Expense vs. Income Tax Paid in Cash

Income tax expense recorded under U.S. GAAP routinely differs from the income taxes paid in cash in any given year. Income tax expense recorded under U.S. GAAP is based on income reported in our Consolidated Statements of Operations for the current period and it includes both current and deferred taxes. Income taxes paid during the year include tax installments made for the current year as well as tax payments and refunds related to prior periods.

For additional information on income tax related items, see "Business—Regulation" and Note 16 to the Consolidated Financial Statements.

Experience-Rated Contractholder Liabilities,
Assets Supporting Experience-Rated Contractholder Liabilities and Other Related Investments

Certain products included in the Retirement and International Businesses segments are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The majority of investments supporting these experience-rated products are carried at fair value. These investments are reflected on the Consolidated Statements of Financial Position as "Assets supporting experience-rated contractholder liabilities, at fair value." Realized and unrealized gains (losses) for these investments are reported in "Other income (loss)." Interest and dividend income for these investments is reported in "Net investment income." To a lesser extent, these experience-rated products are also supported by derivatives and commercial mortgage and other loans. The derivatives that support these experience-rated products are reflected on the Consolidated Statements of Financial Position as "Other invested assets" and are carried at fair value, and the realized and unrealized gains (losses) are reported in "Realized investment gains (losses), net." The commercial mortgage and other loans that support these experience-rated products are carried at unpaid principal, net of unamortized discounts and an allowance for losses, and are reflected on the Consolidated Statements of Financial Position as "Commercial mortgage and other loans." Gains (losses) on sales and changes in the valuation allowance for commercial mortgage and other loans are reported in "Realized investment gains (losses), net."

Our Retirement segment has two types of experience-rated products that are supported by assets supporting experience-rated contractholder liabilities and other related investments. Fully participating products are those for which the entire return on underlying investments is passed back to the policyholders through a corresponding adjustment to the related liability, primarily classified in the Consolidated Statements of Financial Position as "Policyholders' account balances." The adjustment to the liability is based on changes in the fair value of all of the related assets, including commercial mortgage and other loans, which are carried at amortized cost, less any valuation allowance. Partially participating products are those for which only a portion of the return on underlying investments is passed back to the policyholders over time through changes to the contractual crediting rates. The crediting rates are typically reset semiannually, often subject to a minimum crediting rate, and returns are required to be passed back within ten years.

In our International Businesses, the experience-rated products are fully participating. As a result, the entire return on the underlying investments is passed back to policyholders through a corresponding adjustment to the related liability.

Adjusted operating income excludes net investment gains (losses) on assets supporting experience-rated contractholder liabilities, related derivatives and commercial mortgage and other loans. This is consistent with the exclusion of realized investment gains (losses) with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains (losses) on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including changes in the fair value of commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in "Interest credited to policyholders' account balances." The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread we earn on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that we expect will ultimately accrue to the contractholders.

The following table sets forth the impact on results for the periods indicated of these items that are excluded from adjusted operating income:

	 Year ended December 31,				
	 2019		2018		2017
		(in mill	ions)		
Retirement:					
Investment gains (losses) on assets supporting experience-rated contractholder liabilities, net(1)	\$ 699	\$ (472)	\$	(57)
Change in experience-rated contractholder liabilities due to asset value changes	(682)		435		67
Gains (losses), net, on experienced rated contracts(2)(3)	\$ 17	\$	(37)	\$	10
International Businesses:					
Investment gains (losses) on assets supporting experience-rated contractholder liabilities, net	\$ 267	\$ (275)	\$	218
Change in experience-rated contractholder liabilities due to asset value changes	(267)		275		(218)
Gains (losses), net, on experienced rated contracts	\$ 0	\$	0	\$	0
Total:					
Investment gains (losses) on assets supporting experience-rated contractholder liabilities, net(1)	\$ 966	\$ (747)	\$	161
Change in experience-rated contractholder liabilities due to asset value changes	(949)		710		(151)
Gains (losses), net, on experienced rated contracts(2)(3)	\$ 17	\$	(37)	\$	10
100					

- (1) Prior period amounts have been reclassified to conform to current period presentation.
- (2) Decreases to contractholder liabilities due to asset value changes are limited by certain floors and therefore do not reflect cumulative declines in recorded asset values of \$7 million, \$99 million and \$18 million as of December 31, 2019, 2018 and 2017, respectively. We have recovered and expect to recover in future periods these declines in recorded asset values through subsequent increases in recorded asset values or reductions in crediting rates on contractholder liabilities.
- (3) Included in the amounts above related to the change in the liability to contractholders as a result of commercial mortgage and other loans are an increase of \$57 million, and decreases of \$23 million and \$21 million for the years ended December 31, 2019, 2018 and 2017, respectively. As prescribed by U.S. GAAP, changes in the fair value of commercial mortgage and other loans held for investment in our general account, other than when associated with impairments, are not recognized in income in the current period, while the impact of these changes in fair value are reflected as a change in the liability to fully participating contractholders in the current period.

The net impacts, for the Retirement segment, of changes in experience-rated contractholder liabilities and investment gains (losses) on assets supporting experience-rated contractholder liabilities and other related investments reflect timing differences between the recognition of the mark-to-market adjustments and the recognition of the recovery of these adjustments in future periods through subsequent increases in asset values or reductions in crediting rates on contractholder liabilities for partially participating products. These impacts also reflect the difference between the fair value of the underlying commercial mortgages and other loans and the amortized cost, less any valuation allowance, of these loans, as described above.

Valuation of Assets and Liabilities

Fair Value of Assets and Liabilities

The authoritative guidance related to fair value measurement establishes a framework that includes a three-level hierarchy used to classify the inputs used in measuring fair value. The level in the hierarchy within which the fair value falls is determined based on the lowest level input that is significant to the measurement. The fair values of assets and liabilities classified as Level 3 include at least one significant unobservable input in the measurement. See Note 6 to the Consolidated Financial Statements for an additional description of the valuation hierarchy levels as well as for the balances of assets and liabilities measured at fair value on a recurring basis by hierarchy level presented on a consolidated basis.

The table below presents the balances of assets and liabilities measured at fair value on a recurring basis, as of the periods indicated, and the portion of such assets and liabilities that are classified in Level 3 of the valuation hierarchy. The table also provides details about these assets and liabilities excluding those held in the Closed Block division. We believe the amounts excluding the Closed Block division are most relevant to an understanding of our operations that are pertinent to investors in Prudential Financial because substantially all Closed Block division assets support obligations and liabilities relating to the Closed Block policies only. See Note 15 to the Consolidated Financial Statements for further information on the Closed Block.

As of December 31 2010

As of December 31 2018

The determination of fair value, which for certain assets and liabilities is dependent on the application of estimates and assumptions, can have a significant impact on our results of operations and may require the application of a greater degree of judgment depending on market conditions, as the ability to value assets and liabilities can be significantly impacted by a decrease in market activity or a lack of transactions executed in an orderly manner.

Fixed maturity securities included in Level 3 in our fair value hierarchy are generally priced based on internally-developed valuations or indicative broker quotes. For certain private fixed maturity and equity securities, the internal valuation models use significant unobservable inputs and, accordingly, such securities are included in Level 3 in our fair value hierarchy. Level 3 fixed maturity securities for PFI excluding the Closed Block division included approximately \$1.8 billion of public fixed maturities as of December 31, 2019 with values primarily based on indicative broker quotes, and approximately \$2.8 billion of private fixed maturities, with values primarily based on internally-developed models. Significant unobservable inputs used in their valuation included: issue specific spread adjustments, material non-public financial information, management judgment, estimation of future earnings and cash flows, default rate assumptions, liquidity assumptions and indicative quotes from market makers. Separate account assets included in Level 3 in our fair value hierarchy primarily include corporate securities and commercial mortgage loans.

⁽¹⁾ Level 3 assets expressed as a percentage of total assets measured at fair value on a recurring basis for PFI excluding the Closed Block division and for the Closed Block division totaled 1.1% and 2.0%, respectively, as of December 31, 2019 and 1.1% and 2.1%, respectively, as of December 31, 2018.

^{(2) &}quot;All other" represents cash equivalents and short-term investments.

^{(3) &}quot;Other invested assets" and "Other liabilities" primarily include derivatives. The amounts include the impact of netting subject to master netting agreements.

Embedded derivatives reported in "Future policy benefits" and "Policyholders' account balances" that are included in level 3 of our fair value hierarchy represent general account liabilities pertaining to living benefit features of the Company's variable annuity contracts and the index-linked interest credited features on certain life and annuity products. These are carried at fair value with changes in fair value included in "Realized investment gains (losses), net." These embedded derivatives are valued using internally-developed models that require significant estimates and assumptions developed by management. Changes in these estimates and assumptions can have a significant impact on the results of our operations.

For additional information about the valuation techniques and the key estimates and assumptions used in our determination of fair value, see Note 6 to the Consolidated Financial Statements.

General Account Investments

We maintain diversified investment portfolios in our general account to support our liabilities to customers as well as our other general liabilities. Investments and other assets that do not support general account liabilities, and are therefore excluded from our general account, are as follows:

- assets of our derivative operations;
- · assets of our investment management operations, including investments managed for third-parties; and
- those assets classified as "Separate account assets" on our balance sheet.

The general account portfolios are managed pursuant to the distinct objectives and investment policy statements of PFI excluding the Closed Block division and of the Closed Block division. The primary investment objectives of PFI excluding the Closed Block division include:

- hedging and otherwise managing the market risk characteristics of the major product liabilities and other obligations of the Company;
- optimizing investment income yield within risk constraints over time; and
- for certain portfolios, optimizing total return, including both investment income yield and capital appreciation, within risk constraints over time, while managing the market risk exposures associated with the corresponding product liabilities.

We pursue our objective to optimize investment income yield for PFI excluding the Closed Block division over time through:

- the investment of net operating cash flows, including new product premium inflows, and proceeds from investment sales, repayments and prepayments into investments with attractive risk-adjusted yields; and
- the sale of investments, where appropriate, either to meet various cash flow needs or to manage the portfolio's risk exposure profile with respect to duration, credit, currency and other risk factors, while considering the impact on taxes and capital.

The primary investment objectives of the Closed Block division include:

- providing for the reasonable dividend expectations of the participating policyholders within the Closed Block division; and
- optimizing total return, including both investment income yield and capital appreciation, within risk constraints, while managing the market risk
 exposures associated with the major products in the Closed Block division.

Our portfolio management approach, while emphasizing our investment income yield and asset/liability risk management objectives, also takes into account the capital and tax implications of portfolio activity and our assertions regarding our ability and intent to hold debt securities to recovery. For a further discussion of our OTTI policies, including our assertions regarding any intention or requirement to sell debt securities before anticipated recovery, see "—Realized Investment Gains and Losses—Impairments" below.

Management of Investments

The Investment Committee of our Board of Directors ("Board") oversees our proprietary investments, including our general account portfolios, and regularly reviews performance and risk positions. Our Chief Investment Officer Organization ("CIO Organization") develops investment policies subject to risk limits proposed by our Enterprise Risk Management ("ERM") group for the general account portfolios of our domestic and international insurance subsidiaries and directs and oversees management of the general account portfolios within risk limits and exposure ranges approved annually by the Investment Committee.

The CIO Organization, including related functions within our insurance subsidiaries, works closely with product actuaries and ERM to understand the characteristics of our products and their associated market risk exposures. This information is incorporated into the development of target asset portfolios that manage market risk exposures associated with the liability characteristics and establish investment risk exposures, within tolerances prescribed by Prudential's investment risk limits, on which we expect to earn an attractive risk-adjusted return. We develop asset strategies for specific classes of product liabilities and attributed or accumulated surplus, each with distinct risk characteristics. Market risk exposures associated with the liabilities include interest rate risk, which is addressed through the duration characteristics of the target asset mix, and currency risk, which is addressed by the currency profile of the target asset mix. In certain of our smaller markets outside of the U.S. and Japan, capital markets limitations hinder our ability to hedge interest rate exposure to the same extent we do for our U.S. and Japan businesses and lead us to accept a higher degree of interest rate risk in these smaller portfolios. General account portfolios typically include allocations to credit and other investment risks as a means to enhance investment yields and returns over time.

Most of our products can be categorized into the following three classes:

- interest-crediting products for which the rates credited to customers are periodically adjusted to reflect market and competitive forces and actual investment experience, such as fixed annuities and universal life insurance:
- participating individual and experience-rated group products in which customers participate in actual investment and business results through annual dividends, interest or return of premium; and
- products with fixed or guaranteed terms, such as traditional whole life and endowment products, guaranteed investment contracts ("GICs"), funding
 agreements and payout annuities.

Our total investment portfolio is composed of a number of operating portfolios. Each operating portfolio backs a specific set of liabilities, and the portfolios have a target asset mix that supports the liability characteristics, including duration, cash flow, liquidity needs and other criteria. As of December 31, 2019, the average duration of our domestic general account investment portfolios attributable to PFI excluding the Closed Block division, including the impact of derivatives, was approximately 7 years. As of December 31, 2019, the average duration of our international general account portfolios attributable to our Japanese insurance operations, including the impact of derivatives, was between 11 and 12 years and represented a blend of yen-denominated and U.S. dollar and Australian dollar-denominated investments, which have distinct average durations supporting the insurance liabilities we have issued in those currencies. Our asset/liability management process has enabled us to manage our portfolios through several market cycles.

We implement our portfolio strategies primarily through investment in a broad range of fixed income assets, including government and agency securities, public and private corporate bonds and structured securities and commercial mortgage loans. In addition, we hold allocations of non-coupon investments, which include equity securities and other invested assets such as LPs/LLCs, real estate held through direct ownership, derivative instruments, and seed money investments in separate accounts.

We manage our public fixed maturity portfolio to a risk profile directed or overseen by the CIO Organization and ERM groups and to a profile that also reflects the market environments impacting both our domestic and international insurance portfolios. The return that we earn on the portfolio will be reflected in investment income and in realized gains or losses on investments.

We use privately-placed corporate debt securities and commercial mortgage loans, which consist of mortgages on diversified properties in terms of geography, property type and borrowers, to enhance the yield on our portfolio and to improve the overall diversification of the portfolios. Private placements typically offer enhanced yields due to an illiquidity premium and generally offer enhanced credit protection in the form of covenants. Our origination capability offers the opportunity to lead transactions and gives us the opportunity for better terms, including covenants and call protection, and to take advantage of innovative deal structures.

Derivative strategies are employed in the context of our risk management framework to enhance our ability to manage interest rate and currency risk exposures of the asset portfolio relative to the liabilities and to manage credit and equity positions in the investment portfolios. For a discussion of our risk management process, see "Quantitative and Qualitative Disclosures About Market Risk" below.

Our portfolio asset allocation reflects our emphasis on diversification across asset classes, sectors and issuers. The CIO Organization, directly and through related functions within the insurance subsidiaries, implements portfolio strategies primarily through various investment management units within Prudential's PGIM segment. Activities of the PGIM segment on behalf of the general account portfolios are directed and overseen by the CIO Organization and monitored by ERM for compliance with investment risk limits.

In executing the activities on behalf of the general account portfolio, Prudential investment management units are incorporating environmental, social and governance factors into their respective investment processes as appropriate. These factors include investing in opportunities to support diversity and inclusion and to help mitigate climate change by pursuing relevant investments across asset classes.

Portfolio Composition

Our investment portfolio consists of public and private fixed maturity securities, commercial mortgage and other loans, policy loans and non-coupon investments as defined above. The composition of our general account reflects, within the discipline provided by our risk management approach, our need for competitive results and the selection of diverse investment alternatives available primarily through our PGIM segment. The size of our portfolio enables us to invest in asset classes that may be unavailable to the typical investor.

The following tables set forth the composition of our general account investment portfolio apportioned between PFI excluding the Closed Block division and the Closed Block division, as of the dates indicated:

		Decemb	er 31, 2019

⁽¹⁾ Other invested assets consist of investments in LPs/LLCs, investment real estate held through direct ownership, derivative instruments and other miscellaneous investments. For additional information regarding these investments, see "—Other Invested Assets" below.

⁽²⁾ Includes invested assets of our investment management and derivative operations. Excludes assets of our investment management operations that are managed for third-parties and those assets classified as "Separate account assets" on our balance sheet. For additional information regarding these investments, see "—Invested Assets of Other Entities and Operations" below.

The increase in general account investments attributable to PFI excluding the Closed Block division in 2019 was primarily due to market appreciation from a decrease in U.S. and Japan interest rates and tighter credit spreads, the reinvestment of net investment income and net business inflows. For information regarding the methodology used in determining the fair value of our fixed maturities, see Note 6 to the Consolidated Financial Statements.

As of December 31, 2019 and 2018, 42% and 43%, respectively, of our general account investments attributable to PFI excluding the Closed Block division related to our Japanese insurance operations. The following table sets forth the composition of the investments of our Japanese insurance operations' general account, as of the dates indicated:

	Decen	nber 31,	
	 2019		2018
	(in m	illions)	
Fixed maturities:			
Public, available-for-sale, at fair value	\$ 142,220	\$	133,084
Public, held-to-maturity, at amortized cost	1,705		1,745
Private, available-for-sale, at fair value	19,189		16,222
Private, held-to-maturity, at amortized cost	228		268
Fixed maturities, trading, at fair value	492		328
Assets supporting experience-rated contractholder liabilities, at fair value	2,777		2,441
Equity securities, at fair value	2,185		1,972
Commercial mortgage and other loans, at book value	19,138		17,228
Policy loans, at outstanding balance	2,859		2,715
Other invested assets(1)	2,187		1,957
Short-term investments	165		451
Total Japanese general account investments	\$ 193,145	\$	178,411

⁽¹⁾ Other invested assets consist of investments in LPs/LLCs, investment real estate held through direct ownership, derivative instruments and other miscellaneous investments.

The increase in general account investments related to our Japanese insurance operations in 2019 was primarily attributable to market appreciation from a decrease in U.S. and Japan interest rates and tighter credit spreads, the reinvestment of net investment income and net business inflows.

As of December 31, 2019, our Japanese insurance operations had \$77.1 billion, at carrying value, of investments denominated in U.S. dollars, including \$2.1 billion that were hedged to yen through third-party derivative contracts and \$62.4 billion that support liabilities denominated in U.S. dollars, with the remainder hedging our foreign currency exchange rate exposure on U.S. dollar-equivalent equity. As of December 31, 2018, our Japanese insurance operations had \$64.9 billion, at carrying value, of investments denominated in U.S. dollars, including \$2.5 billion that were hedged to yen through third-party derivative contracts and \$50.0 billion that support liabilities denominated in U.S. dollars, with the remainder hedging our foreign currency exchange rate exposure on U.S. dollar-equivalent equity. The \$12.2 billion increase in the carrying value of U.S. dollar-denominated investments from December 31, 2018 was primarily attributable to the impact of the decrease in the U.S. treasury bond rates and credit rate spreads, portfolio growth as a result of net business inflows and the reinvestment of net investment income.

Our Japanese insurance operations had \$9.9 billion and \$10.1 billion, at carrying value, of investments denominated in Australian dollars that support liabilities denominated in Australian dollars, as of December 31, 2019 and 2018, respectively. The \$0.2 billion decrease in the carrying value of Australian dollar-denominated investments from December 31, 2018 was primarily attributable to the run off of the portfolio. For additional information regarding U.S. and Australian dollar investments held in our Japanese insurance operations and a discussion of our yen hedging strategy, see "—Segment Results of Operations—Impact of Foreign Currency Exchange Rates" above.

Investment Results

The following tables set forth the investment results of our general account apportioned between PFI excluding the Closed Block division and the Closed Block division, for the periods indicated. The yields are based on net investment income as reported

under U.S. GAAP and as such do not include certain interest-related items, such as settlements of duration management swaps which are included in "Realized investment gains (losses), net."

⁽¹⁾ The denominator in the yield percentage is based on quarterly average carrying values for all asset types except for fixed maturities which are based on amortized cost. Amounts for fixed maturities, short-term investments and cash equivalents are also netted for securities lending activity (i.e., income netted for rebate expenses and asset values netted for securities lending liabilities). A yield is not presented for other invested assets as it is not considered a meaningful measure of investment performance. Total yields exclude investment income and assets related to other invested assets.

⁽²⁾ Includes fixed maturity securities classified as available-for-sale and held-to-maturity and excludes fixed maturity securities classified as trading, which are included in other invested assets

- (3) Other invested assets consist of investments in LPs/LLCs, investment real estate held through direct ownership, derivative instruments, fixed maturities classified as trading and other miscellaneous investments.
- (4) Includes net investment income of our investment management operations.
- (5) The total yield was 3.81%, 3.77% and 3.68% for the years ended December 31, 2019, 2018 and 2017, respectively.

The increase in investment income after investment expenses yield attributable to our general account investments, excluding both the Closed Block division and the Japanese insurance operations' portfolio, for 2019 compared to 2018 was primarily the result of higher fixed income prepayment fees and call premiums and higher returns on short-term investments based on an increase in short-term rates.

The decrease in investment income after investment expenses yield attributable to the Japanese insurance operations' portfolio for 2019 compared to 2018 was primarily the result of lower reinvestment rates.

Both the U.S. dollar-denominated and Australian dollar-denominated fixed maturities that are not hedged to yen through third-party derivative contracts provide a yield that is substantially higher than the yield on comparable yen-denominated fixed maturities. The average amortized cost of U.S. dollar-denominated fixed maturities that are not hedged to yen through third-party derivative contracts was approximately \$47.5 billion and \$44.3 billion, for the years ended December 31, 2019 and 2018, respectively. The majority of U.S. dollar-denominated fixed maturities support liabilities that are denominated in U.S. dollars. The average amortized cost of Australian dollar-denominated fixed maturities that are not hedged to yen through third-party derivative contracts was approximately \$8.4 billion and \$9.8 billion, for the years ended December 31, 2019 and 2018, respectively. The majority of Australian dollar-denominated fixed maturities support liabilities that are denominated in Australian dollars. For additional information regarding U.S. and Australian dollar investments held in our Japanese insurance operations, see "—Results of Operations—Impact of Foreign Currency Exchange Rates" above.

Realized Investment Gains and Losses

- (1) Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused or will lead to a deficiency in the contractual cash flows related to the investment. The amount of the impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.
- (2) Excludes the portion of OTTI recorded in OCI, representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.
- (3) Includes fixed maturity securities classified as available-for-sale and held-to-maturity and excludes fixed maturity securities classified as trading.
- (4) Effective January 1, 2018, the identification of OTTI for equity securities is no longer needed as all of these investments are now measured at fair value with changes in fair value reported in earnings.
- (5) Effective January 1, 2018, realized gains (losses) on equity securities are recorded within "Other income (loss)."
- (6) Primarily includes OTTI related to investments in LPs/LLCs and real estate held through direct ownership.
- (7) Includes "realized investment gains (losses), net" of our investment management operations.

2019 to 2018 Annual Comparison

Net gains on sales and maturities of fixed maturity securities were \$867 million and \$504 million for the years ended December 31, 2019 and 2018, respectively, primarily driven by the impact of foreign currency exchange rate movements of U.S. and Australian dollar-denominated securities that matured or were sold within our International Businesses segment.

Net realized losses on derivative instruments of \$1,623 million, for the year ended December 31, 2019, primarily included:

- \$2,677 million of losses on product-related embedded derivatives and related hedge positions associated with certain variable annuity contracts; and
- \$1,070 million of losses on capital hedges due to increases in equity indices.

Partially offsetting these losses were:

- \$1,354 million of gains on interest rate derivatives due to decreases in swap and U.S. Treasury rates;
- \$378 million of gains on foreign currency hedges due to U.S. dollar appreciation versus the euro;
- \$145 million of gains for fees earned on fee-based synthetic GICs; and
- \$124 million of gains on credit default swaps primarily due to spreads tightening.

Net realized gains on derivative instruments of \$1,249 million, for the year ended December 31, 2018, primarily included:

- \$575 million of gains on foreign currency hedges due to U.S. dollar and Japanese yen appreciation;
- \$529 million of gains on product-related embedded derivatives and related hedge positions associated with certain variable annuity contracts;
- \$363 million of gains on capital hedges due to decreases in equity indices; and
- \$150 million of gains for fees earned on fee-based synthetic GICs.

Partially offsetting these gains were:

\$362 million of losses on interest rate derivatives due to increases in swap and U.S. Treasury rates.

For a discussion of living benefit guarantees and related hedge positions in our Individual Annuities segment, see "—Results of Operations—U.S. Businesses—U.S. Individual Solutions Division—Individual Annuities" above.

Related adjustments include the portions of "Realized investment gains (losses), net" that are included in adjusted operating income and the portions of "Other income (loss)" and "Net investment income" that are excluded from adjusted operating income. These adjustments are made to arrive at "Realized investment gains (losses), net, and related adjustments" which are excluded from adjusted operating income. Results for the years ended December 31, 2019 and 2018 reflected related adjustments of net positive of \$216 million and net negative \$1,381 million, respectively. Both periods' results reflected settlements and changes in values related to interest rate and currency derivatives, as well as changes in fair value of equity securities recorded in "Other income (loss)."

Charges that relate to "Realized investment gains (losses), net" are also excluded from adjusted operating income and may be reflected as net charges or net benefits. Results for the years ended December 31, 2019 and 2018 reflected net related charges of \$125 million and \$316 million, respectively. Both periods' results were primarily driven by the impact of derivative activity on the amortization of DAC and other costs and certain policyholder reserves.

Impairments

The level of OTTI generally reflects economic conditions and is expected to increase when economic conditions worsen and to decrease when economic conditions improve. Historically, the causes of OTTI have been specific to each individual issuer and have not directly resulted in impairments to other securities within the same industry or geographic region. We may also realize additional credit and interest rate-related losses through sales of investments pursuant to our credit risk and portfolio management objectives.

We maintain separate monitoring processes for public and private fixed maturities and create watch lists to highlight securities that require special scrutiny and management. For private placements, our credit and portfolio management processes help ensure prudent controls over valuation and management. We have separate pricing and authorization processes to establish "checks and balances" for new investments. We apply consistent standards of credit analysis and due diligence for all transactions, whether they originate through our own in-house origination staff or through agents. Our regional offices closely monitor the portfolios in their regions. We set all valuation standards centrally, and we assess the fair value of all investments quarterly. Our public and private fixed maturity investment managers formally review all public and private fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances and/or company or industry-specific concerns.

For LPs/LLCs accounted for using the equity method, the carrying value of these investments is written down or impaired to fair value when a decline in value is considered to be other-than-temporary. For additional information regarding our OTTI policies, see Note 2 to the Consolidated Financial Statements.

Retail-Related Investments

As of December 31, 2019, PFI excluding the Closed Block division had retail-related investments of approximately \$14 billion consisting primarily of \$6 billion of corporate fixed maturities of which 90% were considered investment grade; \$7 billion of commercial mortgage loans with a weighted-average loan-to-value ratio of approximately 51% and weighted-average debt service coverage ratio of 2.43 times; and \$1 billion of real estate held through direct ownership and real estate-related LPs/LLCs.

In addition, we held approximately \$11 billion of commercial mortgage-backed securities, of which approximately 79% and 20% were rated AAA (supersenior) and AA, respectively, and comprised of diversified collateral pools. Approximately 30% of the collateral pools were comprised of retail-related investments, with no pools solely collateralized by retail-related investments. For additional information regarding commercial mortgage-backed securities, see "—Fixed Maturity Securities—Fixed Maturity Securities Credit Quality" below.

General Account Investments of PFI excluding Closed Block Division

In the following sections, we provide details about our investment portfolio, excluding investments held in the Closed Block division. We believe the details of the composition of our investment portfolio excluding the Closed Block division are most relevant to an understanding of our operations that are pertinent to investors in Prudential Financial, Inc. because substantially all Closed Block division assets support obligations and liabilities relating to the Closed Block policies only. See Note 15 to the Consolidated Financial Statements for further information on the Closed Block.

Fixed Maturity Securities

In the following sections, we provide details about our fixed maturity securities portfolio, which excludes fixed maturity securities classified as assets supporting experienced-rated contractholder liabilities and classified as trading.

Fixed Maturity Securities by Contractual Maturity Date

The following table sets forth the breakdown of the amortized cost of our fixed maturity securities portfolio by contractual maturity, as of the date indicated:

	December 3	31, 2019
	Amortized Cost	% of Total
	(\$ in mill	ions)
Corporate & government securities:		
Maturing in 2020	\$ 10,693	3.5%

Total(5)	\$ 309,577	\$ 42,819	\$	962	\$	351,434	\$	295,109	\$	27,138	\$	5,438	\$	316,809	

(1) Investment data has been classified based on standard industry categorizations for domestic public holdings and similar classifications by industry for all other holdings.

(4) As of both December 31, 2019 and 2018, based on amortized cost, more than 99% were rated A or higher.

The increase in net unrealized gains from December 31, 2018 to December 31, 2019 was primarily due to a decrease in U.S. and Japan interest rates and credit spread tightening.

Fixed Maturity Securities Credit Quality

The Securities Valuation Office ("SVO") of the National Association of Insurance Commissioners ("NAIC") evaluates the investments of insurers for statutory reporting purposes and assigns fixed maturity securities to one of six categories called "NAIC Designations." In general, NAIC Designations of "1" highest quality, or "2" high quality, include fixed maturities considered investment grade, which include securities rated Baa3 or higher by Moody's Investor Service, Inc. ("Moody's") or BBB- or higher by Standard & Poor's Rating Services ("S&P"). NAIC Designations of "3" through "6" generally include fixed maturities referred to as below investment grade, which include securities rated Ba1 or lower by Moody's and BB+ or lower by S&P. The NAIC Designations for commercial mortgage-backed securities and non-agency residential mortgage-backed securities, including our asset-backed securities collateralized by sub-prime mortgages, are based on security level expected losses as modeled by an independent third-party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized.

⁽²⁾ Includes \$369 million of gross unrealized gains, as of December 31, 2019, compared to \$359 million of gross unrealized gains and less than \$1 million of gross unrealized losses, as of December 31, 2018, on securities classified as held-to-maturity.

⁽³⁾ As of December 31, 2019 and 2018, based on amortized cost, 77% and 76%, respectively, represent Japanese government bonds held by our Japanese insurance operations with no other individual country representing more than 11% of the balance.

⁽⁵⁾ Excluded from the table above are securities held outside the general account in other entities and operations. For additional information regarding investments held outside the general account, see "—Invested Assets of Other Entities and Operations" below.

As a result of time lags between the funding of investments, the finalization of legal documents, and the completion of the SVO filing process, the fixed maturity portfolio includes certain securities that have not yet been designated by the SVO as of each balance sheet date. Pending receipt of SVO designations, the categorization of these securities by NAIC Designation is based on the expected ratings indicated by internal analysis.

Investments of our international insurance companies are not subject to NAIC guidelines. Investments of our Japanese insurance operations are regulated locally by the Financial Services Agency ("FSA"), an agency of the Japanese government. The FSA has its own investment quality criteria and risk control standards. Our Japanese insurance companies comply with the FSA's credit quality review and risk monitoring guidelines. The credit quality ratings of the investments of our Japanese insurance companies are based on ratings assigned by nationally recognized credit rating agencies, including Moody's and S&P, or rating equivalents based on ratings assigned by Japanese credit ratings agencies.

The following table sets forth our fixed maturity portfolio by NAIC Designation or equivalent rating attributable to PFI excluding the Closed Block division, as of the dates indicated:

		Decemb	er 31,	, 2019	December 31, 2018

- (1) Reflects equivalent ratings for investments of the international insurance operations.
- (2) Includes, as of December 31, 2019 and 2018, 796 securities with amortized cost of \$3,073 million (fair value, \$3,130 million) and 1,744 securities with amortized cost of \$9,079 million (fair value, \$9,135 million), respectively, that have been categorized based on expected NAIC Designations pending receipt of SVO ratings.
- (3) Includes \$369 million of gross unrealized gains, as of December 31, 2019, compared to \$359 million of gross unrealized gains and less than \$1 million of gross unrealized losses, as of December 31, 2018, on securities classified as held-to-maturity.
- (4) As of December 31, 2019, includes gross unrealized losses of \$188 million on public fixed maturities and \$103 million on private fixed maturities considered to be other than high or highest quality and, as of December 31, 2018, includes gross unrealized losses of \$591 million on public fixed maturities and \$280 million on private fixed maturities considered to be other than high or highest quality.
- (5) On an amortized cost basis, as of December 31, 2019, includes \$249,884 million of public fixed maturities and \$43,202 million of private fixed maturities and, as of December 31, 2018, includes \$238,824 million of public fixed maturities and \$39,234 million of private fixed maturities.
- (6) On an amortized cost basis, as of December 31, 2019, includes \$9,049 million of public fixed maturities and \$7,442 million of private fixed maturities and, as of December 31, 2018, includes \$10,588 million of public fixed maturities and \$6,463 million of private fixed maturities.
- (7) On an amortized cost basis, as of December 31, 2019, securities considered below investment grade based on lowest of external rating agency ratings total \$17,527 million, or approximately 6% of the total fixed maturities, and include securities considered high or highest quality by the NAIC based on the rules described above.

Asset-Backed and Commercial Mortgage-Backed Securities

The following table sets forth the amortized cost and fair value of asset-backed and commercial mortgage-backed securities within our fixed maturity available-for-sale portfolio attributable to PFI excluding the Closed Block division by credit quality, as of the dates indicated:

				Decembe	r 31,	2019			December 31, 2018

Assets Supporting Experience-Rated Contractholder Liabilities

For information regarding the composition of "Assets supporting experience-rated contractholder liabilities," see Note 3 to the Consolidated Financial Statements.

Commercial Mortgage and Other Loans

Investment Mix

The following table sets forth the composition of our commercial mortgage and other loans portfolio attributable to PFI excluding the Closed Block division, as of the dates indicated:

⁽²⁾ Includes collateralized loan obligations ("CLOs"), credit-tranched securities collateralized by auto loans, education loans, credit cards and other asset types.

⁽³⁾ As of December 31, 2019 and 2018, based on amortized cost, 97% and 96% were securities with vintages of 2013 or later, respectively.

⁽⁴⁾ Excludes fixed maturity securities classified as "Assets supporting experience-rated contractholder liabilities" and "Fixed maturities, trading" as well as securities held outside the general account in other entities and operations.

⁽²⁾ Excludes fixed maturity securities classified as "Assets supporting experience-rated contractholder liabilities" and "Fixed maturities, trading" as well as securities held outside the general account in other entities and operations.

	I	December 31, 2019	December 3	1, 2018		
		(in millions)				
Commercial mortgage and agricultural property loans	\$	53,928	\$	49,524		
Uncollateralized loans		656		658		
Residential property loans		124		158		
Other collateralized loans		65		17		
Total recorded investment gross of allowance(1)		54,773		50,357		
Allowance for credit losses		(102)		(106)		
Total net commercial mortgage and other loans(2)	\$	54,671	\$	50,251		

(1) As a percentage of recorded investment gross of allowance, more than 99% of these assets were current as of both December 31, 2019 and 2018.

We originate commercial mortgage and agricultural property loans using a dedicated sales and underwriting staff through our various regional offices in the U.S. and international offices primarily in London and Tokyo. All loans are underwritten consistently to our standards using a proprietary quality rating system that has been developed from our industry experience in real estate and mortgage lending.

Uncollateralized loans primarily represent corporate loans which do not meet the definition of a security under authoritative accounting guidance.

Residential property loans primarily include Japanese recourse loans. Upon default of these recourse loans, we can make a claim against the personal assets of the property owner, in addition to the mortgaged property. These loans are also backed by third-party guarantors.

Other collateralized loans include consumer loans.

Composition of Commercial Mortgage and Agricultural Property Loans

Our commercial mortgage and agricultural property loan portfolio strategy emphasizes diversification by property type and geographic location. The following tables set forth the breakdown of the gross carrying values of commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division by geographic region and property type, as of the dates indicated:

⁽²⁾ Excluded from the table above are commercial mortgage and other loans held outside the general account in other entities and operations. For additional information regarding commercial mortgage and other loans held outside the general account, see "—Invested Assets of Other Entities and Operations" below.

Total commercial mortgage and agricultural property loans	\$ 53,928	100.0%	\$ 49,524	100.0%	

Loan-to-value and debt service coverage ratios are measures commonly used to assess the quality of commercial mortgage and agricultural property loans. The loan-to-value ratio compares the amount of the loan to the fair value of the underlying property collateralizing the loan and is commonly expressed as a percentage. A loan-to-value ratio less than 100% indicates an excess of collateral value over the loan amount. Loan-to-value ratios greater than 100% indicate that the loan amount exceeds the collateral value. The debt service coverage ratio compares a property's net operating income to its debt service payments. Debt service coverage ratios less than 1.0 times indicate that property operations do not generate enough income to cover the loan's current debt payments. A debt service coverage ratio greater than 1.0 times indicates an excess of net operating income over the debt service payments.

As of December 31, 2019, our commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division had a weighted-average debt service coverage ratio of 2.46 times and a weighted-average loan-to-value ratio of 56%. As of December 31, 2019, 95% of commercial mortgage and agricultural property loans were fixed rate loans. For those commercial mortgage and agricultural property loans that were originated in 2019, the weighted-average debt service coverage ratio was 2.68 times, and the weighted-average loan-to-value ratio was 63%.

The values utilized in calculating these loan-to-value ratios are developed as part of our periodic review of the commercial mortgage and agricultural property loan portfolio, which includes an internal evaluation of the underlying collateral value. Our periodic review also includes a quality re-rating process, whereby we update the internal quality rating originally assigned at underwriting based on the proprietary quality rating system mentioned above. As discussed below, the internal quality rating is a key input in determining our allowance for credit losses.

For loans with collateral under construction, renovation or lease-up, a stabilized value and projected net operating income are used in the calculation of the loan-to-value and debt service coverage ratios. Our commercial mortgage and agricultural property loan portfolio included \$1.8 billion and approximately \$0.7 billion of such loans as of December 31, 2019 and 2018, respectively. All else being equal, these loans are inherently riskier than those collateralized by properties that have already stabilized. As of December 31, 2019, there were no loan-specific reserves related to these loans. In addition, these unstabilized loans are included in the calculation of our portfolio reserve, as discussed below.

The following table sets forth the gross carrying value of our commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division by loan-to-value and debt service coverage ratios, as of the date indicated:

Total commercial mortgage and other loans	\$	54,773	100.0%	

Commercial Mortgage and Other Loans Quality

The commercial mortgage and other loans portfolio is monitored on an ongoing basis. If certain criteria are met, loans are assigned to either of the following "watch list" categories:

- (1) "Closely Monitored," which includes a variety of considerations, such as when loan metrics fall below acceptable levels, the borrower is not cooperative or has requested a material modification, or the portfolio manager has directed a change in category; or
- (2) "Not in Good Standing," which includes loans in default or with a high probability of loss of principal, such as when the loan is in the process of foreclosure or the borrower is in bankruptcy.

Our workout and special servicing professionals manage the loans on the watch list.

We establish an allowance for credit losses to provide for the risk of credit losses inherent in the lending process. The allowance includes loan-specific reserves for loans that are determined to be impaired as a result of our loan review process and a portfolio reserve for probable incurred but not specifically identified losses for loans which are not on the watch list. We define an impaired loan as a loan for which we estimate it is probable that amounts due according to the contractual terms of the loan agreement will not be collected. The loan-specific portion of the allowance for credit losses is based on our assessment as to ultimate collectability of loan principal and interest. An allowance for credit losses for an impaired loan is recorded based on the present value of expected future cash flows discounted at the loan's effective interest rate, or based on the fair value of the collateral if the loan is collateral dependent. The portfolio reserve for incurred but not specifically identified losses considers the current credit composition of the portfolio based on the internal quality ratings mentioned above. The portfolio reserves are determined using past loan experience, including historical credit migration, loss probability and loss severity factors by property type. These factors are reviewed and updated as appropriate. The allowance for credit losses for commercial mortgage and other loans can increase or decrease from period to period based on these factors.

The following table sets forth the change in allowance for credit losses for our commercial mortgage and other loans portfolio, as of the dates indicated:

	Decer	nber 31, 2019	Γ	December 31, 2018			
		(in millions)					
Allowance, beginning of period	\$	106	\$	91			
Addition to (release of) allowance for credit losses		(4)		15			
Allowance, end of period	\$	102	\$	106			
Loan-specific reserve	\$	1	\$	11			
Portfolio reserve	\$	101	\$	95			

The allowance for credit losses as of December 31, 2019 decreased compared to December 31, 2018 primarily due to the payoff of a loan included in the loan-specific reserve.

Equity Securities

The equity securities attributable to PFI excluding the Closed Block division consist principally of investments in Common and Preferred Stock of publicly-traded companies, as well as mutual fund shares. The following table sets forth the composition of our equity securities portfolio and the associated gross unrealized gains and losses, as of the dates indicated:

	December 31, 2019								December 31, 2018							
	 Gross Unrealized Cost Gains			Gross Unrealized Fair Losses Value				Cost	Gross Unrealized Gains			Gross Unrealized Losses		Fair Value		
							(in m	illio	ıs)							
Mutual funds	\$ 817	\$	258	\$	1	\$	1,074	\$	769	\$	87	\$	13	\$	843	
Other Common Stocks	2,429		1,091		57		3,463		2,353		751		118		2,986	
Non-redeemable Preferred Stocks	51		3		5		49		24		0		4		20	
Total equity securities, at fair value(1)	\$ 3,297	\$	1,352	\$	63	\$	4,586	\$	3,146	\$	838	\$	135	\$	3,849	

⁽¹⁾ Amounts presented exclude investments in private equity and hedge funds and other investments which are reported in "Other invested assets."

The net change in unrealized gains (losses) from equity securities attributable to PFI excluding Closed Block division still held at period end, recorded within "Other income (loss)," was \$586 million and \$(569) million during the year ended December 31, 2019 and 2018, respectively.

Other Invested Assets

The following table sets forth the composition of "Other invested assets" attributable to PFI excluding the Closed Block division, as of the dates indicated:

	Dece	mber 31, 2019	De	cember 31, 2018
		(in m	illions)	
LPs/LLCs:				
Equity method:				
Private equity	\$	2,740	\$	2,318
Hedge funds		1,362		836
Real estate-related		792		544
Subtotal equity method		4,894		3,698
Fair value:				
Private equity		990		938
Hedge funds		1,233		1,256
Real estate-related		50		44
Subtotal fair value		2,273		2,238
Total LPs/LLCs		7,167		5,936
Real estate held through direct ownership(1)		1,350		1,777
Derivative instruments		73		42
Other(2)		620		652
Total other invested assets	\$	9,210	\$	8,407

⁽¹⁾ As of December 31, 2019 and 2018, real estate held through direct ownership had mortgage debt of \$537 million and \$776 million, respectively.

Invested Assets of Other Entities and Operations

"Invested Assets of Other Entities and Operations" presented below includes investments held outside the general account and primarily represents investments associated with our investment management operations and derivative operations. Our derivative operations act on behalf of affiliates primarily to manage interest rate, foreign currency, credit and equity exposures. Assets within our investment management operations that are managed for third parties and those assets classified as "Separate account assets" on our balance sheet are not included.

		December 31, 2019			December 31, 2018		
		(in millions)					
Fixed maturities:							
Public, available-for-sale, at fair value(1)	\$	S	587	\$	473		
Private, available-for-sale, at fair value			1		1		
Fixed maturities, trading, at fair value(1)			1,161		1,155		
Equity securities, at fair value			691		605		
Commercial mortgage and other loans, at book value(2)			259		797		
Other invested assets(1)			3,062		2,803		
Short-term investments			17		43		
Total investments	\$	5	5,778	\$	5,877		
	_			_			

⁽¹⁾ As of December 31, 2019 and 2018, balances include investments in CLOs with fair value of \$438 million and \$408 million, respectively.

⁽²⁾ Primarily includes leveraged leases and member and activity stock held in the Federal Home Loan Banks of New York and Boston. For additional information regarding our holdings in the Federal Home Loan Banks of New York and Boston, see Note 17 to the Consolidated Financial Statements.

⁽²⁾ Book value is generally based on unpaid principal balance, net of any allowance for credit losses, or at fair value, when the fair value option has been elected.

Fixed Maturities, Trading

"Fixed maturities, trading, at fair value" are primarily related to assets associated with consolidated variable interest entities ("VIEs") for which the Company is the investment manager. The assets of the consolidated VIEs are generally offset by liabilities for which the fair value option has been elected. For further information on these consolidated VIEs, see Note 4 to the Consolidated Financial Statements.

Commercial Mortgage and Other Loans

Our investment management operations include our commercial mortgage operations, which provide mortgage origination, investment management and servicing for our general account, institutional clients, the Federal Housing Administration and government-sponsored entities such as Fannie Mae and Freddie Mac.

The mortgage loans of our commercial mortgage operations are included in "Commercial mortgage and other loans." Derivatives and other hedging instruments related to our commercial mortgage operations are primarily included in "Other invested assets."

Other Invested Assets

"Other invested assets" primarily include assets of our derivative operations used to manage interest rate, foreign currency, credit and equity exposures.

Furthermore, other invested assets include strategic investments made as part of our investment management operations. We make these strategic investments in real estate, as well as fixed income, public equity and real estate securities, including controlling interests. Certain of these investments are made primarily for purposes of co-investment in our managed funds and structured products. Other strategic investments are made with the intention to sell or syndicate to investors, including our general account, or for placement in funds and structured products that we offer and manage (seed investments). As part of our investment management operations, we also make loans to our managed funds that are secured by equity commitments from investors or assets of the funds. "Other invested assets" also includes certain assets in consolidated investment funds where the Company is deemed to exercise control over the funds.

Liquidity and Capital Resources

Overview

Liquidity refers to the ability to generate sufficient cash resources to meet the payment obligations of the Company. Capital refers to the long-term financial resources available to support the operations of our businesses, fund business growth, and provide a cushion to withstand adverse circumstances. Our ability to generate and maintain sufficient liquidity and capital depends on the profitability of our businesses, general economic conditions and our access to the capital markets and the alternate sources of liquidity and capital described herein.

Effective and prudent liquidity and capital management is a priority across the organization. Management monitors the liquidity of Prudential Financial and its subsidiaries on a daily basis and projects borrowing and capital needs over a multi-year time horizon through our periodic planning process. We believe that capital and liquidity resources are sufficient to satisfy the capital and liquidity requirements of Prudential Financial and its subsidiaries, including under reasonably foreseeable stress scenarios. We use a Risk Appetite Framework ("RAF") to ensure that all risks taken across the Company align with our capacity and willingness to take those risks. The RAF provides a dynamic assessment of capital and liquidity stress impacts and is intended to ensure that sufficient resources are available to absorb those impacts under comprehensive stresses.

Our businesses are subject to comprehensive regulation and supervision by domestic and international regulators. These regulations currently include, or may include in the future requirements and limitations (many of which are the subject of ongoing rule-making) relating to capital, leverage, liquidity, stress-testing, overall risk management, credit exposure reporting and credit concentration. For information on these regulatory initiatives and their potential impact on us, see "Business—Regulation."

During 2019, we took the following significant actions that impacted our liquidity and capital position:

- We repurchased \$2.5 billion of shares of Prudential Financial's Common Stock in accordance with our 2019 share repurchase authorization and declared aggregate Common Stock dividends of \$1.6 billion;
- We issued \$2.5 billion of senior notes to be utilized for general corporate purposes, including refinancing portions of our senior notes maturing during 2019 and 2020, and to fund the acquisition of Assurance IQ;

- In October 2019, we completed the acquisition of Assurance IQ. See Note 1 to the Consolidated Financial Statements for additional information about the acquisition, including the purchase consideration;
- On September 30, 2019, we entered into a ¥100 billion five-year credit facility with a syndicate of lenders, with terms similar to the prior three-year syndicated credit facility expiring on that date. There were no borrowings under the facility as of December 31, 2019;
- In August 2019, we issued approximately 6.2 million shares of Prudential Financial's Common Stock to the holders of PICA's \$500 million of exchangeable surplus notes upon their exercise of the exchange option. The Company's obligations under the surplus notes are now satisfied; and
- In the second quarter of 2019, PGIM closed on a \$300 million limited-recourse credit facility that is secured by certain of PGIM's fund investments.

Capital

Our capital management framework is primarily based on statutory Risk-Based Capital ("RBC") and solvency margin measures. Due to our diverse mix of businesses and applicable regulatory requirements, we apply certain refinements to the framework that are designed to more appropriately reflect risks associated with our businesses on a consistent basis across the Company.

We believe Prudential Financial's capitalization and financial profile are consistent with its ratings targets. Our long-term senior debt rating targets for Prudential Financial are "A" for S&P, Moody's, and Fitch, and "a" for A.M. Best Company ("A.M. Best"). Our financial strength rating targets for our life insurance companies are "AA/Aa/AA" for S&P, Moody's and Fitch, respectively, and "A+" for A.M. Best. Some entities may currently be rated below these targets, and not all life insurance companies are rated by each of these rating agencies. See "—Ratings" below for a description of the potential impacts of ratings downgrades.

Capital Governance

Our capital management framework is ultimately reviewed and approved by our Board. The Board has authorized our Chairman and Chief Executive Officer and Vice Chair to approve certain capital actions on behalf of the Company and to further delegate authority with respect to capital actions to appropriate officers, up to specified limits. Any capital commitment that exceeds the authority granted to senior management must be separately authorized by the Board.

In addition, our Capital and Finance Committee ("CFC") reviews the use and allocation of capital above certain threshold amounts to promote the efficient use of capital, consistent with our strategic objectives, ratings aspirations and other goals and targets. This management committee provides a multi-disciplinary due diligence review of specific initiatives or transactions requiring the use of capital, including mergers and acquisitions. The CFC also reviews our annual capital plan (and updates to this plan), as well as our capital, liquidity and financial position, borrowing plans, and related matters prior to the discussion of these items with the Board.

Capitalization

The primary components of the Company's capitalization consist of equity and outstanding capital debt, including junior subordinated debt. As shown in the table below, as of December 31, 2019, the Company had \$53.7 billion in capital, all of which was available to support the aggregate capital requirements of its businesses and its Corporate and Other operations. Based on our assessment of these businesses and operations, we believe this level of capital is consistent with our ratings targets.

		1,				
		2019		2018		
		(in millions)				
Equity(1)	\$	39,076	\$	37,711		
Junior subordinated debt (including hybrid securities)		7,575		7,568		
Other capital debt		7,001		5,793		
Total capital	\$	53,652	\$	51,072		

⁽¹⁾ Amounts attributable to Prudential Financial, excluding AOCI.

Insurance Regulatory Capital

We manage PICA, The Prudential Life Insurance Company, Ltd. ("Prudential of Japan"), Gibraltar Life, and other significant insurance subsidiaries to regulatory capital levels consistent with our "AA" ratings targets. We utilize the RBC ratio as a primary

measure of the capital adequacy of our domestic insurance subsidiaries and the solvency margin ratio as a primary measure of the capital adequacy of our Japanese insurance subsidiaries.

RBC is calculated based on statutory financial statements and risk formulas consistent with the practices of the NAIC. RBC considers, among other things, risks related to the type and quality of the invested assets, insurance-related risks associated with an insurer's products and liabilities, interest rate risks and general business risks. RBC ratio calculations are intended to assist insurance regulators in measuring an insurer's solvency and ability to pay future claims. The reporting of RBC measures is not intended for the purpose of ranking any insurance company or for use in connection with any marketing, advertising or promotional activities, but is available to the public.

The table below presents the RBC ratios of our most significant domestic insurance subsidiaries as of December 31, 2018, the most recent statutory fiscal year-end for these subsidiaries for which RBC information has been filed.

	<u>Ratio</u>
PICA(1)	385%
Prudential Annuities Life Assurance Corporation ("PALAC")	511%
Composite Major U.S. Insurance Subsidiaries(2)	417%

- (1) Includes Prudential Retirement Insurance and Annuity Company ("PRIAC"), Pruco Life Insurance Company ("Pruco Life"), Pruco Life Insurance Company of New Jersey ("PLNJ"), which is a subsidiary of Pruco Life, and Prudential Legacy Insurance Company of New Jersey ("PLIC").
- (2) Includes PICA and its subsidiaries, as noted above, and PALAC. Composite RBC is not reported to regulators and is based on the summation of total adjusted capital and risk charges for the included companies as determined under statutory accounting and RBC guidance to calculate a composite numerator and denominator, respectively, for purposes of calculating the composite ratio.

Although not yet filed, we expect our RBC ratios as of December 31, 2019 to be above our "AA" financial strength target levels.

Similar to the RBC ratios that are employed by U.S. insurance regulators, regulatory authorities in the international jurisdictions in which we operate generally establish some form of minimum solvency margin requirements for insurance companies based on local statutory accounting practices. These solvency margins are a primary measure of the capital adequacy of our international insurance operations. Maintenance of our solvency margins at certain levels is also important to our competitive positioning, as in certain jurisdictions, such as Japan, these solvency margins are required to be disclosed to the public and therefore impact the public perception of an insurer's financial strength.

The table below presents the solvency margin ratios of our most significant international insurance subsidiaries as of September 30, 2019, the most recent date for which this information is available.

	Ratio
Prudential of Japan consolidated(1)	875%
Gibraltar Life consolidated(2)	885%

- (1) Includes Prudential Trust Co., Ltd., a subsidiary of Prudential of Japan.
- (2) Includes Prudential Gibraltar Financial Life Insurance Co., Ltd. ("PGFL"), a subsidiary of Gibraltar Life.

Although not yet filed, we expect the solvency margin ratio for each of these subsidiaries to be greater than 700% (3.5 times the regulatory required minimums) as of December 31, 2019.

All of our domestic and significant international insurance subsidiaries have capital levels that substantially exceed the minimum level required by applicable insurance regulations. Our regulatory capital levels may be affected in the future by changes to the applicable regulations, proposals for which are currently under consideration by both domestic and international insurance regulators. For further information on the calculation of RBC and solvency margin ratios, as well as regulatory minimums, see Note 19 to the Consolidated Financial Statements.

Risk Appetite Framework

We manage our capital consistent with our RAF to determine the amount of capital the Company needs to hold given its risk profile. The RAF is designed to ensure that all risks taken across the Company align with our capacity and willingness to take those risks. It allows for a cohesive assessment of risk and available resources and supports management's decision-making. The RAF is supported by our comprehensive stress testing framework to provide a dynamic assessment of stress impacts and the resources available to absorb those impacts under stress scenarios. It incorporates the objectives of what we previously referred to as our Capital Protection Framework.

Captive Reinsurance Companies

We use captive reinsurance companies to more effectively manage our reserves and capital on an economic basis and to enable the aggregation and transfer of risks. Our captive reinsurance companies assume business from affiliates only. To support the risks they assume, our captives are capitalized to a level we believe is consistent with the "AA" financial strength rating targets of our insurance subsidiaries. All of our captives are subject to internal policies governing their activities. In the normal course of business we contribute capital to the captives to support business growth and other needs. Prudential Financial has also entered into support agreements with several of the captives in connection with financing arrangements. For a description of captive reinsurance company financing activities, see below under "—Financing Activities—Subsidiary Borrowings—Term and Universal Life Reserve Financing."

Shareholder Distributions

Share Repurchase Program and Shareholder Dividends

In December 2018, our Board of Directors (the "Board") authorized the Company to repurchase at management's discretion up to \$2.0 billion of its outstanding Common Stock during the period from January 1, 2019 through December 31, 2019. In September 2019, the Board authorized a \$500 million increase to the authorization for calendar year 2019. As a result, the Company's aggregate share repurchase authorization for calendar year 2019 was \$2.5 billion. In December 2019, the Board authorized the Company to repurchase at management's discretion up to \$2.0 billion of its outstanding Common Stock during the period from January 1, 2020 through December 31, 2020.

The timing and amount of share repurchases are determined by management based on market conditions and other considerations, including any increased capital needs of our businesses due to, among other things, changes in regulatory capital requirements and opportunities for growth and acquisitions. Repurchases may be executed in the open market, through derivative, accelerated repurchase and other negotiated transactions and through plans designed to comply with Rule 10b5-1(c) under the Securities Exchange Act of 1934.

The following table sets forth information about declarations of Common Stock dividends, as well as repurchases of shares of Prudential Financial's Common Stock, for each of the quarterly periods in 2019 and for the prior four years.

		Dividend Amount						
Quarterly period ended:		Per Share		ggregate	Shares		otal Cost	
		(in millions, except per share data)						
December 31, 2019	\$	1.00	\$	406	5.4	\$	500	
September 30, 2019	\$	1.00	\$	412	11.4	\$	1,000	
June 30, 2019	\$	1.00	\$	411	5.0	\$	500	
March 31, 2019	\$	1.00	\$	415	5.4	\$	500	

	Dividend Amount						
Year ended:	Pe	r Share	A	ggregate	Shares	T	otal Cost
			(in m	illions, except	per share data)		
December 31, 2019	\$	4.00	\$	1,644	27.2	\$	2,500
December 31, 2018	\$	3.60	\$	1,525	14.9	\$	1,500
December 31, 2017	\$	3.00	\$	1,300	11.5	\$	1,250
December 31, 2016	\$	2.80	\$	1,245	25.1	\$	2,000
December 31, 2015	\$	2.44	\$	1,115	12.1	\$	1,000

In addition, on February 4, 2020, Prudential Financial's Board of Directors declared a cash dividend of \$1.10 per share of Common Stock, payable on March 12, 2020 to shareholders of record as of February 18, 2020.

Liquidity

The principles of our liquidity management framework are described in an enterprise-wide policy that is reviewed and approved by the Board. Liquidity management and stress testing are performed on a legal entity basis as the ability to transfer funds between subsidiaries is limited due in part to regulatory restrictions. Liquidity needs are determined through daily and quarterly cash flow forecasting at the holding company and within our operating subsidiaries. We seek to maintain a minimum balance of highly liquid assets to ensure that adequate liquidity is available at Prudential Financial to cover fixed expenses in the event that we experience reduced cash flows from our operating subsidiaries at a time when access to capital markets is also not available.

We seek to mitigate the risk of having limited or no access to financing due to stressed market conditions by generally pre-funding debt in advance of maturity. We mitigate the refinancing risk associated with our debt that is used to fund operating needs by matching the term of debt with the assets financed. To ensure adequate liquidity in stress scenarios, stress testing is performed for our major operating subsidiaries. We seek to further mitigate liquidity risk by maintaining our access to alternative sources of liquidity, as discussed below.

Liquidity of Prudential Financial

The principal sources of funds available to Prudential Financial, the parent holding company, are dividends, returns of capital and loans from subsidiaries, and proceeds from debt issuances and certain stock-based compensation activity. These sources of funds may be supplemented by Prudential Financial's access to the capital markets as well as the "—Alternative Sources of Liquidity" described below.

The primary uses of funds at Prudential Financial include servicing debt, making capital contributions and loans to subsidiaries, making acquisitions, paying declared shareholder dividends and repurchasing outstanding shares of Common Stock executed under authority from the Board.

As of December 31, 2019, Prudential Financial had highly liquid assets with a carrying value totaling \$5,104 million, a decrease of \$1,095 million from December 31, 2018. Highly liquid assets predominantly include cash, short-term investments, U.S. Treasury securities, obligations of other U.S. government authorities and agencies, and/or foreign government bonds. We maintain an intercompany liquidity account that is designed to optimize the use of cash by facilitating the lending and borrowing of funds between Prudential Financial and its subsidiaries on a daily basis. Excluding net borrowings from this intercompany liquidity account, Prudential Financial had highly liquid assets of \$4,061 million as of December 31, 2019, a decrease of \$1,487 million from December 31, 2018.

The following table sets forth Prudential Financial's principal sources and uses of highly liquid assets, excluding net borrowings from our intercompany liquidity account, for the periods indicated.

Sources and Uses of Holding Company Highly Liquid Assets	 Year Ended	Decem	ber 31,
	 2019		2018
	(in m	illions)
Highly Liquid Assets, beginning of period	\$ 5,548	\$	4,376
Dividends and/or returns of capital from subsidiaries(1)	3,282		4,058

Total Other Activity	(445)		544
Net increase (decrease) in highly liquid assets	 (1,487)		1,172
Highly Liquid Assets, end of period	\$ 4,061	\$	5,548

(1) See "Item 15—Schedule II—Notes to Condensed Financial Information of Registrant—Dividends and Returns of Capital" for dividends and returns of capital by subsidiary.

(2) Affiliated loans/(borrowings) - (capital activities) represent the investment and deployment of capital to and from our businesses in the form of loans. 2019 includes net receipts of \$818 million from international insurance subsidiaries. 2018 includes lending of \$623 million to international subsidiaries.

(3) 2019 includes capital contributions of \$200 million to PICA, \$180 million to international insurance subsidiaries, \$73 million to PGIM, and \$68 million to Assurance IQ. 2018 includes capital contributions of \$590 million to PICA and \$284 million to international insurance subsidiaries.

(4) Includes cash payments made on dividends declared in prior periods.

(5) Includes \$1,758 million of purchase consideration and \$73 million related to compensation expense which is recognized over the requisite service periods. See Note 1 to the Consolidated Financial Statements for additional information.

(6) Affiliated (borrowings)/loans - (operating activities) represent loans to and from affiliated subsidiaries to support business operating needs.

Dividends and Returns of Capital from Subsidiaries

Domestic insurance subsidiaries. During 2019, Prudential Financial received returns of capital of \$978 million from PALAC, dividends of \$600 million from PICA and \$163 million from Prudential Annuities Holding Company.

International insurance subsidiaries. During 2019, Prudential Financial received dividends of \$1,065 million from its international insurance subsidiaries. In addition to paying Common Stock dividends, our international insurance operations may return capital to Prudential Financial through or facilitated by other means, such as the repayment of preferred stock obligations held by Prudential Financial or other affiliates, affiliated lending, affiliated derivatives and reinsurance with U.S.- and Bermuda-based affiliates. In 2019, our Japan insurance operations entered into reinsurance agreements with Gibraltar Re, our Bermuda-based reinsurance affiliate, to reinsure the mortality and morbidity risk associated with a portion of the in-force contracts as well as newly-issued contracts for certain products. We expect these transactions will allow us to more efficiently manage our capital and risk profile.

Other subsidiaries. During 2019, Prudential Financial received dividends and returns of capital of \$462 million from PGIM subsidiaries and dividends of \$14 million from other subsidiaries.

Restriction on dividends and returns of capital from subsidiaries. Our insurance companies are subject to limitations on the payment of dividends and other transfers of funds to Prudential Financial and other affiliates under applicable insurance law and regulation. Also, more generally, the payment of dividends by any of our subsidiaries is subject to declaration by their Board of Directors and can be affected by market conditions and other factors.

With respect to our domestic insurance subsidiaries, PICA is permitted to pay ordinary dividends based on calculations specified under New Jersey insurance law, subject to prior notification to the New Jersey Department of Banking and Insurance ("NJDOBI"). Any distributions above this amount in any twelve-month period are considered to be "extraordinary" dividends, and the approval of the NJDOBI is required prior to payment. The laws regulating dividends of the states where our other domestic insurance companies are domiciled are similar, but not identical, to New Jersey's.

Capital redeployment from our international insurance subsidiaries is subject to local regulatory requirements in the international jurisdictions in which they operate. Our most significant international insurance subsidiaries, Prudential of Japan and Gibraltar Life, are permitted to pay common stock dividends based on calculations specified by Japanese insurance law, subject to prior notification to the FSA. Dividends in excess of these amounts and other forms of capital distribution require the prior approval of the FSA. The regulatory fiscal year end for both Prudential of Japan and Gibraltar Life is March 31, 2020, after which time the common stock dividend amount permitted to be paid without prior approval from the FSA can be determined.

The ability of our PGIM subsidiaries and the majority of our other operating subsidiaries to pay dividends is largely unrestricted from a regulatory standpoint.

See Note 19 to the Consolidated Financial Statements for details on specific dividend restrictions.

Liquidity of Insurance Subsidiaries

We manage the liquidity of our insurance operations to ensure stable, reliable and cost-effective sources of cash flows to meet all of our obligations. Liquidity within each of our insurance subsidiaries is provided by a variety of sources, including portfolios of liquid assets. The investment portfolios of our subsidiaries are integral to the overall liquidity of our insurance operations. We segment our investment portfolios and employ an asset/liability management approach specific to the requirements of each of our product lines. This enhances the discipline applied in managing the liquidity, as well as the interest rate and credit risk profiles, of each portfolio in a manner consistent with the unique characteristics of the product liabilities.

Liquidity is measured against internally-developed benchmarks that take into account the characteristics of both the asset portfolio and the liabilities that they support. We consider attributes of the various categories of liquid assets (for example, type of asset and credit quality) in calculating internal liquidity measures to evaluate our insurance operations' liquidity under various stress scenarios, including company-specific and market-wide events. We continue to believe that cash generated by ongoing operations and the liquidity profile of our assets provide sufficient liquidity under reasonably foreseeable stress scenarios for each of our insurance subsidiaries.

Cash Flow

The principal sources of liquidity for our insurance subsidiaries are premiums, investment and fee income, investment maturities, sales of investments, and sales associated with our insurance and annuity operations, as well as internal and external borrowings. The principal uses of that liquidity include benefits, claims and dividends paid to policyholders, and payments to policyholders and contractholders in connection with surrenders, withdrawals and net policy loan activity. Other uses of liquidity may include commissions, general and administrative expenses, purchases of investments, the payment of dividends to the parent holding company, hedging and reinsurance activity and payments in connection with financing activities.

In each of our major insurance subsidiaries, we believe that the cash flows from operations are adequate to satisfy current liquidity requirements. The continued adequacy of this liquidity will depend upon factors such as future securities market conditions, changes in interest rate levels, policyholder perceptions of our financial strength, policyholder behavior, catastrophic events and the relative safety and attractiveness of competing products, each of which could lead to reduced cash inflows or increased cash outflows. Our insurance operations' cash flows from investment activities result from repayments of principal, proceeds from maturities and sales of invested assets and investment income, net of amounts reinvested. The primary liquidity risks with respect to these cash flows are the risk of default by debtors or bond insurers, our counterparties' willingness to extend repurchase and/or securities lending arrangements, commitments to invest and market volatility. We closely manage these risks through our credit risk management process and regular monitoring of our liquidity position.

Domestic insurance operations. In managing the liquidity of our domestic insurance operations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions when selecting assets to support these contractual obligations. We use surrender charges and other contract provisions to mitigate the extent, timing and profitability impact of withdrawals of funds by customers. The following table sets forth the liabilities for future policy benefits and policyholders' account balances of certain of our domestic insurance subsidiaries as of the dates indicated.

		Decem	ber	31,
	_	2019	_	2018
		(in bi	llion	ıs)
PICA	\$	216.7	\$	207.0
PLIC		51.8		52.6
Pruco Life		48.1		41.5
PRIAC		26.1		25.8
PALAC		19.1		14.7
Other(1)		(96.0)		(91.0)
Total future policy benefits and policyholders' account balances(2)	\$	265.8	\$	250.6

(1) Includes the impact of intercompany eliminations.

(2) Amounts are reflected gross of affiliated reinsurance recoverables.

The liabilities presented above are primarily supported by invested assets in our general account. As noted above, when selecting assets to support these contractual obligations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions. As a result, assets will include both liquid assets, as discussed below, and other assets that we believe adequately support our liabilities.

For PICA and other subsidiaries, the liabilities presented above primarily include annuity reserves and deposit liabilities and individual life insurance policy reserves. Individual life insurance policies may impose surrender charges and policyholders may be subject to a new underwriting process in order to obtain a new insurance policy. PICA's reserves for group annuity contracts primarily relate to pension risk transfer contracts, which are generally not subject to early withdrawal. For our individual annuity contracts, to encourage persistency, most of our variable and fixed annuities have surrender or withdrawal charges for a specified number of years. In addition, certain fixed annuities impose a market value adjustment if the invested amount is not held to maturity. The living benefit features of our variable annuities also encourage persistency because the potential value of the living benefit is fully realized only if the contract persists.

For PRIAC, the liabilities presented above primarily include reserves for stable value contracts. Although many of these contracts are subject to discretionary withdrawal, withdrawals are typically at the market value of the underlying assets. Risk is further reduced by the high persistency of clients driven in part by our competitive position in our target markets and contractual provisions such as deferred payouts.

Gross account withdrawals for our domestic insurance operations' products in 2019 were generally consistent with our assumptions in asset/liability management, and the associated cash outflows did not have a material adverse impact on our overall liquidity.

International insurance operations. As with our domestic operations, in managing the liquidity of our international insurance operations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions in selecting assets to support these contractual obligations. The following table sets forth the liabilities for future policy benefits and policyholders' account balances of certain of our international insurance subsidiaries as of the dates indicated.

		Decen	nber 3	31,
	<u> </u>	2019		2018
		(in b	illions	s)
Prudential of Japan(1)	\$	56.4	\$	51.6
Gibraltar Life(2)		108.0		104.3
All other international insurance subsidiaries(3)		15.4		17.7
Total future policy benefits and policyholders' account balances(4)	\$	179.8	\$	173.6

- (1) As of December 31, 2019 and 2018, \$15.7 billion and \$13.4 billion, respectively, of the insurance-related liabilities for Prudential of Japan are associated with U.S. dollar-denominated products that are coinsured to our domestic insurance operations and supported by U.S. dollar-denominated assets. As of December 31, 2019, \$0.7 billion of the insurance-related liabilities for Prudential of Japan are primarily associated with yen-denominated products that are coinsured to Gibraltar Re, our Bermuda-based reinsurance affiliate, and primarily supported by yen-denominated assets.
- (2) Includes PGFL. As of December 31, 2019 and 2018, \$5.5 billion and \$4.3 billion, respectively, of the insurance-related liabilities for PGFL are associated with U.S. dollar-denominated products that are coinsured to our domestic insurance operations and supported by U.S. dollar-denominated assets. As of December 31, 2019, \$2.0 billion of the insurance-related liabilities for Gibraltar Life are primarily associated with yen-denominated products that are coinsured to Gibraltar Re, our Bermuda-based reinsurance affiliate, and primarily supported by yen-denominated assets.
- (3) Represents our international insurance operations, excluding Japan.
- (4) Amounts are reflected gross of affiliated reinsurance recoverables.

The liabilities presented above are primarily supported by invested assets in our general account. When selecting assets to support these contractual obligations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions. As a result, assets will include both liquid assets, as discussed below, and other assets that we believe adequately support our liabilities.

We believe most of the longer-term recurring pay individual life insurance policies sold by our Japanese operations do not have significant withdrawal risk because policyholders may incur surrender charges and must undergo a new underwriting process to obtain a new insurance policy.

Gibraltar Life sells fixed annuities, denominated in U.S. and Australian dollars, that may be subject to increased surrenders should the yen depreciate in relation to these currencies or if interest rates in Australia and the U.S. decline relative to Japan. A significant portion of the liabilities associated with these contracts include a market value adjustment feature, which mitigates the profitability impact from surrenders. As of December 31, 2019, products with a market value adjustment feature represented \$26.1 billion of our Japan operations' insurance-related liabilities, which included \$22.7 billion attributable to non-yen denominated fixed annuities.

Liquid Assets

Liquid assets include cash and cash equivalents, short-term investments, U.S. Treasury securities, fixed maturities that are not designated as held-to-maturity and public equity securities. In addition to access to substantial investment portfolios, our insurance companies' liquidity is managed through access to a variety of instruments available for funding and/or managing cash flow mismatches, including from time to time those arising from claim levels in excess of projections. Our ability to utilize assets and liquidity between our subsidiaries is limited by regulatory and other constraints. We believe that ongoing operations and the liquidity profile of our assets provide sufficient liquidity under reasonably foreseeable stress scenarios for each of our insurance subsidiaries.

The following table sets forth the fair value of certain of our domestic insurance operations' portfolio of liquid assets, as of the dates indicated.

					Decembe	r 31	, 2019								
	Prudential Insurance		PLIC				PRIAC		PALAC	I	Pruco Life		Total		ember 31, 2018

Public equity securities		2.1		1.8		0.8		4.7		4.0
Total	\$	47.2	\$	100.2	\$	24.9	\$	172.3	\$	163.4

- (1) Includes PGFL.
- (2) Represents our international insurance operations, excluding Japan.
- (3) Excludes fixed maturities designated as held-to-maturity. Credit quality is based on NAIC or equivalent rating.
- (4) As of December 31, 2019, \$122.2 billion, or 78%, were invested in government or government agency bonds.

Given the size and liquidity profile of our investment portfolios, we believe that claim experience, including policyholder withdrawals and surrenders, varying from our projections does not constitute a significant liquidity risk. Our asset/liability management process takes into account the expected maturity of investments and expected claim payments as well as the specific nature and risk profile of the liabilities. To the extent we need to pay claims in excess of projections, we may borrow temporarily or sell investments sooner than anticipated to pay these claims, which may result in increased borrowing costs or realized investment gains or losses, including from changes in interest rates or credit spreads. The payment of claims and sale of investments earlier than anticipated would have an impact on the reported level of cash flow from operating, investing, and financing activities, in our financial statements. Historically, there has been no significant variation between the expected maturities of our investments and the payment of claims.

Liquidity associated with other activities

Hedging activities associated with Individual Annuities

For the portion of our Individual Annuities' ALM strategy executed through hedging, as well as the capital hedge program, we enter into a range of exchange-traded, cleared and other OTC equity and interest rate derivatives in order to hedge certain capital market risks related to more severe market conditions. For a full discussion of our Individual Annuities' risk management strategy, see "—Results of Operations by Segment—U.S. Businesses—U.S. Individual Solutions Division—Individual Annuities." This portion of our Individual Annuities' ALM strategy and capital hedge program requires access to liquidity to meet payment obligations relating to these derivatives, such as payments for periodic settlements, purchases, maturities and terminations. These liquidity needs can vary materially due to, among other items, changes in interest rates, equity markets, mortality and policyholder behavior.

The hedging portion of our Individual Annuities' ALM strategy and capital hedge program may also result in derivative related collateral postings to (when we are in a net pay position) or from (when we are in a net receive position) counterparties. The net collateral position depends on changes in interest rates and equity markets related to the amount of the exposures hedged. Depending on market conditions, the collateral posting requirements can result in material liquidity needs when we are in a net pay position. As of December 31, 2019, the derivatives comprising the hedging portion of our ALM strategy and capital hedge program were in a net receive position of \$4.7 billion compared to a net receive position of \$2.9 billion as of December 31, 2018. The change in collateral position was driven by a net positive impact from declining interest rates, partially offset by rising equity markets.

Foreign exchange hedging activities

We employ various hedging strategies to manage potential exposure to foreign currency exchange rate movements, particularly those associated with the yen. Our overall yen hedging strategy calibrates the hedge level to preserve the relative contribution of our yen-based business to the Company's overall return on equity on a leverage neutral basis. The hedging strategy includes two primary components:

Income Hedges—We hedge a portion of our prospective yen-based earnings streams by entering into external forward currency derivative contracts that effectively fix the currency exchange rates for that portion of earnings, thereby reducing volatility from foreign currency exchange rate movements. As of December 31, 2019, we have hedged 100%, 72% and 28% of expected yen-based earnings for 2020, 2021 and 2022, respectively.

Equity Hedges—We hold both internal and external hedges primarily to hedge our USD-equivalent equity. These hedges also mitigate volatility in the solvency margins of yen-based subsidiaries resulting from changes in the market value of their USD-denominated investments hedging our USD-equivalent equity attributable to changes in the yen-USD exchange rate.

For additional information on our hedging strategy, see "—Results of Operations—Impact of Foreign Currency Exchange Rates."

Cash settlements from these hedging activities result in cash flows between subsidiaries of Prudential Financial and either international-based subsidiaries or external parties. The cash flows are dependent on changes in foreign currency exchange rates and the notional amount of the exposures hedged. For example, a significant yen depreciation over an extended period of time could result in net cash inflows, while a significant yen appreciation could result in net cash outflows. The following tables set forth information about net cash settlements and the net asset or liability resulting from these hedging activities related to the yen and other currencies for the periods indicated.

	Year en	led December 31,

Total Assets (Liabilities)	\$	609	\$	581	

- (1) Includes non-yen related cash settlements of \$41 million, primarily denominated in Australian dollar, Korean won, and Brazilian real and \$(11) million, primarily denominated in Korean won, for the year ended December 31, 2019 and 2018, respectively.
- (2) Represents internal transactions between international-based and U.S.-based entities. Amounts noted are from the U.S.-based entities' perspectives.
- (3) Includes Korean won related cash settlements of \$17 million and \$2 million for the year ended December 31, 2019 and 2018, respectively.
- (4) Includes non-yen related assets of \$37 million, primarily denominated in Korean won, Australian dollar and Chilean peso, and assets of \$44 million primarily, denominated in Australian dollar and Brazilian real, as of December 31, 2019 and 2018, respectively.
- (5) Includes Korean won related assets of \$1 million and liabilities of \$(2) million as of December 31, 2019 and 2018, respectively.
- (6) As of December 31, 2019, approximately \$331 million, \$332 million and \$(115) million of the net market values are scheduled to settle in 2020, 2021 and thereafter, respectively. The net market value of the assets (liabilities) will vary with changing market conditions to the extent there are no corresponding offsetting positions.

PGIM operations

The principal sources of liquidity for our fee-based PGIM businesses include asset management fees and commercial mortgage origination and servicing fees. The principal uses of liquidity include general and administrative expenses, facilitating our commercial mortgage loan business, and distributions of dividends and returns of capital to Prudential Financial. The primary liquidity risks for our fee-based PGIM businesses relate to their profitability, which is impacted by market conditions and our investment management performance. We believe the cash flows from our fee-based PGIM businesses are adequate to satisfy the current liquidity requirements of these operations, as well as requirements that could arise under reasonably foreseeable stress scenarios, which are monitored through the use of internal measures.

The principal sources of liquidity for our strategic investments held in our PGIM businesses are cash flows from investments, the ability to liquidate investments, borrowing lines from internal sources, including Prudential Financial and Prudential Funding, LLC ("Prudential Funding"), a wholly-owned subsidiary of PICA, and external sources, including PGIM's limited-recourse credit facility. The principal use of liquidity for our strategic investments includes making investments to support business growth and paying interest expense from the internal and external borrowings used to fund those investments. The primary liquidity risks

include the inability to sell assets in a timely manner, declines in the value of assets and credit defaults. There have been no material changes to the liquidity position of our PGIM operations since December 31, 2019.

Alternative Sources of Liquidity

In addition to asset-based financing as discussed below, Prudential Financial and certain subsidiaries have access to other sources of liquidity, including syndicated, unsecured committed credit facilities, membership in the Federal Home Loan Banks, commercial paper programs, and a put option agreement. See Note 17 to the Consolidated Financial Statements for more information on these sources of liquidity.

Asset-based Financing

We conduct asset-based or secured financing within our insurance and other subsidiaries, including transactions such as securities lending, repurchase agreements and mortgage dollar rolls, to earn spread income, to borrow funds, or to facilitate trading activity. These programs are primarily driven by portfolio holdings of securities that are lendable based on counterparty demand for these securities in the marketplace. The collateral received in connection with these programs is primarily used to purchase securities in the short-term spread portfolios of our insurance entities. Investments held in the short-term spread portfolios include cash and cash equivalents, short-term investments (primarily corporate bonds), mortgage loans and fixed maturities (primarily collateralized loan obligations and other structured securities), with a weighted average life at time of purchase by the short-term portfolios of four years or less. Floating rate assets comprise the majority of our short-term spread portfolio. These short-term portfolios are subject to specific investment policy statements, which among other things, do not allow for significant asset/liability interest rate duration mismatch.

The following table sets forth our liabilities under asset-based or secured financing programs as of the dates indicated.

	December 31, 2019					December 31, 2018						
	PFI Excluding Closed Block Division		Closed Block Division		Consolidated		PFI Excluding Closed Block Division		Closed Block Division		Ca	onsolidated
						(\$ in r	nillion	s)				
Securities sold under agreements to repurchase	\$	6,834	\$	2,847	\$	9,681	\$	6,982	\$	2,968	\$	9,950

collateral(2)	\$	10,062	\$	3,833	\$	13,895	\$	9,875	\$	3,834	\$	13,709
Weighted average maturity, in days(2)(3)		N/A		N/A				10		N/A		

⁽¹⁾ The daily weighted average outstanding balance for the year ended December 31, 2019 and 2018 was \$10,524 million and \$9,653 million, respectively, for PFI excluding the Closed Block division, and \$4,152 million and \$4,343 million, respectively, for the Closed Block division.

As of December 31, 2019, our domestic insurance entities had assets eligible for the asset-based or secured financing programs of \$123.0 billion, of which \$13.9 billion were on loan. Taking into account market conditions and outstanding loan balances as of December 31, 2019, we believe approximately \$17.4 billion of the remaining eligible assets are readily lendable, including approximately \$12.4 billion relating to PFI excluding the Closed Block division, of which \$4.0 billion relates to certain separate accounts and may only be used for financing activities related to those accounts, and the remaining \$4.9 billion relating to the Closed Block division.

Financing Activities

As of December 31, 2019, total short-term and long-term debt of the Company on a consolidated basis was \$20.6 billion, an increase of \$0.8 billion from December 31, 2018. The following table sets forth total consolidated borrowings of the Company as of the dates indicated. We may, from time to time, seek to redeem or repurchase our outstanding debt securities through open market purchases, individually negotiated transactions or otherwise. Any such actions will depend on prevailing market conditions, our liquidity position and other factors.

⁽²⁾ Prior period amounts have been updated to conform to current period presentation.

⁽³⁾ Excludes securities that may be returned to the Company overnight. "N/A" reflects that all outstanding balances may be returned to the Company overnight.

Total borrowings	\$ 18,634	\$ 1,945	\$ 20,579	\$ 17,256	\$ 2,573	\$ 19,829			

⁽¹⁾ Amounts are net of assets under set-off arrangements of \$9,749 million and \$9,095 million as of December 31, 2019 and 2018, respectively.

As of December 31, 2019 and 2018, we were in compliance with all debt covenants related to the borrowings in the table above. For further information on our short- and long-term debt obligations, see Note 17 to the Consolidated Financial Statements.

Based on the use of proceeds, we classify our borrowings as capital debt and operating debt. Capital debt, which is debt utilized to meet the capital requirements of our businesses, was \$14.6 billion and \$13.4 billion as of December 31, 2019 and 2018, respectively. Operating debt of \$5.2 billion as of December 31, 2019 and 2018, respectively, consists of debt issued to finance specific investment assets or portfolios of investment assets, the proceeds from which will service the debt. Specifically, this includes institutional spread lending investment portfolios, assets supporting reserve requirements under Regulation XXX and Guideline AXXX as described below, as well as funding for institutional and insurance company portfolio cash flow timing differences. Operating debt is also utilized for business funding to meet specific purposes, which may include funding new business acquisition costs associated with our individual annuities business, operating needs associated with hedging our individual annuities products as discussed above and activities associated with our PGIM business.

Prudential Financial Borrowings

Long-term borrowings are conducted primarily by Prudential Financial. It borrows these funds to meet its capital and other funding needs, as well as the capital and funding needs of its subsidiaries. Prudential Financial maintains a shelf registration statement with the SEC that permits the issuance of public debt, equity and hybrid securities. As a "Well-Known Seasoned Issuer" under SEC rules, Prudential Financial's shelf registration statement provides for automatic effectiveness upon filing and has no stated issuance capacity.

Prudential Financial's borrowings increased \$1.38 billion from December 31, 2018, primarily driven by the issuance, net of related costs, of \$2.47 billion of senior debt and a \$10 million increase in commercial paper outstanding, partially offset by debt maturities of \$1.1 billion. For more information on long-term debt, see Note 17 to the Consolidated Financial Statements.

Subsidiary Borrowings

Subsidiary borrowings principally consist of commercial paper borrowings by Prudential Funding, asset-based financing and real estate investment financing. Borrowings of our subsidiaries decreased \$628 million from December 31, 2018 due to \$499

⁽²⁾ Limited and non-recourse borrowing primarily represents mortgage debt of our subsidiaries that has recourse only to real estate investment property of \$537 million and \$776 million as of December 31, 2019 and 2018, respectively, and a draw on a credit facility with recourse only to collateral pledged by the Company of \$300 million and \$0 as of December 31, 2019 and 2018, respectively.

million in debt maturities, a \$239 million decrease in mortgage debt, and a \$203 million decrease in commercial paper outstanding, primarily offset by a \$300 million draw on a credit facility and a \$13 million increase in short-term debt.

Term and Universal Life Reserve Financing

For business written prior to the implementation of principle-based reserving, Regulation XXX and Guideline AXXX require domestic life insurers to establish statutory reserves for term and universal life insurance policies with long-term premium guarantees that are consistent with the statutory reserves required for other individual life policies with similar guarantees. Many market participants believe that these levels of reserves are excessive relative to the levels reasonably required to maintain solvency for moderately adverse experience. The difference between the statutory reserve and the amount necessary to maintain solvency for moderately adverse experience is considered to be the non-economic portion of the statutory reserve.

We use captive reinsurance subsidiaries to finance the portion of the statutory reserves required to be held by our domestic life insurance companies under Regulation XXX and Guideline AXXX that we consider to be non-economic. The financing arrangements involve the reinsurance of term and universal life business to our captive reinsurers and the issuance of surplus notes by those captives that are treated as capital for statutory purposes. These surplus notes are subordinated to policyholder obligations, and the payment of principal and interest on the surplus notes can only be made with prior insurance regulatory approval.

We have entered into agreements with external counterparties providing for the issuance of surplus notes by our captive reinsurers in return for the receipt of credit-linked notes ("Credit-Linked Note Structures"). As of December 31, 2019, we had Credit-Linked Note Structures with an aggregate issuance capacity of \$13,700 million, of which \$12,009 million was outstanding, as compared to an aggregate issuance capacity of \$13,750 million, of which \$11,445 million was outstanding, as of December 31, 2018. Under the agreements, the captive receives in exchange for the surplus notes one or more credit-linked notes issued by a special-purpose affiliate of the Company with an aggregate principal amount equal to the surplus notes outstanding. The captive holds the credit-linked notes as assets supporting Regulation XXX or Guideline AXXX non-economic reserves, as applicable. The captive can redeem the principal amount of the outstanding credit-linked notes for cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event affecting the captive. Under the agreements, the external counterparties have agreed to fund any such payments under the credit-linked notes in return for the receipt of fees. Under certain of the transactions, Prudential Financial has agreed to make capital contributions to the captive to reimburse it for investment losses in excess of specified amounts and/or has agreed to reimburse the external counterparties for any payments made under the credit-linked notes. To date, no such payments under the credit-linked notes have been required. Under these transactions, because valid rights of set-off exist, interest and principal payments on the surplus notes and on the credit-linked notes are settled on a net basis, and the surplus notes are reflected in the Company's total consolidated borrowings on a net basis.

The following table summarizes our Credit-Linked Note Structures, which are reported on a net basis, as of December 31, 2019.

	Surplus No						
Credit-Linked Note Structures:	Original Issue Dates	Maturity Dates				 Facility Size	
		(\$ in 1	millio	ons)			
XXX	2011-2014	2021-2024	\$	1,750 (1)	\$ 1,750	
AXXX	2013	2033		3,248		3,500	
XXX	2014-2018	2021-2034		2,360 (2)	2,450	
XXX	2014-2017	2024-2037		2,265		2,400

Total Credit-Linked Note Structures			\$	12,009		\$ 13,700	

⁽¹⁾ Prudential Financial has agreed to reimburse any amounts paid under the credit-linked notes issued in this structure up to \$0.5 billion. During the fourth quarter of 2019, this financing facility was restructured to allow for an extension through 2036.

As of December 31, 2019, we also had outstanding an aggregate of \$2.6 billion of debt issued for the purpose of financing Regulation XXX and Guideline AXXX non-economic reserves, of which approximately \$0.7 billion relates to Regulation XXX reserves and approximately \$1.9 billion relates to Guideline AXXX reserves. In addition, as of December 31, 2019, for purposes of financing Guideline AXXX reserves, one of our captives had approximately \$4.0 billion of surplus notes outstanding that were issued to affiliates.

⁽²⁾ The \$2.36 billion of surplus notes represents an intercompany transaction that eliminates upon consolidation. Prudential Financial has agreed to reimburse amounts paid under credit-linked notes issued in this structure up to \$1.0 billion.

The Company has introduced updated versions of its products in phases over the course of the principle-based reserving implementation period and has transitioned all products by January 1, 2020. These updated products support the principle-based statutory reserve level without the need for captive reserve financing. The Company is continuing to assess the impact of this new reserving approach on projected statutory reserve levels and product pricing for its entire portfolio of individual life product offerings. Certain elements of the implementation of principle-based reserving are yet to be finalized by the NAIC and may have a material impact on statutory reserves.

Ratings

Financial strength ratings (which are sometimes referred to as "claims-paying" ratings) and credit ratings are important factors affecting public confidence in an insurer and its competitive position in marketing products. Our credit ratings are also important for our ability to raise capital through the issuance of debt and for the cost of such financing. Nationally Recognized Statistical Ratings Organizations continually review the financial performance and financial condition of the entities they rate, including Prudential Financial and its rated subsidiaries.

A downgrade in the credit or financial strength ratings of Prudential Financial or its rated subsidiaries could potentially, among other things, limit our ability to market products, reduce our competitiveness, increase the number or value of policy surrenders and withdrawals, increase our borrowing costs and potentially make it more difficult to borrow funds, adversely affect the availability of financial guarantees, such as letters of credit, cause additional collateral requirements or other required payments under certain agreements, allow counterparties to terminate derivative agreements and/or hurt our relationships with creditors, distributors, or trading counterparties thereby potentially negatively affecting our profitability, liquidity, and/or capital. In addition, we consider our own risk of non-performance in determining the fair value of our liabilities. Therefore, changes in our credit or financial strength ratings may affect the fair value of our liabilities.

Financial strength ratings represent the opinions of rating agencies regarding the financial ability of an insurance company to meet its obligations under an insurance policy. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. The following table summarizes the ratings for Prudential Financial and certain of its subsidiaries as of the date of this filing.

	A.M. Best(1)	S&P(2)	Moody's(3)	Fitch(4)

^{*} The Current 'Stable' Outlook on Prudential's ratings corresponds to all S&P rated Prudential entities except for Prudential's Japanese Subsidiaries (The Prudential Life Insurance Company Ltd., Gibraltar Life Insurance Company, Ltd., and The Prudential Gibraltar Financial Life Insurance Co. Ltd.), which have 'Positive' Outlooks.

- (1) A.M. Best Company, which we refer to as A.M. Best, financial strength ratings for insurance companies range from "A++ (superior)" to "D (Poor)". A rating of A+ is the second highest of thirteen rating categories. A.M. Best long-term credit ratings range from "aaa (exceptional)" to "c (Poor)". A.M. Best short-term credit ratings range from "AMB-1+", which represents the strongest ability to repay short-term debt obligations, to "AMB-4 (Questionable)".
- (2) Standard & Poor's Rating Services, which we refer to as S&P, financial strength ratings for insurance companies range from "AAA (extremely strong)" to "D (default)". A rating of AA- is the fourth highest of twenty-three rating categories. S&P's long-term issue credit ratings range from "AAA (extremely strong)" to "D (default)". S&P short-term ratings range from "A-I (highest category)" to "D (default)".
- (3) Moody's Investors Service, Inc., which we refer to as Moody's, insurance financial strength ratings range from "Aaa (exceptional)" to "C (lowest)". A rating of Aa3 is the fourth highest of twenty-one rating categories. Numeric modifiers are used to refer to the ranking within the group—with 1 being the highest and 3 being the lowest. These modifiers are used to indicate relative strength within a category. Moody's long-term credit ratings range from "Aaa (highest)" to "C (default)". Moody's short-term ratings range from "Prime-1 (P-1)", which represents a superior ability for repayment of short-term debt obligations, to "Prime-3 (P-3)", which represents an acceptable ability for repayment of such obligations. Issuers rated "Not Prime" do not fall within any of the Prime rating categories.
- (4) Fitch Ratings Inc., which we refer to as Fitch, financial strength ratings range from "AAA (exceptionally strong)" to "C (distressed)". A rating of AA- is the fourth highest of twenty-one rating categories. Fitch long-term credit ratings range from "AAA (highest credit quality)", which denotes exceptionally strong capacity for timely payment of financial commitments, to "D (default)". Short-term ratings range from "F1+ (highest credit quality)" to "D (default)".

The ratings set forth above reflect current opinions of each rating agency. Each rating should be evaluated independently of any other rating. These ratings are not directed toward shareholders and do not in any way reflect evaluations of the safety and security of the Common Stock. These ratings are reviewed periodically and may be changed at any time by the rating agencies. As a result, we cannot assure stakeholders that we will maintain our current ratings in the future.

Rating agencies use an "outlook" statement for both industry sectors and individual companies. For an industry sector, a stable outlook generally implies that over the next 12 to 18 months the rating agency expects ratings to remain unchanged among companies in the sector. In 2019, Fitch revised the Rating Outlook on the U.S. life insurance industry from Stable to Negative. A.M. Best, Moody's, and S&P maintained their outlook for the U.S. life insurance sector at Stable. For a particular company, an outlook generally indicates a medium- or long-term trend (generally six months to two years) in credit fundamentals, which if continued, may lead to a rating change. These indicators are not necessarily a precursor of a rating change nor do they preclude a rating agency from changing a rating at any time without notice. A.M. Best, Fitch, S&P and Moody's have the Company's ratings on Stable outlook.

The following is a summary of the significant changes or actions in ratings and rating outlooks for our Company that have occurred from January 1, 2019 through the date of this filing:

^{** &}quot;NR" indicates not rated.

On May 9, 2019, Moody's Investors Service upgraded the financial strength rating of PICA, Pruco Life and PRIAC to 'Aa3' from 'A1'with a Stable outlook. Moody's also upgraded Prudential Financial's long-term senior debt rating to 'A3' from 'Baa1' with a Stable outlook.

Requirements to post collateral or make other payments because of ratings downgrades under certain agreements, including derivative agreements, can be satisfied in cash or by posting permissible securities held by the subsidiaries subject to the agreements. In addition, a ratings downgrade by A.M. Best to "A-" for our domestic life insurance companies would require PICA to either post collateral or a letter of credit in the amount of approximately \$1.3 billion, based on the level of statutory reserves related to the variable annuity business acquired from Allstate. We believe that the posting of such collateral would not be a material liquidity event for PICA.

Contractual Obligations

The table below summarizes the future estimated cash payments related to certain contractual obligations as of December 31, 2019. The estimated payments reflected in this table are based on management's estimates and assumptions about these obligations. Because these estimates and assumptions are necessarily subjective, the actual cash outflows in future periods will vary, possibly materially, from those reflected in the table. In addition, we do not believe that our cash flow requirements can be adequately assessed based solely upon an analysis of these obligations, as the table below does not contemplate all aspects of our cash inflows, such as the level of cash flow generated by certain of our investments, nor all aspects of our cash outflows.

		Estimated Payments Due by Period									
	Total		2020		2021-2022		2023-2024			2025 and thereafter	
					(in	millions)					
Short-term and long-term debt obligations(1)	\$	42,045	\$	2,930	\$	2,680	\$	2,903	\$	33,532	
Operating lease obligations(2)		649		152		247		139		111	
Purchase obligations:											
Commitments to purchase or fund investments(3)		7,421		4,206		1,882		590		743	
Commercial mortgage loan commitments(4)		2,129		1,822		282		25		0	
Other liabilities:											
Insurance liabilities(5)		1,174,006		46,614		67,856		67,902		991,634	
Other(6)		14,025		13,945		53		27		0	
Total	\$	1,240,275	\$	69,669	\$	73,000	\$	71,586	\$	1,026,020	
					_				_		

- (1) The estimated payments due by period for long-term debt reflects the contractual maturities of principal, as disclosed in Note 17 to the Consolidated Financial Statements, as well as estimated future interest payments. The payment of principal and estimated future interest for short-term debt are reflected in estimated payments due in 2020. The estimate for future interest payments includes the effect of derivatives that qualify for hedge accounting treatment. See Note 17 to the Consolidated Financial Statements for additional information concerning our short-term and long-term debt.
- (2) The estimated payments due by period for operating leases reflect the future minimum lease payments under non-cancelable operating leases, as disclosed in Note 11 to the Consolidated Financial Statements
- (3) As discussed in Note 23 to the Consolidated Financial Statements, we have commitments to purchase or fund investments, some of which are contingent upon events or circumstances not under our control, including those at the discretion of our counterparties. The timing of the fulfillment of certain of these commitments cannot be estimated, therefore the settlements of these obligations are reflected in estimated payments due in less than one year. Commitments to purchase or fund investments include \$49 million that we anticipate will ultimately be funded from our separate accounts.
- (4) As discussed in Note 23 to the Consolidated Financial Statements, loan commitments of our commercial mortgage operations, which are legally binding commitments to extend credit to a counterparty, have been reflected in the contractual obligations table above principally based on the expiration date of the commitment; however, it is possible these loan commitments could be funded prior to their expiration date. In certain circumstances the counterparty may also extend the date of the expiration in exchange for a fee.
- (5) The estimated cash flows due by period for insurance liabilities reflect future estimated cash payments to be made to policyholders and others for future policy benefits, policyholders' account balances, policyholder's dividends, reinsurance payables and separate account liabilities, net of premium receipts and reinsurance recoverables. Contractual obligations are contingent upon the receipt of premiums. These future estimated cash flows for current policies in force generally reflect our best estimate economic and actuarial assumptions. These cash flows are undiscounted with respect to interest. Therefore, the sum of the cash flows shown for all years in the table of \$1,174 billion exceeds the corresponding liability amounts of approximately \$769 billion included in the Consolidated Financial Statements as of December 31, 2019. Separate account liabilities are legally insulated from general account obligations, and it is generally expected these liabilities will be fully funded by separate account assets and their related cash flows. We have made significant assumptions to determine the future estimated cash flows related to the underlying policies and contracts. Due to the significance of the assumptions used and the contingent nature of contractual terms, actual cash flows and their timing will differ, possibly materially, from these estimates. Timing of cash flows in the "2025 and thereafter" category include long term liabilities that may extend beyond 100 years.
- (6) The estimated payments due by period for other liabilities includes securities sold under agreements to repurchase, cash collateral for loaned securities, liabilities for unrecognized tax benefits, bank customer liabilities, and other miscellaneous liabilities. Amounts presented in the table also exclude \$1,274 million of notes issued by consolidated VIE's which recourse for these obligations is limited to the assets of the respective VIE and do not have recourse to the general credit of the company.

We also enter into agreements to purchase goods and services in the normal course of business; however, these purchase obligations are not material to our consolidated results of operations or financial position as of December 31, 2019.

Off-Balance Sheet Arrangements

Guarantees and Other Contingencies

In the course of our business, we provide certain guarantees and indemnities to third parties pursuant to which we may be contingently required to make payments in the future. See Note 23 to the Consolidated Financial Statements for additional information.

Other Contingent Commitments

We also have other commitments, some of which are contingent upon events or circumstances not under our control, including those at the discretion of our counterparties. See Note 23 to the Consolidated Financial Statements for additional information regarding these commitments. For further discussion of certain of these commitments that relate to our separate accounts, also see "—Liquidity associated with other activities—PGIM operations."

Other Off-Balance Sheet Arrangements

In 2013, we entered into a put option agreement with a Delaware trust that gives Prudential Financial the right, at any time over a ten-year period, to issue up to \$1.5 billion of senior notes to the trust in return for principal and interest strips of U.S. Treasury securities that are held by the trust. See Note 17 to the Consolidated Financial Statements for more information on this put option agreement. In 2014, Prudential Financial entered into financing transactions, pursuant to which it issued \$500 million of limited recourse notes and, in return, obtained \$500 million of asset-backed notes from a Delaware master trust and ultimately contributed the asset-backed notes to its subsidiary, PRIAC. As of December 31, 2019, no principal payments have been received or are currently due on the asset-backed notes and, as a result, there was no payment obligation under the limited recourse notes. Accordingly, none of the notes are reflected in the Consolidated Financial Statements as of that date.

Other than as described above, we do not have retained or contingent interests in assets transferred to unconsolidated entities, or variable interests in unconsolidated entities or other similar transactions, arrangements or relationships that serve as credit, liquidity or market risk support, that we believe are reasonably likely to have a material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or our access to or requirements for capital resources. In addition, other than the agreements referred to above, we do not have relationships with any unconsolidated entities that are contractually limited to narrow activities that facilitate our transfer of or access to associated assets.

Risk Management

Overview

We employ a risk governance structure, overseen by senior management and our Board and managed by Enterprise Risk Management ("ERM"), to provide a common framework for evaluating the risks embedded in and across our businesses and corporate centers, developing risk appetites, managing these risks and identifying current and future risk challenges and opportunities. For a discussion of the risks of our businesses, see "Risk Factors".

Risk Governance Framework

Each of our businesses has a risk governance structure that is supported by a framework at the corporate level. Generally, our businesses are authorized to make day-to-day risk decisions that are consistent with enterprise risk policies and limits, and subject to enterprise oversight.

Board of Directors Oversight

Our Board oversees our risk profile and management's processes for assessing and managing risk. The Board also reviews strategic risks and opportunities facing the Company. Certain specific categories of risk are assigned to Board committees that report back to the full Board, as summarized below:

- Audit Committee: oversees insurance risk and operational risks, including model risk, as well as risks related to financial controls, legal, regulatory and compliance risks, and the overall risk management governance structure and risk management function.
- Compensation Committee: oversees our compensation programs so that incentives are aligned with appropriate risk taking.

- Corporate Governance and Business Ethics Committee: oversees our corporate governance procedures and practices, ethics and conflict of interest
 policies, political contributions, lobbying expenses and overall political strategy, as well as our strategy and reputation regarding environmental
 stewardship, sustainability and corporate social responsibility.
- Finance Committee: oversees liquidity risk, including risks involving our capital and liquidity management, the incurrence and repayment of borrowings, the capital structure, the funding of benefit plans and statutory insurance reserves. The Finance Committee oversees our capital plan and receives regular updates on the sources and uses of capital relative to plan, as well as on our RAF.
- Investment Committee: oversees investment risk and market risk and the strength of the investment function. The Investment Committee approves investment and market risk limits based on asset class, issuer, credit quality and geography.
- Risk Committee: oversees the governance of significant risks throughout the Company and the establishment and ongoing monitoring of our risk profile, risk capacity and risk appetite. The Risk Committee also serves to coordinate the risk oversight functions of the other committees of the Board.

Management Oversight

Our primary risk management committee is the Enterprise Risk Committee ("ERC"). Currently, the ERC is chaired by our Chief Risk Officer and otherwise comprised of the Vice Chairman, Head of U.S. Businesses, Head of International Businesses, General Counsel, Chief Financial Officer, Chief Investment Officer and Chief Actuary. Our Chief Auditor also attends meetings of the ERC. The ERC is charged with facilitating the Company's ability to identify, assess, monitor and manage risk. The primary focus of the Committee is the critical analysis of significant risks and the appropriateness and alignment to the defined risk appetite of the Company.

The ERC is supported by six Risk Oversight Committees aligned with our tactical risks, each of which is comprised of subject matter experts and dedicated to one of the following risk types: investment, market, insurance, operational, model and liquidity. Significant matters or matters where there are unresolved points of view are reviewed by the ERC. The Risk Oversight Committees provide an opportunity to evaluate complex issues by subject matter experts within the various risk areas. They evaluate the adequacy and effectiveness of risk mitigation options, identify stakeholders of risks and issues, review material assumptions for reasonability and consistency across the Company and, working with the different risk areas, develop recommendations for risk limits, among other responsibilities.

Each of our businesses and certain corporate centers maintains its own risk committee. The risk committees serve as a forum for leaders within each business or corporate center to identify, assess and monitor risk and exposure issues and to review new business activities and initiatives, prior to being reviewed by the Risk Oversight Committees and/or the ERC as appropriate.

Enterprise Risk Management Oversight

ERM manages the risk management framework. It operates independently and is responsible for recommending policies, limits and standards for all risks. ERM oversees these risks under the guidance of the ERC and Risk Oversight Committees. Additionally, ERM works with our businesses and corporate areas to identify, monitor and manage risks that we may face. The ERM infrastructure is generally aligned by risk type, with certain groups within ERM working across risk types.

To enable the broader organizational strategy and streamline risk governance, ERM established Chief Risk Officer roles for the U.S. Workplace Solutions division and U.S. Individual Solutions division. This change brings ERM's subject matter expertise into the business unit dialogue on a real-time basis.

Risk Identification

We rely on a combination of activities and processes to provide analysis and seek assurance that all material risks have been identified and managed as appropriate. There are three levels of activities that seek to ensure that changes in risk levels or new risks to the Company are identified and escalated as appropriate: (1) business activities, (2) corporate center activities, and (3) processes involving senior management and the Board.

- Businesses: Each business area has a risk committee that meets periodically to allow senior leaders to discuss and evaluate current, new, and emerging risks in their own operations. Businesses are required to develop and maintain documented risk inventories which facilitate the identification of current risk exposures.
- Corporate Centers: The corporate centers review the results of the business activities and examine risks from an enterprise view across businesses under normal and stressed conditions. As a result, the corporate centers, particularly ERM, use several processes and activities to identify and assess the risks of the Company.

• Senior Management and the Board: Senior management plays a critical role in reviewing the risk profile of the Company, including by identifying impacts to the business strategy of new or changed risks, and risks in any new strategies under consideration. These risks are discussed with the ERC as appropriate, and with the Board, if significant. As discussed above, the Board oversees the Company's risk profile and management's processes for assessing and managing risk, both as a full Board and through its committees.

Risk Measurement and Monitoring

Our Risk Appetite Framework ("RAF") is a comprehensive process designed to reasonably ensure that all risks taken across the Company align with the Company's capacity and willingness to take those risks. Using common metrics allows for a cohesive assessment of risk, resources and strategy, and supports management and the Board in making well-informed business decisions. The Company has a comprehensive stress testing framework, which serves as the foundation for the RAF. The RAF evaluates the Company's exposure under various stress metrics and stress severities. The RAF provides a dynamic assessment of stress impacts and resources available to absorb these impacts under comprehensive stress scenarios. The Company's capital management framework is integrated with the RAF to determine the amount of capital the Company needs to hold given the risks taken.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

Market risk is defined as the risk of loss from changes in interest rates, equity prices and foreign currency exchange rates resulting from asset/liability mismatches where the change in the value of our liabilities is not offset by the change in value of our assets.

For additional information regarding the potential impacts of interest rate and other market fluctuations, as well as general economic and market conditions on our businesses and profitability, see Item 1A. "Risk Factors" above. For additional information regarding the overall management of our general account investments and our asset mix strategies, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—General Account Investments—Management of Investments" above. For additional information regarding our liquidity and capital resources, which may be impacted by changing market risks, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources" above.

Market Risk Management

Management of market risk, which we consider to be a combination of both investment risk and market risk exposures, includes the identification and measurement of various forms of risk, the establishment of risk thresholds and the creation of processes intended to maintain risks within these thresholds while optimizing returns on the underlying assets or liabilities.

Our risk management process utilizes a variety of tools and techniques, including:

- Measures of price sensitivity to market changes (e.g., interest rates, equity index prices, foreign exchange);
- · Asset/liability management;
- Stress scenario testing;
- · Hedging programs; and
- Risk management governance, including policies, limits, and a committee that oversees investment and market risk. For additional information regarding
 our overall risk management framework and governance structure, see "Management's Discussion and Analysis of Financial Condition and Results of
 Operations—Risk Management" above.

Market Risk Mitigation

Risk mitigation takes three primary forms:

- Asset/Liability Management: Managing assets to liability-based measures. For example, investment policies identify target durations for assets based on liability characteristics and asset portfolios are managed to within ranges around them. This mitigates potential unanticipated economic losses from interest rate movements.
- Hedging: Using derivatives to offset risk exposures. For example, for our variable annuities, potential living benefit claims resulting from more severe
 market conditions are hedged using derivative instruments.

Management of portfolio concentration risk. For example, ongoing monitoring and management at the enterprise level of key rate, currency and other
concentration risks support diversification efforts to mitigate exposure to individual markets and sources of risk.

Market Risk Related to Interest Rates

We perform liability-driven investing and engage in careful asset/liability management. Asset/liability mismatches create the risk that changes in liability values will differ from the changes in the value of the related assets. Additionally, changes in interest rates may impact other items including, but not limited to, the following:

- Net investment spread between the amounts that we are required to pay and the rate of return we are able to earn on investments for certain products supported by general account investments;
- Asset-based fees earned on assets under management or contractholder account values;
- Estimated total gross profits and the amortization of deferred policy acquisition and other costs;
- Net exposure to the guarantees provided under certain products; and
- · Capital levels of our regulated entities.

We use duration and convexity analyses to measure price sensitivity to interest rate changes. Duration measures the relative sensitivity of the fair value of a financial instrument to changes in interest rates. Convexity measures the rate of change of duration with respect to changes in interest rates. We use asset/liability management and derivative strategies to manage our interest rate exposure by legal entity by matching the relative sensitivity of asset and liability values to interest rate changes, or controlling "duration mismatch" of assets and liability duration targets. In certain markets, capital market limitations that hinder our ability to acquire assets that approximate the duration of some of our liabilities are considered in setting duration targets. We consider risk-based capital and tax implications as well as current market conditions in our asset/liability management strategies.

We assess the impact of interest rate movements on the value of our financial assets, financial liabilities and derivatives using hypothetical test scenarios that assume either upward or downward 100 basis point parallel shifts in the yield curve from prevailing interest rates, reflecting changes in either credit spreads or the risk-free rate. The following table sets forth the net estimated potential loss in fair value on these financial instruments from a hypothetical 100 basis point upward shift as of December 31, 2019 and 2018. This table is presented on a gross basis and excludes offsetting impacts to insurance liabilities that are not considered financial liabilities under U.S GAAP. This scenario results in the greatest net exposure to interest rate risk of the hypothetical scenarios tested at those dates. While the test scenario is for illustrative purposes only and does not reflect our expectations regarding future interest rates or the performance of fixed income markets, it is a near-term, reasonably possible hypothetical change that illustrates the potential impact of such events. These test scenarios do not measure the changes in value that could result from non-parallel shifts in the yield curve which we would expect to produce different changes in discount rates for different maturities. As a result, the actual loss in fair value from a 100 basis point change in interest rates could be different from that indicated by these calculations. The estimated changes in fair values do not include separate account assets.

	 A	s of l	December 31,	2019	l		A	s of 1	December 31,	2018	
	 Notional		Fair Value]	Hypothetical Change in Fair Value		Notional		Fair Value		Iypothetical Change in Fair Value

contracts			(102,156)		3,562				(98,428)		3,367
Net estimated potential loss				\$	(38,348)					\$	(34,237)

⁽¹⁾ Includes assets classified as "Fixed maturities, available-for-sale, at fair value," "Assets supporting experience-rated contractholder liabilities, at fair value" and "Fixed maturities, trading, at fair value." Approximately \$391 billion and \$354 billion as of December 31, 2019 and 2018, respectively, of fixed maturities are classified as available-for-sale.

(3) Excludes any offsetting impact of derivative instruments purchased to hedge changes in the embedded derivatives. Amounts reported net of third-party reinsurance.

Under U.S. GAAP, the fair value of the embedded derivatives for certain features associated with variable annuity, indexed universal life, and fixed indexed annuity contracts, reflected in the table above, includes the impact of the market's perception of our NPR. For more information on NPR related to the sensitivity of the embedded derivatives to our NPR credit spread, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Accounting Policies & Pronouncements—Application of Critical Accounting Estimates—Sensitivities for Insurance Assets and Liabilities" above.

For an additional discussion of our variable annuity optional living benefit guarantees accounted for as embedded derivatives and related derivatives used to hedge the changes in fair value of these embedded derivatives, see "Market Risk Related to Certain Variable Annuity Products" below. For additional information about the key estimates and assumptions used in our determination of fair value, see Note 6 to the Consolidated Financial Statements. For information on the impacts of a sustained low interest rate environment, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Executive Summary—Impact of a Low Interest Rate Environment" above.

Market Risk Related to Equity Prices

We have exposure to equity risk through asset/liability mismatches, including our investments in equity securities held in our general account investment portfolio and unhedged exposure in our insurance liabilities, principally related to certain variable annuity living benefit feature embedded derivatives. Our equity-based derivatives primarily hedge the equity risk embedded in these living benefit feature embedded derivatives, and are also part of our capital hedging program. Changes in equity prices create risk that the resulting changes in asset values will differ from the changes in the value of the liabilities relating to the underlying or hedged products. Additionally, changes in equity prices may impact other items including, but not limited to, the following:

- · Asset-based fees earned on assets under management or contractholder account value;
- Estimated total gross profits and the amortization of deferred policy acquisition and other costs; and
- Net exposure to the guarantees provided under certain products.

⁽²⁾ Embedded derivatives relate primarily to certain features associated with variable annuity, indexed universal life, and fixed indexed annuity contracts. The fair value and hypothetical change in fair value of each is \$(12,602) million and \$6,315 million, \$(1,119) million and \$216 million, and \$(197) million and \$(6) million, respectively, as of December 31, 2019. Amounts as of December 31, 2018 relate primarily to certain features associated with variable annuity contracts.

⁽⁴⁾ Excludes approximately \$344 billion and \$324 billion as of December 31, 2019 and 2018, respectively, of insurance reserve and deposit liabilities which are not considered financial liabilities. We believe that the interest rate sensitivities of these insurance liabilities would serve as an offset to the net interest rate risk of the financial assets and liabilities, including investment contracts.

We manage equity risk against benchmarks in respective markets. We benchmark our return on equity holdings against a blend of market indices, mainly the S&P 500 and Russell 2000 for U.S. equities. We benchmark foreign equities against the Tokyo Price Index, and the MSCI EAFE, a market index of European, Australian, and Far Eastern equities. We target price sensitivities that approximate those of the benchmark indices.

We estimate our equity risk from a hypothetical 10% decline in equity benchmark market levels. The following table sets forth the net estimated potential loss in fair value from such a decline as of December 31, 2019 and 2018. While these scenarios are for illustrative purposes only and do not reflect our expectations regarding future performance of equity markets or of our equity portfolio, they represent near-term reasonably possible hypothetical changes that illustrate the potential impact of such events. These scenarios consider only the direct impact on fair value of declines in equity benchmark market levels and not changes in asset-based fees recognized as revenue, changes in our estimates of total gross profits used as a basis for amortizing deferred policy acquisition and other costs, or changes in any other assumptions such as market volatility or mortality, utilization or persistency rates in our variable annuity contracts that could also impact the fair value of our living benefit features. In addition, these scenarios do not reflect the impact of basis risk, such as potential differences in the performance of the investment funds underlying the variable annuity products relative to the market indices we use as a basis for developing our hedging strategy. The impact of basis risk could result in larger differences between the change in fair value of the equity-based derivatives and the related living benefit features in comparison to these scenarios. In calculating these amounts, we exclude separate account equity securities.

	As of December 31, 2019						As of December 31, 2018								
		Notional		Fair Value		Hypothetical Change in Fair Value	,	Notional		Fair Value		Hypothetical Change in Fair Value			
						(in mi	illions))							
Equity securities(1)			\$	9,175	\$	(918)			\$	7,560	\$	(756)			
Equity-based derivatives(2)	\$	52,677		(719)		1,755	\$	77,143		867		1,528			
Embedded derivatives(2)(3)(4)				(14,147)		(1,726)				(8,926)		(1,497)			
Net estimated potential loss					\$	(889)					\$	(725)			

- (1) Includes equity securities classified as "Assets supporting experience-rated contractholder liabilities" and "Equity securities, at fair value."
- (2) The notional and fair value of equity-based derivatives and the fair value of embedded derivatives are also reflected in amounts under "Market Risk Related to Interest Rates" above, and are not cumulative.
- (3) Embedded derivatives relate primarily to certain features associated with variable annuity, indexed universal life, and fixed indexed annuity contracts. The fair value and hypothetical change in fair value of each is \$(12,602) million and \$(1,833) million, \$(1,119) million and \$81 million, and \$(197) million and \$26 million, respectively, as of December 31, 2019. Amounts as of December 31, 2018 relate primarily to certain features associated with variable annuity contracts.
- (4) Excludes any offsetting impact of derivative instruments purchased to hedge changes in the embedded derivatives. Amounts reported net of third-party reinsurance.

Market Risk Related to Foreign Currency Exchange Rates

As a U.S.-based company with significant business operations outside of the U.S., particularly in Japan, we are exposed to foreign currency exchange rate risk related to these operations, as well as in our general account investment portfolio and other proprietary investment portfolios.

For our international insurance operations, changes in foreign currency exchange rates create risk that we may experience volatility in the U.S. dollar-equivalent earnings and equity of these operations. We actively manage this risk through various hedging strategies, including the use of foreign currency hedges and through holding U.S. dollar-denominated securities in the investment portfolios of certain of these operations. Additionally, our Japanese insurance operations offer a variety of non-yen denominated products which are supported by investments in corresponding currencies. While these non-yen denominated assets are economically matched to the currency of the product liabilities, the accounting treatment may differ for changes in the value of these assets and liabilities due to moves in foreign currency exchange rates, resulting in volatility in reported U.S. GAAP earnings. This volatility has been mitigated by disaggregating the U.S. and Australian dollar-denominated businesses in Gibraltar Life into separate divisions, each with its own functional currency that aligns with the underlying products and investments. For certain of our international insurance operations outside of Japan, we elect to not hedge the risk of changes in our equity investments due to foreign exchange rate movements. For further information, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Impact of Foreign Currency Exchange Rates—Impact of products denominated in non-local currencies on U.S. GAAP earnings" above.

For our domestic general account investment portfolios supporting our U.S. insurance operations and other proprietary investment portfolios, our foreign currency exchange rate risk arises primarily from investments that are denominated in foreign currencies. We manage this risk by hedging substantially all domestic foreign currency denominated fixed income investments

into U.S. dollars. We generally do not hedge all of the foreign currency risk of our investments in equity securities of unaffiliated foreign entities.

We manage our foreign currency exchange rate risks within specified limits, and estimate our exposure, excluding equity in our Japanese insurance operations, to a hypothetical 10% change in foreign currency exchange rates. The following table sets forth the net estimated potential loss in fair value from such a change as of December 31, 2019 and 2018. While these scenarios are for illustrative purposes only and do not reflect our expectations regarding future changes in foreign exchange markets, they represent reasonably possible near-term hypothetical changes that illustrate the potential impact of such events.

			As of Do	ecem	ber 31, 2018		
			Change in		Fair Value		Hypothetical Change in Fair Value
			(in n	nillion	s)		
Unhedged portion of equity investment in international subsidiaries and foreign currency denominated investments in domestic general account portfolio	\$ 4,834	\$	(483)	\$	5,414	\$	541

For additional information, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—General Account Investments—Portfolio Composition" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations by Segment—International Businesses" above.

Derivatives

We use derivative financial instruments primarily to reduce market risk from changes in interest rates, equity prices and foreign currency exchange rates, including their use to alter interest rate or foreign currency exposures arising from mismatches between assets and liabilities. Our derivatives primarily include swaps, futures, options and forward contracts that are exchange-traded or contracted in the OTC market.

Our derivatives also include interest rate guarantees we provide on our synthetic GIC products. Synthetic GICs simulate the performance of traditional insurance-related GICs but are accounted for as derivatives under U.S. GAAP due to the fact that the policyholders own the underlying assets, and we only provide a book value "wrap" on the customers' funds, which are held in a client-owned trust. Since these wraps provide payment of guaranteed principal and interest to the customer, changes in interest rates create risk such that declines in the market value of customers' funds would increase our net exposure to these guarantees; however, our obligation is limited to payments that are in excess of the existing customers' fund value. Additionally, we have the ability to periodically reset crediting rates, subject to a 0% minimum floor, as well as the ability to increase prices. Further, our contract provisions provide that, although participants may withdraw funds at book value, contractholder withdrawals may only occur at market value immediately, or at book value over time. These factors, among others, result in these contracts experiencing minimal changes in fair value, despite a more significant notional value.

Our derivatives also include those that are embedded in certain financial instruments, and primarily relate to certain optional living benefit features associated with our variable annuity products, as discussed in more detail in "Market Risk Related to Certain Variable Annuity Products" below. For additional information on our derivative activities, see Note 5 to the Consolidated Financial Statements.

Market Risk Related to Certain Variable Annuity Products

The primary risk exposures of our variable annuity contracts relate to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including capital markets assumptions, such as equity market returns, interest rates and market volatility and actuarial assumptions. For our capital markets assumptions, we manage our exposure to the risk created by capital markets fluctuations through a combination of product design elements, such as an automatic rebalancing element and inclusion of certain optional living benefits in our living benefits hedging program. In addition, we consider external reinsurance a form of risk mitigation as well as our capital hedge program. Certain variable annuity optional living benefit features are accounted for as embedded derivatives and recorded at fair value. The market risk sensitivities associated with U.S. GAAP values of both the embedded derivatives and the related derivatives used to hedge the changes in fair value of these embedded derivatives are provided under "Market Risk Related to Interest Rates" and "Market Risk Related to Equity Prices" above.

For additional information regarding our risk management strategies, including our living benefit hedging program and other product design elements, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities" above.

Management's Annual Report on Internal Control Over Financial Reporting

Management of Prudential Financial, Inc. (together with its consolidated subsidiaries, the "Company") is responsible for establishing and maintaining adequate internal control over financial reporting. Management conducted an assessment of the effectiveness, as of December 31, 2019, of the Company's internal control over financial reporting, based on the framework established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on our assessment under that framework, which excluded the controls for Assurance IQ discussed further below, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2019.

Our internal control over financial reporting is a process designed by or under the supervision of our principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We have excluded Assurance IQ, acquired on October 10, 2019, from management's assessment of internal control over financial reporting. Assurance IQ total assets and total revenues represented less than 1% of the related consolidated financial statement amounts as of and for the year ended December 31, 2019.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2019, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report appearing herein.

February 14, 2020

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Prudential Financial, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statements of financial position of Prudential Financial, Inc. and its subsidiaries (the "Company") as of December 31, 2019 and 2018, and the related consolidated statements of operations, comprehensive income, equity and cash flows for each of the three years in the period ended December 31, 2019, including the related notes and financial statement schedules listed in the index appearing under Item 15.2 (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2019 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the COSO.

Changes in Accounting Principles

As discussed in Note 2 to the consolidated financial statements, the Company changed the manner in which it accounts for leases in 2019, the manner in which it accounts for certain financial assets and liabilities and the manner in which it accounts for certain tax effects originally recognized in accumulated other comprehensive income in 2018, and the manner in which it accounts for certain reinsurance costs in 2017.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As described in Management's Annual Report on Internal Control over Financial Reporting, management has excluded Assurance IQ, Inc. ("Assurance IQ") from its assessment of internal control over financial reporting as of December 31, 2019, because it was acquired by the Company in a purchase business combination during 2019. We have also excluded Assurance IQ from our audit of internal control over financial reporting. Assurance IQ is a wholly-owned subsidiary whose total assets and total revenues excluded from management's assessment and our audit of internal control over financial reporting represent less than 1% of the related consolidated financial statement amounts as of and for the year ended December 31, 2019.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Valuation of guaranteed benefit features associated with certain life and annuity products included in the liability for future policy benefits

As described in Notes 2, 6, 12 and 13 to the consolidated financial statements, the Company issues certain variable annuity contracts which contain guaranteed benefit features. Certain of the guarantees associated with these contracts are accounted for as embedded derivatives and recorded at fair value. As of December 31, 2019, the fair value of the obligations associated with these guarantees was \$12.8 billion. As there is no observable active market for the transfer of these obligations, the valuations are calculated by management using internally-developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows. The significant inputs to the valuation models for these embedded derivatives include capital market assumptions, such as interest rate levels and volatility assumptions, the risk of the Company's non-performance under the contract, as well as actuarially determined assumptions, including mortality rates, lapse rates, benefit utilization rates and withdrawal rates. Additional policyholder liabilities are also established for certain life insurance and annuity products that include certain contract features including guaranteed minimum death benefits (GMDB) and no-lapse guarantees. The liability for no-lapse guarantee features is grouped with GMDB features in Note 13. For these contract features, a liability is established when associated assessments are recognized. As of December 31, 2019, the additional liability for these contract features included in the liability for future policy benefits was \$8.4 billion. This liability is established using current best estimate assumptions, including lapse, withdrawal, mortality, and premium pattern rates, as well as interest rate and equity market return assumptions, and is based on the ratio of the present value of total expected excess payments (e.g., payments in

The principal considerations for our determination that performing procedures relating to the valuation of guaranteed benefit features associated with certain life and annuity products included in the liability for future policy benefits is a critical audit matter are there was significant judgment by management to determine i) the valuation model for the benefit features accounted for as embedded derivatives given the lack of an observable market for these guarantees and ii) the aforementioned assumptions for the benefit features described above. This in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating the audit evidence relating to the model for embedded derivatives recorded at fair value and the aforementioned assumptions used in the valuation of the liabilities for all guaranteed benefit features described above. Also, the audit effort involved the use of professionals with specialized skill and knowledge to assist in performing procedures and evaluating the audit evidence obtained.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the valuation of guaranteed benefit features associated with certain life and annuity products included in the liability for future policy benefits, including controls over the model for the benefit features accounted for as embedded derivatives and development of the assumptions used in the valuation of the liabilities for all the benefit features described above. These procedures also included, among others, evaluating the appropriateness of management's model in light of the valuation objective (fair value) and the lack of any observable market, evaluating the reasonableness of the aforementioned assumptions used in the valuation based on industry knowledge and data as well as historical Company data and experience, testing the completeness and accuracy of data used to develop the aforementioned assumptions, testing that the aforementioned assumptions are accurately reflected in the model, and testing the mathematical accuracy of management's model. Professionals with specialized skill and knowledge were used to assist in evaluating the appropriateness of the models for embedded derivatives, and the reasonableness of the aforementioned assumptions used in the valuation of the guaranteed benefit features based on industry knowledge and the Company's historical experience.

Valuation of the deferred acquisition costs related to universal life and variable life products and fixed and variable deferred annuity products and deferred sales inducements related to fixed and variable deferred annuity products

As described in Notes 2, 7 and 13 to the consolidated financial statements, as of December 31, 2019, a significant portion of the \$19.9 billion deferred policy acquisition costs (DAC) are associated with certain universal and variable life products and fixed and variable deferred annuity products, and a significant portion of the \$935 million deferred sales inducements (DSI) are associated with certain fixed and variable deferred annuity products. Acquisition costs that relate directly to the successful acquisition of new and renewal insurance and annuity business are deferred to the extent such costs are deemed recoverable from future profits. DAC related to universal and variable life products and fixed and variable deferred annuity products is generally amortized over the expected life of the policies in proportion to gross profits arising principally from investment margins, mortality and expense margins, and surrender charges. These margins are updated periodically based on historical and anticipated future experience. The Company also offers various types of sales inducements to policyholders related to fixed and variable deferred annuity contracts. Sales inducements are amortized over the expected life of the policies using the same methodology and assumptions used to amortize DAC. DAC and DSI balances are regularly adjusted with a corresponding charge or credit to current period earnings for the impact of actual gross profits and changes in management's projections of estimated future gross profits. DAC and DSI are subject to periodic recoverability testing.

The principal considerations for our determination that performing procedures relating to the valuation of DAC related to universal life and variable life products and fixed and variable deferred annuity products and DSI related to fixed and variable deferred annuity products is a critical audit matter are there was significant judgment by management to determine the assumptions used in the valuation of DAC and DSI including mortality, lapse, benefit utilization, withdrawal, and premium pattern rates, as well as interest rate and equity market return assumptions ("significant assumptions"). This in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating the audit evidence relating to the significant assumptions. Also, the audit effort involved the use of professionals with specialized skill and knowledge to assist in performing procedures and evaluating the audit evidence obtained.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the valuation of DAC related to universal life and variable life products and fixed and variable deferred annuity products, including controls over the development of the significant assumptions. These procedures also included, among others, evaluating the appropriateness of management's models, evaluating the reasonableness of the significant assumptions used in the valuation based on industry knowledge and data as well as historical Company data and experience, testing the completeness and accuracy of data used to develop the assumptions, testing that the assumptions are accurately reflected in the model, and testing the mathematical accuracy of management's model. Professionals with specialized skill and knowledge were used to assist in evaluating the reasonableness of these significant assumptions.

Valuation of the liability for future policy benefits for individual and group long-term care policies

As described in Note 12 to the consolidated financial statements, as of December 31, 2019, a portion of the liability for future policy benefits is associated with benefits that will become payable on long-term care policies. This liability is determined by management using the net premium valuation methodology and, is accrued when premium revenue is recognized. The liability, which represents the present value of future benefits to be paid to or on behalf of policyholders and related expenses less the present value of future net premiums, is estimated using assumptions applicable at the time the insurance contracts are written, with provisions for the risk of adverse deviation, as appropriate. The original assumptions continue to be used in subsequent accounting periods unless a premium deficiency exists. Premium deficiency reserves are established by management, if necessary,

when the liability for future policy benefits plus the present value of expected future gross premiums are determined to be insufficient to provide for expected future policy benefits and expenses. Most contracts have recorded a premium deficiency reserve, for which assumptions as of the most recent premium deficiency reserve establishment are used. The primary assumptions used in establishing these reserves include interest rate, morbidity, mortality, lapse, premium rate increase and maintenance expenses.

The principal considerations for our determination that performing procedures relating to the valuation of the liability for future policy benefits for individual and group long-term care policies is a critical audit matter are there was significant judgment by management to develop the primary actuarial assumptions used in determining whether a premium deficiency exists, including morbidity, mortality, lapse, and premium rate increase ("significant assumptions"), which led to a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating the audit evidence relating to the significant assumptions used by management in the valuation of these liabilities. Also, the audit effort involved the use of professionals with specialized skill and knowledge to assist in performing procedures and evaluating the audit evidence obtained.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the valuation of the liability for future policy benefits for individual and group long-term care policies and determining whether a premium deficiency exists, including controls over the development of the significant assumptions. These procedures also included, among others, evaluating the appropriateness of management's model, evaluating the reasonableness of the significant assumptions used in the valuation based on industry knowledge and data as well as historical Company data and experience, testing the completeness and accuracy of data used to develop the significant assumptions, testing that the assumptions are accurately reflected in the model, and testing the mathematical accuracy of management's model. Professionals with specialized skill and knowledge were used to assist in evaluating the reasonableness of the significant assumptions.

Contingent payments related to the acquisition of Assurance IQ

As described in Note 1 to the consolidated financial statements, on October 10, 2019, the Company completed the acquisition of Assurance IQ for \$2.2 billion paid at closing, plus the fair value of additional contingent payments of up to \$1.2 billion payable in 2023 upon the achievement of certain financial targets. A portion of the contingent payments will be accounted for as compensation expense.

The principal considerations for our determination that performing procedures relating to the contingent payments related to the acquisition of Assurance IQ is a critical audit matter are there was significant judgment by management to determine whether such payments represented contingent consideration or compensation given the terms of the agreement. This in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating the audit evidence relating to management's assessment of the recognition and presentation of the contingent payments. Also, the audit effort involved the use of professionals with specialized skill and knowledge to assist in performing procedures and evaluating the audit evidence obtained.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the acquisition accounting, including controls over management's identification, recognition and presentation of the contingent payments. These procedures also included, among others, reading the purchase agreement and evaluating management's assessment of the contingent payments related to the acquisition, including the identification of contingent payments in connection with the acquisition and the allocation of those payments between purchase price and compensation expense. Professionals with specialized skill and knowledge were used to assist in evaluating the appropriateness of the classification of the contingent payments related to the Assurance IQ acquisition.

Notes to Consolidated Financial Statements

1. BUSINESS AND BASIS OF PRESENTATION

Prudential Financial, Inc. ("Prudential Financial" or "PFI") and its subsidiaries (collectively, "Prudential" or the "Company") provide a wide range of insurance, investment management, and other financial products and services to both individual and institutional customers throughout the United States and in many other countries. Principal products and services provided include life insurance, annuities, retirement-related services, mutual funds and investment management.

The Company's principal operations are comprised of PGIM (the Company's global investment management business), the U.S. Businesses (consisting of the U.S. Workplace Solutions, U.S. Individual Solutions, and Assurance IQ divisions), the International Businesses, the Closed Block division, and the Company's Corporate and Other operations. The U.S. Workplace Solutions division consists of the Retirement and Group Insurance businesses, the U.S. Individual Solutions division consists of the Individual Annuities and Individual Life businesses, and the Assurance IQ division consists of the Assurance IQ business. In October 2019, the Company completed the acquisition of Assurance IQ, Inc. ("Assurance IQ"), a leading consumer solutions platform that offers a range of solutions that help meet consumers' financial needs. The Closed Block division is accounted for as a divested business that is reported separately from the Divested and Run-off Businesses that are included in Corporate and Other. The Company's Corporate and Other operations include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested or placed in run-off, excluding the Closed Block division. See Note 22 to the Consolidated Financial Statements for revenues, income and loss, and total assets by segment.

Basis of Presentation

The Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The Consolidated Financial Statements include the accounts of Prudential Financial, entities over which the Company exercises control, including majority-owned subsidiaries and minority-owned entities such as limited partnerships in which the Company is the general partner and variable interest entities ("VIEs") in which the Company is consolidated variable interest entities. Intercompany balances and transactions have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The most significant estimates include those used in determining deferred policy acquisition costs ("DAC") and related amortization; fair value of embedded derivative instruments associated with the index-linked features of certain universal life and fixed annuity products; value of business acquired ("VOBA") and its amortization; amortization of deferred sales inducements ("DSI"); measurement of goodwill and any related impairment; valuation of investments including derivatives and the recognition of other-than-temporary impairments ("OTTI"); future policy benefits including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; and accruals for contingent liabilities, including estimates for losses in connection with unresolved legal and regulatory matters.

Reclassifications

Certain amounts in prior periods have been reclassified to conform to the current period presentation.

Acquisitions

On October 10, 2019, the Company completed its acquisition of Assurance IQ as discussed above. Assurance IQ is a wholly-owned subsidiary of the Company and the results of the Assurance IQ business are reported as a separate segment of our U.S. Businesses.

The total purchase consideration included \$2,212 million paid at closing, and \$100 million of contingent consideration (see "Contingent Consideration Liability" below). The amount paid at closing was comprised of \$1,758 million in cash and \$454 million in shares of restricted Prudential Financial Common Stock and other equity awards. In addition to the purchase consideration, the Company also granted approximately\$160 million of cash and equity awards to Assurance IQ employees which are recognized

Notes to Consolidated Financial Statements—(Continued)

as compensation expense over their requisite service periods. See Note 21 for further details on the equity awards issued as part of the transaction.

The contingent consideration as well as additional compensation awards are payable in 2023 in a mix of approximately 25% cash and 75% Prudential Financial Common Stock, contingent upon Assurance IQ's achievement of certain targets for gross revenues net of associated selling expenses ("Variable Profits") over the period from January 1, 2020 through December 31, 2022 as follows:

- If Variable Profits are less than \$900 million, no additional amount is payable.
- If Variable Profits are greater than \$1,300 million, an additional amount of \$1,150 million is payable.
- If Variable Profits are greater than \$900 million but less than or equal to \$1,300 million, an additional amount is payable equal to the product of (i) the quotient of (A) an amount equal to (1) Variable Profits achieved minus (2) \$900 million divided by (B) \$400 million and (ii) \$1,150 million.

Payment of the additional amount may be accelerated if the Company violates certain provisions of the merger agreement requiring it to take or refrain from taking certain actions, including with respect to the management and operation of Assurance IO.

Pursuant to the merger agreement, the number of shares of Prudential Financial Common Stock issued at closing was determined based on a price per share of \$83.71, which is equal to the weighted average price of Prudential Financial Common Stock for the 15 trading days before, and 15 trading days beginning on, September 4, 2019, the date of the merger agreement. The foregoing \$454 million in shares of restricted Prudential Financial Common Stock and equity awards paid at closing was based on the \$87.67 closing price per share of Prudential Financial Common Stock on the closing date.

Net Assets Acquired

The assets acquired and liabilities assumed have been included in the Consolidated Financial Statements as of the acquisition date. Total assets acquired included identified intangible assets of \$191 million. As a result of the acquisition, the Company recognized an asset for goodwill determined as the excess of the purchase price over the net fair value of the assets acquired and liabilities assumed that amounted to \$2,128 million, which is fully deductible for tax purposes. The value of the components within goodwill include expected revenue and cost synergies, the business model, technology capabilities, new customers, and the assembled workforce and key personnel. See Note 2 and Note 10 for additional information regarding goodwill. The valuation of the assets acquired and liabilities assumed is preliminary and subject to revision as more detailed analyses are completed. If additional information about the fair value of assets acquired and liabilities assumed becomes available, the Company may further revise the preliminary purchase price allocation as soon as practical, but no later than one year from the acquisition date.

Contingent Consideration Liability

The contingent consideration liability referred to above is reported at fair value. Fair value is determined based on the present value of expected award payments under the arrangement described above, using an internally developed model based on a number of assumptions, including market participant assumptions of future Variable Profits and the future price of Prudential Financial Common Stock (see Note 6). The fair value of the liability is updated each reporting period, with changes in fair value reported within "Other income". The fair value of the contingent consideration liability was \$105 million as of December 31, 2019. The stock-based component of contingent consideration impacts the share count for purposes of calculating the Company's diluted earnings per share when Assurance IQ's actual Variable Profits achieved as of the end of the reporting period is in excess of \$900 million, as if the contingent consideration performance period ended on the applicable reporting date. The number of shares issued as part of the contingent consideration payable in 2023 will be based on a \$83.71 price per share.

Notes to Consolidated Financial Statements—(Continued)

2. SIGNIFICANT ACCOUNTING POLICIES AND PRONOUNCEMENTS

ASSETS

Fixed maturities, available-for-sale, at fair value and Fixed maturities, held-to-maturity, at amortized cost are comprised of bonds, notes and redeemable preferred stock. Fixed maturities classified as "available-for-sale" are carried at fair value. See Note 6 for additional information regarding the determination of fair value. The associated unrealized gains and losses, net of tax, and the effect on DAC, VOBA, DSI, future policy benefits, policyholders' account balances and policyholders' dividends that would result from the realization of unrealized gains and losses, are included in "Accumulated other comprehensive income (loss)" ("AOCI"). Fixed maturities that the Company has both the positive intent and ability to hold to maturity are carried at amortized cost and classified as "held-to-maturity." The purchased cost of fixed maturities is adjusted for amortization of premiums and accretion of discounts to maturity or, if applicable, call date.

Interest income, and amortization of premium and accretion of discount are included in "Net investment income" under the effective yield method. Additionally, prepayment premiums are also included in "Net investment income." For mortgage-backed and asset-backed securities, the effective yield is based on estimated cash flows, including interest rate and prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. In addition to interest rate and prepayment assumptions, cash flow estimates also vary based on other assumptions regarding the underlying collateral, including default rates and changes in value. These assumptions can significantly impact income recognition and the amount of OTTI recognized in earnings and other comprehensive income (loss) ("OCI"). For high credit quality mortgage-backed and asset-backed securities (those rated AA or above), cash flows are provided quarterly, and the amortized cost and effective yield of the securities are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost are recorded as a charge or credit to "Net investment income" in accordance with the retrospective method. For mortgage-backed and asset-backed securities rated below AA, or those for which an OTTI has been recorded, the effective yield is adjusted prospectively for any changes in estimated cash flows. See the discussion below on realized investment gains and losses for a description of the accounting for impairments.

Fixed maturities, trading, at fair value consists of fixed maturities with embedded features and assets contained within consolidated variable interest entities. Realized and unrealized gains and losses on these investments are reported in "Other income (loss)," and interest and dividend income from these investments is reported in "Net investment income."

Assets supporting experience-rated contractholder liabilities, at fair value includes invested assets that consist of fixed maturities, equity securities, short-term investments and cash equivalents, that support certain products included in the Retirement and International Businesses segments which are experience-rated, meaning that the investment results associated with these products are expected to ultimately accrue to contractholders. Realized and unrealized gains and losses for these investments are reported in "Other income (loss)." Interest and dividend income from these investments is reported in "Net investment income."

Equity securities, at fair value is comprised of common stock, mutual fund shares and non-redeemable preferred stock, which are carried at fair value. Realized and unrealized gains and losses on these investments are reported in "Other income (loss)," and dividend income is reported in "Net investment income" on the ex-dividend date.

Effective January 1, 2018, the Company adopted ASU 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Liabilities using a modified retrospective method. Adoption of this ASU impacted the Company's accounting and presentation related to equity investments. The most significant impact is that the changes in fair value of equity securities previously classified as "available-for-sale" are reported in net income within "Other income (loss)" in the Consolidated Statements of Operations. Prior to this, the changes in fair value on equity securities classified as "available-for-sale" were reported in AOCI. The impact of this standard resulted in an increase to retained earnings of \$904 million, a reduction to AOCI of \$847 million, and an increase to equity of \$57 million upon adoption on January 1, 2018.

Commercial mortgage and other loans consists of commercial mortgage loans, agricultural property loans, loans backed by residential properties, as well as certain other collateralized and uncollateralized loans. Loans backed by residential properties primarily include recourse loans held by the Company's international insurance operations. Uncollateralized loans primarily represent reverse dual currency loans and corporate loans held by the Company's international insurance operations.

Notes to Consolidated Financial Statements—(Continued)

Commercial mortgage and other loans originated and held for investment are generally carried at unpaid principal balance, net of unamortized deferred loan origination fees and expenses, and net of an allowance for losses. The Company carries certain commercial mortgage loans originated within the Company's commercial mortgage operations at fair value where the fair value option has been elected. Loans held for sale where the Company has not elected the fair value option are carried at the lower of cost or fair value. Commercial mortgage and other loans acquired, including those related to the acquisition of a business, are recorded at fair value when purchased, reflecting any premiums or discounts to unpaid principal balances. Interest income, and the amortization of the related premiums or discounts, are included in "Net investment income" under the effective yield method. Prepayment fees are also included in "Net investment income."

Impaired loans include those loans for which it is probable that amounts due will not all be collected according to the contractual terms of the loan agreement. The Company defines "past due" as principal or interest not collected at least 30 days past the scheduled contractual due date. Interest received on loans that are past due, including impaired and non-impaired loans as well as loans that were previously modified in a troubled debt restructuring, is either applied against the principal or reported as net investment income based on the Company's assessment as to the collectability of the principal. See Note 3 for additional information about the Company's past due loans.

The Company discontinues accruing interest on loans after the loans become 90 days delinquent as to principal or interest payments, or earlier when the Company has doubts about collectability. When the Company discontinues accruing interest on a loan, any accrued but uncollectible interest on the loan and other loans backed by the same collateral, if any, is charged to interest income in the same period. Generally, a loan is restored to accrual status only after all delinquent interest and principal are brought current and, in the case of loans where the payment of interest has been interrupted for a substantial period, or the loan has been modified, a regular payment performance has been established.

The Company reviews the performance and credit quality of the commercial mortgage and other loan portfolio on an on-going basis. Loans are placed on watch list status based on a predefined set of criteria and are assigned one of two categories. Loans are classified as "closely monitored" when it is determined that there is a collateral deficiency or other credit events that may lead to a potential loss of principal or interest. Loans "not in good standing" are those loans where the Company has concluded that there is a high probability of loss of principal, such as when the loan is delinquent or in the process of foreclosure. As described below, in determining the allowance for losses, the Company evaluates each loan on the watch list to determine if it is probable that amounts due will not be collected according to the contractual terms of the loan agreement.

Loan-to-value and debt service coverage ratios are measures commonly used to assess the quality of commercial mortgage loans. The loan-to-value ratio compares the amount of the loan to the fair value of the underlying property collateralizing the loan, and is commonly expressed as a percentage. Loan-to-value ratios greater than 100% indicate that the loan amount exceeds the collateral value. A loan-to-value ratio less than 100% indicates an excess of collateral value over the loan amount. The debt service coverage ratio compares a property's net operating income to its debt service payments. Debt service coverage ratios less than 1.0 times indicate that property operations do not generate enough income to cover the loan's current debt payments. A debt service coverage ratio greater than 1.0 times indicates an excess of net operating income over the debt service payments. The values utilized in calculating these ratios are developed as part of the Company's periodic review of the commercial mortgage loan and agricultural property loan portfolios, which includes an internal appraisal of the underlying collateral value. The Company's periodic review also includes a quality re-rating process, whereby the internal quality rating originally assigned at underwriting is updated based on current loan, property and market information using a proprietary quality rating system. The loan-to-value ratio is the most significant of several inputs used to establish the internal credit rating of a loan which in turn drives the allowance for losses. Other key factors considered in determining the internal credit rating include debt service coverage ratios, amortization, loan term, and estimated market value growth rate and volatility for the property type and region. See Note 3 for additional information related to the loan-to-value ratios and debt service coverage ratios related to the Company's commercial mortgage and agricultural loan portfolios.

Loans backed by residential properties and uncollateralized loans are also reviewed periodically. Each loan is assigned an internal or external credit rating. Internal credit ratings take into consideration various factors including financial ratios and qualitative assessments based on non-financial information. In cases where there are personal or third-party guarantors, the credit quality of the guarantor is also reviewed. These factors are used in developing the allowance for losses. Based on the diversity of the loans in these categories and their immateriality, the Company has not disclosed the credit quality indicators related to these loans in Note 3.

Notes to Consolidated Financial Statements—(Continued)

For those loans not reported at fair value, the allowance for losses includes a loan specific reserve for each impaired loan that has a specifically identified loss and a portfolio reserve for probable incurred but not specifically identified losses. For impaired commercial mortgage and other loans, the allowances for losses are determined based on the present value of expected future cash flows discounted at the loan's effective interest rate, or based upon the fair value of the collateral if the loan is collateral dependent. The portfolio reserves for probable incurred but not specifically identified losses in the commercial mortgage and agricultural loan portfolios consider the current credit composition of the portfolio based on an internal quality rating, as described above. The portfolio reserves are determined using past loan experience, including historical credit migration, loss probability and loss severity factors by property type. These factors are reviewed and updated as appropriate.

The allowance for losses on commercial mortgage and other loans can increase or decrease from period to period based on the factors noted above. "Realized investment gains (losses), net" includes changes in the allowance for losses and changes in value for loans accounted for under the fair value option. "Realized investment gains (losses), net" also includes gains and losses on sales, certain restructurings, and foreclosures.

When a commercial mortgage or other loan is deemed to be uncollectible, any specific valuation allowance associated with the loan is reversed and a direct write-down of the carrying amount of the loan is made. The carrying amount of the loan is not adjusted for subsequent recoveries in value.

Commercial mortgage and other loans are occasionally restructured in a troubled debt restructuring. These restructurings generally include one or more of the following: full or partial payoffs outside of the original contract terms; changes to interest rates; extensions of maturity; or additions or modifications to covenants. Additionally, the Company may accept assets in full or partial satisfaction of the debt as part of a troubled debt restructuring. When restructurings occur, they are evaluated individually to determine whether the restructuring or modification constitutes a "troubled debt restructuring" as defined by authoritative accounting guidance. If the borrower is experiencing financial difficulty and the Company has granted a concession, the restructuring, including those that involve a partial payoff or the receipt of assets in full satisfaction of the debt is deemed to be a troubled debt restructuring. Based on the Company's credit review process described above, these loans generally would have been deemed impaired prior to the troubled debt restructuring, and specific allowances for losses would have been established prior to the determination that a troubled debt restructuring has occurred.

In a troubled debt restructuring where the Company receives assets in full satisfaction of the debt, any specific valuation allowance is reversed and a direct write-down of the loan is recorded for the amount of the allowance, and any additional loss, net of recoveries, or any gain is recorded for the difference between the fair value of the assets received and the recorded investment in the loan. When assets are received in partial settlement, the same process is followed, and the remaining loan is evaluated prospectively for impairment based on the credit review process noted above. When a loan is restructured in a troubled debt restructuring, the impairment of the loan is remeasured using the modified terms and the loan's original effective yield, and the allowance for loss is adjusted accordingly. Subsequent to the modification, income is recognized prospectively based on the modified terms of the loans in accordance with the income recognition policy noted above. Additionally, the loan continues to be subject to the credit review process noted above.

In situations where a loan has been restructured in a troubled debt restructuring and the loan has subsequently defaulted, this factor is considered when evaluating the loan for a specific allowance for losses in accordance with the credit review process noted above.

See Note 3 for additional information about commercial mortgage and other loans that have been restructured in a troubled debt restructuring.

Policy loans represent funds loaned to policyholders up to the cash surrender value of the associated insurance policies and are carried at the unpaid principal balances due to the Company from the policyholders. Interest income on policy loans is recognized in "Net investment income" at the contract interest rate when earned. Policy loans are fully collateralized by the cash surrender value of the associated insurance policies.

Notes to Consolidated Financial Statements—(Continued)

Other invested assets consists of the Company's non-coupon investments in limited partnerships and limited liability companies ("LPs/LLCs"), other than operating joint ventures, as well as wholly-owned investment real estate, derivative assets and other investments. LPs/LLCs interests are accounted for using either the equity method of accounting, or at fair value with changes in fair value reported in "Other income (loss)." The Company's income from investments in LPs/LLCs accounted for using the equity method, other than the Company's investments in operating joint ventures, is included in "Net investment income." The carrying value of these investments is written down, or impaired, to fair value when a decline in value is considered to be other-than-temporary. In applying the equity method (including assessment for OTTI), the Company uses financial information provided by the investee, generally on a one to three-month lag. The Company consolidates LPs/LLCs in certain other instances where it is deemed to exercise control, or is considered the primary beneficiary of a variable interest entity. See Note 4 for additional information about VIEs.

The Company's wholly-owned investment real estate consists of real estate which the Company has the intent to hold for the production of income as well as real estate held for sale. Real estate which the Company has the intent to hold for the production of income is carried at depreciated cost less any write-downs to fair value for impairment losses and is reviewed for impairment whenever events or circumstances indicate that the carrying value may not be recoverable. Real estate held for sale is carried at the lower of depreciated cost or fair value less estimated selling costs and is not further depreciated once classified as such. An impairment loss is recognized when the carrying value of the investment real estate exceeds the estimated undiscounted future cash flows (excluding interest charges) from the investment. At that time, the carrying value of the investment real estate is written down to fair value. Decreases in the carrying value of investment real estate held for the production of income due to OTTI are recorded in "Realized investment gains (losses), net." Depreciation on real estate held for the production of income is computed using the straight-line method over the estimated useful lives of the properties and is included in "Net investment income."

Short-term investments primarily consist of highly liquid debt instruments with a maturity of twelve months or less and greater than three months when purchased, other than those debt instruments meeting this definition that are included in "Assets supporting experience-rated contractholder liabilities, at fair value." These investments are generally carried at fair value or amortized cost that approximates fair value and include certain money market investments, funds managed similar to regulated money market funds, short-term debt securities issued by government-sponsored entities and other highly liquid debt instruments.

Realized investment gains (losses) are computed using the specific identification method with the exception of some of the Company's International Businesses portfolios, where the average cost method is used. Realized investment gains and losses are generated from numerous sources, including the sales of fixed maturity securities, investments in joint ventures and limited partnerships and other types of investments, as well as adjustments to the cost basis of investments for net OTTI recognized in earnings. Realized investment gains and losses also reflect changes in the allowance for losses on commercial mortgage and other loans, fair value changes on commercial mortgage loans carried at fair value, and fair value changes on embedded derivatives and free-standing derivatives that do not qualify for hedge accounting treatment. See "Derivative Financial Instruments" below for additional information regarding the accounting for derivatives.

The Company's available-for-sale and held-to-maturity securities with unrealized losses are reviewed quarterly to identify OTTI in value. In evaluating whether a decline in value is other-than-temporary, the Company considers several factors including, but not limited to the following: (1) the extent and the duration of the decline; (2) the reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening); and (3) the financial condition of and near-term prospects of the issuer.

An OTTI is recognized in earnings for a debt security in an unrealized loss position when either (1) the Company has the intent to sell the debt security or (2) it is more likely than not the Company will be required to sell the debt security before its anticipated recovery. For all debt securities in unrealized loss positions that do not meet either of these two criteria, the Company analyzes its ability to recover the amortized cost by comparing the net present value of projected future cash flows with the amortized cost of the security. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the debt security prior to impairment. The Company may use the estimated fair value of collateral as a proxy for the net present value if it believes that the security is dependent on the liquidation of collateral for recovery of its investment. If the net present value is less than the amortized cost of the investment, an OTTI is recognized. In addition to the above-mentioned circumstances, the Company also recognizes an OTTI in earnings when a non-functional currency denominated security in an unrealized loss position due to currency exchange rates is not expected to recover in value before maturity.

Notes to Consolidated Financial Statements—(Continued)

When an OTTI of a debt security has occurred, the amount of the OTTI recognized in earnings depends on whether the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the debt security meets either of these two criteria or the unrealized losses due to changes in foreign currency exchange rates are not expected to be recovered before maturity, the OTTI recognized in earnings is equal to the entire difference between the security's amortized cost basis and its fair value at the impairment measurement date. For OTTI of debt securities that do not meet these criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the debt security and its net present value calculated as described above. Any difference between the fair value and the net present value of the debt security at the impairment measurement date is recorded in "Other comprehensive income (loss)." Unrealized gains or losses on securities for which an OTTI has been recognized in earnings is tracked as a separate component of AOCI.

The split between the amount of an OTTI recognized in "Other comprehensive income (loss)" and the net amount recognized in earnings for debt securities is driven principally by assumptions regarding the amount and timing of projected cash flows. For mortgage-backed and asset-backed securities, cash flow estimates consider the payment terms of the underlying assets backing a particular security, including interest rate and prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. In addition to interest rate and prepayment assumptions, cash flow estimates also include other assumptions regarding the underlying collateral including default rates and recoveries, which vary based on the asset type and geographic location, as well as the vintage year of the security. For structured securities, the payment priority within the tranche structure is also considered. For all other debt securities, cash flow estimates are driven by assumptions regarding probability of default and estimates regarding timing and amount of recoveries associated with a default. The Company has developed these estimates using information based on its historical experience as well as using market observable data, such as industry analyst reports and forecasts, sector credit ratings and other data relevant to the collectability of a security, such as the general payment terms of the security and the security's position within the capital structure of the issuer.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an OTTI, the impaired security is accounted for as if it had been purchased on the measurement date of the impairment. For debt securities, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods, including increases in cash flows on a prospective basis. In certain cases where there are decreased cash flow expectations, the security is reviewed for further cash flow impairments.

Unrealized investment gains and losses are also considered in determining certain other balances, including DAC, VOBA, DSI, certain future policy benefits, policyholders' account balances, policyholders' dividends and deferred tax assets or liabilities. These balances are adjusted, as applicable, for the impact of unrealized gains or losses on investments as if these gains or losses had been realized, with corresponding credits or charges included in AOCI. Each of these balances is discussed in greater detail below.

Cash and cash equivalents include cash on hand, amounts due from banks, certain money market investments, funds managed similar to regulated money market funds, other debt instruments with maturities of three months or less when purchased, other than cash equivalents that are included in "Assets supporting experience-rated contractholder liabilities, at fair value," and receivables related to securities purchased under agreements to resell (see also "Securities sold under agreements to repurchase" below). These assets are generally carried at fair value or amortized cost which approximates fair value.

Accrued investment income primarily includes accruals of interest and dividend income from investments that have been earned but not yet received.

Deferred policy acquisition costs are costs directly related to the successful acquisition of new and renewal insurance and annuity business that have been deferred to the extent such costs are deemed recoverable from future profits. Such DAC primarily includes commissions, costs of policy issuance and underwriting, and certain other expenses that are directly related to successfully negotiated contracts. In each reporting period, capitalized DAC is amortized to "Amortization of DAC," net of the accrual of imputed interest on DAC balances. DAC is subject to periodic recoverability testing. DAC, for applicable products, is adjusted for the impact of unrealized gains or losses on investments as if these gains or losses had been realized, with corresponding credits or charges included in AOCI.

For traditional participating life insurance which are included in the Closed Block, DAC is amortized over the expected life of the contracts in proportion to gross margins based on historical and anticipated future experience, which is evaluated regularly. The effect of changes in estimated gross margins on unamortized DAC is reflected in the period such estimated gross margins are revised on a retrospective basis. DAC related to non-participating traditional individual life insurance and longevity reinsurance contracts is amortized in proportion to gross premiums.

Notes to Consolidated Financial Statements—(Continued)

DAC related to universal and variable life products and fixed and variable deferred annuity products are generally deferred and amortized over the expected life of the contracts in proportion to gross profits arising principally from investment margins, mortality and expense margins, and surrender charges, based on historical and anticipated future experience, which is updated periodically. The Company uses a reversion to the mean approach for equities to derive future equity return assumptions. However, if the projected equity return calculated using this approach is greater than the maximum equity return assumption, the maximum equity return is utilized. Gross profits also include impacts from the embedded derivatives associated with certain of the optional living benefit features of variable annuity contracts, and index-linked crediting features of indexed universal life and fixed indexed annuity contracts and related hedging activities. Total gross profits include both actual gross profits and estimates of gross profits for future periods. The Company regularly evaluates and adjusts DAC balances with a corresponding charge or credit to current period earnings, representing a cumulative adjustment to all prior periods' amortization, for the impact of actual gross profits and changes in the Company's projections of estimated future gross profits. Adjustments to DAC balances include: (i) annual review of assumptions that reflect the comprehensive review of the assumptions used in estimating gross profits for future periods, (ii) quarterly adjustments for current period experience (also referred to as "experience true-up" adjustments) that reflect the impact of differences between actual gross profits for a given period and the previously estimated expected gross profits for that period, and (iii) quarterly adjustments for market performance (also referred to as "experience unlocking") that reflect the impact of changes to the Company's estimate of total gross profits to reflect actual fund performance and mark

For group annuity contracts (other than single premium group annuities), acquisition costs are generally deferred and amortized over the expected life of the contracts in proportion to gross profits. For group corporate-, bank- and trust-owned life insurance contracts, acquisition costs are generally deferred and amortized in proportion to lives insured. For single premium immediate annuities with life contingencies, single premium group annuities, including non-participating group annuity contracts, and single premium structured settlements with life contingencies, all acquisition costs are charged to expense immediately because generally all premiums are received at the inception of the contract. For funding agreement notes contracts, single premium structured settlement contracts without life contingencies, and single premium immediate annuities without life contingencies, acquisition expenses are deferred and amortized over the expected life of the contracts using the interest method. For other group life and disability insurance contracts and guaranteed investment contracts ("GICs"), acquisition costs are expensed as incurred.

For some products, policyholders can elect to modify product benefits, features, rights or coverages by exchanging a contract for a new contract or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. These transactions are known as internal replacements. If policyholders surrender traditional life insurance policies in exchange for life insurance policies that do not have fixed and guaranteed terms, the Company immediately charges to expense the remaining unamortized DAC on the surrendered policies. For other internal replacement transactions, except those that involve the addition of a nonintegrated contract feature that does not change the existing base contract, the unamortized DAC is immediately charged to expense if the terms of the new policies are not substantially similar to those of the former policies. If the new terms are substantially similar to those of the earlier policies, the DAC is retained with respect to the new policies and amortized over the expected life of the new policies. See Note 7 for additional information regarding DAC.

Value of business acquired represents identifiable intangible assets to which a portion of the purchase price in a business acquisition is attributed under the application of purchase accounting. VOBA represents an adjustment to the stated value of in-force insurance contract liabilities to present them at fair value, determined as of the acquisition date. VOBA balances are subject to recoverability testing, in the manner in which they were acquired. The Company has established a VOBA asset primarily for its acquired life insurance products, accident and health products with fixed benefits, deferred annuity contracts, and defined contribution and defined benefit businesses. As of December 31, 2019, the majority of the VOBA balance relates to the 2011 acquisition of AIG Star Life Insurance Co., Ltd, AIG Edison Life Insurance Company, and AIG Financial Assurance Japan K.K. and AIG Edison Service Co., Ltd. (collectively, the "Star and Edison Businesses".) The Company amortizes VOBA over the anticipated life of the acquired contracts using the same methodology and assumptions used to amortize DAC. The Company records amortization of VOBA in "General and administrative expenses." VOBA, for applicable products, is adjusted for the impact of unrealized gains or losses on investments as if these gains or losses had been realized, with corresponding credits or charges included in AOCI. See Note 8 for additional information regarding VOBA.

Other assets consist primarily of prepaid pension benefit costs (see Note 18), certain restricted assets, trade receivables, goodwill and other intangible assets, "right-of-use" lease assets (see "*Other liabilities*" below), DSI, the Company's investments in operating joint ventures, property and equipment, reinsurance recoverables (see "*Reinsurance*" below), and receivables resulting from sales of securities that had not yet settled at the balance sheet date.

Property and equipment are carried at cost less accumulated depreciation. Depreciation is determined using the straight-line method over the estimated useful lives of the related assets, which generally range from 3 to 40 years.

Notes to Consolidated Financial Statements—(Continued)

As a result of certain acquisitions, the Company recognizes an asset for goodwill representing the excess of cost over the net fair value of the assets acquired and liabilities assumed. Goodwill is assigned to reporting units at the date the goodwill is initially recorded. A reporting unit is an operating segment or a unit one level below the operating segment, if discrete financial information is prepared and regularly reviewed by management at that level. Once goodwill has been assigned to reporting units, it no longer retains its association with a particular acquisition, and all of the activities within a reporting unit, whether acquired or organically grown, are available to support the value of the goodwill.

The Company tests goodwill for impairment annually as of December 31 and more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Accounting guidance provides for an optional qualitative assessment for testing goodwill impairment that may allow companies to skip the quantitative two-step test. The Company performed the qualitative assessment for Assurance IQ which was acquired in October 2019. All other reporting units elected the quantitative two-step test. The first step, used to identify potential impairment, involves comparing each reporting unit's fair value to its carrying value including goodwill. If the fair value of a reporting unit exceeds its carrying value, the applicable goodwill is considered not to be impaired. If the carrying value exceeds fair value, there is an indication of a potential impairment and the second step of the test is performed to measure the amount of impairment.

The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated impairment. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, which is the excess of the fair value of the reporting unit, as determined in the first step, over the aggregate fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill in the "pro forma" business combination accounting as described above exceeds the goodwill assigned to the reporting unit, there is no impairment. If the goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded in "General and administrative expenses" for the excess. An impairment loss recognized cannot exceed the amount of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted. Management is required to make significant estimates in determining the fair value of a reporting unit including, but not limited to: projected earnings, comparative market multiples, and the risk rate at which future net cash flows are discounted.

The Company offered various types of sales inducements to policyholders related to fixed and variable deferred annuity contracts. The Company defers sales inducements and amortizes them over the expected life of the policy using the same methodology and assumptions used to amortize DAC. Sales inducement balances are subject to periodic recoverability testing. The Company records amortization of DSI in "Interest credited to policyholders' account balances." DSI, for applicable products, is adjusted for the impact of unrealized gains or losses on investments as if these gains or losses had been realized, with corresponding credits or charges included in AOCI. See Note 13 for additional information regarding sales inducements.

Identifiable intangible assets primarily include customer relationships and mortgage servicing rights and are recorded net of accumulated amortization. The Company tests identifiable intangible assets for impairment on an annual basis as of December 31 of each year or whenever events or circumstances suggest that the carrying value of an identifiable intangible asset may exceed the sum of the undiscounted cash flows expected to result from its use and eventual disposition. If this condition exists and the carrying value of an identifiable intangible asset exceeds its fair value, the excess is recognized as an impairment and is recorded as a charge against net income. Measuring intangible assets requires the use of estimates. Significant estimates include the projected net cash flow attributable to the intangible asset and the risk rate at which future net cash flows are discounted for purposes of estimating fair value, as applicable. See Note 10 for additional information regarding identifiable intangible assets.

Investments in operating joint ventures are generally accounted for under the equity method. The carrying value of these investments is written down, or impaired, to fair value when a decline in value is considered to be other-than-temporary. See Note 9 for additional information on investments in operating joint ventures.

Leases are recorded on the balance sheet as "right-of-use" assets and lease liabilities within "Other assets" and "Other liabilities" respectively. Leases are classified as either operating or finance leases and lease expense is recognized within "General and administrative expenses." As a lessee, for operating leases, total lease expense is recognized using a straight-line method. Finance leases are treated as the purchase of an asset on a financing basis. Additionally, as a lessor, for sales-type and direct financing leases, the Company derecognizes the carrying value of the leased asset that is considered to have been transferred to a lessee and records a lease receivable and residual asset ("receivable and residual" approach). See Note 11 for additional information regarding leases.

Notes to Consolidated Financial Statements—(Continued)

Separate account assets represent segregated funds that are invested for certain policyholders, pension funds and other customers. The assets consist primarily of equity securities, fixed maturities, real estate-related investments, real estate mortgage loans, short-term investments and derivative instruments and are reported at fair value. The assets of each account are legally segregated and are not subject to claims that arise out of any other business of the Company. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. The investment income and realized investment gains or losses from separate account assets generally accrue to the policyholders and are not included in the Company's results of operations. Mortality, policy administration and surrender charges assessed against the accounts are included in "Policy charges and fee income." Asset management fees charged to the accounts are included in "Asset management and service fees." Seed money that the Company invests in separate accounts is reported in the appropriate general account asset line. Investment income and realized investment gains or losses from seed money invested in separate accounts accrues to the Company and is included in the Company's results of operations. See Note 13 for additional information regarding separate account arrangements with contractual guarantees. See also "Separate account liabilities" below.

LIABILITIES

Future policy benefits liability is primarily comprised of the present value of estimated future payments to or on behalf of policyholders, where the timing and amount of payment depends on policyholder mortality or morbidity, less the present value of future net premiums. For individual traditional participating life insurance products, the mortality and interest rate assumptions applied are those used to calculate the policies' guaranteed cash surrender values. For life insurance, other than individual traditional participating life insurance, and annuity and disability products, expected mortality and morbidity are generally based on Company experience, industry data and/or other factors. Interest rate assumptions are based on factors such as market conditions and expected investment returns. Although mortality, morbidity and interest rate assumptions are "locked-in" upon the issuance of new insurance or annuity business with fixed and guaranteed terms, significant changes in experience or assumptions may require the Company to provide for expected future losses on a product by recognizing a premium deficiency. A premium deficiency exists when the liability for future policy benefits plus the present value of expected future gross premiums are determined to be insufficient to provide for expected future policy benefits and expenses. If a premium deficiency is recognized, the assumptions without a provision for the risk of adverse deviation as of the premium deficiency test date are locked-in and used in subsequent valuations. The net reserves continue to be subject to premium deficiency testing. In determining if a premium deficiency related to short-duration contracts exists, the Company considers, among other factors, anticipated investment income. Any adjustments to future policy benefit reserves related to net unrealized gains on securities classified as available-for-sale are included in AOCI. In certain instances, the policyholder liability for a particular line of business may not be deficient in the aggregate to trigger loss recognition, but the pattern of earnings may be such that profits are expected to be recognized in earlier years followed by losses in later years. In these situations, accounting standards require that an additional liability (Profits Followed by Losses or "PFL" liability) be recognized by an amount necessary to sufficiently offset the losses that would be recognized in later years. Historically, PFL liabilities have been predominantly associated with certain universal life contracts that measure GAAP reserves using a dynamic approach, and accordingly, are updated each quarter, using current in-force and market data, and as part of the annual assumption update, such that the liability as of each measurement date represents the Company's current estimate of the present value of the amount necessary to offset anticipated future losses. See Note 12 for additional information regarding future policy benefits.

The Company's liability for future policy benefits also includes a liability for unpaid claims and claim adjustment expenses. The Company does not establish claim liabilities until a loss has been incurred. However, unpaid claims and claim adjustment expenses include estimates of claims that the Company believes have been incurred but have not yet been reported as of the balance sheet date. The Company's liability for future policy benefits also includes net liabilities for guarantee benefits related to certain long-duration life and annuity contracts, which are discussed more fully in Note 13, and deferred profits.

Policyholders' account balances liability represents the contract value that has accrued to the benefit of the policyholder as of the balance sheet date. This liability is primarily associated with the account deposits, plus interest credited, less policyholder withdrawals and other charges assessed against the account balance, as applicable. These policyholders' account balances also include provision for benefits under non-life contingent payout annuities and certain unearned revenues. See Note 12 for additional information regarding policyholders' account balances.

Notes to Consolidated Financial Statements—(Continued)

Policyholders' dividends liability includes dividends payable to policyholders and the policyholder dividend obligation associated with the participating policies included in the Closed Block. The dividends payable for participating policies included in the Closed Block are determined at the end of each year for the following year by the Board of Directors of The Prudential Insurance Company of America ("PICA") based on its statutory results, capital position, ratings, and the emerging experience of the Closed Block. The policyholder dividend obligation represents amounts expected to be paid to Closed Block policyholders as an additional policyholder dividend unless otherwise offset by future Closed Block performance. Any adjustments to the policyholder dividend obligation related to net unrealized gains (losses) on securities classified as available-for-sale are included in AOCI. For additional information on the policyholder dividend obligation, see Note 15. The dividends payable for policies other than the participating policies included in the Closed Block include dividends payable in accordance with certain group and individual insurance policies.

Securities sold under agreements to repurchase represent liabilities associated with securities repurchase agreements which are used primarily to earn spread income. As part of securities repurchase agreements, the Company transfers U.S. government and government agency securities to a third-party, and receives cash as collateral. For securities repurchase agreements, the cash received is typically invested in cash equivalents, short-term investments or fixed maturities. Receivables associated with securities purchased under agreements to resell are generally reflected as cash equivalents (see also "Cash and cash equivalents" above). As part of securities resale agreements, the Company invests cash and receives as collateral U.S. government securities or other debt securities.

Securities repurchase and resale agreements that satisfy certain criteria are treated as secured borrowing or secured lending arrangements. These agreements are carried at the amounts at which the securities will be subsequently resold or reacquired, as specified in the respective transactions. For securities purchased under agreements to resell, the Company's policy is to take possession or control of the securities either directly or through a third-party custodian. These securities are valued daily and additional securities or cash collateral is received, or returned, when appropriate to protect against credit exposure. Securities to be resold are the same, or substantially the same, as the securities received. The majority of these transactions are with large brokerage firms and large banks. For securities sold under agreements to repurchase, the market value of the securities to be repurchased is monitored, and additional collateral is obtained where appropriate, to protect against credit exposure. The Company obtains collateral in an amount at least equal to 95% of the fair value of the securities sold. Securities to be repurchased are the same, or substantially the same, as those sold. The majority of these transactions are with highly rated money market funds. Income and expenses related to these transactions executed within the insurance companies used to earn spread income are reported as "Net investment income."

Cash collateral for loaned securities represent liabilities to return cash proceeds from security lending transactions. Securities lending transactions are used primarily to earn spread income. As part of securities lending transactions, the Company transfers U.S. and foreign debt and equity securities, as well as U.S. government and government agency securities, and receives cash as collateral. Cash proceeds from securities lending transactions are primarily used to earn spread income, and are typically invested in cash equivalents, short-term investments or fixed maturities. Securities lending transactions are treated as financing arrangements and are recorded at the amount of cash received. The Company obtains collateral in an amount equal to 102% and 105% of the fair value of the domestic and foreign securities, respectively. The Company monitors the market value of the securities loaned on a daily basis with additional collateral obtained as necessary. Substantially all of the Company's securities lending transactions are with large brokerage firms and large banks. Income and expenses associated with securities lending transactions used to earn spread income are reported as "Net investment income."

The Company also enters into securities lending transactions where non-cash collateral, typically Japanese government bonds, is received. The collateral received is not reported on the Company's Consolidated Statements of Financial Position. In these transactions, the Company receives a fee and obtains collateral in an amount equal to 102% and 105% of the fair value of the domestic and foreign securities, respectively. The Company monitors the market value of the securities loaned on a daily basis with additional collateral obtained as necessary. Substantially all of these transactions are with large brokerage firms and large banks. Income is reported as "Net investment income."

Income taxes liability primarily represents the net deferred tax liability and the Company's estimated taxes payable for the current year and open audit years.

The Company and its includible domestic subsidiaries file a consolidated federal income tax return that includes both life insurance companies and non-life insurance companies. Certain other domestic subsidiaries file separate tax returns. Subsidiaries operating outside the U.S. are taxed, and income tax expense is recorded, based on applicable foreign statutes. See Note 16 for a discussion of certain non-U.S. jurisdictions for which the Company assumes repatriation of earnings.

Notes to Consolidated Financial Statements—(Continued)

Items required by tax regulations to be included in the tax return may differ from the items reflected in the financial statements. As a result, the effective tax rate reflected in the financial statements may be different than the actual rate applied on the tax return. Some of these differences are permanent such as expenses that are not deductible in the Company's tax return, and some differences are temporary, reversing over time, such as valuation of insurance reserves. Temporary differences create deferred tax assets and liabilities. Deferred tax assets generally represent items that can be used as a tax deduction or credit in future years for which the Company has already recorded the tax benefit in the Company's Consolidated Statements of Operations. Deferred tax liabilities generally represent tax expense recognized in the Company's financial statements for which payment has been deferred, or expenditures for which the Company has already taken a deduction in the Company's tax return but have not yet been recognized in the Company's financial statements.

Deferred income taxes are recognized, based on enacted rates, when assets and liabilities have different values for financial statement and tax reporting purposes. The application of U.S. GAAP requires the Company to evaluate the recoverability of the Company's deferred tax assets and establish a valuation allowance if necessary to reduce the Company's deferred tax assets to an amount that is more likely than not expected to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. See Note 16 for a discussion of factors considered when evaluating the need for a valuation allowance.

The U.S. Tax Cuts and Jobs Act of 2017 ("Tax Act of 2017") includes two new tax provisions that could impact the Company's effective tax rate and cash tax payments in future periods. The Base Erosion and Anti-Abuse Tax ("BEAT") taxes modified taxable income at a rate of 10% in 2019 increasing to 12.5% in 2026 and is due if the calculated BEAT amount that is determined without the benefit of foreign and certain tax credits is greater than the regular corporate tax in any given year. In general, modified taxable income is calculated by adding back to a taxpayer's regular taxable income the amount of certain "base erosion tax benefits" with respect to payments to foreign affiliates, as well as the "base erosion percentage" of any net operating loss deductions. Final Regulations confirmed that benefit and claim payments made by our U.S. insurance business to our foreign affiliates on reinsurance assumed by the U.S. affiliates are not base erosion payments. The Global Intangible Low-Taxed Income ("GILTI") provision applies a minimum U.S. tax to earnings of consolidated foreign subsidiaries in excess of a 10% deemed return on tangible assets of foreign subsidiaries by imposing the U.S. tax rate to 50% of earnings of such foreign affiliates and provides for a partial foreign tax credit for foreign income taxes. The amount of tax in any period on GILTI can depend on annual differences between U.S. taxable income recognition rules which limit the amount of foreign tax credits that can be applied to reduce the U.S. tax on the GILTI provision. Under certain circumstances the taxable income tax return reports a net operating loss or has a loss attributable to U.S. sources of operations, the GILTI provision would operate to cause a loss of U.S. tax benefits for some or all of those losses, effectively increasing the tax on foreign earnings. The Company accounts for the effects of the BEAT and GILTI provisions as a period cost if and when incurred.

In December of 2017, Securities and Exchange Commission ("SEC") staff issued "SAB 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act" ("SAB 118"), which allowed registrants to record provisional amounts during a "measurement period" not to extend beyond one year. Under the relief provided by SAB 118, a company could recognize provisional amounts when it did not have the necessary information available, prepared or analyzed in reasonable detail to complete its accounting for the change in tax law. See Note 16 to the Consolidated Financial Statements for a discussion of provisional amounts related to the Tax Act of 2017 recorded in 2017 and adjustments to provisional amounts recorded in 2018.

U.S. GAAP prescribes a comprehensive model for how a company should recognize, measure, present, and disclose in its financial statements uncertain tax positions that a company has taken or expects to take on tax returns. The application of this guidance is a two-step process. First, the Company determines whether it is more likely than not, based on the technical merits, that the tax position will be sustained upon examination. If a tax position does not meet the more likely than not recognition threshold, the benefit of that position is not recognized in the financial statements. The second step is measurement. The Company measures the tax position as the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate resolution with a taxing authority that has full knowledge of all relevant information. This measurement considers the amounts and probabilities of the outcomes that could be realized upon ultimate settlement using the facts, circumstances, and information available at the reporting date.

Notes to Consolidated Financial Statements—(Continued)

The Company's liability for income taxes includes a liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by the Internal Revenue Service ("IRS") or other taxing jurisdictions. Audit periods remain open for review until the statute of limitations has passed. Generally, for tax years which produce net operating losses, capital losses or tax credit carryforwards ("tax attributes"), the statute of limitations does not close, to the extent of these tax attributes, until the expiration of the statute of limitations for the tax year in which they are fully utilized. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the liability for income taxes. The Company classifies all interest and penalties related to tax uncertainties as income tax expense. See Note 16 for additional information regarding income taxes.

Effective January 1, 2018, the Company adopted ASU 2018-02, *Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income (Loss)*, which allowed a reclassification from AOCI to retained earnings for stranded effects resulting from the Tax Act of 2017. The Company elected to apply the ASU subsequent to recording the adoption impacts of ASU 2016-01 as described above. As a result, the Company reclassified stranded effects resulting from the Tax Act of 2017 by increasing AOCI and decreasing retained earnings, each by \$1,653 million upon adoption on January 1, 2018. Stranded effects unrelated to the Tax Act of 2017 are generally released from AOCI when an entire portfolio of the type of item related to the stranded effect is liquidated, sold or extinguished (i.e., portfolio approach).

Short-term and long-term debt liabilities are primarily carried at an amount equal to unpaid principal balance, net of unamortized discount or premium and debt issue costs. Original-issue discount or premium and debt-issue costs are recognized as a component of interest expense over the period the debt is expected to be outstanding, using the interest method of amortization. Interest expense is generally presented within "General and administrative expenses" in the Company's Consolidated Statements of Operations. Interest expense may also be reported within "Net investment income" for certain activity, as prescribed by specialized industry guidance. Short-term debt is debt coming due in the next twelve months, including that portion of debt otherwise classified as long-term. The short-term debt caption may exclude short-term debt items for which the Company has the intent and ability to refinance on a long-term basis in the near-term. See Note 17 for additional information regarding short-term and long-term debt.

Other liabilities consist primarily of trade payables, lease liabilities (see "Other assets" above), pension and other employee benefit liabilities (see Note 18), derivative liabilities (see "Derivative Financial Instruments" below), reinsurance payables (see "Reinsurance" below), and payables resulting from purchases of securities that had not yet settled at the balance sheet date.

Notes issued by consolidated variable interest entities represent notes issued by certain asset-backed investment vehicles, primarily collateralized loan obligations ("CLOs"), which the Company is required to consolidate. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIEs. The Company has elected the fair value option for the majority of these notes, and has based the fair value on the corresponding bank loan collateral. Changes in fair value are reported in "Other income (loss)."

Separate account liabilities primarily represent the contractholder's account balance in separate account assets and to a lesser extent borrowings of the separate account, and will be equal and offsetting to total separate account assets. See also "Separate account assets" above.

Commitments and contingent liabilities are accrued if it is probable that a liability has been incurred and an amount is reasonably estimable. Management evaluates whether there are incremental legal or other costs directly associated with the ultimate resolution of the matter that are reasonably estimable and, if so, they are included in the accrual. These accruals are generally reported in "Other liabilities."

REVENUES AND BENEFITS AND EXPENSES

Insurance Revenue and Expense Recognition

Premiums from individual life products, other than universal and variable life contracts, and health insurance and long-term care products are recognized when due. When premiums are due over a significantly shorter period than the period over which benefits are provided, any gross premium in excess of the net premium (i.e., the portion of the gross premium required to provide for all expected future benefits and expenses) is generally deferred and recognized into revenue in a constant relationship to insurance in force. Benefits are recorded as an expense when they are incurred. A liability for future policy benefits is recorded when premiums are recognized using the net level premium valuation methodology.

Notes to Consolidated Financial Statements—(Continued)

Premiums from non-participating group annuities with life contingencies, single premium structured settlements with life contingencies and single premium immediate annuities with life contingencies are recognized when due. When premiums are due over a significantly shorter period than the period over which benefits are provided, any gross premium in excess of the net premium is generally deferred and recognized into revenue based on expected future benefit payments. Benefits are recorded as an expense when they are incurred. A liability for future policy benefits is recorded when premiums are recognized using the net level premium valuation methodology.

Certain individual annuity contracts provide the contractholder a guarantee that the benefit received upon death or annuitization will be no less than a minimum prescribed amount. These benefits are accounted for as insurance contracts. The Company also provides contracts with certain living benefits which are considered embedded derivatives. See Note 13 for additional information regarding these contracts and Note 6 for information regarding the valuation of these embedded derivatives.

Amounts received as payment for universal or variable group and individual life contracts, deferred fixed or variable annuities, structured settlements and other contracts without life contingencies, and participating group annuities are reported as deposits to "Policyholders' account balances" and/or "Separate account liabilities." Revenues from these contracts are reflected in "Policy charges and fee income" consisting primarily of fees assessed during the period against the policyholders' account balances for mortality and other benefit charges, policy administration charges and surrender charges. In addition to fees, the Company earns investment income from the investment of deposits in the Company's general account portfolio. Fees assessed that represent compensation to the Company for services to be provided in future periods and certain other fees are generally deferred and amortized into revenue over the life of the related contracts in proportion to estimated gross profits. Benefits and expenses for these products include claims in excess of related account balances, expenses of contract administration, interest credited to policyholders' account balances and amortization of DAC, DSI and VOBA.

Policyholders' account balances also include amounts representing the fair value of embedded derivative instruments associated with the index-linked features of certain universal life and fixed annuity products. For additional information regarding the valuation of these embedded derivatives, see Note 6.

For group life, other than universal and variable group life contracts, and disability insurance, premiums are generally recognized over the period to which the premiums relate in proportion to the amount of insurance protection provided. Claim and claim adjustment expenses are recognized when incurred.

Asset management and service fees principally includes asset-based asset management fees, which are recognized in the period in which the services are performed. In certain asset management fee arrangements, the Company is entitled to receive performance-based incentive fees when the return on assets under management exceeds certain benchmark returns or other performance targets. The Company may be required to return all, or part, of such performance-based incentive fee depending on future performance of these assets relative to performance benchmarks. The Company records performance-based incentive fee revenue when the contractual terms of the asset management fee arrangement have been satisfied and it is probable that a significant reversal in the amount of the fee will not occur. Under this principle the Company records a deferred performance-based incentive fee liability to the extent it receives cash related to the performance-based incentive fee prior to meeting the revenue recognition criteria delineated above.

Other income (loss) includes realized and unrealized gains or losses from investments classified "Fixed maturities, trading," "Assets supporting experience-rated contractholder liabilities, at fair value," "Equity securities, at fair value," and "Other invested assets" that are measured at fair value and consolidated entities that follow specialized investment company fair value accounting. "Other income (loss)" also includes gains and losses primarily related to the remeasurement of foreign currency denominated assets and liabilities, as discussed in more detail under "Foreign Currency" below.

Additionally, for digital insurance brokerage placement services provided by Assurance IQ, the Company earns both initial and renewal commissions as compensation for the placement of insurance policies with insurance carriers. At the effective date of the policy, the Company records within "Other income (loss)" the expected lifetime revenue for the initial and renewal commissions considering estimates of the timing of future policy cancelations. These estimates are reassessed each reporting period and any changes in estimates are reflected in the current period.

Notes to Consolidated Financial Statements—(Continued)

OTHER ACCOUNTING POLICIES

Share-Based Payments

The Company applies the fair value-based measurement method in accounting for share-based payment transactions with employees except for equity instruments held by employee share ownership plans. Excess tax benefits (deficits) are recorded in earnings and represent the cumulative difference between the actual tax benefit realized and the amount of deferred tax assets recorded attributable to shared-based payment transactions.

The Company accounts for non-employee stock options using the fair value method in accordance with authoritative guidance and related interpretations on accounting for equity instruments that are issued to other than employees for acquiring, or in conjunction with selling, goods or services.

Earnings Per Share

Earnings per share of Common Stock for 2019, 2018 and 2017 reflects the consolidated earnings of Prudential Financial. Basic earnings per share is computed by dividing available income attributable to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share includes the effect of all dilutive potential common shares that were outstanding during the period. See Note 20 for additional information.

Foreign Currency

The currency in which the Company prepares its financial statements (the "reporting currency") is the U.S. dollar. Assets, liabilities and results of foreign operations are recorded based on the functional currency of each foreign operation. The determination of the functional currency is based on economic facts and circumstances pertaining to each foreign operation. The local currencies of the Company's foreign operations are typically their functional currencies with the most significant exception being the Company's Japanese operations where multiple functional currencies exist.

There are two distinct processes for expressing these foreign transactions and balances in the Company's financial statements: foreign currency measurement and foreign currency translation. Foreign currency measurement is the process by which transactions in foreign currencies are expressed in the functional currency. Gains and losses resulting from foreign currency measurement are reported in current earnings in "Other income (loss)." Foreign currency translation is the process of expressing a foreign entity's functional currency financial statements in the reporting currency. Assets and liabilities of foreign operations and subsidiaries reported in currencies other than U.S. dollars are translated at the exchange rate in effect at the end of the period. Revenues, benefits and other expenses are translated at the average rate prevailing during the period. The effects of translating the statements of operations and financial position of non-U.S. entities with functional currencies other than the U.S. dollar are included, net of related qualifying hedge gains and losses and income taxes, in "Foreign currency translation adjustment," a component of AOCI.

Derivative Financial Instruments

Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices, values of securities or commodities, credit spreads, market volatility, expected returns, and liquidity. Values can also be affected by changes in estimates and assumptions, including those related to counterparty behavior and non-performance risk ("NPR") used in valuation models. Derivative financial instruments generally used by the Company include swaps, futures, forwards and options and may be exchange-traded or contracted in the over-the-counter ("OTC") market. Certain of the Company's OTC derivatives are cleared and settled through central clearing counterparties (OTC-cleared), while others are bilateral contracts between two counterparties (OTC-bilateral). Derivative positions are carried at fair value, generally by obtaining quoted market prices or through the use of valuation models.

Derivatives are used to manage the interest rate and currency characteristics of assets or liabilities and to mitigate volatility of expected non-functional currency earnings and net investments in foreign operations resulting from changes in currency exchange rates. Additionally, derivatives may be used to seek to reduce exposure to interest rate, credit, foreign currency and equity risks associated with assets held or expected to be purchased or sold, and liabilities incurred or expected to be incurred. As discussed in detail below and in Note 5, all realized and unrealized changes in fair value of derivatives are recorded in current earnings, with the exception of cash flow hedges and hedges of net investments in foreign operations. The Company may also enter into intercompany derivatives, the results of which ultimately eliminate in consolidation over the term of the instrument; however, where applicable, derivative results are included in business gross profits which may impact the pattern by which DAC and other

Notes to Consolidated Financial Statements—(Continued)

assets are amortized. Cash flows from derivatives are reported in the operating, investing, or financing activities sections in the Consolidated Statements of Cash Flows based on the nature and purpose of the derivative.

Derivatives are recorded either as assets, within "Other invested assets," or as liabilities, within "Other liabilities," except for embedded derivatives which are recorded with the associated host contract. The Company nets the fair value of all derivative financial instruments with counterparties for which a master netting arrangement has been executed.

The Company designates derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment ("fair value" hedge); (2) a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability ("cash flow" hedge); (3) a foreign currency fair value or cash flow hedge ("foreign currency" hedge); (4) a hedge of a net investment in a foreign operation; or (5) a derivative that does not qualify for hedge accounting.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship.

The Company formally documents at inception all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives designated as fair value, cash flow, or foreign currency hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. Hedges of a net investment in a foreign operation are linked to the specific foreign operation.

When a derivative is designated as a fair value hedge and is determined to be highly effective, changes in its fair value, along with changes in the fair value of the hedged asset or liability (including losses or gains on firm commitments), are reported on a net basis in the Consolidated Statements of Operations, generally in "Realized investment gains (losses), net." When swaps are used in hedge accounting relationships, periodic settlements are recorded in the same Consolidated Statements of Operations line as the related settlements of the hedged items.

When a derivative is designated as a cash flow hedge and is determined to be highly effective, changes in its fair value are recorded in AOCI until earnings are affected by the variability of cash flows being hedged (e.g., when periodic settlements on a variable-rate asset or liability are recorded in earnings). At that time, the related portion of deferred gains or losses on the derivative instrument is reclassified and reported in the Consolidated Statements of Operations line item associated with the hedged item.

When a derivative is designated as a foreign currency hedge and is determined to be highly effective, changes in its fair value are recorded either in current period earnings if the hedge transaction is a fair value hedge (e.g., a hedge of a recognized foreign currency asset or liability) or in AOCI if the hedge transaction is a cash flow hedge (e.g., a foreign currency denominated forecasted transaction). When a derivative is used as a hedge of a net investment in a foreign operation, its change in fair value is accounted for in the same manner as a translation adjustment (i.e., reported in the cumulative translation adjustment account within AOCI).

If it is determined that a derivative no longer qualifies as an effective fair value or cash flow hedge or management removes the hedge designation, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in "Realized investment gains (losses), net." In this scenario, the hedged asset or liability under a fair value hedge will no longer be adjusted for changes in fair value and the existing basis adjustment is amortized to the Consolidated Statements of Operations line associated with the asset or liability. The component of AOCI related to discontinued cash flow hedges is reclassified to the Consolidated Statements of Operations line associated with the hedged cash flows consistent with the earnings impact of the original hedged cash flows.

When hedge accounting is discontinued because the hedged item no longer meets the definition of a firm commitment, or because it is probable that the forecasted transaction will not occur by the end of the specified time period, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in "Realized investment gains (losses), net." Any asset or liability that was recorded pursuant to recognition of the firm commitment is removed from the balance sheet and recognized currently in "Realized investment gains (losses), net." Gains and losses that were in AOCI pursuant to the cash flow hedge of a forecasted transaction are recognized immediately in "Realized investment gains (losses), net."

If a derivative does not qualify for hedge accounting, all changes in its fair value, including net receipts and payments, are included in "Realized investment gains (losses), net" without considering changes in the fair value of the economically associated assets or liabilities.

Notes to Consolidated Financial Statements—(Continued)

The Company is a party to financial instruments that contain derivative instruments that are "embedded" in the financial instruments. At inception, the Company assesses whether the economic characteristics of the embedded instrument are clearly and closely related to the economic characteristics of the remaining component of the financial instrument (i.e., the host contract) and whether a separate instrument with the same terms as the embedded instrument would meet the definition of a derivative instrument. When it is determined that (1) the embedded instrument possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded instrument qualifies as an embedded derivative that is separated from the host contract, carried at fair value, and changes in its fair value are included in "Realized investment gains (losses), net." For certain financial instruments that contain an embedded derivative that otherwise would need to be bifurcated and reported at fair value, the Company may elect to carry the entire instrument at fair value and report it within "Other invested assets" or "Other liabilities."

Reinsurance

For each of its reinsurance contracts, the Company determines if the contract provides indemnification against loss or liability relating to insurance risk in accordance with applicable accounting standards. The Company reviews all contractual features, particularly those that may limit the amount of insurance risk to which the reinsurer is subject or features that delay the timely reimbursement of claims.

The Company participates in reinsurance arrangements in various capacities as either the ceding entity or as the reinsurer (i.e., assuming entity). See Note 14 for additional information about the Company's reinsurance arrangements. Reinsurance assumed business is generally accounted for consistent with direct business. Amounts currently recoverable under reinsurance agreements are included in "Other assets" and amounts payable are included in "Other liabilities." Revenues and benefits and expenses include amounts assumed under reinsurance agreements and are reflected net of reinsurance ceded.

Reinsurance ceded arrangements do not discharge the Company as the primary insurer. Ceded balances would represent a liability of the Company in the event the reinsurers were unable to meet their obligations to the Company under the terms of the reinsurance agreements. Reinsurance premiums, commissions, expense reimbursements, benefits and reserves related to reinsured long-duration contracts under coinsurance arrangements are accounted for over the life of the underlying reinsured contracts using assumptions consistent with those used to account for the underlying contracts. Coinsurance arrangements contrast with the Company's yearly renewable term arrangements, where only mortality risk is transferred to the reinsurer and premiums are paid to the reinsurer to reinsure that risk. The mortality risk that is reinsured under yearly renewable term arrangements represents the difference between the stated death benefits in the underlying reinsured contracts and the corresponding reserves or account value carried by the Company on those same contracts. The premiums paid to the reinsurer are based upon negotiated amounts, not on the actual premiums paid by the underlying contract holders to the Company. As yearly renewable term arrangements are usually entered into by the Company with the expectation that the contracts will be in force for the lives of the underlying policies, they are considered to be long-duration reinsurance contracts. The cost of reinsurance for universal life products is generally recognized based on the gross assessments of the underlying direct policies. The cost of reinsurance related to short-duration reinsurance contracts is accounted for over the reinsurance contract period.

If the Company determines that a reinsurance agreement does not expose the reinsurer to a reasonable possibility of a significant loss from insurance risk, the Company records the agreement using the deposit method of accounting. Deposits received are included in "Other liabilities" and deposits made are included in "Other assets". As amounts are paid or received, consistent with the underlying contracts, the deposit assets or liabilities are adjusted. Interest on such deposits is recorded as "Other income (loss)" or "General and administrative expenses", as appropriate.

Accounting for Certain Reinsurance Contracts in the Individual Life Business

In 2017, the Company recognized a charge of \$237 million in the Individual Life segment, reflecting a change to a preferable accounting method for estimating reinsurance cash flows associated with universal life products and reflecting these cash flows in the financial statements. Under the previous method of accounting, with the exception of recoveries pertaining to no lapse guarantees, reinsurance cash flows (e.g., premiums and recoveries) were generally recognized as they occurred. Under the new method, the expected reinsurance cash flows are recognized more ratably over the life of the underlying reinsured policies. In conjunction with this change, the way in which reinsurance is reflected in estimated gross profits used for the amortization of unearned revenue reserves, DAC and VOBA was also revised. The change represents a change in accounting estimate effected by

Notes to Consolidated Financial Statements—(Continued)

a change in accounting principle and is included within the Company's annual reviews and update of assumptions and other refinements.

RECENT ACCOUNTING PRONOUNCEMENTS

Changes to U.S. GAAP are established by the Financial Accounting Standards Board ("FASB") in the form of Accounting Standards Updates ("ASUs") to the FASB Accounting Standards Codification ("ASC"). The Company considers the applicability and impact of all ASUs. ASUs listed below include those that have been adopted during the current fiscal year and/or those that have been issued but not yet adopted as of December 31, 2019, and as of the date of this filing. ASUs not listed below were assessed and determined to be either not applicable or not material.

Notes to Consolidated Financial Statements—(Continued)

ASUs adopted during the year ended December 31, 2019

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2016-02, Leases (Topic 842)	This ASU requires lessees to recognize assets and liabilities from all outstanding lease contracts on the balance sheet (with limited exception). Specifically, lessees are required to record on balance sheet "right-of-use" assets and related liabilities to make operating or finance lease payments. Lessees are required to record single lease expenses on a straight-line basis for operating leases, and interest and amortization expenses for finance leases. For lessors, the standard modifies classification criteria and accounting for sales-type and direct financing leases and requires a lessor to derecognize the carrying value of the leased asset that is considered to have been transferred to a lessee and record a lease receivable and residual asset ("receivable and residual" approach). The standard also eliminates the real estate specific provisions of existing Topic 840, Leases, and requires additional disclosures.	January 1, 2019 using the modified retrospective method with a cumulative effect adjustment as of the earliest period presented. The Company elected the package of practical expedients permitted under the transition guidance which eliminated the need to reassess: (a) whether any existing contracts are, or contain, leases; (b) the lease classification for any existing leases (i.e., all existing lessee arrangements that were classified as operating leases before are now classified as operating leases, and all existing lessee arrangements that were classified as capital leases before are now classified as finance leases); and (c) initial direct costs for any existing leases. The Company did not elect the practical expedient, which may be applied separately, to use hindsight in determining the lease term and in assessing impairment of the Company's "right-of-use assets."	Adoption of the ASU resulted in the recording of "right-of-use" assets and lease liabilities related to existing operating leases of approximately \$600 million as of January 1, 2019 on the Consolidated Financial Statements. Adoption of the standard also resulted in additional required disclosures. See Note 11 for additional information.
ASU 2017-08, Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20) Premium Amortization on Purchased Callable Debt Securities	This ASU requires certain premiums on callable debt securities to be amortized to the earliest call date.	January 1, 2019 using the modified retrospective method which included cumulative effect adjustment on the balance sheet as of the beginning of the fiscal year of adoption.	Adoption of the ASU did not have a significant impact on the Consolidated Financial Statements and Notes to the Consolidated Financial Statements. The impact of the cumulative effect adjustment to retained earnings was immaterial.
ASU 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities	This ASU makes targeted changes to the existing hedge accounting model to better portray the economics of an entity's risk management activities and to simplify the use of hedge accounting. The ASU eliminates separate measurement and recording of hedge ineffectiveness. It requires entities to present the earnings effect of the hedging instrument in the same income statement line item in which the hedged item is reported and also requires expanded disclosures.	January 1, 2019 using the modified retrospective method which included cumulative effect adjustment on the balance sheet as of the beginning of the fiscal year of adoption.	Adoption of the ASU did not have a significant impact on the Consolidated Financial Statements and Notes to the Consolidated Financial Statements. The impact of the cumulative effect adjustment to retained earnings and accumulated other comprehensive income (loss) ("AOCI") related to ineffectiveness of the hedge instruments outstanding at the date of adoption was immaterial. See Note 5 for additional required disclosures.

Notes to Consolidated Financial Statements—(Continued)

ASU issued but not yet adopted as of December 31, 2019—ASU 2018-12

ASU 2018-12, Financial Services—Insurance (Topic 944): Targeted Improvements to the Accounting for Long-Duration Contracts, was issued by the FASB on August 15, 2018 and is expected to have a significant impact on the Consolidated Financial Statements and Notes to the Consolidated Financial Statements. In October 2019, the FASB issued ASU 2019-09, Financial Services - Insurance (Topic 944): Effective Date to affirm its decision to defer the effective date of ASU 2018-12 to January 1, 2022 (with early adoption permitted), representing a one year extension from the original effective date of January 1, 2021. This ASU will impact, at least to some extent, the accounting and disclosure requirements for all long-duration insurance and investment contracts issued by the Company. Outlined below are four key areas of change, although there are other less significant changes not noted below. In addition to the impacts to the balance sheet upon adoption, the Company also expects an impact to how earnings emerge thereafter.

Notes to Consolidated Financial Statements—(Continued)

ASU 2018-12 Amended Topic	Description	Method of adoption	Effect on the financial statements or other significant matters
Cash flow assumptions used to measure the liability for future policy benefits for non-participating traditional and limited-pay insurance products	Requires an entity to review, and if necessary, update the cash flow assumptions used to measure the liability for future policy benefits, for both changes in future assumptions and actual experience, at least annually using a retrospective update method with a cumulative catch-up adjustment recorded in a separate line item in the Consolidated Statements of Operations.	An entity may choose one of two adoption methods for the liability for future policy benefits: (1) a modified retrospective transition method whereby the entity will apply the amendments to contracts in force as of the beginning of the earliest period presented on the basis of their existing carrying amounts, adjusted for the removal of any related amounts in AOCI or (2) a full retrospective transition method.	The options for method of adoption and the impacts of such methods are under assessment.
Discount rate assumption used to measure the liability for future policy benefits for non-participating traditional and limited-pay insurance products	Requires discount rate assumptions to be based on an upper-medium grade fixed income instrument yield and will be required to be updated each quarter with the impact recorded through OCI.	As noted above, an entity may choose either a modified retrospective transition method or full retrospective transition method for the liability for future policy benefits. Under either method, for balance sheet remeasurement purposes, the liability for future policy benefits will be remeasured using current discount rates as of the beginning of the earliest period presented with the impact recorded as a cumulative effect adjustment to AOCI.	Upon adoption, under either transition method, there will be an adjustment to AOCI as a result of remeasuring in-force contract liabilities using current uppermedium grade fixed income instrument yields. The adjustment upon adoption will largely reflect the difference between the discount rate locked-in at contract inception versus current discount rates at transition. The magnitude of such adjustment is currently being assessed.
Amortization of deferred acquisition costs (DAC) and other balances	Requires DAC and other balances, such as unearned revenue reserves and DSI, to be amortized on a constant level basis over the expected term of the related contract, independent of expected profitability.	An entity may apply one of two adoption methods: (1) a modified retrospective transition method whereby the entity will apply the amendments to contracts in force as of the beginning of the earliest period presented on the basis of their existing carrying amounts, adjusted for the removal of any related amounts in AOCI or (2) if an entity chooses a full retrospective transition method for its liability for future policy benefits, as described above, it is required to also use a retrospective transition method for DAC and other balances.	The options for method of adoption and the impacts of such methods are under assessment. Under the modified retrospective transition method, the Company would not expect a significant impact to the balance sheet, other than the impact of the removal of any related amounts in AOCI.
Market Risk Benefits	Requires an entity to measure all market risk benefits (e.g., living benefit and death benefit guarantees associated with variable annuities) at fair value, and record market risk benefit assets and liabilities separately on the Consolidated Statements of Financial Position. Changes in fair value of market risk benefits are recorded in net income, except for the portion of the change that is attributable to changes in an entity's NPR which is recognized in OCI.	An entity shall adopt the guidance for market risk benefits using the retrospective transition method, which includes a cumulative effect adjustment on the balance sheet as of the earliest period presented. An entity shall maximize the use of relevant observable information and minimize the use of unobservable information in determining the balance of the market risk benefits upon adoption.	Upon adoption, the Company expects an impact to retained earnings for the difference between the fair value and carrying value of benefits not currently measured at fair value (e.g., guaranteed minimum death benefits on variable annuities) and an impact from reclassifying the cumulative effect of changes in NPR from retained earnings to AOCI. The magnitude of such adjustments is currently being assessed.
		180	

Notes to Consolidated Financial Statements—(Continued)

Other ASUs issued but not yet adopted as of December 31, 2019

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments	This ASU provides a new current expected credit loss model to account for credit losses on certain financial assets and off-balance sheet exposures (e.g., loans held for investment, debt securities held-to-maturity, reinsurance receivables, net investments in leases and loan commitments). The model requires an entity to estimate lifetime credit losses related to such financial assets and exposures based on relevant information about past events, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. The standard also modifies the current OTTI standard for available-for-sale debt securities to require the use of an allowance rather than a direct write down of the investment, and replaces the existing standard for purchased credit deteriorated loans and debt securities.	January 1, 2020 using the modified retrospective method which will include a cumulative effect adjustment on the balance sheet as of the beginning of the fiscal year of adoption. However, prospective application is required for purchased credit deteriorated assets previously accounted for under ASC 310-30 and for debt securities for which an OTTI was recognized prior to the date of adoption. Early adoption is permitted beginning January 1, 2019.	Adoption of this guidance will result in 1) the recognition of an allowance for credit losses based on the current expected credit loss model on financial assets carried at amortized cost and certain off-balance sheet credit exposures; and 2) related adjustments to retained earnings. The cumulative effect associated with the adoption of this standard is expected to reduce retained earnings by approximately \$100 million. This impact is attributable to an increase of \$152 million in the allowance for losses (primarily related to mortgage loans) reduced by \$52 million related to offsets for deferred tax liability, policyholders' dividends and deferred policy acquisition costs.
ASU 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment	This ASU simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test, which measures a goodwill impairment by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of the goodwill. Under the ASU, a goodwill impairment should be recorded for the amount by which the carrying amount of a reporting unit exceeds its fair value (capped by the total amount of goodwill allocated to the reporting unit).	January 1, 2020 using the prospective method. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017.	The Company does not expect the adoption of the ASU to have a significant impact on the Consolidated Financial Statements and Notes to the Consolidated Financial Statements.
3. INVESTMENTS			
Fixed Maturity Securities			

The following tables set forth the composition of fixed maturity securities (excluding investments classified as trading), as of the dates indicated:

⁽¹⁾ As of December 31, 2018, there was \$13 million of fair value and less than \$1 million of gross unrealized losses, which are not reflected in AOCI, on securities classified as held-to-maturity.

Notes to Consolidated Financial Statements—(Continued)

As of December 31, 2019 and 2018, the gross unrealized losses on fixed maturity securities were composed of \$973 million and \$5,391 million, respectively, related to "1" highest quality or "2" high quality securities based on the National Association of Insurance Commissioners ("NAIC") or equivalent rating and \$342 million and \$1,000 million, respectively, related to other than high or highest quality securities based on NAIC or equivalent rating. As of December 31, 2019, the \$878 million of gross unrealized losses of twelve months or more were concentrated in the Company's corporate securities within the energy, consumer non-cyclical and finance sectors. As of December 31, 2018, the \$3,283 million of gross unrealized losses of twelve months or more were concentrated in U.S. government bonds and in the Company's corporate securities within the utility, consumer non-cyclical and finance sectors. In accordance with its policy described in Note 2, the Company concluded that an adjustment to earnings for OTTI for these fixed maturity securities was not warranted at either December 31, 2019 or 2018. These conclusions were based on a detailed analysis of the underlying credit and cash flows on each security. Gross unrealized losses are primarily attributable to general credit spread widening, increases in interest rates and foreign currency exchange rate movements. As of December 31, 2019, the Company did not intend to sell these securities, and it was not more likely than not that the Company would be required to sell these securities before the anticipated recovery of the remaining amortized cost basis.

The following table sets forth the amortized cost and fair value of fixed maturities by contractual maturities, as of the date indicated:

				Decemb	er 31,	, 2019		
		Availabl	le-for	-Sale		Held-to-	rity	
	A	Amortized Cost		Fair Value		Amortized Cost		Fair Value
				(in m	illion	is)		
Fixed maturities:								
Due in one year or less	\$	12,287	\$	12,816	\$	29	\$	29
Due after one year through five years		51,942		55,160		114		116
Due after five years through ten years		68,965		75,506		592		657
Due after ten years(1)		182,291		215,665		888		1,169
Asset-backed securities		13,067		13,174		0		0
Commercial mortgage-backed securities		14,978		15,574		0		0
Residential mortgage-backed securities		3,044		3,201		310		331
Total	\$	346,574	\$	391,096	\$	1,933	\$	2,302

⁽¹⁾ Excludes available-for-sale notes with amortized cost of \$4,751 million (fair value, \$4,757 million) and held-to-maturity notes with amortized cost of \$4,998 million (fair value, \$5,401 million), which have been offset with the associated debt under a netting agreement.

Actual maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations. Asset-backed, commercial mortgage-backed and residential mortgage-backed securities are shown separately in the table above, as they do not have a single maturity date.

The following table sets forth the sources of fixed maturity proceeds and related investment gains (losses), as well as losses on impairments of fixed maturities, for the periods indicated:

Notes to Consolidated Financial Statements—(Continued)

Equity securities	1,465		1,790		1,378		1,460
Total assets supporting experience-rated contractholder liabilities(4)	\$ 20,646	\$	21,597	\$	21,299	\$	21,254

⁽¹⁾ Includes publicly-traded agency pass-through securities and collateralized mortgage obligations.

The net change in unrealized gains (losses) from assets supporting experience-rated contractholder liabilities still held at period end, recorded within "Other income (loss)," was \$996 million, \$(778) million and \$300 million during the years ended December 31, 2019, 2018 and 2017, respectively.

Equity Securities

The net change in unrealized gains (losses) from equity securities still held at period end, recorded within "Other income (loss)," was \$943 million and \$(1,157) million during the years ended December 31, 2019 and 2018, respectively. The net change in unrealized gains (losses) from equity securities still held at period end, recorded within "Other comprehensive income (loss)," was \$(494) million during the year ended December 31, 2017.

Concentrations of Financial Instruments

The Company monitors its concentrations of financial instruments and mitigates credit risk by maintaining a diversified investment portfolio which limits exposure to any single issuer.

As of the dates indicated, the Company's exposure to concentrations of credit risk of single issuers greater than 10% of the Company's equity included securities of the U.S. government and certain U.S. government agencies and securities guaranteed by the U.S. government, as well as the securities disclosed below:

⁽²⁾ Includes collateralized loan obligations, auto loans, education loans, home equity and other asset types. Collateralized loan obligations at fair value were \$1,060 million and \$1,028 million as of December 31, 2019 and 2018, respectively, all of which were rated AAA.

⁽³⁾ As a percentage of amortized cost, 94% and 93% of the portfolio was considered high or highest quality based on NAIC or equivalent ratings, as of December 31, 2019 and 2018, respectively.

⁽⁴⁾ As a percentage of amortized cost, 77% and 78% of the portfolio consisted of public securities as of December 31, 2019 and 2018, respectively.

⁽¹⁾ As of December 31, 2019 and 2018, real estate held through direct ownership had mortgage debt of \$537 million and \$776 million, respectively.

In certain investment structures, the Company's investment management business invests with other co-investors in an investment fund referred to as a feeder fund. In these structures, the invested capital of several feeder funds is pooled together and used to purchase ownership interests in another fund, referred to as a master fund. The master fund utilizes this invested capital and, in certain cases, other debt financing, to purchase various classes of assets on behalf of its investors. Specialized industry accounting for investment companies calls for the feeder fund to reflect its investment in the master fund as a single net asset equal to its proportionate share of the net assets of the master fund, regardless of its level of interest in the master fund. In cases where the Company consolidates the feeder fund, it retains the feeder fund's net asset presentation and reports the consolidated feeder fund's proportionate share of the net assets of the master fund in "Other invested assets," with any unaffiliated investors' non-controlling interest in the feeder fund reported in "Other liabilities" or "Noncontrolling interests." The consolidated feeder funds' investments in these master funds, reflected on this net asset basis, totaled \$428 million and \$349 million as of December 31, 2019 and 2018, respectively. There was \$230 million and \$199 million of unaffiliated interest in the consolidated feeder funds as of December 31, 2019 and 2018, respectively, and the master funds had gross assets of \$89,313 million and \$122,376 million, respectively, and gross liabilities of \$86,471 million and \$119,697 million, respectively, which are not included on the Company's balance sheet.

Equity Method Investments

The following tables set forth summarized combined financial information for significant LP/LLC interests accounted for under the equity method, including the Company's investments in operating joint ventures that are described in more detail in Note 9. Changes between periods in the tables below reflect changes in the activities within the operating joint ventures and LPs/LLCs, as well as changes in the Company's level of investment in such entities.

⁽²⁾ Primarily includes strategic investments made by investment management operations, leveraged leases and member and activity stock held in the Federal Home Loan Banks of New York and Boston. For additional information regarding the Company's holdings in the Federal Home Loan Banks of New York and Boston, see Note 17.

Notes to Consolidated Financial Statements—(Continued)

In the normal course of its business activities, the Company accepts collateral that can be sold or repledged. The primary sources of this collateral are securities in customer accounts, securities purchased under agreements to resell and postings of collateral from OTC derivative counterparties. The fair value of this collateral was approximately \$7,729 million as of December 31, 2019 (the largest components of which included \$1,012 million of securities and \$6,717 million of cash from OTC derivative counterparties) and \$5,309 million as of December 31, 2018 (the largest components of which included \$986 million of securities and \$4,323 million of cash from OTC derivative counterparties). A portion of the aforementioned securities, for both periods, had either been sold or repledged.

Assets on Deposit, Held in Trust, and Restricted as to Sale

The following table provides assets on deposit, assets held in trust, and securities restricted as to sale, as of the dates indicated:

	 Decem	ber 31,	
	 2019		2018
	(in mi	llions)	
Assets on deposit with governmental authorities or trustees	\$ 30	\$	27
Assets held in voluntary trusts(1)	58		609
Assets held in trust related to reinsurance and other agreements(2)	14,897		13,259
Securities restricted as to sale(3)	36		40
Total assets on deposit, assets held in trust and securities restricted as to sale	\$ 15,021	\$	13,935

- (1) Represents assets held in voluntary trusts established primarily to fund guaranteed dividends to certain policyholders and to fund certain employee benefits.
- (2) Represents assets held in trust related to reinsurance agreements excluding reinsurance agreements between wholly-owned subsidiaries. Assets valued at \$21.7 billion and \$16.1 billion were held in trust related to reinsurance agreements between wholly-owned subsidiaries as of December 31, 2019 and 2018, respectively.
- (3) Includes member and activity stock associated with memberships in the Federal Home Loan Banks of New York and Boston.

4. VARIABLE INTEREST ENTITIES

In the normal course of its activities, the Company enters into relationships with various special-purpose entities and other entities that are deemed to be VIEs. A VIE is an entity that either (1) has equity investors that lack certain essential characteristics of a controlling financial interest (including the ability to control activities of the entity, the obligation to absorb the entity's expected losses and the right to receive the entity's expected residual returns) or (2) lacks sufficient equity to finance its own activities without financial support provided by other entities, which in turn would be expected to absorb at least some of the expected losses of the VIE.

The Company is the primary beneficiary if the Company has (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant. If the Company determines that it is the VIE's primary beneficiary, it consolidates the VIE.

Consolidated Variable Interest Entities

The Company is the investment manager of certain asset-backed investment vehicles, commonly referred to as CLOs, and certain other vehicles for which the Company earns fee income for investment management services. The Company may sell or syndicate investments through these vehicles, principally as part of the strategic investing activity of the Company's investment management businesses. Additionally, the Company may invest in securities issued by these vehicles. The Company is also the investment manager of certain investment structures whose beneficial interests are wholly-owned by consolidated subsidiaries.

The Company has analyzed these relationships and determined that for certain CLOs and other investment structures it is the primary beneficiary and consolidates these entities. This analysis includes a review of (1) the Company's rights and responsibilities as investment manager and (2) variable interests (if any) held by the Company. The assets of these VIEs are restricted and must be used first to settle liabilities of the VIE. The Company is not required to provide, and has not provided, material financial or other support to any of these VIEs.

Notes to Consolidated Financial Statements—(Continued)

Additionally, the Company is the primary beneficiary of certain VIEs in which the Company has invested, as part of its investment activities, but for which it is not the investment manager. These include structured investments issued by a VIE that manages yen-denominated investments coupled with cross-currency coupon swap agreements thereby creating synthetic dual currency investments. The Company's involvement in the structuring of these investments combined with its economic interest indicates that the Company is the primary beneficiary. The Company has not provided material financial support or other support that was not contractually required to these VIEs.

The table below reflects the carrying amount and balance sheet caption in which the assets and liabilities of consolidated VIEs are reported. The liabilities primarily comprise obligations under debt instruments issued by the VIEs. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIEs.

Notes issued by consolidated VIEs(2)	1,274		955		0		0	
Total liabilities of consolidated VIEs	\$ 1,578	\$	1,250	\$	13	\$	17	

⁽¹⁾ Total assets of consolidated VIEs reflect \$2,668 million and \$2,013 million as of December 31, 2019 and 2018, respectively, related to VIEs whose beneficial interests are wholly-owned by consolidated subsidiaries.

Unconsolidated Variable Interest Entities

The Company has determined that it is not the primary beneficiary of certain VIEs for which it is the investment manager. These VIEs consist primarily of CLOs and investment funds for which the Company has determined that it is not the primary beneficiary as it does not have both (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant. The Company's maximum exposure to loss resulting from its relationship with unconsolidated VIEs for which it is the investment manager is limited to its investment in the VIEs, which was \$1,021 million and \$836 million at December 31, 2019 and 2018, respectively. These investments are reflected in "Fixed maturities, available-for-sale," "Fixed maturities, trading," "Equity securities" and "Other invested assets." There are no liabilities associated with these unconsolidated VIEs on the Company's Consolidated Statements of Financial Position.

⁽²⁾ Recourse is limited to the assets of the respective VIE and does not extend to the general credit of the Company. As of December 31, 2019, the maturities of these obligations were between 4 and 9 years.

Notes to Consolidated Financial Statements—(Continued)

In the normal course of its activities, the Company will invest in LPs/LLCs which include hedge funds, private equity funds and real estate-related funds and may or may not be VIEs. The Company's maximum exposure to loss on these investments, both VIEs and non-VIEs, is limited to the amount of its investment. The Company has determined that it is not required to consolidate these entities because either (1) it does not control them or (2) it does not have the obligation to absorb losses of these entities that could be potentially significant to the entities or the right to receive benefits from the entities that could be potentially significant. The Company classifies these investments as "Other invested assets" and its maximum exposure to loss associated with these entities was \$11,157 million and \$9,841 million as of December 31, 2019 and 2018, respectively.

In addition, in the normal course of its activities, the Company will invest in structured investments including VIEs for which it is not the investment manager. These structured investments typically invest in fixed income investments and are managed by third parties and include asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities. The Company's maximum exposure to loss on these structured investments, both VIEs and non-VIEs, is limited to the amount of its investment. See Note 3 for details regarding the carrying amounts and classification of these assets. The Company has not provided material financial or other support that was not contractually required to these structures. The Company has determined that it is not the primary beneficiary of these structures due to the fact that it does not control these entities.

5. DERIVATIVE INSTRUMENTS

Types of Derivative Instruments and Derivative Strategies

Interest Rate Contracts

Interest rate swaps, options and futures are used by the Company to reduce risks from changes in interest rates, manage interest rate exposures arising from mismatches between assets and liabilities and to hedge against changes in their values it owns or anticipates acquiring or selling.

Swaps may be attributed to specific assets or liabilities or to a portfolio of assets or liabilities. Under interest rate swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed upon notional principal amount.

The Company also uses interest rate swaptions, caps, and floors to manage interest rate risk. A swaption is an option to enter into a swap with a forward starting effective date. The Company pays a premium for purchased swaptions and receives a premium for written swaptions. In an interest rate cap, the buyer receives payments at the end of each period in which the interest rate exceeds the agreed strike price. Similarly, in an interest rate floor, the buyer receives payments at the end of each period in which the interest rate is below the agreed strike price. Swaptions, caps and floors are included in interest rate options.

In standardized exchange-traded interest rate futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the daily market values of underlying referenced investments. The Company enters into exchange-traded futures with regulated futures commission's merchants who are members of a trading exchange.

Equity Contracts

Equity options, total return swaps, and futures are used by the Company to manage its exposure to the equity markets which impacts the value of assets and liabilities it owns or anticipates acquiring or selling.

Equity index options are contracts which will settle in cash based on differentials in the underlying indices at the time of exercise and the strike price. The Company uses combinations of purchases and sales of equity index options to hedge the effects of adverse changes in equity indices within a predetermined range.

Total return swaps are contracts whereby the Company agrees with counterparties to exchange, at specified intervals, the difference between the return on an asset (or market index) and London Inter-Bank Offered Rate ("LIBOR") plus an associated funding spread based on a notional amount. The Company generally uses total return swaps to hedge the effect of adverse changes in equity indices.

In standardized exchange-traded equity futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the daily market values of underlying referenced equity indices. The Company enters into exchange-traded futures with regulated futures commission's merchants who are members of a trading exchange.

Foreign Exchange Contracts

Notes to Consolidated Financial Statements—(Continued)

Currency derivatives, including currency futures, options, forwards and swaps, are used by the Company to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell, and to hedge the currency risk associated with net investments in foreign operations and anticipated earnings of its foreign operations.

Under currency forwards, the Company agrees with counterparties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. As noted above, the Company uses currency forwards to mitigate the impact of changes in currency exchange rates on U.S. dollar-equivalent earnings generated by certain of its non-U.S. businesses, primarily its international insurance and investment operations. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. dollar-denominated earnings are expected to be generated.

Under currency swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party.

Credit Contracts

The Company writes credit default swaps to gain exposure similar to investment in public fixed maturity cash instruments. With these derivatives the Company sells credit protection on a single name reference, or certain index reference, and in return receives a quarterly premium. This premium or credit spread generally corresponds to the difference between the yield on the referenced name (or an index's referenced names) public fixed maturity cash instruments and swap rates, at the time the agreement is executed. If there is an event of default by the referenced name or one of the referenced names in the index, as defined by the agreement, then the Company is obligated to pay the referenced amount of the contract to the counterparty and receive in return the referenced defaulted security or similar security or (in the case of a credit default index) pay the referenced amount less the auction recovery rate. See credit derivatives section for further discussion of guarantees. In addition to selling credit protection, the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company's investment portfolio.

Other Contracts

"To Be Announced" ("TBA") Forward Contracts. The Company uses TBA forward contracts to gain exposure to the investment risk and return of mortgage-backed securities. TBA transactions can help the Company enhance the return on its investment portfolio, and can provide a more liquid and cost-effective method of achieving these goals than purchasing or selling individual mortgage-backed pools. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date. Additionally, pursuant to the Company's mortgage dollar roll program, TBAs or mortgage-backed securities are transferred to counterparties with a corresponding agreement to repurchase them at a future date. These transactions do not qualify as secured borrowings and are accounted for as derivatives.

Loan Commitments. In its mortgage operations, the Company enters into commitments to fund commercial mortgage loans at specified interest rates and other applicable terms within specified periods of time. These commitments are legally binding agreements to extend credit to a counterparty. Loan commitments for loans that will be held for sale are recognized as derivatives and recorded at fair value. The determination of the fair value of loan commitments accounted for as derivatives considers various factors including, among others, terms of the related loan, the intended exit strategy for the loans based upon either securitization valuation models or investor purchase commitments, prevailing interest rates, origination income or expense, and the value of service rights. Loan commitments that relate to the origination of mortgage loans that will be held for investment are not accounted for as derivatives and accordingly are not recognized in the Company's financial statements. See Note 23 for additional information.

Embedded Derivatives. The Company sells certain products (for example, variable annuities) which may include guaranteed benefit features that are accounted for as embedded derivatives. These embedded derivatives are marked to market through "Realized investment gains (losses), net" based on the change in value of the underlying contractual guarantees, which are determined using valuation models. The Company maintains a portfolio of derivative instruments that is intended to offset certain risks related to the above products' features. The derivatives may include, but are not limited to equity options, equity futures, total return swaps, interest rate swaptions, caps, floors and other instruments.

Notes to Consolidated Financial Statements—(Continued)

Synthetic Guarantees. The Company sells synthetic GICs, through both full service and investment-only sales channels, to investment vehicles primarily used by qualified defined contribution pension plans. The synthetic GICs are issued in respect of assets that are owned by the trustees of such plans, who invest the assets according to the contract terms agreed to with the Company. The contracts establish participant balances and credit interest thereon. The participant balances are supported by the underlying assets. In connection with certain participant-initiated withdrawals, the contract guarantees that after all underlying assets are liquidated, any remaining participant balances will be paid by the Company. Under U.S. GAAP, these contracts are accounted for as derivatives and recorded at fair value.

Primary Risks Managed by Derivatives

The table below provides a summary of the gross notional amount and fair value of derivatives contracts by the primary underlying risks, excluding embedded derivatives and associated reinsurance recoverables. Many derivative instruments contain multiple underlying risks. The fair value amounts below represent the value of derivative contracts prior to taking into account the netting effects of master netting agreements and cash collateral. This netting impact results in total derivative assets of \$867 million and \$1,148 million as of December 31, 2019 and 2018, respectively, and total derivative liabilities of \$831 million and \$127 million as of December 31, 2019 and 2018, respectively, reflected in the Consolidated Statements of Financial Position.

^{(1) &}quot;Other" primarily includes derivative contracts used to improve the balance of the Company's tail longevity and mortality risk. Under these contracts, the Company's gains (losses) are capped at the notional amount.

As of December 31, 2019, the following amounts were recorded on the Consolidated Statements of Financial Position related to the carrying amount of the hedged assets (liabilities) and cumulative basis adjustments included in the carrying amount for fair value hedges.

⁽²⁾ Excludes embedded derivatives and associated reinsurance recoverables which contain multiple underlying risks. The fair value of these embedded derivatives was a net liability of \$14,035 million and \$8,959 million as of December 31, 2019, and 2018, respectively, primarily included in "Future policy benefits."

⁽³⁾ Recorded in "Other invested assets" and "Other liabilities" on the Consolidated Statements of Financial Position.

Cumulative Amount of Fair Value Hedging Adjustment Included in the Carrying Amount of the Hedged Carrying Amount of the Hedged Balance Sheet Line Item in which Hedged Item is Recorded Assets (Liabilities) Assets (Liabilities)(1) (in millions) Fixed maturities, available-for-sale, at fair value \$ 389 \$ 64 Commercial mortgage and other loans \$ 23 \$ 2 \$ (107)Policyholders' account balances (1,376)\$ \$ Future policy benefits (676)\$ (172)

Most of the Company's derivatives do not qualify for hedge accounting for various reasons. For example: (i) derivatives that economically hedge embedded derivatives do not qualify for hedge accounting because changes in the fair value of the embedded derivatives are already recorded in net income; (ii) derivatives that are utilized as macro hedges of the Company's exposure to various risks typically do not qualify for hedge accounting because they do not meet the criteria required under portfolio hedge accounting rules; and (iii) synthetic GIC, which are product standalone derivatives, do not qualify as hedging instruments under hedge accounting rules.

Offsetting Assets and Liabilities

The following table presents recognized derivative instruments (excluding embedded derivatives and associated reinsurance recoverables), and repurchase and reverse repurchase agreements that are offset in the Consolidated Statements of Financial Position, and/or are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in the Consolidated Statements of Financial Position.

				Dece	ember 31, 2019

Securities sold under agreement to repurchase			9,950	0		9,950	(9,950)		0
Total Liabilities	9	\$	15,337	\$ (5,281)	\$	10,056	\$ (9,995)	\$	61

⁽¹⁾ Amounts exclude the excess of collateral received/pledged from/to the counterparty.

For information regarding the rights of offset associated with the derivative assets and liabilities in the table above, see "—Counterparty Credit Risk" below. For securities purchased under agreements to resell and securities sold under agreements to repurchase, the Company monitors the value of the securities and maintains collateral, as appropriate, to protect against credit exposure. Where the Company has entered into repurchase and resale agreements with the same counterparty, in the event of default, the Company would generally be permitted to exercise rights of offset. For additional information on the Company's accounting policy for securities repurchase and resale agreements, see Note 2.

Cash Flow, Fair Value and Net Investment Hedges

The primary derivative instruments used by the Company in its fair value, cash flow and net investment hedge accounting relationships are interest rate swaps, currency swaps and currency forwards. These instruments are only designated for hedge accounting in instances where the appropriate criteria are met. The Company does not use futures, options, credit, and equity derivatives in any of its fair value, cash flow or net investment hedge accounting relationships.

The following table provides the financial statement classification and impact of derivatives used in qualifying and non-qualifying hedge relationships, including the offset of the hedged item in fair value hedge relationships.

See Note 2 for details.

The changes in fair value of cash flow hedges are deferred in AOCI and are included in "Net unrealized investment gains (losses)" in the Consolidated Statements of Comprehensive Income; these amounts are then reclassified to earnings when the hedged item affects earnings. Using December 31, 2019 values, it is estimated that a pre-tax gain of approximately \$261 million is expected to be reclassified from AOCI to earnings during the subsequent twelve months ending December 31, 2020.

Notes to Consolidated Financial Statements—(Continued)

The exposures the Company is hedging with these qualifying cash flow hedges include the variability of future cash flows from forecasted transactions denominated in foreign currencies, the purchases of invested assets, and the receipt or payment of variable interest on existing financial instruments. The maximum length of time over which the Company is hedging its exposure to the variability in future cash flows for forecasted transactions is 10 years.

There were no material amounts reclassified from AOCI into earnings relating to instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur by the anticipated date or within the additional time period permitted by the authoritative guidance for the accounting for derivatives and hedging. In addition, there were no instances in which the Company discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

For effective net investment hedges, the amounts, before applicable taxes, recorded in the cumulative translation adjustment within AOCI were \$536 million as of 2019, \$532 million as of 2018, and \$526 million as of 2017.

Notes to Consolidated Financial Statements—(Continued)

Credit Derivatives

Credit derivatives, where the Company has written credit protection on a single name reference, had outstanding notional amounts of \$100 million and \$110 million as of December 31, 2019 and 2018, respectively. These credit derivatives are reported at fair value as an asset of \$1 million as of both December 31, 2019 and 2018. As of December 31, 2019, the notional amount of these credit derivatives had the following NAIC ratings: \$36 million in NAIC 1; \$60 million in NAIC 2; and \$4 million in NAIC 3. The Company has also written credit protection on certain index references with notional amounts of \$692 million and \$4,953 million, reported at fair value as an asset of \$20 million and \$10 million as of December 31, 2019 and 2018, respectively. As of December 31, 2019, the notional amount of these credit derivatives had the following NAIC ratings: \$50 million in NAIC 1; \$570 million in NAIC 3; and \$72 million in NAIC 6. NAIC designations are based on the lowest rated single name reference included in the index.

The Company's maximum amount at risk under these credit derivatives equals the aforementioned notional amounts and assumes the value of the underlying referenced securities become worthless. These credit derivatives have maturities of less than 1 year and less than 28 years for single name and index references, respectively.

In addition to writing credit protection, the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company's investment portfolio. As of December 31, 2019 and 2018, the Company had \$6 million and \$145 million of outstanding notional amounts, reported at fair value as a liability of \$0 million and \$1 million, respectively.

Counterparty Credit Risk

The Company is exposed to losses in the event of non-performance by counterparties to financial derivative transactions with a positive fair value. The Company manages credit risk by: (i) entering into derivative transactions with highly rated major international financial institutions and other creditworthy counterparties governed by master netting agreements, as applicable; (ii) trading through central clearing and OTC parties; (iii) obtaining collateral, such as cash and securities, when appropriate; and (iv) setting limits on single party credit exposures which are subject to periodic management review.

Substantially all of the Company's derivative agreements have zero thresholds which require daily full collateralization by the party in a liability position. In addition, certain of the Company's derivative agreements contain credit-risk related contingent features; if the credit rating of one of the parties to the derivative agreement is to fall below a certain level, the party with positive fair value could request termination at the then fair value or demand immediate full collateralization from the party whose credit rating fell and is in a net liability position.

As of December 31, 2019, there were no net liability derivative positions with counterparties with credit risk-related contingent features. All derivatives have been appropriately collateralized by the Company or the counterparty in accordance with the terms of the derivative agreements.

6. FAIR VALUE OF ASSETS AND LIABILITIES

Fair Value Measurement—Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative fair value guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1—Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. The Company's Level 1 assets and liabilities primarily include certain cash equivalents and short-term investments, equity securities and derivative contracts that trade on an active exchange market.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Level 2—Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. The Company's Level 2 assets and liabilities include: fixed maturities (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain equity securities (mutual funds, which do not trade in active markets because they are not publicly available), certain commercial mortgage loans, short-term investments and certain cash equivalents (primarily commercial paper), and certain OTC derivatives.

Level 3—Fair value is based on at least one significant unobservable input for the asset or liability. The assets and liabilities in this category may require significant judgment or estimation in determining the fair value. The Company's Level 3 assets and liabilities primarily include: certain private fixed maturities and equity securities, certain manually priced public equity securities and fixed maturities, certain highly structured OTC derivative contracts, certain consolidated real estate funds for which the Company is the general partner and embedded derivatives resulting from certain products with guaranteed benefits.

Assets and Liabilities by Hierarchy Level—The tables below present the balances of assets and liabilities reported at fair value on a recurring basis, as of the dates indicated.

^{(1) &}quot;Netting" amounts represent cash collateral of \$6,814 million and \$4,050 million as of December 31, 2019 and 2018, respectively.

⁽²⁾ Excludes notes with fair value of \$4,757 million (carrying amount of \$4,751 million) and \$4,216 million (carrying amount of \$4,216 million) as of December 31, 2019 and 2018, respectively, which have been offset with the associated payables under a netting agreement.

⁽³⁾ Includes credit-tranched securities collateralized by syndicated bank loans, sub-prime mortgages, auto loans, credit cards, education loans and other asset types.

⁽⁴⁾ All other represents cash equivalents and short-term investments.

⁽⁵⁾ Other invested assets excluded from the fair value hierarchy include certain hedge funds, private equity funds and other funds for which fair value is measured at net asset value ("NAV") per share (or its equivalent) as a practical expedient. At December 31, 2019 and 2018, the fair values of such investments were \$4,213 million and \$4,115 million respectively.

⁽⁶⁾ Separate account assets included in the fair value hierarchy exclude investments in entities that calculate NAV per share (or its equivalent) as a practical expedient. Such investments excluded from the fair value hierarchy include investments in real estate, hedge funds and other invested assets. At December 31, 2019 and 2018, the fair value of such investments were \$23,557 million and \$25,070 million, respectively.

Notes to Consolidated Financial Statements—(Continued)

- (7) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Consolidated Statements of Financial Position.
- (8) As of December 31, 2019, the net embedded derivative liability position of \$12.8 billion includes \$0.7 billion of embedded derivatives in an asset position and \$13.5 billion of embedded derivatives in a liability position. As of December 31, 2018, the net embedded derivative liability position of \$8.9 billion includes \$0.7 billion of embedded derivatives in an asset position and \$9.6 billion of embedded derivatives in a liability position.

The methods and assumptions the Company uses to estimate the fair value of assets and liabilities measured at fair value on a recurring basis are summarized below.

Fixed Maturity Securities—The fair values of the Company's public fixed maturity securities are generally based on prices obtained from independent pricing services. Prices for each security are generally sourced from multiple pricing vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. The pricing hierarchy is updated for new financial products and recent pricing experience with various vendors. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2, as they are primarily based on observable pricing for similar assets and/or other market observable inputs. Typical inputs used by these pricing services include but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flow, prepayment speeds and default rates. If the pricing information received from third-party pricing services is deemed not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service or classify the securities as Level 3. If the pricing service updates the price to be more consistent with the presented market observations, the security remains within Level 2.

Internally-developed valuations or indicative broker quotes are also used to determine fair value in circumstances where vendor pricing is not available, or where the Company ultimately concludes that pricing information received from the independent pricing services is not reflective of market activity. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may override the information with an internally-developed valuation. As of December 31, 2019 and 2018, overrides on a net basis were not material. Pricing service overrides, internally-developed valuations and indicative broker quotes are generally included in Level 3 in the fair value hierarchy.

The Company conducts several specific price monitoring activities. Daily analyses identify price changes over predetermined thresholds defined at the financial instrument level. Various pricing integrity reports are reviewed on a daily and monthly basis to determine if pricing is reflective of market activity or if it would warrant any adjustments. Other procedures performed include, but are not limited to, reviews of third-party pricing services methodologies, reviews of pricing trends and back testing.

The fair values of private fixed maturities, which are originated by internal private asset managers, are primarily determined using discounted cash flow models. These models primarily use observable inputs that include Treasury or similar base rates plus estimated credit spreads to value each security. The credit spreads are obtained through a survey of private market intermediaries who are active in both primary and secondary transactions, and consider, among other factors, the credit quality and the reduced liquidity associated with private placements. Internal adjustments are made to reflect variation in observed sector spreads. Since most private placements are valued using standard market observable inputs and inputs derived from, or corroborated by, market observable data including, but not limited to observed prices and spreads for similar publicly-traded issues, they have been reflected within Level 2. For certain private fixed maturities, the discounted cash flow model may incorporate significant unobservable inputs, which reflect the Company's own assumptions about the inputs that market participants would use in pricing the asset. To the extent management determines that such unobservable inputs are significant to the price of a security, a Level 3 classification is made.

Assets Supporting Experience-Rated Contractholder Liabilities—Assets supporting experience-rated contractholder liabilities consist primarily of fixed maturity securities, equity securities and derivatives whose fair values are determined consistent with similar instruments described above under "Fixed Maturity Securities" and below under "Equity Securities" and "Derivative Instruments."

Notes to Consolidated Financial Statements—(Continued)

Equity Securities—Equity securities consist principally of investments in common and preferred stock of publicly-traded companies, perpetual preferred stock, privately-traded securities, as well as mutual fund shares. The fair values of most publicly-traded equity securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded equity securities are determined using discounted cash flow, earnings multiple and other valuation models that require a substantial level of judgment around inputs and therefore are classified within Level 3. The fair values of mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares and are classified within Level 2 in the fair value hierarchy. The fair values of perpetual preferred stock are based on inputs obtained from independent pricing services that are primarily based on indicative broker quotes. As a result, the fair values of perpetual preferred stock are classified as Level 3.

Commercial Mortgage and Other Loans—The fair value of loans held and accounted for using the fair value option is determined utilizing pricing indicators from the whole loan market, where investors are committed to purchase these loans at a predetermined price, which is considered the principal exit market for these loans. The Company evaluates the valuation inputs used for these assets, including the existence of predetermined exit prices, the terms of the loans, prevailing interest rates and credit risk, and deems the primary pricing inputs are Level 2 inputs in the fair value hierarchy.

Other Invested Assets—Other invested assets primarily include investments in LPs/LLCs, derivatives and certain limited partnerships which are consolidated because the Company is either deemed to exercise control or considered the primary beneficiary of a variable interest entity. These entities are primarily investment companies and follow specialized industry accounting whereby their assets are carried at fair value. The investments held by these entities include various feeder fund investments in underlying master funds (whose underlying holdings generally include public fixed maturities, equity securities and mutual funds), as well as wholly-owned real estate held within other investment funds. For the unconsolidated fund investments, the fair value is primarily determined by the fund managers and is measured at net asset value ("NAV") as a practical expedient.

Other Assets—Other assets reflected in Level 3 include reinsurance recoverables which are carried at fair value and relate to the reinsurance of the Company's living benefit guarantees on certain variable annuity contracts. The methods and assumptions used to estimate the fair value are consistent with those described below under "Future Policy Benefits."

Derivative Instruments—Derivatives are recorded at fair value either as assets, within "Assets supporting experience-rated contractholder liabilities," or "Other invested assets, at fair value," or as liabilities, within "Other liabilities," except for embedded derivatives which are recorded with the associated host contract. The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected returns, NPR, liquidity and other factors. For derivative positions included within Level 3 of the fair value hierarchy, liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity and other specific attributes of the underlying derivative position.

The Company's exchange-traded futures and options include Treasury futures, Eurodollar futures, commodity futures, Eurodollar options and commodity options. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in the fair value hierarchy.

The majority of the Company's derivative positions are traded in the OTC derivative market and are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models that utilize actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The Company's policy is to use mid-market pricing in determining its best estimate of fair value. The fair values of most OTC derivatives, including interest rate and cross-currency swaps, currency forward contracts, commodity swaps, commodity forward contracts, single name credit default swaps, loan commitments held for sale and TBA forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models' key inputs include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, NPR, volatility and other factors.

The Company's cleared interest rate swaps and credit derivatives linked to an index are valued using models that utilize actively quoted or observable market inputs, including Overnight Indexed Swap discount rates, obtained from external market data providers, third-party pricing vendors and/or recent trading activity. These derivatives are classified as Level 2 in the fair value hierarchy.

Notes to Consolidated Financial Statements—(Continued)

The majority of the Company's derivative agreements are with highly rated major international financial institutions. To reflect the market's perception of its own and the counterparty's NPR, the Company incorporates additional spreads over LIBOR into the discount rate used in determining the fair value of OTC derivative assets and liabilities that are not otherwise collateralized.

Derivatives classified as Level 3 include look-back equity options and other structured products. These derivatives are valued based upon models, such as Monte Carlo simulation models and other techniques that utilize significant unobservable inputs. Level 3 methodologies are validated through periodic comparison of the Company's fair values to external broker-dealer values.

Cash Equivalents and Short-Term Investments—Cash equivalents and short-term investments include money market instruments, commercial paper and other highly liquid debt instruments. Certain money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. The remaining instruments in this category are generally fair valued based on market observable inputs and these investments have primarily been classified within Level 2.

Separate Account Assets—Separate account assets include mutual funds, fixed maturity securities, treasuries, equity securities, real estate and commercial mortgage loans for which values are determined consistent with similar instruments described above under "Fixed Maturity Securities," "Equity Securities" and "Commercial Mortgage and Other Loans."

Future Policy Benefits—The liability for future policy benefits is related to guarantees primarily associated with the living benefit features of certain variable annuity contracts offered by the Company's Individual Annuities segment, including guaranteed minimum accumulation benefits ("GMAB"), guaranteed withdrawal benefits ("GMWB") and guaranteed minimum income and withdrawal benefits ("GMIWB"), accounted for as embedded derivatives. The fair values of these liabilities are calculated as the present value of future expected benefit payments to customers less the present value of future expected rider fees attributable to the embedded derivative feature. This methodology could result in either a liability or contra-liability balance, given changing capital market conditions and various actuarial assumptions. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally-developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows. The determination of these risk premiums requires the use of management's judgment.

The significant inputs to the valuation models for these embedded derivatives include capital market assumptions, such as interest rate levels and volatility assumptions, the Company's market-perceived NPR, as well as actuarially determined assumptions, including contractholder behavior, such as lapse rates, benefit utilization rates, withdrawal rates, and mortality rates. Since many of these assumptions are unobservable and are considered to be significant inputs to the liability valuation, the liability included in future policy benefits has been reflected within Level 3 in the fair value hierarchy.

Capital market inputs and actual policyholders' account values are updated each quarter based on capital market conditions as of the end of the quarter, including interest rates, equity markets and volatility. In the risk neutral valuation, the initial swap curve drives the total return used to grow the policyholders' account values. The Company's discount rate assumption is based on the LIBOR swap curve adjusted for an additional spread relative to LIBOR to reflect NPR.

Actuarial assumptions, including contractholder behavior and mortality, are reviewed at least annually, and updated based upon emerging experience, future expectations and other data, including any observable market data. These assumptions are generally updated annually unless a material change that the Company feels is indicative of a long-term trend is observed in an interim period.

Policyholders' Account Balances—The liability for policyholders' account balances is related to certain embedded derivative instruments associated with certain universal life and fixed annuity products that provide the policyholders with the index-linked interest credited over contract specified term periods. The fair values of these liabilities are determined using discounted cash flow models which include capital market assumptions such as interest rates and equity index volatility assumptions, the Company's market-perceived NPR and actuarially determined assumptions for mortality, lapses and projected hedge costs.

As there is no observable active market for these liabilities, the fair value is determined as the present value of account balances paid to policyholders in excess of contractually guaranteed minimums using option pricing techniques for index term periods that contain deposits as of the valuation date, and the expected option cost for future index term periods, where the terms of index crediting rates have not yet been declared by the Company. Premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows are also incorporated in the fair value of these

Notes to Consolidated Financial Statements—(Continued)

liabilities. The determination of these risk premiums requires the use of management's judgment, and hence these liabilities are reflected within Level 3 in the fair value hierarchy.

Capital market inputs, including interest rates and equity markets volatility, and actual policyholders' account values are updated each quarter. Actuarial assumptions are reviewed at least annually and updated based upon emerging experience, future expectations and other data, including any observable market data. Aside from these annual updates, assumptions are generally updated only if a material change is observed in an interim period that the Company believes is indicative of a long-term trend.

Other Liabilities—Other liabilities include certain derivative instruments and the contingent consideration liability associated with the acquisition of Assurance IQ. The fair values of derivative instruments are primarily determined consistent with those described above under "Derivative Instruments." For the contingent consideration liability, see Note 1 for additional information.

Notes issued by Consolidated VIEs—These notes are based on the fair values of corresponding bank loan collateral. Since the notes are valued based on reference collateral, they are classified as Level 3. See Note 4 and "Fair Value Option" below for additional information.

Quantitative Information Regarding Internally-Priced Level 3 Assets and Liabilities—The tables below present quantitative information on significant internally-priced Level 3 assets and liabilities.

			Mortality rate(12)	0% 15%			Decrease
			Equity volatility curve	18%	22%		Increase

- (1) Conversely, the impact of a decrease in input would have the opposite impact on fair value as that presented in the table.
- (2) Includes assets classified as fixed maturities available-for-sale, assets supporting experience-rated contractholder liabilities and fixed maturities, trading.
- (3) Represents multiples of earnings before interest, taxes, depreciation and amortization ("EBITDA"), and are amounts used when the Company has determined that market participants would use such multiples when valuing the investments.
- (4) Includes certain investments where enterprise value is less than the amount needed to support senior and subordinated claims. These investments typically use a range of discount rates (10% to 20%), therefore presenting a range, rather than a weighted average, is a more meaningful representation of the unobservable inputs used in the valuation.
- (5) Changes in the fair value of separate account assets are borne by customers and thus are offset by changes in separate account liabilities on the Company's Consolidated Statements of Financial Position. As a result, changes in value associated with these investments are not reflected in the Company's Consolidated Statements of Operations.
- (6) Future policy benefits primarily represent general account liabilities for the living benefit features of the Company's variable annuity contracts which are accounted for as embedded derivatives. Since the valuation methodology for these liabilities uses a range of inputs that vary at the contract level over the cash flow projection period, presenting a range, rather than a weighted average, is a more meaningful representation of the unobservable inputs used in the valuation.
- (7) Policyholders' account balances primarily represent general account liabilities for the index-linked interest credited on certain of the Company's life and annuity products that are accounted for as embedded derivatives. Since the valuation methodology for these liabilities uses a range of inputs that vary at the contract level over the cash flow projection period, presenting a range, rather than a weighted average, is a more meaningful representation of the unobservable inputs used in the valuation.
- (8) Lapse rates for contracts with living benefit guarantees are adjusted at the contract level based on the in-the-moneyness of the living benefit and reflect other factors, such as the applicability of any surrender charges. Lapse rates are reduced when contracts are more in-the-money. Lapse rates for contracts with index-linked crediting guarantees may be adjusted at the contract level based on the applicability of any surrender charges, product type, and market related factors such as interest rates. Lapse rates are also generally assumed to be lower for the period where surrender charges apply. For any given contract, lapse rates vary throughout the period over which cash flows are projected for the purposes of valuing these embedded derivatives.
- (9) The spread over the London Inter-Bank Offered Rate ("LIBOR") swap curve represents the premium added to the proxy for the risk-free rate (LIBOR) to reflect the Company's estimates of rates that a market participant would use to value the living benefits in both the accumulation and payout phases and index-linked interest crediting guarantees. This spread includes an estimate of NPR, which is the risk that the obligation will not be fulfilled by the Company. NPR is primarily estimated by utilizing the credit spreads associated with issuing funding agreements, adjusted for any illiquidity risk premium. In order to reflect the financial strength ratings of the Company, credit spreads associated with funding agreements, as opposed to credit spread associated with debt, are utilized in developing this estimate because funding agreements, living benefit guarantees, and index-linked interest crediting guarantees are insurance liabilities and are therefore senior to debt.
- (10) The utilization rate assumption estimates the percentage of contracts that will utilize the benefit during the contract duration, and begin lifetime withdrawals at various time intervals from contract inception. The remaining contractholders are assumed to either begin lifetime withdrawals immediately or never utilize the benefit. Utilization assumptions may vary by product type, tax status, and age. The impact of changes in these assumptions is highly dependent on the product type, the age of the contractholder at the time of the sale, and the timing of the first lifetime income withdrawal. Range reflects the utilization rate for the vast majority of business with living benefits.

Notes to Consolidated Financial Statements—(Continued)

- (11) The withdrawal rate assumption estimates the magnitude of annual contractholder withdrawals relative to the maximum allowable amount under the contract. These assumptions vary based on the age of the contractholder, the tax status of the contract and the duration since the contractholder began lifetime withdrawals. As of both December 31, 2019 and 2018, the minimum withdrawal rate assumption is 78% and the maximum withdrawal rate assumption may be greater than 100%. The fair value of the liability will generally increase the closer the withdrawal rate is to 100% and decrease as the withdrawal rate moves further away from 100%.
- (12) The range reflects the mortality rates for the vast majority of business with living benefits and other contracts, with policyholders ranging from 45 to 90 years old. While the majority of living benefits have a minimum age requirement, certain other contracts do not have an age restriction. This results in contractholders with mortality rates approaching 0% for certain benefits. Mortality rates may vary by product, age, and duration. A mortality improvement assumption is also incorporated into the overall mortality table.

Interrelationships Between Unobservable Inputs—In addition to the sensitivities of fair value measurements to changes in each unobservable input in isolation, as reflected in the table above, interrelationships between these inputs may also exist, such that a change in one unobservable input may give rise to a change in another or multiple inputs. Examples of such interrelationships for significant internally-priced Level 3 assets and liabilities are as follows:

Corporate Securities—The rate used to discount future cash flows reflects current risk-free rates plus credit and liquidity spread requirements that market participants would use to value an asset. The discount rate may be influenced by many factors, including market cycles, expectations of default, collateral, term, and asset complexity. Each of these factors can influence discount rates, either in isolation, or in response to other factors.

Future Policy Benefits—The Company expects efficient benefit utilization and withdrawal rates to generally be correlated with lapse rates. However, behavior is generally highly dependent on the facts and circumstances surrounding the individual contractholder, such as their liquidity needs or tax situation, which could drive lapse behavior independent of other contractholder behavior assumptions. To the extent more efficient contractholder behavior results in greater in-the-moneyness at the contract level, lapse rates may decline for those contracts. Similarly, to the extent that increases in equity volatility are correlated with overall declines in the capital markets, lapse rates may decline as contracts become more in-the-money.

Changes in Level 3 Assets and Liabilities—The following tables describe changes in fair values of Level 3 assets and liabilities as of the dates indicated, as well as the portion of gains or losses included in income attributable to unrealized gains or losses related to those assets and liabilities still held at the end of their respective periods. When a determination is made to classify assets and liabilities within Level 3, the determination is based on significance of the unobservable inputs in the overall fair value measurement. All transfers are based on changes in the observability of the valuation inputs, including the availability of pricing service information that the Company can validate. Transfers into Level 3 are generally the result of unobservable inputs utilized within valuation methodologies and the use of indicative broker quotes for assets that were previously valued using observable inputs. Transfers out of Level 3 are generally due to the use of observable inputs in valuation methodologies as well as the availability of pricing service information for certain assets that the Company can validate.

^{(1) &}quot;Other," for the periods ended December 31, 2019 and 2018, primarily represent deconsolidation of VIE, reclassifications of certain assets between reporting categories and foreign currency translation.

⁽²⁾ Unrealized gains or losses related to assets still held at the end of the period do not include amortization or accretion of premiums and discounts.

⁽³⁾ Includes U.S. corporate public, U.S. corporate private, foreign corporate public and foreign corporate private securities.

⁽⁴⁾ Includes asset-backed, commercial mortgage-backed and residential mortgage-backed securities.

Notes to Consolidated Financial Statements—(Continued)

- (5) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Consolidated Statements of Financial Position.
- (6) Issuances and settlements for Policyholders' account balances are presented net in the rollforward. Prior period amounts have been updated to conform to current period presentation.

Notes to Consolidated Financial Statements—(Continued)

Derivative Fair Value Information

The following tables present the balances of derivative assets and liabilities measured at fair value on a recurring basis, as of the date indicated, by primary underlying risks. These tables exclude embedded derivatives and associated reinsurance recoverables. The derivative assets and liabilities shown below are included in "Other invested assets" or "Other liabilities" in the tables contained within the sections "—Assets and Liabilities by Hierarchy Level" and "—Changes in Level 3 Assets and Liabilities," above.

	As of December 31, 2019									
		Level 1		Level 2	_	Level 3	Netting(1)			Total

Net Derivative - Interest Rate		4	(7)	0	0	0	0	0	0	0	(3)	(7)

- (1) Represents conversion of warrants to equity shares.
- (2) Transfers into or out of Level 3 are generally reported at the value as of the beginning of the quarter in which the transfers occur for any such positions still held at the end of the quarter.
- (3) Related to warrants received in restructuring a certain asset that resulted in reclassification of reporting category.
- (4) Total realized and unrealized gains (losses) as well as unrealized gains (losses) for assets still held at the end of the period are recorded in "Realized investment gains (losses), net."

Nonrecurring Fair Value Measurements—The following tables represent information for assets measured at fair value on a nonrecurring basis. The fair value measurement is nonrecurring as these assets are measured at fair value only when there is a triggering event (e.g., an evidence of impairment). Assets included in the table are those that were impaired during the respective reporting periods and that are still held as of the reporting date. The estimated fair values for these amounts were determined using significant unobservable inputs (Level 3).

	Year Ended December 31,							
	2019			2018		2017		
				(in millions)				
Realized investment gains (losses) net:								
Commercial mortgage loans(1)	\$	2	\$	(12)	\$	(2)		
Mortgage servicing rights(2)	\$	11	\$	10	\$	7		

	 Year Ended December 31

	(in m	illions)			
Carrying value after measurement as of period end					
Commercial mortgage loans(1):	\$ 15	\$	47		
Mortgage servicing rights(2):	\$ 87	\$	73		

- (1) Commercial mortgage loans are valued based on discounted cash flows utilizing market rates or the fair value of the underlying real estate collateral.
- (2) Mortgage servicing rights are valued using a discounted cash flow model. The model incorporates assumptions for servicing revenues, which are adjusted for expected prepayments, delinquency rates, escrow deposit income and estimated loan servicing expenses. The discount rates incorporated into the model are determined based on the estimated returns a market participant would require for this business plus a liquidity and risk premium. This estimate includes available relevant data from any active market sales of mortgage servicing rights.

Fair Value Option

The fair value option allows the Company to elect fair value as an alternative measurement for selected financial assets and financial liabilities not otherwise reported at fair value. Such elections have been made by the Company to help mitigate volatility in earnings that result from different measurement attributes. Electing the fair value option also allows the Company to achieve consistent accounting for certain assets and liabilities. Changes in fair value are reflected in "Realized investment gains (losses), net" for commercial mortgage and other loans and "Other income (loss)" for other assets and notes issued by consolidated VIEs. Changes in fair value due to instrument-specific credit risk are estimated using changes in credit spreads and quality ratings for the period reported. Interest income on commercial mortgage and other loans is included in "Net investment income." Interest income on these loans is recorded based on the effective interest rate as determined at the closing of the loan.

Notes to Consolidated Financial Statements—(Continued)

The following tables present information regarding assets and liabilities where the fair value option has been elected.

		Year Ended December 31,

⁽¹⁾ As of December 31, 2019, for loans for which the fair value option has been elected, there were no loans in non-accrual status and none of the loans were more than 90 days past due and still accruing.

Fair Value of Financial Instruments

The table below presents the carrying amount and fair value by fair value hierarchy level of certain financial instruments that are not reported at fair value. The financial instruments presented below are reported at carrying value on the Company's Consolidated Statements of Financial Position. In some cases, as described below, the carrying amount equals or approximates fair value.

⁽¹⁾ Carrying values presented herein differ from those in the Company's Consolidated Statements of Financial Position because certain items within the respective financial statement captions are not considered financial instruments or out of scope under authoritative guidance relating to disclosures of the fair value of financial instruments.

The fair values presented above have been determined by using available market information and by applying market valuation methodologies, as described in more detail below.

Fixed Maturities, Held-to-Maturity

The fair values of public fixed maturity securities are generally based on prices from third-party pricing services, which are reviewed for reasonableness; however, for certain public fixed maturity securities and investments in private placement fixed maturity securities, this information is either not available or not reliable. For these public fixed maturity securities, the fair value is based on indicative broker quotes, if available, or determined using a discounted cash flow model or other internally-developed models. For private fixed maturities, fair value is determined using a discounted cash flow model. In determining the fair value of certain fixed maturity securities, the discounted cash flow model may also use unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the security.

Commercial Mortgage and Other Loans

⁽²⁾ Excludes notes with fair value of \$5,401 million (carrying amount of \$4,998 million) and \$4,879 million (carrying amount of \$4,879 million) as of December 31, 2019 and 2018, respectively, which have been offset with the associated payables under a netting agreement.

⁽³⁾ Includes notes with fair value of \$10,158 million (carrying amount of \$9,749 million) and \$9,095 million (carrying amount of \$9,095 million) as of December 31, 2019 and 2018, respectively, which have been offset with the associated receivables under a netting agreement.

Notes to Consolidated Financial Statements—(Continued)

The fair value of most commercial mortgage loans is based upon the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate or foreign government bond rate (for non-U.S. dollar-denominated loans) plus an appropriate credit spread for loans of similar quality, average life and currency. The quality ratings for these loans, a primary determinant of the credit spreads and a significant component of the pricing process, are based on an internally-developed methodology. Certain commercial mortgage loans are valued incorporating other factors, including the terms of the loans, the principal exit strategies for the loans, prevailing interest rates and credit risk.

Policy Loans

The Company's valuation technique for policy loans is to discount cash flows at the current policy loan coupon rate. Policy loans are fully collateralized by the cash surrender value of underlying insurance policies. As a result, the carrying value of the policy loans approximates the fair value.

Short-Term Investments, Cash and Cash Equivalents, Accrued Investment Income and Other Assets

The Company believes that due to the short-term nature of certain assets, the carrying value approximates fair value. These assets include: certain short-term investments, which are not securities, recorded at amortized cost and include quality loans; cash and cash equivalent instruments; accrued investment income; and other assets that meet the definition of financial instruments, including receivables, such as reinsurance recoverables, unsettled trades, accounts receivable and restricted cash.

Policyholders' Account Balances—Investment Contracts

Only the portion of policyholders' account balances related to products that are investment contracts (those without significant mortality or morbidity risk) are reflected in the table above. For fixed deferred annuities, single premium endowments, payout annuities and other similar contracts without life contingencies, fair values are generally derived using discounted projected cash flows based on interest rates that are representative of the Company's financial strength ratings, and hence reflect the Company's NPR. For GICs, funding agreements, structured settlements without life contingencies and other similar products, fair values are generally derived using discounted projected cash flows based on interest rates being offered for similar contracts with maturities consistent with those of the contracts being valued. For those balances that can be withdrawn by the customer at any time without prior notice or penalty, the fair value is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. For defined contribution and defined benefit contracts and certain other products, the fair value is the market value of the assets supporting the liabilities.

Securities Sold Under Agreements to Repurchase

The Company receives collateral for selling securities under agreements to repurchase, or pledges collateral under agreements to resell. Repurchase and resale agreements are also generally short-term in nature and, therefore, the carrying amounts of these instruments approximate fair value.

Cash Collateral for Loaned Securities

Cash collateral for loaned securities represents the collateral received or paid in connection with loaning or borrowing securities, similar to the securities sold under agreement to repurchase above. Due to the short-term nature of these transactions, the carrying value approximates fair value.

Debt

The fair value of short-term and long-term debt, as well as notes issued by consolidated VIEs, is generally determined by either prices obtained from independent pricing services, which are validated by the Company, or discounted cash flow models. With the exception of the notes issued by consolidated VIEs for which recourse is limited to the assets of the respective VIE and does not extend to the general credit of the Company, the fair values of these instruments consider the Company's NPR. Discounted cash flow models predominately use market observable inputs such as the borrowing rates currently available to the Company for debt and financial instruments with similar terms and remaining maturities. For commercial paper issuances and other debt with a maturity of less than 90 days, the carrying value approximates fair value.

Other Liabilities

Notes to Consolidated Financial Statements—(Continued)

Other liabilities are primarily payables, such as reinsurance payables, unsettled trades, drafts and accrued expense payables. Due to the short-term until settlement of most of these liabilities, the Company believes that carrying value approximates fair value.

Separate Account Liabilities—Investment Contracts

Only the portion of separate account liabilities related to products that are investment contracts are reflected in the table above. Separate account liabilities are recorded at the amount credited to the contractholder, which reflects the change in fair value of the corresponding separate account assets including contractholder deposits less withdrawals and fees; therefore, carrying value approximates fair value.

7. DEFERRED POLICY ACQUISITION COSTS

The balances of and changes in DAC as of and for the years ended December 31, are as follows:

	2019		2018	2017
		(i	n millions)	
Balance, beginning of period	\$ 20,058	\$	18,992	\$ 17,661
Capitalization of commissions, sales and issue expenses	2,966		2,870	2,820
Amortization—Impact of assumption and experience unlocking and true-ups	(164)		(217)	247
Amortization—All other	(2,168)		(2,056)	(1,827)
Change in unrealized investment gains and losses	(713)		519	(190)

					(in n	nillions)			
Estimated future VOBA amortization	\$	118	\$	110	\$	100	\$ 88	\$	74

9. INVESTMENTS IN OPERATING JOINT VENTURES

The Company has made investments in certain joint ventures that are strategic in nature and made other than for the sole purpose of generating investment income. These investments are accounted for under the equity method of accounting and are included in "Other assets" in the Company's Consolidated Statements of Financial Position. The earnings from these investments are included on an after-tax basis in "Equity in earnings of operating joint ventures, net of taxes" in the Company's Consolidated Statements of Operations. The Company has made these investments through its PGIM and International Businesses segments, and its Corporate and Other operations. The summarized financial information for the Company's operating joint ventures has been included in the summarized combined financial information for all significant equity method investments shown in Note 3.

The following table sets forth information related to the Company's investments in operating joint ventures as of and for the years ended December 31:

	 2019		2018	 2017
		(in	millions)	
Investment in operating joint ventures	\$ 1,309	\$	1,329	\$ 1,483
Dividends received from operating joint ventures	\$ 70	\$	93	\$ 63
After-tax equity in earnings of operating joint ventures	\$ 100	\$	76	\$ 49

For the years ended December 31, 2019, 2018 and 2017, the Company recognized \$29 million, \$32 million and \$36 million, respectively, of asset management fee income for services the Company provided to these operating joint ventures.

10. GOODWILL AND OTHER INTANGIBLES

The changes in the carrying value of goodwill by reportable segment are as follows:

PRUDENTIAL FINANCIAL, INC. Notes to Consolidated Financial Statements—(Continued)

	 PGIM Retirement Assurance IQ Businesses Other						Other	Total		
					(in m	illio	ns)			
Goodwill balance, December 31, 2016:	\$ 230	\$	444	\$	0	\$	159	\$	0	\$ 833
Effect of foreign currency translation	5		0		0		5		0	10
Goodwill balance, December 31, 2017:	235		444		0		164		0	843
Acquisitions	0		11		0		0		11	22
Effect of foreign currency translation	(2)		0		0		0		0	(2)
Goodwill balance, December 31, 2018:	233		455		0		164		11	863
Acquisitions	22		0		2,128		0		0	2,150
Effect of foreign currency translation	(1)		0		0		1		0	0
Goodwill balance, December 31, 2019:	\$ 254	\$	455	\$	2,128	\$	165	\$	11	\$ 3,013

The Company tests goodwill for impairment annually, as of December 31, and more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount, as discussed in further detail in Note 2. The Company's reporting units, except Assurance IQ, each performed their annual goodwill impairment test using the quantitative two-step approach at December 31, 2019 and 2018. The Assurance IQ segment performed a qualitative assessment at December 31, 2019 considering the October 2019 acquisition date. There are no impairments or accumulated impairment losses recorded in the periods presented above for goodwill.

Other Intangibles

Other intangible balances at December 31, are as follows:

				2019					2018			
		Gross Carrying Amount				Net Carrying Amount		Gross Carrying Amount		Accumulated Amortization		Carrying mount
					(in m	illions)						
Subject to amortization:												
Mortgage servicing rights	\$	745	\$	(468)	\$ 277	\$	689	\$	(423)	\$	266	
Customer relationships		244		(153)	91		173		(120)		53	
Software and other		201		(38)	163		114		(87)		27	
Not subject to amortization		69		N/A	69		2		N/A		2	
Total					\$ 600					\$	348	

The fair values of net mortgage servicing rights were \$287 million and \$295 million at December 31, 2019 and 2018, respectively. Amortization expense for other intangibles was \$65 million, \$61 million and \$51 million for the years ending December 31, 2019, 2018 and 2017, respectively. The amortization expense amounts for 2019, 2018 and 2017 do not include impairments recorded for mortgage servicing rights or other intangibles. See the nonrecurring fair value measurements section of Note 6 for more information regarding these impairments.

The following table provides estimated future amortization for the periods indicated.

	202	0	2	021	2	022	202	3	 2024
					(in n	nillions)			
Estimated future amortization expense of other intangibles	\$	70	\$	65	\$	57	\$	41	\$ 34

11. LEASES

Notes to Consolidated Financial Statements—(Continued)

The Company occupies leased office space and other facilities in many locations under various long-term leases and has entered into numerous leases covering the long-term use of computers and other equipment. The leases, depending on their specific terms, are classified as either operating or finance with the vast majority of leases falling under the operating classification. The leases in the Company's portfolio have remaining lease terms from less than one year to 29 years, some of which include options to extend the leases for up to 17 years, and some of which include options to terminate the leases within 8 years. An analysis of all economic and non-economic factors associated with leases containing certain options, including factors such as the existence of cancellation penalties, leasehold improvements made to the underlying assets and location of the underlying assets, is conducted to determine whether those leases are reasonably certain to renew, and hence, should be included in the lease term that is used to establish the right-of-use assets and lease liabilities for those arrangements.

The Company does not have residual guarantees associated with its lessee arrangements, nor are there any restrictions or covenants associated with its lease arrangements.

Lessee

Supplemental balance sheet information related to leases where the Company is the lessee is included below. Right-of-use assets and lease liabilities are included within "Other assets" and "Other liabilities" respectively.

	December 31, 2019		
	(\$ i	n millions)	
Operating Leases:			
Right-of-use assets	\$	554	
Lease liabilities	\$	594	
Weighted average remaining lease term		6 years	
Weighted average discount rate		2.46%	

Maturities of operating lease liabilities are as follows:

	Decem	ber 31, 2019
	(in	millions)
2020	\$	152
2021		143
2022		104
2023		74
2024		65
Thereafter		111
Total lease payments		649
Less imputed interest		(55)
Total	\$	594

Lease expense is included in "General and administrative expenses." The expense was comprised of operating lease costs and short-term lease costs of \$138 million and \$101 million for the twelve months ended December 31, 2019, respectively. Short-term lease costs relate to those leases with terms of twelve months or less that do not include an option to purchase the underlying asset that is reasonably certain of exercise.

Future minimum lease payments under non-cancelable operating and capital leases along with associated sub-lease income prior to the adoption of ASU 2016-02, Leases (Topic 842) are as follows:

Notes to Consolidated Financial Statements—(Continued)

	December 31, 2018			
	Operating and Capital Leases(1)	Sub-lease Income		
	(in millions)			
2019	\$ 168	\$ 1		
2020	133	1		
2021	106	1		
2022	82	0		
2023	58	0		
2024 and thereafter	138	0		
Total	\$ 685	\$ 3		

⁽¹⁾ Future minimum lease payments under capital leases were \$26 million as of December 31, 2018.

Rental expense, net of sub-lease income were \$265 million and \$258 million for the years ended December 31, 2018 and 2017, respectively.

Lessor

The Company directly owns real estate properties within its investment portfolio. Such real estate is leased to third-parties, with the Company serving as the lessor. The terms of the leases vary depending on property type (e.g., commercial or residential). In most cases, the lessee has an option to renew the lease contract based on market rates but does not have an option to purchase the property. The terms of the leases may also include provisions for the use of common areas. Such non-lease components are not separately accounted for by the Company, as a result of applying the practical expedient discussed in Note 2. Lease income included in "Net investment income" was \$182 million for the twelve months ended December 31, 2019.

12. POLICYHOLDERS' LIABILITIES

Future Policy Benefits

Future policy benefits at December 31 for the years indicated are as follows:

	 2019		2018
	(in m	illions)	
Life insurance	\$ 191,654	\$	180,749
Individual and group annuities and supplementary contracts	75,940		72,624
Other contract liabilities	23,052		17,665
Subtotal future policy benefits excluding unpaid claims and claim settlement expenses	290,646		271,038
Unpaid claims and claim settlement expenses	2,881		2,808
Total future policy benefits	\$ 293,527	\$	273,846
•	\$ 	\$	

Life insurance liabilities include reserves for death and endowment policy benefits, terminal dividends and certain health benefits. Individual and group annuities and supplementary contracts liabilities include reserves for life contingent immediate annuities and life contingent group annuities. Other contract liabilities include unearned premiums and certain other reserves for group, annuities and individual life and health products.

Future policy benefits for individual participating traditional life insurance are based on the net level premium method, calculated using the guaranteed mortality and nonforfeiture interest rates which range from 2.5% to 7.5%. Participating insurance represented 2% of direct individual life insurance in force for both December 31, 2019 and 2018, and 11%, 12% and 14% of direct individual life insurance premiums for 2019, 2018 and 2017, respectively.

Future policy benefits for individual non-participating traditional life insurance policies, group and individual long-term care policies and individual health insurance policies are generally equal to the present value of future benefit payments and related expenses, less the present value of future net premiums. Assumptions as to mortality, morbidity and persistency are based on the Company's experience, industry data, and/or other factors, when the basis of the reserve is established. Interest rates used in the determination of the present values range from (0.1)% to 9.5%; less than 1% of the reserves are based on an interest rate in excess of 8%.

Notes to Consolidated Financial Statements—(Continued)

Future policy benefits for individual and group annuities and supplementary contracts with life contingencies are generally equal to the present value of expected future payments. Assumptions as to mortality are based on the Company's experience, industry data, and/or other factors, when the basis of the reserve is established. The interest rates used in the determination of the present values range from (0.2)% to 11.3%; less than 1% of the reserves are based on an interest rate in excess of 8%.

Future policy benefits for other contract liabilities are generally equal to the present value of expected future payments based on the Company's experience, except for example, certain group insurance coverages for which future policy benefits are equal to gross unearned premium reserves. The interest rates used in the determination of the present values range from 0.8% to 7.0%.

The Company's liability for future policy benefits is also inclusive of liabilities for guaranteed benefits related to certain long-duration life and annuity contracts. Liabilities for guaranteed benefits with embedded derivative features are primarily in "other contract liabilities" in the table above. The remaining liabilities for guaranteed benefits are primarily reflected with the underlying contract. See Note 13 for additional information regarding liabilities for guaranteed benefits related to certain long-duration life and annuity contracts.

Reserves for recognizing a premium deficiency included in "Future policy benefits" are established, if necessary, when the liability for future policy benefits plus the present value of expected future gross premiums are determined to be insufficient to provide for expected future policy benefits and expenses. Additionally, in certain instances the policyholder liability for a particular line of business may not be deficient in the aggregate to trigger loss recognition, but the pattern of earnings may be such that profits are expected to be recognized in earlier years followed by losses in later years. In these situations, accounting standards require that an additional PFL liability be recognized by an amount necessary to sufficiently offset the losses that would be recognized in later years. Premium deficiencies have been recognized in the past for the group single premium annuity business, which consists of limited-payment, long-duration traditional, non-participating annuities; structured settlements; single premium immediate annuities with life contingencies; long-term care; certain individual health policies; and certain interest-sensitive life products.

Unpaid claims and claim settlement expenses primarily reflect the Company's estimate of future disability claim payments and expenses as well as estimates of claims incurred but not yet reported as of the balance sheet date related to group disability products. Unpaid claim liabilities that are discounted use interest rates ranging from 2.6% to 6.4%.

Policyholders' Account Balances

Policyholders' account balances at December 31 for the years indicated are as follows:

	2019	2018
	(in ı	nillions)
Individual annuities	\$ 44,391	\$ 43,309
Group annuities	27,843	27,618
Guaranteed investment contracts and guaranteed interest accounts	13,759	13,558
Funding agreements	4,119	3,785
Interest-sensitive life contracts	40,364	39,228
Dividend accumulation and other deposit type funds	21,634	22,840
Total policyholders' account balances	\$ 152,110	\$ 150,338

Policyholders' account balances primarily represent an accumulation of account deposits plus credited interest less withdrawals, expense charges and mortality charges, if applicable. These policyholders' account balances also include provisions for benefits under non-life contingent payout annuities. Included in "Funding agreements" at December 31, 2019 and 2018 are \$4,104 million and \$3,755 million, respectively, related to the Company's Funding Agreement Notes Issuance Program ("FANIP"). Under this program, which has a maximum authorized amount of \$15 billion of medium-term notes and \$3 billion of commercial paper, Delaware statutory trusts issue short-term commercial paper and/or medium-term notes to investors that are secured by funding agreements issued to the trusts by PICA. The outstanding commercial paper and notes have fixed or floating interest rates that range from 0.0% to 3.5% and original maturities ranging from two months to five years. Included in the amounts at December 31, 2019 and 2018 is the medium-term note liability, which is carried at amortized cost, of \$2,414 million and \$2,764 million, respectively and short-term note liability of \$1,697 million and \$997 million, respectively.

Interest crediting rates range from 0% to 7.5% for interest-sensitive life contracts and from 0% to 13.3% for contracts other than interest-sensitive life. Less than 1% of policyholders' account balances have interest crediting rates in excess of 8%.

Notes to Consolidated Financial Statements—(Continued)

13. CERTAIN LONG-DURATION CONTRACTS WITH GUARANTEES

The Company issues variable annuity contracts through its separate accounts for which investment income and investment gains and losses accrue directly to, and investment risk is borne by, the contractholder. The Company also issues variable annuity contracts with general and separate account options where the Company contractually guarantees to the contractholder a return of no less than total deposits made to the contract adjusted for any partial withdrawals ("return of net deposits"). In certain of these variable annuity contracts, the Company also contractually guarantees to the contractholder a return of no less than (1) total deposits made to the contract adjusted for any partial withdrawals plus a minimum return ("minimum return"), and/or (2) the highest contract value on a specified date adjusted for any withdrawals ("contract value"). These guarantees include benefits that are payable in the event of death, annuitization or at specified dates during the accumulation period and withdrawal and income benefits payable during specified periods. The Company also issues annuity contracts and single premium whole life contracts with market value adjusted investment options ("MVAs"). Annuity contracts with MVAs provide for a return of principal plus a fixed rate of return if held-to-maturity, or, alternatively, a "market adjusted value" if surrendered prior to maturity or if funds are reallocated to other investment options. Single premium whole life contracts provide a market adjusted value upon surrender. The market value adjustment may result in a gain or loss to the Company, depending on crediting rates or an indexed rate at surrender, as applicable. The Company also issues fixed deferred and immediate annuity contracts, some without MVA, that have a guaranteed credited rate and annuity benefit.

In addition, the Company issues certain variable life, variable universal life and universal life contracts where the Company contractually guarantees to the contractholder a death benefit even when there is insufficient value to cover monthly mortality and expense charges, whereas otherwise the contract would typically lapse ("no-lapse guarantee"). Variable life and variable universal life contracts are offered with general and separate account options.

The assets supporting the variable portion of all variable annuities are carried at fair value and reported as "Separate account assets" with an equivalent amount reported as "Separate account liabilities." Amounts assessed against the contractholders for mortality, administration, and other services are included within revenue in "Policy charges and fee income" and changes in liabilities for minimum guarantees are generally included in "Policyholders' benefits" or "Realized investment gains (losses), net."

For those guarantees of benefits that are payable in the event of death, the net amount at risk is generally defined as the current guaranteed minimum death benefit in excess of the current account balance at the balance sheet date. The Company's primary risk exposures for these contracts relates to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including fixed income and equity market returns, contract lapses and contractholder mortality.

For guarantees of benefits that are payable at annuitization, the net amount at risk is generally defined as the present value of the minimum guaranteed annuity payments available to the contractholder determined in accordance with the terms of the contract in excess of the current account balance. The Company's primary risk exposures for these contracts relates to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including fixed income and equity market returns, timing of annuitization, contract lapses and contractholder mortality.

For guarantees of benefits that are payable at withdrawal, the net amount at risk is generally defined as the present value of the minimum guaranteed withdrawal payments available to the contractholder determined in accordance with the terms of the contract in excess of the current account balance. For guarantees of accumulation balances, the net amount at risk is generally defined as the guaranteed minimum accumulation balance minus the current account balance. The Company's primary risk exposures for these contracts relates to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including equity market returns, interest rates, market volatility and contractholder behavior.

Notes to Consolidated Financial Statements—(Continued)

The Company's contracts with guarantees may offer more than one type of guarantee in each contract; therefore, the amounts listed may not be mutually exclusive. The liabilities related to the net amount at risk are reflected within "Future policy benefits." As of December 31, 2019 and 2018, the Company had the following guarantees associated with these contracts, by product and guarantee type:

		December 31, 2019				Decei	nber 31, 2018		
	I	In the Event At Annuitization / of Death Accumulation(1)		In the Event of Death			At Annuitization / Accumulation(1)		
				(\$ in r	millions)

Money market funds		3,530	3,	,122
Total	5	\$ 158,206	\$ 140,5	,595
				=

In addition to the amounts invested in separate account investment options above, \$7,781 million at December 31, 2019, and \$8,104 million at December 31, 2018, of account balances of variable annuity contracts with guarantees, inclusive of contracts with MVA features, were invested in general account investment options. For the years ended December 31, 2019, 2018 and 2017, there were no transfers of assets, other than cash, from the general account to any separate account, and accordingly no gains or losses recorded.

Notes to Consolidated Financial Statements—(Continued)

Liabilities for Guarantee Benefits

The table below summarizes the changes in general account liabilities for guarantees. The liabilities for GMDB and GMIB are included in "Future policy benefits" and the related changes in the liabilities are included in "Policyholders' benefits." GMAB, GMWB and GMIWB are accounted for as embedded derivatives and are recorded at fair value within "Future policy benefits." Changes in the fair value of these derivatives, including changes in the Company's own risk of non-performance, along with any fees attributed or payments made relating to the derivative, are recorded in "Realized investment gains (losses), net." See Note 6 for additional information regarding the methodology used in determining the fair value of these embedded derivatives. The Company maintains a portfolio of derivative investments that serve as a partial hedge of the risks associated with these products, for which the changes in fair value are also recorded in "Realized investment gains (losses), net." This portfolio of derivative investments does not qualify for hedge accounting treatment under U.S. GAAP. Additionally, the Company externally reinsures the guaranteed benefit features associated with certain contracts. See Note 14 for further information regarding the external reinsurance arrangement.

Balance at December 31, 2019	\$	7,602	\$ 753	\$ 355	\$	12,831

⁽¹⁾ Incurred guarantee benefits include the portion of assessments established as additions to reserves as well as changes in estimates affecting the reserves. Also includes changes in the fair value of features considered to be derivatives.

The GMDB, which includes the liability for no-lapse guarantees, and GMIB liability are established when associated assessments (which include all policy charges including charges for administration, mortality, expense, surrender, and other, regardless of how characterized) are recognized. This liability is established using current best estimate assumptions and is based on the ratio of the present value of total expected excess payments (e.g., payments in excess of account value) over the life of the contract divided by the present value of total expected assessments (i.e., benefit ratio). The liability equals the current benefit ratio multiplied by cumulative assessments recognized to date, plus interest, less cumulative excess payments to date. Similar to as described above for DAC, the reserves are subject to adjustments based on annual reviews of assumptions and quarterly adjustments for experience, including market performance. These adjustments reflect the impact on the benefit ratio of using actual historical experience from the issuance date to the balance sheet date plus updated estimates of future experience. The updated benefit ratio is then applied to all prior periods' assessments to derive an adjustment to the reserve recognized through a benefit or charge to current period earnings.

⁽²⁾ Other primarily represents foreign currency translation.

Notes to Consolidated Financial Statements—(Continued)

The GMAB features provide the contractholder with a guaranteed return of initial account value or an enhanced value if applicable. The most significant of the Company's GMAB features are the guaranteed return option features, which includes an automatic rebalancing element that reduces the Company's exposure to these guarantees. The GMAB liability is calculated as the present value of future expected payments in excess of the account balance less the present value of future expected rider fees attributable to the embedded derivative feature.

The GMWB features provide the contractholder with access to a guaranteed remaining balance if the account value is reduced to zero through a combination of market declines and withdrawals. The guaranteed remaining balance is generally equal to the protected value under the contract, which is initially established as the greater of the account value or cumulative deposits when withdrawals commence, less cumulative withdrawals. The contractholder also has the option, after a specified time period, to reset the guaranteed remaining balance to the then current account value, if greater. The contractholder accesses the guaranteed remaining balance through payments over time, subject to maximum annual limits. The GMWB liability is calculated as the present value of future expected payments to customers less the present value of future expected rider fees attributable to the embedded derivative feature.

The GMIWB features, taken collectively, provide a contractholder two optional methods to receive guaranteed minimum payments over time, a "withdrawal" option or an "income" option. The withdrawal option (which was available under only one of the GMIWBs and is no longer offered) guarantees that a contractholder can withdraw an amount each year until the cumulative withdrawals reach a total guaranteed balance. The income option (which varies among the Company's GMIWBs) in general guarantees the contractholder the ability to withdraw an amount each year for life (or for joint lives, in the case of any spousal version of the benefit) where such amount is equal to a percentage of a protected value under the benefit. The contractholder also has the potential to increase this annual amount, based on certain subsequent increases in account value that may occur. The GMIWB can be elected by the contractholder upon issuance of an appropriate deferred variable annuity contract or at any time following contract issue prior to annuitization. Certain GMIWB features include an automatic rebalancing element that reduces the Company's exposure to these guarantees. The GMIWB liability is calculated as the present value of future expected payments to customers less the present value of future expected rider fees attributable to the embedded derivative feature.

Sales Inducements

The Company defers sales inducements and amortizes them over the anticipated life of the policy using the same methodology and assumptions used to amortize DAC. DSI is included in "Other assets." The Company has offered various types of sales inducements including: (1) a bonus whereby the policyholder's initial account balance is increased by an amount equal to a specified percentage of the customer's initial deposit; (2) additional credits after a certain number of years a contract is held; and (3) enhanced interest crediting rates that are higher than the normal general account interest rate credited in certain product lines. Changes in DSI, reported as "Interest credited to policyholders' account balances," are as follows:

	 Sales Inducements (in millions)
Balance at December 31, 2016	\$ 1,127

Amortization—All other	(163)
Change in unrealized investment gains and losses	(35)
Balance at December 31, 2019	\$ 935

Notes to Consolidated Financial Statements—(Continued)

14. REINSURANCE

The Company participates in reinsurance with third parties primarily to provide additional capacity for future growth, limit the maximum net loss potential arising from large risks and acquire or dispose of businesses.

Effective April 1, 2015, the Company entered into an agreement with Union Hamilton Reinsurance, Ltd. ("Union Hamilton") an external counterparty, to reinsure approximately 50% of the Prudential Premier® Retirement Variable Annuity with Highest Daily Lifetime Income ("HDI") v.3.0 business, a guaranteed benefit feature. This reinsurance agreement covered most new HDI v.3.0 variable annuity business issued between April 1, 2015 and December 31, 2016 on a quota share basis, with Union Hamilton's cumulative quota share amounting to \$2.9 billion of new rider premiums as of December 31, 2016. Reinsurance on business subject to this agreement remains in force for the duration of the underlying annuity contracts. New sales subsequent to December 31, 2016 are not covered by this external reinsurance agreement. These guaranteed benefit features are accounted for as embedded derivatives.

In January 2013, the Company acquired the Hartford Life Business through reinsurance transactions with three subsidiaries of Hartford Financial Services Group, Inc. ("Hartford Financial"). Under the related agreements, the Company provided reinsurance for approximately 700,000 life insurance policies with net retained face amount in force of approximately \$141 billion. The Company acquired the general account business through a coinsurance arrangement and, for certain types of general account policies, a modified coinsurance arrangement. The Company acquired the separate account business through a modified coinsurance arrangement. In December 2017, Hartford Financial announced a definitive agreement to sell a group of operating subsidiaries, which includes two of the Company's counterparties to these reinsurance arrangements. The sale occurred in May 2018 and there was no impact to the terms, rights or obligations of the Company, or operation of these reinsurance arrangements, as a result of this change in control of such counterparties.

Since 2011, the Company has entered into several reinsurance agreements to assume pension liabilities in the United Kingdom. Under these arrangements, the Company assumes the longevity risk associated with the pension benefits of certain specified beneficiaries.

In 2006, the Company acquired the variable annuity business of The Allstate Corporation ("Allstate") through a reinsurance transaction. The reinsurance arrangements with Allstate include a coinsurance arrangement associated with the general account liabilities assumed and a modified coinsurance arrangement associated with the separate account liabilities assumed. The reinsurance payable, which represents the Company's obligation under the modified coinsurance arrangement, is netted with the reinsurance receivable in the Consolidated Statements of Financial Position.

In 2004, the Company acquired the retirement business of CIGNA and subsequently entered into various reinsurance arrangements. The Company still has indemnity coinsurance and modified coinsurance without assumption arrangements in effect related to this acquisition.

For the domestic business, life and disability reinsurance is accomplished through various plans of reinsurance, primarily yearly renewable term, per person excess, excess of loss, and coinsurance. On policies sold since 2000, the Company has reinsured a significant portion of the individual life mortality risk. Placement of reinsurance is accomplished primarily on an automatic basis with some specific risks reinsured on a facultative basis. The Company is authorized and has historically retained up to \$30 million per life, but reduced its operating retention limit to \$20 million per life in 2013. Retention in excess of the operating limit is on an exception basis.

The international business primarily uses reinsurance to obtain experience with respect to certain new product offerings and to a lesser extent, to mitigate mortality risk for certain protection products and for capital management purposes.

Reinsurance amounts included in the Consolidated Statements of Operations for premiums, policy charges and fee income, and policyholders' benefits for the years ended December 31, are as follows:

PRUDENTIAL FINANCIAL, INC. Notes to Consolidated Financial Statements—(Continued)

	 2019 2018		2017

Policyholders' benefits	\$ 36,820	\$	39,404	\$	33,794

Reinsurance recoverables at December 31, are as follows:

	 2019		2018
	(in m	illions)	
Individual and group annuities(1)	\$ 688	\$	499
Life insurance(2)	5,535		4,335
Other reinsurance	403		162
Total reinsurance recoverables	\$ 6,626	\$	4,996

⁽¹⁾ Primarily represents reinsurance recoverables established under the reinsurance arrangements associated with the acquisition of the retirement business of CIGNA. The Company has recorded reinsurance recoverables related to the acquisition of the retirement business of CIGNA of \$553 million and \$481 million at December 31, 2019 and 2018, respectively. Also included is \$95 million and \$15 million of reinsurance recoverables at December 31, 2019 and 2018, respectively, established under the reinsurance agreement with Union Hamilton related to the ceding of certain embedded derivative liabilities associated with the Company's guaranteed benefits.

Excluding the reinsurance recoverable associated with the acquisition of the Hartford Life Business and the retirement business of CIGNA, four major reinsurance companies account for approximately 60% of the reinsurance recoverable at December 31, 2019. The Company periodically reviews the financial condition of its reinsurers, amounts recoverable therefrom, and unearned reinsurance premium, in order to reduce its exposure to loss from reinsurer insolvencies. If deemed necessary, the Company obtains collateral in the form of a trust, letter of credit, or funds withheld arrangement to ensure collectability; otherwise, an allowance for uncollectible reinsurance is recorded. Under the Company's longevity reinsurance transactions, the Company obtains collateral from its counterparties to mitigate counterparty default risk.

15. CLOSED BLOCK

On December 18, 2001, the date of demutualization, PICA established a closed block for certain in-force participating insurance policies and annuity products, along with corresponding assets used for the payment of benefits and policyholders' dividends on these products, (collectively the "Closed Block"), and ceased offering these participating products. The recorded assets and liabilities were allocated to the Closed Block at their historical carrying amounts. The Closed Block forms the principal component of the Closed Block division. See Note 22 for financial information on the Closed Block division. The insurance policies and annuity contracts comprising the Closed Block are managed in accordance with the Plan of Reorganization approved by the New Jersey Department of Banking and Insurance ("NJDOBI") on December 18, 2001, and PICA is directly obligated for the insurance policies and annuity contracts in the Closed Block.

⁽²⁾ Includes \$2,105 million and \$2,035 million of reinsurance recoverables established at December 31, 2019 and 2018, respectively, under the reinsurance arrangements associated with the acquisition of the Hartford Life Business. The Company has also recorded reinsurance payables related to the Hartford Life Business acquisition of \$1,290 million and \$1,259 million at December 31, 2019 and 2018, respectively.

Notes to Consolidated Financial Statements—(Continued)

The policies included in the Closed Block are specified individual life insurance policies and individual annuity contracts that were in force on the date of demutualization and for which PICA is currently paying or expects to pay experience-based policy dividends. Assets have been allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses and taxes and to provide for continuation of the policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues. To the extent that, over time, cash flows from the assets allocated to the Closed Block and claims and other experience related to the Closed Block are, in the aggregate, more or less favorable than what was assumed when the Closed Block was established, total dividends paid to Closed Block policyholders may be greater than or less than the total dividends that would have been paid to these policyholders if the policyholder dividend scales in effect in 2000 had been continued. Any cash flows in excess of amounts assumed will be available for distribution over time to Closed Block policyholders and will not be available to shareholders. If the Closed Block has insufficient funds to make guaranteed policy benefit payments, such payments will be made from PICA's assets outside of the Closed Block. The Closed Block will continue in effect as long as any policy in the Closed Block remains in force unless, with the consent of the New Jersey insurance regulator, it is terminated earlier.

The excess of Closed Block liabilities over Closed Block assets at the date of the demutualization (adjusted to eliminate the impact of related amounts in AOCI) represented the estimated maximum future earnings at that date from the Closed Block expected to result from operations attributed to the Closed Block after income taxes. In establishing the Closed Block, the Company developed an actuarial calculation of the timing of such maximum future earnings. If actual cumulative earnings of the Closed Block from inception through the end of any given period are greater than the expected cumulative earnings, only the expected earnings will be recognized in income. Any excess of actual cumulative earnings over expected cumulative earnings will represent undistributed accumulated earnings attributable to policyholders, which are recorded as a policyholder dividend obligation. The policyholder dividend obligation represents amounts to be paid to Closed Block policyholders as an additional policyholder dividend unless otherwise offset by future Closed Block performance that is less favorable than originally expected. If the actual cumulative earnings of the Closed Block from its inception through the end of any given period are less than the expected cumulative earnings of the Closed Block, the Company will recognize only the actual earnings in income.

As of December 31, 2019 and 2018, the Company recognized a policyholder dividend obligation of \$2,816 million and \$2,252 million, respectively, to Closed Block policyholders for the excess of actual cumulative earnings over the expected cumulative earnings. Additionally, accumulated net unrealized investment gains that have arisen subsequent to the establishment of the Closed Block have been reflected as a policyholder dividend obligation of \$3,332 million and \$899 million at December 31, 2019 and 2018, respectively, to be paid to Closed Block policyholders unless offset by future experience, with a corresponding amount reported in AOCI.

On December 8, 2017, PICA's Board of Directors acted to decrease the dividends payable on Closed Block policies for 2018. On December 7, 2018, PICA's Board of Directors approved a continuation of the dividends payable on Closed Block policies for 2019. On December 6, 2019, PICA's Board of Directors acted to decrease the dividends payable on Closed Block policies for 2020. These actions resulted in a decrease of approximately \$86 million for both years ending December 31, 2017 and 2018 and a decrease of approximately \$79 million for the year ended December 31, 2019 in the liability for policyholders' dividends recognized.

Closed Block liabilities and assets designated to the Closed Block at December 31, as well as maximum future earnings to be recognized from these liabilities and assets, are as follows:

Notes to Consolidated Financial Statements—(Continued)

	2019	2018
	(in mi	llions)
Closed Block liabilities		
Future policy benefits	\$ 47,613	\$ 48,282

Total income taxes	\$	4,801	\$ (9	59)	\$	(623)

⁽¹⁾ Amounts for 2018 U.S. and foreign deferred tax expense have been revised to correct previously reported amounts.

Reconciliation of Expected Tax at Statutory Rates to Reported Income Tax Expense (Benefit)

Notes to Consolidated Financial Statements—(Continued)

The differences between income taxes expected at the U.S. federal statutory income tax rate of 21% applicable for 2019 and 2018 and 35% applicable for 2017, and the reported income tax expense (benefit) are summarized as follows:

	Year Ended December 31,					
		2019		2018		2017
			(i	n millions)		
Expected federal income tax expense (benefit)	\$	1,068	\$	1,015	\$	2,270
Non-taxable investment income		(270)		(246)		(369)
Foreign taxes at other than U.S. rate		225		349		(249)
Low-income housing and other tax credits		(118)		(112)		(126)
Changes in tax law		0		(321)		(2,858)
Other		42		137		(106)
Reported income tax expense (benefit)	\$	947	\$	822	\$	(1,438)
Effective tax rate		18.6%		17.0%		(22.2)%

The effective tax rate is the ratio of "Total income tax expense (benefit)" divided by "Income before income taxes and equity in earnings of operating joint ventures." The Company's effective tax rate for fiscal years 2019, 2018 and 2017 was 18.6%, 17.0% and (22.2)%, respectively. The following is a description of items that had the most significant impact on the difference between the Company's statutory U.S. federal income tax rate of 21% applicable for 2019 and 2018 and 35% applicable for 2017, and the Company's effective tax rate during the periods presented:

Changes in Tax Law. The following is a list of notable changes in tax law that impacted the Company's effective tax rate for the periods presented:

Tax Act of 2017 - On December 22, 2017, the Tax Act of 2017 was enacted into U.S. law. As a result, the Company recognized a \$2,880 million tax benefit in "Total income tax expense (benefit)" in the Company's Consolidated Statements of Operations for the year ended December 31, 2017. In accordance with SEC Staff Accounting Bulletin 118, in 2017 the Company recorded the effects of the Tax Act of 2017 using reasonable estimates due to the need for further analysis of the provisions within the Tax Act of 2017 and collection, preparation and analysis of relevant data necessary to complete the accounting. During 2018, the Company completed the collection, preparation and analysis of data relevant to the Tax Act of 2017, and interpreted any additional guidance issued by the IRS, U.S. Department of the Treasury, or other standard-setting organizations, and recognized a \$153 million reduction in income tax expense primarily related to refinements of our provisional estimates of earnings of affiliated foreign companies subject to the one-time toll charge.

The financial statement impact related to the adoption of Tax Act of 2017 for the twelve months ended December 31, 2017 and twelve months ended December 31, 2018 was as follows:

	 Twelve Months Ended December 31, 2017 Twelve Months Ended December 31, 2018			Total
			(in millions)	
Deferred tax revaluation from tax law change	\$ (1,592)	\$	7	\$ (1,585)
Adoption of modified territorial system	(1,785)		(24)	(1,809)
Deemed repatriation	497		(136)	361
Total provision for income tax expense (benefit)	\$ (2,880)	\$	(153)	\$ (3,033)

2018 Industry Issue Resolution (IIR). In August 2018, the IRS released a Directive to provide guidance on the tax reserving for guaranteed benefits within variable annuity contracts and principle-based reserves on certain life insurance contracts. Adopting the methodology specified in the Directive resulted in an accelerated deduction for the Company's 2017 tax return, that would have otherwise been deductible in future years. Prior to the adoption of this Directive, the Company accounted for these future deductions as deferred tax assets measured using the current 21% corporate income tax rate. Upon adoption of the Directive, the tax benefits were revalued using the 35% tax rate applicable for the 2017 tax year and resulted in a reduction in income tax expense of \$198 million.

Notes to Consolidated Financial Statements—(Continued)

South Korea Tax Reform Bill. On December 19, 2017, South Korea enacted a 2018 tax reform bill that adds a new 25% corporate income tax bracket for taxable income in excess of \\$300 billion for tax years beginning on or after January 1, 2018. Taxable income in excess of \\$20 billion but less than \\$300 billion continues to be subject to a 22% corporate income tax. In addition, corporations continue to be subject to a local income surtax of 10% of the computed corporate income tax before the application of tax credits and exemptions (i.e., 2.5% for the tax base in excess of \\$300 billion, 2.2% for the tax base between \\$20 billion and \\$300 billion). After taking into account this 10% local income tax surcharge on corporate tax, the 2018 tax reform bill increased the top corporate income tax rate in South Korea from 24.2% to 27.5%. As a result, the Company recognized a \\$26 million tax expense in 2017 related to remeasuring Korea's deferred tax assets and liabilities.

Non-Taxable Investment Income. The U.S. Dividends Received Deduction ("DRD") reduces the amount of dividend income subject to U.S. tax and accounts for most of the non-taxable investment income shown in the table above. More specifically, the U.S. DRD constitutes \$122 million of the total \$270 million of 2019 non-taxable investment income, \$127 million of the total \$246 million of 2018 non-taxable investment income, and \$280 million of the total \$369 million of 2017 non-taxable investment income. The DRD for the current period was estimated using information from 2018, current year investment results, and current year's equity market performance. The actual current year DRD can vary based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from fund investments, changes in the account balances of variable life and annuity contracts, and the Company's taxable income before the DRD.

Foreign Taxes at Other Than U.S. Rates. The statutory income tax rate in the Company's two largest non-U.S. tax jurisdictions is approximately 28% in Japan and 24.2% in Korea as compared to the U.S. federal income tax rate of 21% applicable for 2019 and 2018 and 35% applicable for 2017.

The 952 Election. The Company made a tax election, effective for the 2017 and later tax years, to subject earnings from its insurance operations in Brazil to tax in the U.S. in the tax year earned, net of related foreign tax credits. This election has the effect of reducing the rate at which the Company will incur taxes on these earnings from the approximately 45% tax rate in Brazil to the 21% tax rate in the U.S., which in turn will reduce the amount of associated income tax expense in 2018 and thereafter. In conjunction with this election, the Company remeasured its related deferred tax assets from the previous 45% rate in Brazil to the new rate of 21% in the U.S., which resulted in additional income tax expense at the time of election. The net effect of the lower tax rate and the remeasurement of the deferred tax assets was a net increase in income tax expense of \$34 million in 2018 and a net decrease in income tax expense of \$3 million in 2019. In October 2019, the IRS issued a legal memorandum, applicable to all taxpayers, in which the IRS argues that the election became inoperable in 1998. The Company disagrees with the IRS's position and intends to defend its position. If the Company is ultimately not successful, it will not be able to claim a U.S. tax credit for the Brazil taxes in excess of the U.S. tax rate, and thus will have a higher tax expense over time.

<u>Low-Income Housing and Other Tax Credits</u>. These amounts include incentives within the U.S. tax code for the development of affordable housing aiming at low-income Americans. The Company routinely makes such investments that generate a tax credit which reduces the Company's effective tax rate.

<u>Other</u>. This line item represents insignificant reconciling items that are individually less than 5% of the computed expected federal income tax expense (benefit) and have therefore been aggregated for purposes of this reconciliation in accordance with relevant disclosure guidance.

Notes to Consolidated Financial Statements—(Continued)

Schedule of Deferred Tax Assets and Deferred Tax Liabilities

	 As of Dec	ember 31,		
	 2019		2018	
	(in m	illions)	ı	
Deferred tax assets:				
Insurance reserves	\$ 730	\$	0	
Policyholders' dividends	1,365		733	
Net operating and capital loss carryforwards	189		155	
Refundable AMT credits	0		205	
Employee benefits	973		693	
Investments	0		1,002	
Other	113		39	
Deferred tax assets before valuation allowance	3,370		2,827	
Valuation allowance	(136)		(117)	
Deferred tax assets after valuation allowance	3,234		2,710	
Deferred tax liabilities:				
Insurance reserves	0		719	
Net unrealized investment gains	11,109		5,961	
Deferred policy acquisition costs	3,799		3,888	
Investments	138		0	
Value of business acquired	262		461	
Deferred tax liabilities	15,308		11,029	
Net deferred tax liability	\$ (12,074)	\$	(8,319)	

The application of U.S. GAAP requires the Company to evaluate the recoverability of deferred tax assets and establish a valuation allowance if necessary to reduce the deferred tax asset to an amount that is more likely than not expected to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance, the Company considers many factors, including: (1) the nature of the deferred tax assets and liabilities; (2) whether they are ordinary or capital; (3) in which tax jurisdictions they were generated and the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized in the various taxing jurisdictions; (6) any unique tax rules that would impact the utilization of the deferred tax assets; and (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although realization is not assured, management believes it is more likely than not that the deferred tax assets, net of valuation allowances, will be realized.

A valuation allowance has been recorded against deferred tax assets related to federal, state and local taxes and foreign operations. Adjustments to the valuation allowance are made to reflect changes in management's assessment of the amount of the deferred tax asset that is realizable and the amount of deferred tax asset actually realized during the year. The valuation allowance includes amounts recorded in connection with deferred tax assets as follows:

	 Federal	State	Fo	oreign Operations	Total
		(in mi	illions)	ı	
Balance at January 1, 2017	\$ 0	\$ 138	\$	25	\$ 163
Charged to costs and expenses	0	63		3	66
Other adjustments	0	(5)		(10)	(15)
Balance at December 31, 2017	0	196		18	214
Charged to costs and expenses	0	24		(6)	18
Other adjustments	0	(114)		(1)	(115)
Balance at December 31, 2018	 0	106		11	117
Charged to costs and expenses	3	34		(5)	32
Other adjustments	0	(13)		0	(13)
Balance at December 31, 2019	\$ 3	\$ 127	\$	6	\$ 136

The following table sets forth the amount and expiration dates of federal, state and foreign operating losses, capital loss and foreign tax credit carryforwards for tax purposes, as of the periods indicated:

	 As of De	cembe	er 31,
	 2019		2018
	(in m	nillions	s)
Federal net operating and capital loss carryforwards(1)	\$ 33	\$	0
State net operating and capital loss carryforwards(2)	\$ 2,005	\$	2,152
Foreign net operating and capital loss carryforwards(3)	\$ 203	\$	99
Federal foreign tax credit carryforwards(4)	\$ 4	\$	0

- (1) Expires in 2024.
- (2) Expires between 2020 and 2039.
- (3) \$124 million expires between 2021 and 2035 and \$79 million has an unlimited carryforward. Prior year balance has been updated to conform with current period presentation.
- (4) Expires in 2029.

Consistent with the Tax Act of 2017, the Company provides applicable U.S. income tax for all unremitted earnings of the Company's foreign affiliates. For certain foreign affiliates organized in withholding tax jurisdictions, the Company considers the unremitted foreign earnings of those affiliates to be indefinitely reinvested, and therefore does not provide for the withholding tax when calculating its current and deferred tax obligations. For certain other foreign affiliates organized in withholding tax jurisdictions, the Company does not consider unremitted earnings indefinitely reinvested, and therefore provides for foreign withholding tax when calculating its current and deferred tax obligations. The following table summarizes the Company's indefinite reinvestment assertions for jurisdictions in which the Company operates that impose a withholding tax on dividends or may be subject to other foreign country tax upon a remittance:

Unremitted earnings are indefinitely reinvested

Unremitted earnings are not indefinitely reinvested

Insurance operations in Chile, China, and Taiwan and non-insurance operations in Korea and certain operations in Luxembourg

Insurance operations in Argentina, Indonesia, and Ghana, and non-insurance operations in China, Italy and Taiwan, as well as partially for the insurance operation in Korea

During the fourth quarter of 2017, in light of and for the period after the Tax Act of 2017, the Company determined that all unremitted earnings of the Company's foreign operations are not considered indefinitely reinvested for purposes of determining U.S. tax liability, as well as determining whether the unremitted earnings of the Company's foreign operations are considered indefinitely reinvested for purposes of determining its foreign withholding tax liability, as described above. Prior to the enactment of the Tax Act of 2017, for the Japanese insurance operations, the Company provided for U.S. income taxes on pre-2014 U.S. GAAP earnings, post-2013 realized and unrealized capital gains, and an additional amount from Gibraltar Life and Prudential Gibraltar Financial Life Insurance Co. Ltd. ("PGFL"), not to exceed the deferred tax asset recorded in the Statement of Financial Position as of the acquisition date for PGFL and the Star and Edison Businesses. The Company had no change to its U.S. tax in "Income (loss) before equity in earnings of operating joint ventures" during 2017. During the first and second quarters of 2018,

Notes to Consolidated Financial Statements—(Continued)

respectively, the Company determined that the earnings of its Polish and Italian insurance operation would be repatriated to the U.S. Accordingly, earnings of the Polish and Italian insurance operations were not considered indefinitely reinvested, and the Company recognized an income tax expense of \$10 million during 2018. During the first and fourth quarters of 2018, the Company determined that a portion of the earnings of its Korean insurance operation would be repatriated to the U.S. Accordingly, a portion of the earnings of the Korean insurance operation were not considered indefinitely reinvested, and the Company recognized an income tax expense of \$14 million in "Income (loss) before equity in earnings of operating joint ventures" during 2018. The Company made no changes with respect to its repatriation assumptions in 2019.

The following table sets forth the undistributed earnings of foreign subsidiaries, where the Company assumes indefinite reinvestment of such earnings and for which, in 2019, 2018, and 2017, U.S. deferred taxes have not been provided, and for which, in 2017 and 2018, foreign deferred withholding taxes have not been provided. The net tax liability that may arise if the 2019 earnings were remitted can range from \$0 to \$235 million which includes any foreign exchange impacts.

		At Dece	mber 31	,	
	 2019	20)18		2017
		(in mi	illions)		
Undistributed earnings of foreign subsidiaries (assuming indefinite reinvestment for U.S. tax purposes)(1)	N/A		N/A		N/A
Undistributed earnings of foreign subsidiaries (assuming indefinite reinvestment only for Withholding or other non-U.S. Taxes)	\$ 2,764	\$ 2	2,475	\$	2,603

⁽¹⁾ Consistent with the Tax Act of 2017, the Company provides U.S. income tax for all unremitted earnings of the Company's foreign affiliates as of December 31, 2017.

The Company's "Income (loss) before income taxes and equity in earnings of operating joint ventures" includes income from domestic operations of \$1,985 million, \$1,447 million and \$2,541 million, and income (loss) from foreign operations of \$3,101 million, \$3,387 million and \$3,945 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Tax Audit and Unrecognized Tax Benefits

The Company's liability for income taxes includes the liability for unrecognized tax benefits and interest that relate to tax years still subject to review by the IRS or other taxing authorities. The completion of review or the expiration of the Federal statute of limitations for a given audit period could result in an adjustment to the liability for income taxes.

The following table reconciles the total amount of unrecognized tax benefits at the beginning and end of the periods indicated.

	2	2019		2018		2017
			(in 1	nillions)		
Balance at January 1,	\$	20	\$	45	\$	26
Increases in unrecognized tax benefits—prior years		0		20		11
(Decreases) in unrecognized tax benefits—prior years		(2)		0		(5)
Increases in unrecognized tax benefits—current year		0		0		14
(Decreases) in unrecognized tax benefits—current year		0		0		0
Settlements with taxing authorities		0		(45)		(1)
Balance at December 31,	\$	18	\$	20	\$	45
Unrecognized tax benefits that, if recognized, would favorably impact the effective rate	\$	0	\$	0	\$	45

The Company does not anticipate any significant changes within the next twelve months to its total unrecognized tax benefits related to tax years for which the statute of limitations has not expired.

The Company classifies all interest and penalties related to tax uncertainties as income tax expense (benefit). The amounts recognized in the consolidated financial statements for tax-related interest and penalties for the years ended December 31 are as follows:

Interest and penalties recognized in liabilities in the Consolidated Statements of Financial Position		\$	2	\$	1

Listed below are the tax years that remain subject to examination, by major tax jurisdiction, as of December 31, 2019:

Major Tax Jurisdiction	Open Tax Years
United States	2015-2019
Japan	Fiscal years ended March 31, 2015-2019
Korea	2014-2019

The Company participates in the IRS's Compliance Assurance Program. Under this program, the IRS assigns an examination team to review completed transactions as they occur in order to reach agreement with the Company on how they should be reported in the relevant tax returns. If disagreements arise, accelerated resolutions programs are available to resolve the disagreements in a timely manner.

Some of the Company's affiliates in Japan file a consolidated tax return, while others file separate tax returns. The Company's affiliates in Japan are subject to audits by the local taxing authority. The general statute of limitations is five years from when the return is filed. The Japanese National Tax Service conducted tax audits of some non-insurance companies during the reporting period, which had no material impact on the Company's 2017, 2018 or 2019 results.

The Company's affiliates in South Korea file separate tax returns and are subject to audits by the local taxing authority. The general statute of limitations is five years from when the return is filed. In December 2019, the Korean tax authority informed Prudential of Korea that during 2020 they intend to conduct a tax audit of its 2015, 2016, and 2017 tax years.

17. SHORT-TERM AND LONG-TERM DEBT

Short-term Debt

The table below presents the Company's short-term debt at December 31, for the years indicated as follows:

Notes to Consolidated Financial Statements—(Continued)

	 2019		2018
	(\$ in r	millions)
Commercial paper:			
Prudential Financial	\$ 25	\$	15
Prudential Funding, LLC	524		727
Subtotal commercial paper	549		742
Mortgage Debt(1)	0		53
Current portion of long-term debt:			
Senior Notes	1,179		1,100
Mortgage Debt	192		57
Surplus Notes	0		499
Subtotal Current portion of long-term debt	 1,371		1,656
Other(2)	13		0
Total short-term debt(3)	\$ 1,933	\$	2,451
Supplemental short-term debt information:			
Portion of commercial paper borrowings due overnight	\$ 224	\$	301
Daily average commercial paper outstanding for the quarter ended	\$ 1,702	\$	1,554
Weighted average maturity of outstanding commercial paper, in days	6		12
Weighted average interest rate on outstanding commercial paper(4)	1.61%		2.41%

- (1) Includes \$53 million of mortgage debt denominated in foreign currency at December 31, 2018.
- (2) Includes \$13 million drawn on a revolving line of credit held by a subsidiary at December 31, 2019.
- (3) Includes Prudential Financial debt of \$1,204 million and \$1,115 million at December 31, 2019 and 2018, respectively.
- (4) Prior period interest rate has been updated to conform to current period presentation.

At December 31, 2019 and 2018, the Company was in compliance with all covenants related to the above debt.

Commercial Paper

Prudential Financial has a commercial paper program with an authorized capacity of \$3.0 billion. Prudential Financial's commercial paper borrowings have generally been used to fund the working capital needs of Prudential Financial's subsidiaries and provide short-term liquidity at Prudential Financial.

Prudential Funding, LLC ("Prudential Funding"), a wholly-owned subsidiary of PICA, has a commercial paper program, with an authorized capacity of \$7.0 billion. Prudential Funding commercial paper borrowings generally have served as an additional source of financing to meet the working capital needs of PICA and its subsidiaries. Prudential Funding also lends to other subsidiaries of Prudential Financial up to limits agreed with the NJDOBI. Prudential Funding maintains a support agreement with PICA whereby PICA has agreed to maintain Prudential Funding's tangible net worth at a positive level. Additionally, Prudential Financial has issued a subordinated guarantee covering Prudential Funding's \$7.0 billion commercial paper program.

Federal Home Loan Bank of New York

PICA is a member of the FHLBNY. Membership allows PICA access to the FHLBNY's financial services, including the ability to obtain collateralized loans and to issue collateralized funding agreements. Under applicable law, the funding agreements issued to the FHLBNY have priority claim status above debt holders of PICA. FHLBNY borrowings and funding agreements are collateralized by qualifying mortgage-related assets or U.S. Treasury securities, the fair value of which must be maintained at certain specified levels relative to outstanding borrowings. FHLBNY membership requires PICA to own member stock and borrowings require the purchase of activity-based stock in an amount equal to 4.5% of outstanding borrowings. Under FHLBNY guidelines, if any of PICA's financial strength ratings decline below A-/A3/A- Negative by S&P/Moody's/Fitch, respectively, and the FHLBNY does not receive written assurances from the NJDOBI regarding PICA's solvency, new borrowings from the FHLBNY would be limited to a term of 90 days or less. Currently there are no restrictions on the term of borrowings from the FHLBNY stock purchased by PICA is classified as restricted general account investments within "Other invested assets," and the carrying value of these investments was \$30.2 million and \$29.9 million as of December 31, 2019 and 2018, respectively.

Notes to Consolidated Financial Statements—(Continued)

NJDOBI permits PICA to pledge collateral to the FHLBNY in an amount of up to 5% of its prior year-end statutory net admitted assets, excluding separate account assets. Based on PICA's statutory net admitted assets as of December 31, 2018, the 5% limitation equates to a maximum amount of eligible assets of \$6.7 billion and an estimated maximum borrowing capacity (after taking into account required collateralization levels) of approximately \$5.9 billion. Nevertheless, FHLBNY borrowings are subject to the FHLBNY's discretion and to the availability of qualifying assets at PICA.

PICA had no advances outstanding under the FHLBNY facility as of December 31, 2019. In February 2020, PICA issued a \$1 billion funding agreement with a seven-year term under this facility.

Federal Home Loan Bank of Boston

Prudential Retirement Insurance and Annuity Company ("PRIAC") is a member of the Federal Home Loan Bank of Boston ("FHLBB"). Membership allows PRIAC access to collateralized advances which will be classified in "Short-term debt" or "Long-term debt," depending on the maturity date of the obligation. PRIAC's membership in FHLBB requires the ownership of member stock and borrowings from FHLBB require the purchase of activity-based stock in an amount between 3.0% and 4.5% of outstanding borrowings, depending on the maturity date of the obligation. All FHLBB stock purchased by PRIAC is classified as restricted general account investments within "Other invested assets," and the carrying value of these investments was \$6 million and \$10 million as of December 31, 2019 and 2018, respectively. As of December 31, 2019, PRIAC had no advances outstanding under the FHLBB facility.

Under Connecticut state insurance law, without the prior consent of the Connecticut Insurance Department, the amount of assets insurers may pledge to secure debt obligations is limited to the lesser of 5% of prior-year statutory admitted assets or 25% of prior-year statutory surplus, resulting in a maximum borrowing capacity for PRIAC under the FHLBB facility of approximately \$271 million as of December 31, 2019.

Surplus Notes

In August 2019, as a result of the note holders' exercise of the exchange option on \$500 million of surplus notes, the Company issued approximately 6.2 million shares of Common Stock at an exchange rate equal to 12.3877 shares of Common Stock per each \$1,000 principal amount of surplus notes. The Company's obligations under the surplus notes are now satisfied.

Credit Facilities

As of December 31, 2019, the Company maintained syndicated, unsecured committed credit facilities as described below.

<u>Borrower</u>	Original Term	Expiration Date		Capacity	Amour	nt Outstanding
				(in	millions)
Prudential Financial and Prudential Funding	5 years	Jul 2022	\$	4,000	\$	0
Prudential Holdings of Japan. Inc.	5 years	Sep 2024	¥	100,000	¥	0

The \$4.0 billion five-year credit facility contains customary representations and warranties, covenants and events of default and borrowings are not contingent on the borrowers' credit ratings nor subject to material adverse change clauses. Borrowings under this facility are conditioned on the continued satisfaction of customary conditions, including Prudential Financial's maintenance of consolidated net worth of at least \$20.958 billion, which is calculated as U.S. GAAP equity, excluding AOCI, equity of noncontrolling interests and equity attributable to the Closed Block. The Company expects that it may borrow under the facility from time to time to fund its working capital needs. In addition, amounts under this credit facility may be drawn in the form of standby letters of credit that can be used to meet the Company's operating needs.

The ¥100 billion five-year facility was entered into by Prudential Holdings of Japan, Inc. ("PHJ") in September 2019. This facility also contains customary representations and warranties, covenants, and events of default and borrowings are not contingent on the borrower's credit ratings nor subject to material adverse change clauses.

Borrowings under each of these credit facilities may be used for general corporate purposes. As of December 31, 2019, the Company was in compliance with the covenants under each of these credit facilities.

Notes to Consolidated Financial Statements—(Continued)

In addition to the above credit facilities, the Company had access to \$370 million of certain other lines of credit at December 31, 2019, of which \$160 million was for the sole use of certain real estate separate accounts. The separate account facilities include loan-to-value ratio requirements and other financial covenants, and recourse on obligations under these facilities is limited to the assets of the applicable separate account. At December 31, 2019, \$19 million of these credit facilities were used. The Company also has access to uncommitted lines of credit from financial institutions.

Put Option Agreement for Senior Debt Issuance

In November 2013, Prudential Financial entered into a ten-year put option agreement with a Delaware trust upon the completion of the sale of \$1.5 billion of trust securities by that Delaware trust in a Rule 144A private placement. The trust invested the proceeds from the sale of the trust securities in a portfolio of principal and interest strips of U.S. Treasury securities. The put option agreement provides Prudential Financial the right to sell to the trust at any time up to \$1.5 billion of 4.419% senior notes due November 2023 and receive in exchange a corresponding amount of the principal and interest strips of U.S. Treasury securities held by the trust. In return, the Company agreed to pay a semi-annual put premium to the trust at a rate of 1.777% per annum applied to the unexercised portion of the put option. The put option agreement with the trust provides Prudential Financial with a source of liquid assets.

The put option described above will be exercised automatically in full upon the Company's failure to make certain payments to the trust, such as paying the put option premium or reimbursing the trust for its expenses, if the Company's failure to pay is not cured within 30 days, and upon an event involving its bankruptcy. The Company is also required to exercise the put option if its consolidated stockholders' equity, calculated in accordance with U.S. GAAP but excluding AOCI, falls below \$7.0 billion, subject to adjustment in certain cases. The Company has a one-time right to unwind a prior voluntary exercise of the put option by repurchasing all of the senior notes then held by the trust in exchange for principal and interest strips of U.S. Treasury securities. Finally, any of the 4.419% senior notes that Prudential Financial issues may be redeemed prior to their maturity at par or, if greater, a make-whole price, following a voluntary exercise in full of the put option.

Notes to Consolidated Financial Statements—(Continued)

Long-term Debt

The table below presents the Company's long-term debt at December 31, for the years indicated as follows:

	Maturity Dec				mber 31,		
	Dates	Rate(1)	2019			2018	
				(\$ in r	nillions)		
Fixed-rate notes:							
Surplus notes	2025	8.30%	\$	342	\$	341	
Surplus notes subject to set-off arrangements	2021-2038	3.52%-5.26%		7,484		6,895	
Senior notes	2021-2051	1.35%-11.31%		10,084		8,774	
Mortgage debt(2)	2021-2027	2.95%-3.85%		104		237	
Floating-rate notes:							
Line of Credit	2022	3.10%-3.75%		300		0	
Surplus notes subject to set-off arrangements	2024-2037	3.48%-4.20%		2,265		2,200	
Senior notes		-		0		29	
Mortgage debt(3)	2021-2024	2.36%-4.67%		241		429	
Junior subordinated notes(4)	2042-2058	1.55%-5.88%		7,575		7,568	
Subtotal				28,395		26,473	
Less: assets under set-off arrangements(5)				9,749		9,095	
Total long-term debt(6)			\$	18,646	\$	17,378	

⁽¹⁾ Ranges of interest rates are for the year ended December 31, 2019.

(6) Includes Prudential Financial debt of \$17,430 million and \$16,141 million at December 31, 2019 and 2018, respectively.

At December 31, 2019 and 2018, the Company was in compliance with all debt covenants related to the borrowings in the table above.

The following table presents the contractual maturities of the Company's long-term debt as of December 31, 2019:

	 Calendar Year										
	2021	1	2022	2	2023	2	2024	2025 and hereafter			
					(in 1	nillion	ıs)				
Long-term debt	\$ 491	\$	436	\$	245	\$	725	\$ 16,750	\$	18,646	

Surplus Notes

As of December 31, 2019, the Company had \$342 million of fixed-rate surplus notes outstanding. These notes are subordinated to other PICA borrowings and policyholder obligations, and the payment of interest and principal may only be made with the prior approval of the NJDOBI. The NJDOBI could prohibit the payment of the interest and principal on the surplus notes if certain statutory capital requirements are not met. At December 31, 2019 and 2018, the Company met these statutory capital requirements.

From 2011 through 2013, a captive reinsurance subsidiary entered into agreements providing for the issuance and sale of up to \$2 billion of ten-year fixed-rate surplus notes. The aggregate amount available to be issued under these agreements was reduced to \$1.75 billion in 2018. The agreements were restructured in 2019 to provide for financing in the same amount through 2036. Under the agreements, the captive receives in exchange for the surplus notes one or more credit-linked notes issued by a special-purpose subsidiary of the Company in an aggregate principal amount equal to the surplus notes issued. The captive holds the credit-linked notes as assets supporting the non-economic portion of the statutory reserve required to be held by the Company's domestic insurance subsidiaries under Regulation XXX in connection with the reinsurance of term life insurance policies through the captive. The non-economic portion of the statutory reserve equals the difference between the statutory reserve required under

⁽²⁾ Includes \$43 million and \$101 million of debt denominated in foreign currency at December 31, 2019 and 2018, respectively.

⁽³⁾ Includes \$53 million and \$206 million of debt denominated in foreign currency at December 31, 2019 and 2018, respectively.

⁽⁴⁾ Includes Prudential Financial debt of \$7,518 million and subsidiary debt of \$57 million denominated in foreign currency at December 31, 2019.

⁵⁾ Assets under set-off arrangements represent a reduction in the amount of surplus notes included in long-term debt, resulting from an arrangement where valid rights of set-off exist and it is the intent of both parties to settle on a net basis under legally enforceable arrangements. These assets include available-for-sale securities that are reported at fair value.

Notes to Consolidated Financial Statements—(Continued)

Regulation XXX and the amount the Company considers necessary to maintain solvency for moderately adverse experience. The principal amount of the outstanding credit-linked notes is redeemable by the captive in cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event affecting the captive. Under the agreements, external counterparties have agreed to fund any such payment under the credit-linked notes in return for a fee. Prudential Financial has agreed to reimburse one of the external counterparties for any payment under the credit-linked notes funded by it in an amount of up to \$0.5 billion. As of December 31, 2019, an aggregate of \$1.75 billion of surplus notes were outstanding under these agreements and no such payments under the credit-linked notes have been required.

In December 2013, a captive reinsurance subsidiary entered into a twenty-year financing facility with external counterparties providing for the issuance and sale of a surplus note for the financing of non-economic reserves required under Guideline AXXX. The current financing capacity available under the facility is \$3.5 billion, but can be increased to a maximum potential size of \$4.5 billion. The captive receives in exchange for the surplus note one or more credit-linked notes is redeemable by the captive in cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event, and the external counterparties have agreed to fund any such payment. Prudential Financial has agreed to reimburse the captive for investment losses in excess of specified amounts; however, Prudential Financial has no other reimbursement obligations to the external counterparties under this facility. As of December 31, 2019, an aggregate of \$3.25 billion of surplus notes were outstanding under the facility and no credit-linked note payments have been required.

In December 2014, a captive reinsurance subsidiary entered into a financing facility with external counterparties, pursuant to which the captive agreed to issue and sell a surplus note with a ten-year term in an aggregate principal amount of up to \$1.75 billion in return for an equal principal amount of credit-linked notes issued by a special-purpose affiliate. In December 2017, the Company increased the maximum potential size of the facility to \$2.4 billion, of which \$650 million has a twenty-year term. The captive holds the credit-linked notes as assets supporting non-economic reserves required to be held by the Company's domestic insurance subsidiaries under Regulation XXX. The principal amount of the outstanding credit-linked notes is redeemable by the captive in cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event affecting the captive. Under the agreements, external counterparties have agreed to fund any such payment under the credit-linked notes in return for a fee. Prudential Financial has no reimbursement obligations to the external counterparties under this facility. As of December 31, 2019, an aggregate of \$2.27 billion of surplus notes were outstanding under the facility and no credit-linked note payments have been required.

Another captive reinsurance subsidiary maintains a financing facility with external counterparties, pursuant to which the captive has outstanding \$2.36 billion in principal amount of surplus notes and received in return an equal principal amount of credit-linked notes issued by a special-purpose affiliate. The remaining term of the financing is approximately fifteen years. The captive holds the credit-linked notes as assets supporting non-economic reserves required to be held by the Company's domestic insurance subsidiaries under Regulation XXX. The captive can redeem the credit-linked notes in cash upon the occurrence of, and in an amount necessary to remedy, a liquidity stress event affecting the captive. Current capacity of this financing facility is \$2.45 billion. Prudential Financial has agreed to make capital contributions to the captive and to the special-purpose affiliate to reimburse them for investment losses in excess of specified amounts. Prudential Financial has also agreed to reimburse one of the external counterparties for any payments under the credit-linked notes funded by it in an amount of up to \$1.0 billion.

In March 2017, a captive reinsurance subsidiary entered into a twenty-year financing facility with external counterparties providing for the issuance and sale of a surplus note for the financing of non-economic reserves required under Guideline AXXX. The initial financing capacity available under the facility was \$1.0 billion. In June 2018, the Company amended this captive financing facility by increasing the maximum potential size of the facility to \$2.0 billion. The captive receives in exchange for the surplus note one or more credit-linked notes issued by a special-purpose affiliate in an aggregate principal amount equal to the surplus note. The principal amount of the outstanding credit-linked notes is redeemable by the captive in cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event, and the external counterparties have agreed to fund any such payment. Prudential Financial has no reimbursement obligations to the external counterparties under this facility. As of December 31, 2019, an aggregate of \$1.47 billion of surplus notes were outstanding under the facility and no credit-linked note payments have been required.

In March 2018, the Company established a new \$1.6 billion captive financing facility to finance non-economic reserves required under Regulation XXX. Similar to the Company's other captive financing facilities, a captive reinsurance subsidiary issues surplus notes under the facility in exchange for credit-linked notes issued by a special-purpose affiliate that are held to support non-economic reserves. The credit-linked notes are redeemable for cash upon the occurrence of a liquidity stress event affecting the captive and external counterparties have agreed to fund these payments. Prudential Financial has no reimbursement

Notes to Consolidated Financial Statements—(Continued)

obligations to the external counterparties under this facility. As of December 31, 2019, \$920 million of surplus notes were outstanding under the facility and no credit-linked note payments have been required.

Under each of the above transactions for the captive reinsurance subsidiaries, because valid rights of set-off exist, interest and principal payments on the surplus notes and on the related credit-linked notes are settled on a net basis, and the surplus notes are reflected in the Company's total consolidated borrowings on a net basis. The surplus notes for the captive reinsurance subsidiaries described above are subordinated to policyholder obligations, and for certain applicable surplus notes, the repayment of principal may only be made with prior approval of the Arizona Department of Insurance. The payment of interest on the surplus notes has been approved by the Arizona Department of Insurance, subject to its ability to withdraw that approval.

In February 2015, Prudential Legacy Insurance Company of New Jersey ("PLIC") entered into a twenty-year financing facility with certain external counterparties and a special-purpose affiliate, pursuant to which PLIC may, at its option and subject to the satisfaction of customary conditions, issue and sell to the affiliate up to \$4.0 billion in aggregate principal amount of surplus notes, in return for an equal principal amount of credit-linked notes. Upon issuance, PLIC would hold any credit-linked notes as assets to support future statutory surplus needs within PLIC. As of December 31, 2019, an aggregate of \$100 million of surplus notes were outstanding under the facility and no credit-linked note payments have been required.

Senior Notes

Medium-Term Notes Program. The Company maintains a medium-term notes program under its shelf registration statement with an authorized issuance capacity of \$20.0 billion. As of December 31, 2019, the outstanding balance of medium-term notes under this program was \$9.34 billion, of which \$1.15 billion is included in current portion of long-term debt. This is an increase of \$1.4 billion from December 31, 2018. The increase was due to the issuance of \$1 billion of medium-term notes with an interest rate of 4.350% maturing in February 2050 and \$1.5 billion of notes with an interest rate of 3.700% maturing in 2051, offset by \$1,100 million of maturities in March and August 2019.

Retail Medium-Term Notes Program. The Company maintains a retail medium-term notes program under its shelf registration statement with an authorized issuance capacity of \$5.0 billion. As of December 31, 2019, the outstanding balance of the program was \$302 million, of which \$29 million is included in current portion of long-term debt.

The weighted average interest rate on outstanding senior notes issued under these programs, including the effect of interest rate hedging activity, was 4.85% and 5.04% for the years ended December 31, 2019 and 2018, respectively, excluding the effect of debt issued to consolidated subsidiaries.

Funding Agreement Notes Issuance Program ("FANIP"). The Company maintains a FANIP in which statutory trusts issue medium-term notes and commercial paper secured by funding agreements issued to the trusts by PICA. These obligations are included in "Policyholders' account balances" and not included in the foregoing table. See Note 12 for further discussion of these obligations.

Mortgage Debt. As of December 31, 2019, the Company's subsidiaries had long-term mortgage debt of \$537 million that has recourse only to real estate property held for investment by those subsidiaries. This represents a decrease of \$239 million from December 31, 2018, primarily due to \$288 million of prepayment activity, offset by new borrowings in 2019 of \$47 million and foreign exchange fluctuations of \$2 million.

Junior Subordinated Notes

Certain of Prudential Financial's junior subordinated notes outstanding are considered hybrid securities that receive enhanced equity treatment from the rating agencies. These notes outstanding, along with their key terms, are as follows:

<u>Issue Date</u>		rincipal Amount	Initial Interest Rate	Optional Investor Redemption Type Date		Interest Rate Subsequent to Optional Redemption Date	Maturity Date
	(\$ iı	n millions)					
Aug-12	\$	1,000	5.88%	Institutional	9/15/2022	LIBOR + 4.18%	9/15/2042
Nov-12	\$	1,500	5.63%	Institutional	6/15/2023	LIBOR + 3.92%	6/15/2043
Dec-12	\$	575	5.75%	Retail	12/4/2017	5.75%	12/15/2052
Mar-13	\$	710	5.70%	Retail	3/15/2018	5.70%	3/15/2053
Mar-13	\$	500	5.20%	Institutional	3/15/2024	LIBOR + 3.04%	3/15/2044
May-15	\$	1,000	5.38%	Institutional	5/15/2025	LIBOR + 3.03%	3/15/2045
Sep-17	\$	750	4.50%	Institutional	9/15/2027	LIBOR + 2.38%	9/15/2047
Aug-18	\$	565	5.63%	Retail	8/13/2023	5.63%	8/13/2058
Sep-18	\$	1,000	5.70%	Institutional	9/15/2028	LIBOR + 2.67%	9/15/2048

The Company has the right to defer interest payments on these notes for specified periods, typically 5 to 10 years without resulting in a default, during which time interest will be compounded. On or after the optional redemption dates, Prudential Financial may redeem the notes at par plus accrued and unpaid interest. Prior to those optional redemption dates, redemptions generally are subject to a make-whole price; however, the Company may redeem the notes prior to these dates at par upon the occurrence of certain events, such as a future change in the regulatory capital treatment of the notes with respect to the Company.

Limited Recourse Notes. In 2014, the Company entered into financing transactions pursuant to which it issued \$500 million of limited recourse notes and, in return, obtained \$500 million of asset-backed notes issued by a designated series of a Delaware master trust. The asset-backed notes mature from 2020 through 2026; however, the maturity date of a portion of the notes may be extended by the Company through 2028, subject to conditions.

The master trust's payment obligations under each of the asset-backed notes are secured by corresponding payment obligations of a third-party financial institution and a portfolio of specified assets that have an aggregate value at least equal to the principal amount of the applicable asset-backed note. The principal amount of each asset-backed note is payable to PRIAC in cash at any time upon demand by PRIAC or, if not repaid earlier, at maturity. Each of the limited recourse notes obligates Prudential Financial to reimburse the applicable third-party financial institution for any principal payments received on the corresponding asset-backed note, but there is no obligation to reimburse any portion of a principal payment that is needed by PRIAC to pay then current claims to its policyholders. Each limited recourse note bears interest at a rate equal to the rate on the corresponding asset-backed note, plus an amount representing fees payable to the applicable third-party financial institution. As of December 31, 2019, no principal payments have been received or are currently due on the asset-backed notes and, as a result, there was no payment obligation under the limited recourse notes. Accordingly, the notes are not reflected in the Consolidated Financial Statements as of December 31, 2019.

Interest Expense

In order to modify exposure to interest rate and currency exchange rate movements, the Company utilizes derivative instruments, primarily interest rate swaps, in conjunction with some of its debt issues. The impact of these derivative instruments is not reflected in the rates presented in the tables above. For those derivative instruments that qualify for hedge accounting treatment, interest expense was less than \$1 million, \$1 million, and \$3 million for the years ended December 31, 2019, 2018 and 2017, respectively. See Note 5 for additional information on the Company's use of derivative instruments.

Interest expense for short-term and long-term debt was \$1,563 million, \$1,423 million and \$1,334 million for the years ended December 31, 2019, 2018 and 2017, respectively.

18. EMPLOYEE BENEFIT PLANS

Pension and Other Postretirement Plans

The Company has funded and non-funded non-contributory defined benefit pension plans ("Pension Benefits"), which cover substantially all of its employees. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and earnings during their career.

Notes to Consolidated Financial Statements—(Continued)

The Company provides certain health care and life insurance benefits for its retired employees, their beneficiaries and covered dependents ("Other Postretirement Benefits"). The health care plan is contributory; the life insurance plan is non-contributory. Substantially all of the Company's U.S. employees may become eligible to receive other postretirement benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service.

Prepaid benefits costs and accrued benefit liabilities are included in "Other assets" and "Other liabilities," respectively, in the Company's Consolidated Statements of Financial Position. The status of these plans as of December 31, 2019 and 2018 is summarized below:

	Pension Benefits				Other Postretirement Benefits

Notes to Consolidated Financial Statements—(Continued)

In addition to the plan assets above, the Company in 2007 established an irrevocable trust, commonly referred to as a "rabbi trust," for the purpose of holding assets of the Company to be used to satisfy its obligations with respect to certain non-qualified retirement plans (\$1,301 million and \$1,208 million benefit obligation at December 31, 2019 and 2018, respectively). Assets held in the rabbi trust are available to the general creditors of the Company in the event of insolvency or bankruptcy. The Company may from time to time in its discretion make contributions to the trust to fund accrued benefits payable to participants in one or more of the plans, and, in the case of a change in control of the Company, as defined in the trust agreement, the Company will be required to make contributions to the trust to fund the accrued benefits, vested and unvested, payable on a pre-tax basis to participants in the plans. The Company did not make any discretionary payments to the trust in 2019 and 2018. As of December 31, 2019 and 2018, the assets in the trust had a carrying value of \$986 million and \$861 million, respectively.

The Company also maintains a separate rabbi trust for the purpose of holding assets of the Company to be used to satisfy its obligations with respect to certain other non-qualified retirement plans (\$76 million and \$72 million benefit obligation at December 31, 2019 and 2018, respectively), as well as certain cash-based deferred compensation arrangements. As of December 31, 2019 and 2018, the assets in the trust had a carrying value of \$106 million and \$102 million, respectively.

Pension benefits for foreign plans comprised 14% and 15% of the ending benefit obligation for both 2019 and 2018, respectively. Foreign pension plans comprised 5% of the ending fair value of plan assets for both 2019 and 2018. There are no material foreign postretirement plans.

Information for pension plans with a projected benefit obligation in excess of plan assets

	_	2019		2018
		(in m	ıillioı	ns)
Projected benefit obligation	\$	2,997	\$	2,895
Fair value of plan assets	\$	62	\$	59

	 2019		2018
	(in m	illion	ıs)
Accumulated benefit obligation	\$ 2,760	\$	2,697
Fair value of plan assets	\$ 7	\$	6

There were no purchases of annuity contracts in 2019 and 2018 from PICA. The approximate future annual benefit payment payable by PICA for all annuity contracts was \$22 million and \$18 million as of December 31, 2019 and 2018, respectively.

Components of Net Periodic Benefit Cost

The Company uses market related value to determine components of net periodic (benefit) cost. Market related value recognizes certain changes in fair value of plan assets over a period of five years. Changes in the fair value of U.S. equities, international equities, real estate and other assets are recognized over a five year period. However, changes in the fair value for fixed maturity assets (including short-term investments) are recognized immediately for the purposes of market related value.

Net periodic (benefit) cost included in "General and administrative expenses" in the Company's Consolidated Statements of Operations for the years ended December 31, includes the following components:

		Pension Benefits			Other Postretirer Benefits				ment			
		2019		2018 20		2017		2019	2018			2017
		(in ı					in millions)					
Service cost	\$	291	\$	314	\$	284	\$	22	\$	23	\$	20
Interest cost		489		448		476		78		70		82
Expected return on plan assets	(816)		(817)		(781)		(95)		(108)		(102)
Amortization of prior service cost		(4)		(4)		(3)		4		1		0
Amortization of actuarial (gain) loss, net		217		213		191		24		17		36
Settlements		59		8		13		0		0		0
Special termination benefits(1)(2)		26		1		4		1		0		0
Net periodic (benefit) cost	\$	262	\$	163	\$	184	\$	34	\$	3	\$	36

⁽¹⁾ For 2019, 2018 and 2017 certain employees were provided special termination benefits under non-qualified plans in the form of unreduced early retirement benefits as a result of their involuntary termination.

Changes in Accumulated Other Comprehensive Income (Loss)

The benefit obligation is based upon actuarial assumptions such as discount, termination, retirement, mortality and salary growth rates. Changes at year-end in these actuarial assumptions, along with experience changes based on updated participant census data are deferred in AOCI. Plan assets generate actuarial gains and losses when actual returns on plan assets differ from expected returns on plan assets, and these differences are also deferred in AOCI. The cumulative deferred gain (loss) within AOCI is amortized into earnings if it exceeds 10% of the greater of the benefit obligation or plan assets at the beginning of the year, and the amortization period is based upon the actuarially calculated expected future years of service for a given plan.

The amounts recorded in AOCI as of the end of the period, which have not yet been recognized as a component of net periodic (benefit) cost, and the related changes in these items during the period that are recognized in "Other comprehensive income (loss)" are as follows:

		Pension Benefits					Other Postretiren Benefits									
	S	Prior Service Cost		Service		Service		Net Actuarial (Gain) Loss		Actuarial		Actuarial		Prior ervice Cost		Net actuarial ain) Loss
			(in millions)

⁽²⁾ For 2019 certain employees were provided special termination benefits in the qualified and non-qualified plans in the form of retirement eligibility bridging as a result of their participation in the Voluntary Separation Program that was offered to eligible U.S.-based employees in 2019.

Notes to Consolidated Financial Statements—(Continued)

The amounts included in AOCI expected to be recognized as components of net periodic (benefit) cost in 2020 are as follows:

	Pension Benefits	Other Postretirement Benefits
	(i	n millions)
Amortization of prior service cost	\$ (4)	\$ 6
Amortization of actuarial (gain) loss, net	262	17
Total	\$ 258	\$ 23

The Company's assumptions related to the calculation of the domestic benefit obligation (end of period) and the determination of net periodic (benefit) cost (beginning of period) are presented in the table below:

	Pension Benefits			Other Po	nefits	
	2019	2018	2017	2019	2018	2017
Weighted average assumptions						
Discount rate (beginning of period)	4.30%	3.65%	4.15%	4.30%	3.60%	4.05%
Discount rate (end of period)	3.30%	4.30%	3.65%	3.25%	4.30%	3.60%
Rate of increase in compensation levels (beginning of period)	4.50%	4.50%	4.50%	N/A	N/A	N/A
Rate of increase in compensation levels (end of period)	4.50%	4.50%	4.50%	N/A	N/A	N/A
Expected return on plan assets (beginning of period)	6.50%	6.25%	6.25%	7.00%	7.00%	7.00%
Health care cost trend rates (beginning of period)	N/A	N/A	N/A	6.00%	6.20%	6.60%
Health care cost trend rates (end of period)	N/A	N/A	N/A	6.25%	6.00%	6.20%
For 2019, 2018 and 2017, the ultimate health care cost trend rate after gradual decrease until: 2024, 2024, 2021, (beginning of period)	N/A	N/A	N/A	5.00%	5.00%	5.00%
For 2019, 2018 and 2017, the ultimate health care cost trend rate after gradual decrease until: 2028, 2024, 2024 (end of period)	N/A	N/A	N/A	5.00%	5.00%	5.00%

The domestic discount rate used to value the pension and postretirement obligations at December 31, 2019 and December 31, 2018 is based upon the value of a portfolio of Aa-rated investments whose cash flows would be available to pay the benefit obligation's cash flows when due. The December 31, 2019 portfolio is selected from a compilation of approximately 540 Aa-rated bonds across the full range of maturities. Since yields can vary widely at each maturity point, the Company generally avoids using the highest and lowest yielding bonds at the maturity points, so as to avoid relying on bonds that might be mispriced or misrated. This refinement process generally results in having a distribution from the 10th to 90th percentile. The Aa-rated portfolio is then selected and, accordingly, its value is a measure of the benefit obligation. A single equivalent discount rate is calculated to equate the value of the Aa-rated portfolio to the cash flows for the benefit obligation. The result is rounded to the nearest 5 basis points and the benefit obligation is recalculated using the rounded discount rate.

The pension and postretirement expected long-term rates of return on plan assets for 2019 were determined based upon an approach that considered the allocation of plan assets as of December 31, 2018. Expected returns are estimated by asset class as noted in the discussion of investment policies and strategies below. Expected returns on asset classes are developed using a building-block approach that is forward looking and are not strictly based upon historical returns. The building blocks for equity returns include inflation, real return, a term premium, an equity risk premium, capital appreciation, expenses, the effect of active management and the effect of rebalancing. The building blocks for fixed maturity returns include inflation, real return, a term premium, credit spread, capital appreciation, effect of active management, expenses and the effect of rebalancing.

The Company applied the same approach to the determination of the expected rate of return on plan assets in 2020. The expected rate of return for 2020 is 6.00% and 6.75% for pension and postretirement, respectively.

The assumptions for foreign pension plans are based on local markets. There are no material foreign postretirement plans.

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plan. A one-percentage point increase and decrease in assumed health care cost trend rates would have the following effects:

Notes to Consolidated Financial Statements—(Continued)

	 Other Postretirement Benefits
	(in millions)
One percentage point increase	
Increase in total service and interest costs	\$ 6
Increase in postretirement benefit obligation	\$ 110
One percentage point decrease	
Decrease in total service and interest costs	\$ 5
Decrease in postretirement benefit obligation	\$ 102

Plan Assets

The investment goal of the domestic pension plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds and other investments. The cash requirements of the pension obligation, which include a traditional formula principally representing payments to annuitants and a cash balance formula that allows lump sum payments and annuity payments, are designed to be met by the bonds and short-term investments in the portfolio. The pension plan risk management practices include guidelines for asset concentration, credit rating and liquidity. The pension plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

The investment goal of the domestic postretirement plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds, and other investments, while meeting the cash requirements for the postretirement obligation that includes a medical benefit including prescription drugs, a dental benefit and a life benefit. The postretirement plan risk management practices include guidelines for asset concentration, credit rating, liquidity and tax efficiency. The postretirement plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

The plan fiduciaries for the Company's pension and postretirement plans have developed guidelines for asset allocations reflecting a percentage of total assets by asset class, which are reviewed on an annual basis. Asset allocation targets as of December 31, 2019 are as follows:

	Pen	sion	Postretirement		
	Minimum	Maximum	Minimum	Maximum	
Asset Category					
U.S. Equities	2%	8%	29%	66%	
International Equities	2%	10%	2%	21%	
Fixed Maturities	54%	66%	10%	48%	
Short-term Investments	0%	12%	0%	35%	
Real Estate	2%	16%	0%	0%	
Other	6%	27%	0%	0%	

To implement the investment strategy, plan assets are invested in funds that primarily invest in securities that correspond to one of the asset categories under the investment guidelines. However, at any point in time, some of the assets in a fund may be of a different nature than the specified asset category.

Assets held with PICA are in either pooled separate accounts or single client separate accounts. Pooled separate accounts hold assets for multiple investors. Each investor owns a "unit of account." Single client separate accounts hold assets for only one investor, the domestic qualified pension plan, and each security in the fund is treated as individually owned. Assets held with a bank are either in common/collective trusts or single client trusts. Common or collective trusts hold assets for more than one investor. Each investor owns a "unit of account." Single client trusts hold assets for only one investor, the domestic qualified pension plan, and each security in the fund is treated as individually owned.

There were no investments in Prudential Financial Common Stock as of December 31, 2019 and December 31, 2018 for either the pension or postretirement plans.

Notes to Consolidated Financial Statements—(Continued)

The authoritative guidance around fair value established a framework for measuring fair value. Fair value is disclosed using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, as described in Note 6.

The following describes the valuation methodologies used for pension and postretirement plans assets measured at fair value.

Insurance Company Pooled Separate Accounts, Common or Collective Trusts, and United Kingdom Insurance Pooled Funds—Insurance company pooled separate accounts are invested via group annuity contracts issued by PICA. Assets are represented by a "unit of account." The redemption value of those units is based on a per unit value whose value is the result of the accumulated values of underlying investments. The underlying investments are valued in accordance with the corresponding valuation method for the investments held.

Equities—See Note 6 for a discussion of the valuation methodologies for equity securities.

U.S. Government Securities (both Federal and State & Other), Non-U.S. Government Securities, and Corporate Debt—See Note 6 for a discussion of the valuation methodologies for fixed maturity securities.

Interest Rate Swaps—See Note 6 for a discussion of the valuation methodologies for derivative instruments.

Guaranteed Investment Contracts—The value is based on contract cash flows and available market rates for similar investments.

Registered Investment Companies (Mutual Funds)—Securities are priced at the NAV of shares.

Unrealized Gain (Loss) on Investment of Securities Lending Collateral—This value is the contractual position relative to the investment of securities lending collateral.

Real Estate—The values are determined through an independent appraisal process. The estimate of fair value is based on three approaches; (1) current cost of reproducing the property less deterioration and functional/economic obsolescence; (2) discounting a series of income streams and reversion at a specific yield or by directly capitalizing a single year income estimate by an appropriate factor; and (3) value indicated by recent sales of comparable properties in the market. Each approach requires the exercise of subjective judgment.

Short-term Investments—Securities are valued initially at cost and thereafter adjusted for amortization of any discount or premium (i.e., amortized cost). Amortized cost approximates fair value.

Partnerships—Valued at the NAV of shares. The NAV is used as a practical expedient to estimate fair value. The value of interests owned in partnerships is based on valuations of the underlying investments that include private placements, structured debt, real estate, equities, fixed maturities, commodities and other investments.

Hedge Funds—Valued at the NAV of shares. The NAV is used as a practical expedient to estimate fair value. The value of interests in hedge funds is based on the underlying investments that include equities, debt and other investments.

Variable Life Insurance Policies—These assets are held in group and individual variable life insurance policies issued by PICA. Group policies are invested in Insurance Company Pooled Separate Accounts. Individual policies are invested in Registered Investment Companies (Mutual Funds). The value of interest in these policies is the cash surrender value of the policies based on the underlying investments.

Pension plan asset allocations in accordance with the investment guidelines are as follows:

Real Estate	11	10	0	0	
Other	16	18	0	0	
Total	100%	100%	100%	100%	

The expected benefit payments for the Company's pension and postretirement plans, as well as the expected Medicare Part D subsidy receipts related to the Company's postretirement plan, for the years indicated are as follows:

	 Pension Benefit Payments	_	Other Postretirement Benefit Payments	_	Other Postretirement Benefits- Medicare Part D Subsidy Receipts
			(in millions)		
2020	\$ 938	\$	147	\$	8
2021	797		148		8
2022	825		149		8
2023	858		148		7
2024	865		146		7
2025-2029	4,577		698		32
Total	\$ 8,860	\$	1,436	\$	70

The Company anticipates that it will make cash contributions in 2020 of approximately \$205 million to the pension plans and approximately \$10 million to the postretirement plans.

Postemployment Benefits

The Company accrues postemployment benefits for income continuance and health and life benefits provided to former or inactive employees who are not retirees. The net accumulated liability for these benefits at December 31, 2019 and 2018 was \$1 million and is included in "Other liabilities."

Other Employee Benefits

The Company sponsors voluntary savings plans for employees (401(k) plans). The plans provide for salary reduction contributions by employees and matching contributions by the Company of up to 4% of annual salary. The matching contributions by the Company included in "General and administrative expenses" were \$84 million, \$89 million and \$74 million for the years ended December 31, 2019, 2018 and 2017, respectively.

19. EQUITY

Preferred Stock

As of December 31, 2019, 2018 and 2017, the Company had 10,000,000 shares of preferred stock authorized but none issued or outstanding.

Common Stock

On the date of demutualization in December 2001, Prudential Financial completed an initial public offering of its Common Stock. The shares of Common Stock issued were in addition to shares of Common Stock the Company distributed to policyholders as part of the demutualization. The Common Stock is traded on the New York Stock Exchange under the symbol "PRU". In the event of a liquidation, dissolution or winding-up of the Company, holders of Common Stock would be entitled to receive a proportionate share of the net assets of the Company that remain after paying all liabilities and the liquidation preferences of any preferred stock.

The changes in the number of shares of Common Stock issued, held in treasury and outstanding, are as follows for the periods indicated:

Notes to Consolidated Financial Statements—(Continued)

Balance, December 31, 2019	666.3	267.5	398.8	

⁽¹⁾ Represents net shares issued from treasury pursuant to the Company's stock-based compensation programs.

Additional paid-in capital

Additional paid-in capital is primarily comprised of the cumulative excess between: (a) the total cash received by the Company in conjunction with past issuances of Common Stock shares or Common Stock shares reissued from treasury in conjunction with the Company's stock-based compensation program and (b) the total par value associated with those shares (\$.01 per share).

Common stock held in treasury

Common Stock held in treasury represents the Company's previously issued shares of stock which have been repurchased by the Company but not retired. These shares are accounted for at the cost at which they were acquired. Common Stock held in treasury is typically impacted by repurchases of shares under the Board of Directors approved share repurchase program and by reissuances of shares associated with our stock-based compensation programs, or for other purposes, which are accounted for at average cost upon reissuance. Gains resulting from the reissuance of Common Stock held in treasury are credited to Additional paid-in capital. Losses resulting from the reissuance of Common Stock held in treasury are charged first to Additional paid-in capital to the extent the Company has previously recorded gains on treasury share transactions, then to Retained earnings.

The Board of Directors may from time to time, at its discretion, authorize management to repurchase shares of Common Stock of the Company. The timing and amount of share repurchases are determined by management based upon market conditions and other considerations, and repurchases may be executed in the open market, through derivative, accelerated repurchase and other negotiated transactions and through prearranged trading plans complying with Rule 10b5-1(c) under the Securities Exchange Act of 1934 (the "Exchange Act"). Numerous factors could affect the timing and amount of any future repurchases under the share repurchase authorization, including increased capital needs of the Company due to changes in regulatory capital requirements, opportunities for growth and acquisitions, and the effect of adverse market conditions on the segments.

The following table summarizes share repurchases for each of the past three years as well as the share repurchase authorization for 2020 which was approved by the Board of Directors in December 2019.

⁽²⁾ In August 2019, as a result of the note holders' exercise of the exchange option on \$500 million of surplus notes, the Company issued approximately 6.2 million shares of Common Stock at an exchange rate equal to 12.3877 shares of Common Stock per each \$1,000 principal amount of surplus notes. The Company's obligations under the surplus notes are now satisfied. For additional information, see Note 20.

³⁾ In October 2019, the Company issued approximately 5.5 million shares of restricted Common Stock as part of consideration paid for the Assurance IQ acquisition. For additional information about the acquisition, see Note 1.

			January 1, 2019 - December 31, 2019		January 1, 2018 - December 31, 2018		January 1, 2017 - December 31, 20

⁽⁵⁾ See Note 18 for information on employee benefit plans.

Notes to Consolidated Financial Statements—(Continued)

Net Unrealized Investment Gains (Losses)

Net unrealized investment gains (losses) on securities classified as available-for-sale and certain other invested assets and other assets are included in the Company's Consolidated Statements of Financial Position as a component of AOCI. Changes in these amounts include reclassification adjustments to exclude from "Other comprehensive income (loss)" those items that are included as part of "Net income" for a period that had been part of "Other comprehensive income (loss)" in earlier periods. The amounts for the periods indicated below, split between amounts related to fixed maturity securities on which an OTTI loss has been recognized, and all other net unrealized investment gains (losses), are as follows:

Net Unrealized Investment Gains (Losses) on Fixed Maturity Securities on which an OTTI loss has been recognized

Notes to Consolidated Financial Statements—(Continued)

(2) Represents "transfers out" related to the portion of OTTI losses recognized during the period that were not recognized in earnings for securities with no prior OTTI loss.

Retained earnings

Retained earnings primarily represents the cumulative net income earned by the Company that has been retained by the Company as of the reporting date. Other unique items, included but not limited to the adoption of new accounting standards updates, may also impact retained earnings. In any given period, retained earnings may increase due to net income and may decrease due to net losses or the declaration of dividends. The declaration and payment of dividends on the Common Stock is limited by New Jersey corporate law, pursuant to which Prudential Financial is prohibited from paying a Common Stock dividend if, after giving effect to that dividend, either (a) the Company would be unable to pay its debts as they become due in the usual course of its business or (b) the Company's total assets would be less than its liabilities. In addition, the terms of the Company's outstanding junior subordinated debt include a "dividend stopper" provision that restricts the payment of dividends on the Common Stock if interest payments are not made on the junior subordinated debt.

Other than the above limitations, the Company's Retained earnings balance is free of restrictions for the payment of Common Stock dividends; however, Common Stock dividends will be dependent upon financial conditions, results of operations, cash needs, future prospects and other factors, including cash available to Prudential Financial, the parent holding company. The principal sources of funds available to Prudential Financial are dividends and returns of capital from its subsidiaries, loans from its subsidiaries, repayments of operating loans from its subsidiaries, and cash and other highly liquid assets. The primary uses of funds at Prudential Financial include servicing its debt, operating expenses, capital contributions and loans to subsidiaries, the payment of declared shareholder dividends and repurchases of outstanding shares of Common Stock if executed under Board authority. As of December 31, 2019, Prudential Financial had highly liquid assets (excluding amounts held in an intercompany liquidity account) of \$4,061 million predominantly including cash, short-term investments, U.S. Treasury securities, obligations of other U.S. government authorities and agencies, and/or foreign government bonds.

Future cash available at Prudential Financial to support the payment of future Common Stock dividends is dependent on the receipt of dividends or other funds from its subsidiaries, the majority of which are subject to comprehensive regulation, including limitations on their payment of dividends and other transfers of funds, which are discussed in this Note further below.

Non-controlling interests

For certain subsidiaries, the Company owns a controlling interest that is less than 100% ownership of the subsidiary but must consolidate 100% of the subsidiary's financial statements in accordance with U.S. GAAP. Non-controlling interests represent the portion of equity ownership in a consolidated subsidiary that is not attributable to the Company.

Insurance Subsidiaries - Statutory Financial Information and Restrictions on Payments of Dividends

U.S. Insurance Subsidiaries - Statutory Financial Information

The Company's domestic insurance subsidiaries are required to prepare statutory financial statements in accordance with statutory accounting practices prescribed or permitted by the insurance department of the state of domicile. Statutory accounting practices primarily differ from U.S. GAAP by charging policy acquisition costs to expense as incurred, establishing future policy benefit liabilities using different actuarial assumptions as well as valuing investments and certain assets and accounting for deferred taxes on a different basis.

The risk-based capital ("RBC") ratio is a primary measure by which the Company and its insurance regulators evaluate the capital adequacy of PICA and the Company's other domestic insurance subsidiaries. RBC is determined by NAIC-prescribed formulas that consider, among other things, risks related to the type and quality of the invested assets, insurance-related risks associated with an insurer's products and liabilities, interest rate risks and general business risks. Insurers that have less statutory capital than required are considered to have inadequate capital and are subject to varying degrees of regulatory action depending upon the level of capital inadequacy. The Company expects to report RBC ratios as of December 31, 2019 above the regulatory required minimums that would require corrective action and above our "AA" financial strength target levels for both PICA and Prudential Annuities Life Assurance Corporation ("PALAC").

The following table summarizes certain statutory financial information for the Company's two largest U.S. insurance subsidiaries for the periods indicated:

				PICA			PALAC							
In millions and presented as of or for the year ended	Decem	ber 31, 2019	Dece	mber 31, 2018	Dece	ember 31, 2017	Dece	mber 31, 2019	Dece	ember 31, 2018	Dece	ember 31, 2017		
Statutory net income (loss)(1)	\$	(169)	\$	1,324	\$	(217)	\$	(2,052)	\$	(852)	\$	3,911		
Statutory capital and surplus(1)	\$	11,483	\$	10,695	\$	9,948	\$	4,748	\$	6,396	\$	8,059		

⁽¹⁾ Prior year amounts have been updated to conform to finalized statutory filing where applicable.

With respect to PICA, a New Jersey domiciled insurance subsidiary which is also the Company's primary domestic insurance subsidiary, New Jersey insurance law provides that, except in the case of extraordinary dividends (as described below), all dividends or other distributions paid by PICA may be paid only from unassigned surplus, as determined pursuant to statutory accounting principles, less cumulative unrealized investment gains and losses and revaluation of assets as of the prior calendar year-end. As of December 31, 2019, PICA's unassigned surplus less applicable adjustments for cumulative unrealized investment gains was \$7,511 million. PICA must give prior notification to the NJDOBI of its intent to pay any such dividend or distribution. Also, if any dividend, together with other dividends or distributions made within the preceding twelve months, exceeds the greater of (i) 10% of statutory capital and surplus as of the preceding December 31 or (ii) its statutory net gain from operations excluding realized investment gains and losses for the twelve-month period ending on the preceding December 31, the dividend is considered to be an "extraordinary dividend" and requires the prior approval of the NJDOBI. Under New Jersey insurance law, PICA is permitted to pay an ordinary dividend of up to \$1,148 million in 2020, without prior approval of the NJDOBI.

The laws regulating dividends of the states where the Company's other domestic insurance subsidiaries are domiciled are similar, but not identical, to New Jersey. With respect to PALAC, an Arizona domiciled insurance subsidiary of the Company, Arizona insurance law provides that if any dividend, together with other dividends or distributions made within the preceding twelve months, exceeds the lesser of (i) 10% of statutory capital and surplus as of the preceding December 31 or (ii) its statutory net gain from operations excluding realized investment gains and losses for the twelve month period ending on the preceding December 31, the dividend is considered to be an "extraordinary dividend" and requires prior approval of the Arizona Department of Insurance. Under Arizona law, the maximum PALAC is permitted to pay in 2020 as an ordinary dividend is \$204 million, without prior approval of the Arizona Department of Insurance.

International Insurance Subsidiaries - Statutory Financial Information

The Company's international insurance subsidiaries prepare financial statements in accordance with local regulatory requirements. These statutory accounting practices differ from U.S. GAAP primarily by charging policy acquisition costs to expense as incurred and establishing future policy benefit liabilities using different actuarial assumptions, as well as valuing investments and certain assets and accounting for deferred taxes on a different basis.

The Japan Financial Services Agency ("FSA") utilizes a solvency margin ratio to evaluate the capital adequacy of Japanese insurance companies. The solvency margin ratio considers the level of solvency margin capital to a solvency margin risk amount, which is calculated in a similar manner to RBC. As of December 31, 2019, the Company expects The Prudential Life Insurance Company Ltd. ("Prudential of Japan") and Gibraltar Life both had solvency margin capital in excess of 3.5 times the regulatory required minimums that would require corrective action.

All of the Company's domestic and international insurance subsidiaries have capital and surplus levels that exceed their respective regulatory minimum requirements, and none utilized prescribed or permitted practices that vary materially from the practices prescribed by the NAIC or equivalent regulatory bodies for results reported as of December 31, 2019 and 2018, respectively, or for the years ended December 31, 2019, 2018 and 2017, respectively.

International Insurance Subsidiaries - Restrictions on Payment of Dividends to Prudential Financial, the Parent Holding Company

The Company's international insurance operations are subject to dividend restrictions from the regulatory authorities in the jurisdictions in which they operate. With respect to Prudential of Japan and Gibraltar Life, the Company's most significant international insurance subsidiaries, both of which are domiciled in Japan, Japan insurance law provides that common stock dividends may be paid in an amount of up to 83% of prior fiscal year statutory after-tax earnings, after certain reserving thresholds are met, including providing for policyholder dividends. If statutory retained earnings exceed 100% of statutory paid-in capital,

U.S. Insurance Subsidiaries - Restrictions on Payment of Dividends to Prudential Financial, the Parent Holding Company

Notes to Consolidated Financial Statements—(Continued)

100% of prior year statutory after-tax earnings may be paid, after reserving thresholds are met. Dividends in excess of these amounts and other forms of capital distribution require the prior approval of the FSA. Additionally, Prudential of Japan and Gibraltar Life must give prior notification to the FSA of their intent to pay any dividend or distribution. In addition to paying common stock dividends, Prudential of Japan and Gibraltar Life may return capital to Prudential Financial through other means, such as the repayment of subordinated debt or preferred stock obligations held by Prudential Financial or other affiliates and affiliated lending, derivatives and reinsurance.

For the year ended December 31, 2019, Prudential Financial received \$1,065 million from its international insurance subsidiaries. In addition to paying Common Stock dividends, the Company's international insurance operations may return capital to Prudential Financial through, or facilitated by, other means, such as the repayment of Preferred Stock obligations held by Prudential Financial or other affiliates, affiliated lending, affiliated derivatives and reinsurance with U.S.-and Bermuda-based affiliates. In 2019, the Company's Japan insurance operations entered into reinsurance agreements with Gibraltar Re, the Company's Bermuda-based reinsurance affiliate, to reinsure the mortality and morbidity risk associated with a portion of the in-force contracts as well as newly-issued contracts for certain products. The Company expects these transactions will allow it to more efficiently manage its capital and risk profile. The current regulatory fiscal year end for both Prudential of Japan and Gibraltar Life is March 31, 2020, after which time the common stock dividend amount permitted to be paid without prior approval from the FSA can be determined.

In addition, although prior regulatory approval may not be required by law for the payment of dividends up to the limitations described above, in practice, the Company would typically discuss any dividend payments with the applicable regulatory authority prior to payment. Additionally, the payment of dividends by the Company's subsidiaries is subject to declaration by their Board of Directors and may be affected by market conditions and other factors.

20. EARNINGS PER SHARE

A reconciliation of the numerators and denominators of the basic and diluted per share computations of Common Stock based on the consolidated earnings of Prudential Financial for the years ended December 31, is as follows:

PRUDENTIAL FINANCIAL, INC. Notes to Consolidated Financial Statements—(Continued)

		2019		2018			2017				
	Income	Weighted Average Shares	er Share Amount	Income	Weighted Average Shares		r Share mount	Income	Weighted Average Shares		r Share mount
				(in millio	ns, except per s	hare a	mounts)				
Basic earnings per share											
Net income (loss)	\$ 4,238			\$ 4,088				\$ 7,974			
Less: Income (loss) attributable to noncontrolling interests	52			14				111			
Less: Dividends and undistributed earnings allocated to participating unvested share-based payment awards	46			48				95			
Net income (loss) attributable to Prudential Financial available to holders of Common Stock	\$ 4,140	404.8	\$ 10.23	\$ 4,026	417.6	\$	9.64	\$ 7,768	427.0	\$	18.19
Effect of dilutive securities and compensation programs											
Add: Dividends and undistributed earnings allocated to participating unvested share-based payment awards—Basic	\$ 46			\$ 48				\$ 95			
Less: Dividends and undistributed earnings allocated to participating unvested share-based payment awards —Diluted	45			47				94			
Stock options		1.1			1.5				2.1		
Deferred and long-term compensation programs		1.4			1.2				1.1		
Exchangeable Surplus Notes	12	3.6		21	5.9			17	5.8		
Diluted earnings per share							•				
Net income (loss) attributable to Prudential Financial available to holders of Common Stock	\$ 4,153	410.9	\$ 10.11	\$ 4,048	426.2	\$	9.50	\$ 7,786	436.0	\$	17.86

Unvested share-based payment awards that contain nonforfeitable rights to dividends are participating securities and included in the computation of earnings per share pursuant to the two-class method. Under this method, earnings attributable to Prudential Financial are allocated between Common Stock and the participating awards, as if the awards were a second class of stock. During periods of net income available to holders of Common Stock, the calculation of earnings per share excludes the income attributable to participating securities in the numerator and the dilutive impact of these securities from the denominator. In the event of a net loss available to holders of Common Stock, undistributed earnings are not allocated to participating securities and the denominator excludes the dilutive impact of these securities as they do not share in the losses of the Company. Undistributed earnings allocated to participating unvested share-based payment awards for the years ended December 31, 2019, 2018 and 2017, as applicable, were based on 4.6 million, 4.9 million and 5.2 million of such awards, respectively, weighted for the period they were outstanding.

Stock options and shares related to deferred and long-term compensation programs that are considered antidilutive are excluded from the computation of diluted earnings per share. Stock options are considered antidilutive based on application of the treasury stock method or in the event of a net loss available to holders of Common Stock. Shares related to deferred and long-term compensation programs are considered antidilutive in the event of a net loss available to holders of Common Stock. For the years ended December 31, the number of stock options and shares related to deferred and long-term compensation programs that were considered antidilutive and were excluded from the computation of diluted earnings per share, weighted for the portion of the period they were outstanding, are as follows:

Notes to Consolidated Financial Statements—(Continued)

	2	2019	2	018	2	2017
	Shares	Exercise Price Per Share	Shares	Exercise Price Per Shares Share		Exercise Price Per Share
		(in millions		share amounts l average)	, based on	
Antidilutive stock options based on application of the treasury stock method	1.2	\$ 102.84	0.7	\$ 108.34	0.3	\$ 110.18
Antidilutive stock options due to net loss available to holders of Common Stock	0.0		0.0		0.0	
Antidilutive shares based on application of the treasury stock method	0.0		0.0		0.1	
Antidilutive shares due to net loss available to holders of Common Stock	0.0		0.0		0.0	
Total antidilutive stock options and shares	1.2		0.7		0.4	

In September 2009, the Company issued \$500 million of surplus notes with an interest rate of 5.36% per annum which were exchangeable at the option of the note holders for shares of Common Stock. The initial exchange rate for the surplus notes was 10.1235 shares of Common Stock per each \$1,000 principal amount of surplus notes. This was equivalent to 5.1 million shares and an initial exchange price per share of Common Stock of \$98.78. In August 2019, as a result of the note holders' exercise of the exchange option, the Company issued approximately 6.2 million shares of Common Stock at an exchange rate equal to 12.3877 shares of Common Stock per each \$1,000 principal amount of surplus notes. The Company's obligations under the surplus notes are now satisfied. In calculating diluted earnings per share under the if-converted method, the potential shares that would be issued assuming a hypothetical exchange, weighted for the period the notes were outstanding, are added to the denominator, and the related interest expense, net of tax, is excluded from the numerator, if the overall effect is dilutive.

21. SHARE-BASED PAYMENTS

Omnibus Incentive Plan

Prudential Financial, Inc.'s Omnibus Incentive Plan provides stock-based awards including stock options, stock appreciation rights, restricted stock shares, restricted stock units, stock settled performance shares, and cash settled performance units. Dividend equivalents are generally provided on restricted stock shares and restricted stock units outstanding as of the record date. Dividend equivalents are generally accrued on target performance shares and units outstanding as of the record date. These dividend equivalents are paid only on the performance shares and units released up to a maximum of the target number of shares and units awarded. Generally, the requisite service period is the vesting period. There were 14,183,145 authorized shares available for grant under the Omnibus Incentive Plan as of December 31, 2019.

Assurance IQ Acquisition

The Company acquired Assurance IQ on October 10, 2019. The terms of the Acquisition included compensation awards that involved share-based payment arrangements that are linked to retention and therefore fall under the reporting requirements of ASC 718, Stock Compensation. These compensation awards include stock options, restricted stock units and performance shares.

Compensation Costs

Compensation cost for restricted stock units, performance shares and performance units granted to employees is measured by the share price of the underlying Common Stock at the date of grant.

Compensation cost for employee stock options is based on the fair values estimated on the grant date. Under the Omnibus Incentive Plan, the fair value of each stock option award is estimated using a binomial option pricing model on the date of grant for stock options issued to employees. For the Acquisition related awards, the fair value of each stock option award is based on its intrinsic value on the date of grant.

The weighted average grant date assumptions used in the binomial option valuation model are as follows:

PRUDENTIAL FINANCIAL, INC. Notes to Consolidated Financial Statements—(Continued)

	2019	2018	2017
Expected volatility	34.63%	35.39%	35.29%
Expected dividend yield	4.26%	2.88%	2.84%
Expected term	5.54 years	5.49 years	5.60 years
Risk-free interest rate	2.50%	2.64%	2.06%

Expected volatilities are based on historical volatility of Prudential Financial's Common Stock and implied volatilities from traded options on Prudential Financial's Common Stock. The Company uses historical data and expectations of future exercise patterns to estimate option exercises and employee terminations within the valuation model. The expected term of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods associated with the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

The following chart summarizes the compensation cost recognized and the related income tax benefit for stock options, restricted stock units, performance shares and performance units for the years ended December 31:

		2019	9		2018	8		2017	ı 7		
Omnibus Incentive Plan:	Compen	otal sation Cost nized (1)	I	ncome Tax Benefit	Total mpensation Cost Recognized (1)]	Income Tax Benefit	Total Compensation Cost Recognized (1)		ncome Tax Benefit	
					(in milli	ions)					
Employee stock options	\$	11	\$	3	\$ 13	\$	3	\$ 12	\$	5	
Employee restricted stock units		149		35	139		32	142		51	
Employee performance shares and performance units		71		17	3		1	109		41	
Total	\$	231	\$	55	\$ 155	\$	36	\$ 263	\$	97	

⁽¹⁾ Compensation costs related to retirement eligible participants are recorded on the grant date (typically in the first quarter of every year).

	2019									
Assurance IQ Acquisition:	To Compens Reco		ne Tax nefit							
		(in millions	s)							
Employee stock options	\$	4	\$	1						
Employee restricted stock units		1		0						
Employee performance shares		0		0						
Total	\$	5	\$	1						

Compensation costs related to stock-based compensation plans capitalized in deferred acquisition costs for the years ended December 31, 2019, 2018 and 2017 were de minimis.

Stock Options

Each stock option granted under the Omnibus Incentive Plan has an exercise price at the fair market value of Prudential Financial's Common Stock on the date of grant and has a maximum term of 10 years. Generally, one third of the option grant vests in each of the first three years. Options granted related to the Acquisition have an exercise price based on the original strike price of the Assurance IQ options that they replaced and have a maximum term of 10 years from the date the Assurance IQ options were originally granted. Options granted related to the Acquisition generally vest quarterly over three years.

Notes to Consolidated Financial Statements—(Continued)

A summary of the status of the Company's stock option grants is as follows

	-		Employee S	tock Options		
	Omnibu	ıs Ince	ntive Plan	Assura	nce l	Q Acquisition
	Shares		eighted Average Exercise Price	Shares		Weighted Average Exercise Price
Outstanding at December 31, 2018	4,584,244	\$	72.03	0	\$	0.00
Granted	569,137		93.36	584,017		1.36
Exercised	(541,473)		58.56	(36,825)		0.98
Forfeited	(165)		76.71	0		0.00
Expired	(746)		19.86	0		0.00
Outstanding at December 31, 2019	4,610,997	\$	76.26	547,192	\$	1.38
Exercisable at December 31, 2019	3,614,679	\$	70.03	33,596	\$	2.08

The weighted average grant date fair value of employee stock options granted under the Omnibus Incentive Plan during the years ended December 31, 2019, 2018 and 2017 was \$20.02, \$27.11 and \$27.91, respectively. For the Acquisition related awards, the weighted average grant date fair value of employee stock options granted during the year ended December 31, 2019 was \$86.31.

The total intrinsic value (i.e., market price of the stock less the option exercise price) of employee stock options exercised during the years ended December 31, 2019, 2018 and 2017 was \$21 million, \$28 million, and \$109 million, respectively. For the Acquisition related awards, the total intrinsic value of employee stock options exercised during the year ended December 31, 2019 was \$3 million.

The weighted average remaining contractual term and the aggregate intrinsic value of stock options outstanding and exercisable as of December 31, 2019 is as follows:

Employee Stock Options

	Omnibus In	centive Pla	ın	Assurance IQ	Assurance IQ Acquisition						
	Weighted Average Remaining Contractual Term		ggregate nsic Value	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value						
	(in years)	(in	millions)	(in years)	(in millions)						
Outstanding	4.53	\$	92	8.47	S	51					
Exercisable	3.73	\$	92	8.69	S	3					

Restricted Stock Units, Performance Share Awards and Performance Unit Awards

A restricted stock unit is an unfunded, unsecured right to receive a share of Prudential Financial's Common Stock at the end of a specified period of time, which is subject to forfeiture and transfer restrictions. Generally, the restrictions will lapse on the third anniversary of the date of grant. Performance shares and performance units are awards denominated in Prudential Financial's Common Stock. The number of units is determined over the performance period and may be adjusted based on the satisfaction of certain performance goals for the Company. Performance share awards are payable in Prudential Financial's Common Stock. Performance unit awards are payable in cash. Effective October 2019, the Company modified certain provisions of its long term compensation plan to settle the performance units component in Prudential Financial Common Stock. As a result, outstanding performance units were converted to performance shares except for certain employee directed deferrals in the deferred compensation plan which remain as performance units for the full life of the grant. Beginning in 2020, the Company will no longer grant performance unit awards.

A summary of the Company's restricted stock units, performance shares and performance unit awards under the Omnibus Incentive Plan is as follows:

PRUDENTIAL FINANCIAL, INC. Notes to Consolidated Financial Statements—(Continued)

	Restricted Stock Units	Weighted verage Grant ate Fair Value	Performance Share and Performance Unit Awards(1)	Weighted Average Grant Date Fair Value
Restricted at December 31, 2018(2)	4,760,914	\$ 90.09	1,809,075	\$ 81.55
Granted(2)	1,919,168	93.35	691,724	90.68
Forfeited	(183,997)	100.09	(12,947)	93.26
Performance adjustment(3)			92,841	93.36
Released	(2,024,896)	65.44	(757,807)	93.36
Restricted at December 31, 2019(2)	4,471,189	\$ 102.25	1,822,886	\$ 80.62

⁽¹⁾ Performance share and performance unit awards reflect the target units awarded, reduced for forfeitures and releases to date. The actual number of units to be awarded at the end of each performance period will range between 0% and 125% of the target number of units granted, based upon a measure of the reported performance for the Company relative to stated goals. Performance awards granted to senior management in 2018 include a stated goal related to diversity & inclusion that can modify the performance result by +/- 10%.

A summary of the Company's restricted stock units and performance share awards related to the Acquisition is as follows:

	Restricted Stock Units	Weighted Average Grant Date Fair Value	Performance Share Awards(1)	Weighted Average Grant Date Fair Value
Restricted at December 31, 2018	0	\$ 0	0	\$ 0.00
Granted	125,788	87.67	1,982,708	89.81
Forfeited	0	0	0	0.00
Performance adjustment(2)	0	0	0	0.00
Released	0	0	0	0.00
Restricted at December 31, 2019	125,788	\$ 87.67	1,982,708	\$ 89.81

⁽¹⁾ Performance share awards related to the Assurance IQ acquisition reflect the maximum number of units that have been awarded under the terms of the acquisition. The actual number of units that will be awarded at the end of the performance period will range between 0% and 100% of the number of units granted, based upon a predetermined formula of achieving variable profits between \$900 million and \$1,300 million.

The fair market value of restricted stock units, performance shares and performance units released under the Omnibus Incentive Plan for the years ended December 31, 2019, 2018 and 2017 was \$255 million, \$238 million and \$196 million, respectively. For the Acquisition related awards there were no restricted stock units or performance shares released for the year ended December 31, 2019.

The weighted average grant date fair value for restricted stock units granted under the Omnibus Incentive Plan during the years ended December 31, 2019, 2018 and 2017 was \$93.35, \$106.32 and \$110.39, respectively. The weighted average grant date fair value for performance shares and performance units granted under the Omnibus Incentive Plan during the years ended December 31, 2019, 2018 and 2017 was \$90.68, \$81.55 and \$114.98, respectively. The weighted average grant date fair value for restricted stock units granted for the Acquisition during the year ended December 31, 2019 was \$87.67. The weighted average grant date fair value for performance shares granted for the Acquisition during the year ended December 31, 2019 was \$89.81.

Unrecognized Compensation Cost

Unrecognized compensation cost for stock options under the Omnibus Incentive Plan as of December 31, 2019 was \$2 million with a weighted average recognition period of 1.46 years. Unrecognized compensation cost for restricted stock units, performance shares and performance units under the Omnibus Incentive Plan as of December 31, 2019 was \$153 million with a weighted average recognition period of 1.72 years. Unrecognized compensation cost for stock options related to the Acquisition as of December 31, 2019 was \$45 million with a weighted average recognition period of 3.13 years. Unrecognized compensation cost for restricted stock units and performance shares related to the Acquisition as of December 31, 2019 was \$10 million with a weighted average recognition period of 4.17 years.

⁽²⁾ Effective October 1, 2019, the Company modified existing performance share and performance unit awards to remove features of the grants that prevent having a mutual understanding of the key terms and conditions of the award between the employee and employer until the grants vested. Consequently, the weighted average grant date fair value as of December 31, 2019 is the closing stock price of Prudential Financial's common stock as of September 30, 2019. The weighted average grant date fair value as of 12/31/2018 is the closing stock price of Prudential Financial's common stock as of December 31, 2018.

Represents the difference between the target units granted and the actual units awarded based upon the attainment of performance goals for the Company.

⁽²⁾ Represents the difference between the target units granted and the actual units awarded based upon the attainment of performance goals for the Company.

Notes to Consolidated Financial Statements—(Continued)

Tax Benefits Realized

The Company's tax benefit realized for exercises of stock options under the Omnibus Incentive Plan during the years ended December 31, 2019, 2018 and 2017 was \$5 million, \$7 million and \$39 million, respectively. The tax benefit realized for exercises of stock options related to the Acquisition during the year ended December 31, 2019 was \$2 million.

The Company's tax benefit realized upon vesting of restricted stock units, performance shares and performance units under the Omnibus Incentive Plan for the years ended December 31, 2019, 2018 and 2017 was \$52 million, \$49 million and \$70 million, respectively. There were no vested restricted stock units or performance shares related to the Acquisition for the year ended December 31, 2019.

Settlement of Awards

The Company's policy is to issue shares from Common Stock held in treasury upon exercise of stock options, the release of restricted stock units and performance shares. The Company uses cash to settle performance units. The amount of cash used to settle performance units during the years ended December 31, 2019, 2018 and 2017 was \$32 million, \$29 million and \$27 million, respectively.

22. SEGMENT INFORMATION

Segments

The Company operates through eight segments: PGIM (our global investment management business); Retirement, Group Insurance, Individual Annuities, Individual Life, and Assurance IQ (collectively referred to as the U.S. Businesses); International Businesses; and Closed Block. In addition, the Company reports certain of its results of operations in its Corporate and Other operations.

The PGIM segment provides asset management services related to public and private fixed income, public equity and real estate, commercial mortgage origination and servicing, and mutual funds and other retail services to institutional, private and sub-advisory clients (including mutual funds), insurance company separate accounts, government sponsored entities and the Company's general accounts.

- The U.S. Businesses offer a broad range of products and solutions that cover protection, retirement, savings, income and investment needs. The U.S. Businesses are organized into three divisions:
- U.S. Workplace Solutions division. The U.S. Workplace Solutions division consists of the Retirement and Group Insurance segments. The Retirement segment provides a broad range of retirement investment and income products and services to retirement plan sponsors in the public, private and not-for-profit sectors. The Group Insurance segment provides a full range of group life, long-term and short-term group disability, and group corporate-, bank- and trust-owned life insurance in the U.S., primarily to institutional clients for use in connection with employee plans and affinity groups.
- U.S. Individual Solutions division. The U.S. Individual Solutions division consists of the Individual Annuities and Individual Life segments. The Individual Annuities segment develops and distributes individual variable and fixed annuity products, primarily to the U.S. mass affluent and affluent markets. The Individual Life segment develops and distributes individual variable life, term life and universal life insurance products primarily to the U.S. mass middle, mass affluent and affluent markets.

Assurance IQ division. The Assurance IQ division consists of the Assurance IQ segment, a leading consumer solutions platform that offers a range of solutions that help meet consumers' financial needs. Assurance IQ leverages data science and technology to distribute third-party life, health, Medicare and property and casualty products directly to retail shoppers primarily through its digital and independent agent channels.

The International Businesses develops and distributes individual life insurance, retirement and related products to the mass affluent and affluent markets in Japan, Korea and other foreign countries through its Life Planner operations. In addition, similar products are offered to the broad middle income and mass affluent markets across Japan and the Company's joint ventures in various foreign countries through Life Consultants, the proprietary distribution channel of the Company's Gibraltar Life operation, as well as other channels, including banks and independent agencies.

Notes to Consolidated Financial Statements—(Continued)

The Closed Block division includes certain in-force participating insurance and annuity products and corresponding assets that are used for the payment of benefits, expenses and policyholders' dividends related to these products, as well as certain related assets and liabilities. In connection with demutualization, the Company ceased offering these participating products. The Closed Block division is accounted for as a divested business that is reported separately from the Divested and Run-off Businesses that are included in the Company's Corporate and Other operations. See Note 15 for additional information on the Closed Block.

Corporate Operations - consist primarily of: (1) capital that is not deployed in any business segment; (2) investments not allocated to business segments, including debt-financed investment portfolios, and tax credit and other tax-enhanced investments financed by business segments; (3) capital debt that is used or will be used to meet the capital requirements of the Company and the related interest expense; (4) our qualified and non-qualified pension and other employee benefit plans, after allocations to business segments; (5) corporate-level activities, after allocations to business segments, including strategic expenditures, acquisition costs, corporate governance, corporate advertising, philanthropic activities, deferred compensation, and costs related to certain contingencies and enhanced regulatory supervision; (6) expenses associated with the multi-year plan of programs that span across our businesses and the functional areas that support those businesses; (7) our ownership interest in a life insurance joint venture in China; (8) certain retained obligations relating to pre-demutualization policyholders; (9) our Risk Appetite Framework; (10) the foreign currency income hedging program used to hedge certain non-U.S. dollar denominated earnings in our International Businesses segment; (11) intercompany arrangements with our PGIM segment to translate certain non-U.S. dollar-denominated earnings at fixed currency exchange rates; and (12) transactions with and between other segments, including the elimination of intercompany transactions for consolidation purposes.

Segment Accounting Policies. The accounting policies of the segments are the same as those described in Note 2. Results for each segment include earnings on attributed equity established at a level which management considers necessary to support each segment's risks. Operating expenses specifically identifiable to a particular segment are allocated to that segment as incurred. Operating expenses not identifiable to a specific segment that are incurred in connection with the generation of segment revenues are generally allocated based upon the segment's historical percentage of general and administrative expenses.

For information related to significant acquisitions, see Note 1. For information related to the adoption of new accounting pronouncements, see Note 2. The segments' results in prior years have been revised for these items, as applicable, to conform to the current year presentation.

Adjusted Operating Income

The Company analyzes the operating performance of each segment using "adjusted operating income." Adjusted operating income does not equate to "Income (loss) before income taxes and equity in earnings of operating joint ventures" or "Net income (loss)" as determined in accordance with U.S. GAAP but is the measure of segment profit or loss used by the Company's chief operating decision maker to evaluate segment performance and allocate resources and, consistent with authoritative guidance, is the measure of segment performance presented below. Adjusted operating income is calculated by adjusting each segment's "Income (loss) before income taxes and equity in earnings of operating joint ventures" for the following items, which are described in greater detail below:

- Realized investment gains (losses), net, and related adjustments;
- · Charges related to realized investment gains (losses), net;
- · Market experience updates;
- Divested and Run-off Businesses;
- · Other adjustments; and
- Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests.

These items are important to an understanding of overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and the Company's definition of adjusted operating income may differ from that used by other companies. However, the Company believes that the presentation of adjusted operating income as measured for management purposes enhances the understanding of results of operations by highlighting the results from ongoing operations and the underlying profitability factors of its businesses.

Realized investment gains (losses), net, and related adjustments

Notes to Consolidated Financial Statements—(Continued)

Realized investment gains (losses), net

Adjusted operating income excludes "Realized investment gains (losses), net," except for certain items described below. Significant activity excluded from adjusted operating income includes impairments and credit-related gains (losses) from sales of securities, the timing of which depends largely on market credit cycles and can vary considerably across periods, and interest rate-related gains (losses) from sales of securities, which are largely subject to the Company's discretion and influenced by market opportunities, as well as the Company's tax and capital profile. Additionally, adjusted operating income generally excludes realized investment gains (losses) from products that contain embedded derivatives, and from associated derivative portfolios that are part of an asset/liability management program related to the risk of those products. However, the effectiveness of the hedging program will ultimately be reflected in adjusted operating income over time. Trends in the underlying profitability of the Company's businesses can be more clearly identified without the fluctuating effects of these transactions.

The following table sets forth the significant components of "Realized investment gains (losses), net" that are included in adjusted operating income and, as a result, are reflected as adjustments to "Realized investment gains (losses), net" for purposes of calculating adjusted operating income:

	 Ye	(in millions)						
	 2019		2018		2017			
		(i	in millions)					
Net gains (losses) from(1):								
Terminated hedges of foreign currency earnings	\$ 65	\$	(15)	\$	(15)			
Current period yield adjustments	\$ 331	\$	367	\$	434			
Principal source of earnings	\$ (37)	\$	219	\$	(8)			

⁽¹⁾ In addition to the items in the table above, "Realized investment gains (losses), net, and related charges and adjustments" also includes an adjustment to reflect "Realized investment gains (losses), net" related to Divested and Run-off Businesses. See "Divested and Run-off Businesses" discussed below.

Terminated Hedges of Foreign Currency Earnings. The amounts shown in the table above primarily reflect the impact of an intercompany arrangement between Corporate and Other operations and the International Businesses segment, pursuant to which the non-U.S. dollar-denominated earnings in all countries for a particular year, including its interim reporting periods, are translated at fixed currency exchange rates. The fixed rates are determined in connection with a currency hedging program designed to mitigate the risk that unfavorable rate changes will reduce the segment's U.S. dollar-equivalent earnings. Pursuant to this program, the Company's Corporate and Other operations may execute forward currency contracts with third-parties to sell the net exposure of projected earnings from the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these contracts correspond with the future periods in which the identified non-U.S. dollar-denominated earnings are expected to be generated. These contracts do not qualify for hedge accounting under U.S. GAAP, so the resulting profits or losses are recorded in "Realized investment gains (losses), net." When the contracts are terminated in the same period that the expected earnings emerge, the resulting positive or negative cash flow effect is included in adjusted operating income.

Current Period Yield Adjustments. The Company uses interest rate and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. For derivative contracts that do not qualify for hedge accounting treatment, the periodic swap settlements, as well as certain other derivative related yield adjustments are recorded in "Realized investment gains (losses), net," and are included in adjusted operating income to reflect the after-hedge yield of the underlying instruments. In certain instances, when these derivative contracts are terminated or offset before their final maturity, the resulting realized gains or losses are recognized in adjusted operating income over periods that generally approximate the expected terms of the derivatives or underlying instruments in order for adjusted operating income to reflect the after-hedge yield of the underlying instruments. Included in the amounts shown in the table above are gains (losses) on certain derivative contracts that were terminated or offset before their final maturity of \$41 million, \$19 million and \$53 million for the years ended 2019, 2018 and 2017, respectively. As of December 31, 2019, there was a \$222 million deferred net gain related to certain derivative contracts that were terminated or offset before their final maturity, primarily in the International Businesses. Also included in the amounts shown in the table above are fees related to synthetic GICs of \$147 million, \$146 million and \$159 million for the years ended 2019, 2018 and 2017, respectively. Synthetic GICs are accounted for as derivatives under U.S. GAAP and, therefore, these fees are recorded in "Realized investment gains (losses), net." See Note 5 for additional information on synthetic GICs.

Notes to Consolidated Financial Statements—(Continued)

Principal Source of Earnings. The Company conducts certain activities for which realized investment gains (losses) are a principal source of earnings for its businesses and are therefore included in adjusted operating income, particularly within the Company's PGIM segment. For example, PGIM's strategic investing business makes investments for sale or syndication to other investors or for placement or co-investment in the Company's managed funds and structured products. The realized investment gains (losses) associated with the sale of these strategic investments, as well as the majority of derivative results, are a principal activity for this business and included in adjusted operating income. In addition, the realized investment gains (losses) associated with loans originated by the Company's commercial mortgage operations, as well as related derivative results and retained mortgage servicing rights, are a principal activity for this business and are therefore included in adjusted operating income.

Adjustments related to Realized investment gains (losses), net

The following table sets forth certain other items excluded from adjusted operating income and reflected as an adjustment to "Realized investment gains (losses), net" for purposes of calculating adjusted operating income:

	 Ye	ar Ei	nded December	31,	.
	 2019		2018		2017
		((in millions)		
Net gains (losses) from:					
Investments carried at fair value through net income	\$ 558	\$	(417)	\$	184
Foreign currency exchange movements	\$ 61	\$	(289)	\$	(135)
Gains (losses), net, on experience-rated contracts (excluding derivatives and commercial mortgage and					
other loans)(1)	\$ 22	\$	(153)	\$	185
Other activities	\$ (31)	\$	(41)	\$	(20)

⁽¹⁾ Adjusted operating income excludes net investment gains (losses) on assets supporting experience-rated contractholder liabilities, related derivatives, and commercial mortgage and other loans. The activity for derivatives and commercial mortgage and other loans that support these experience-rated products are reported in "Realized investment gains (losses), net" and excluded from adjusted operating income.

Investments carried at fair value through net income. The Company has certain investments in its general account portfolios that are carried at fair value with changes in fair value reported in "Other income (loss)." Examples include the Company's investments in equity securities and fixed maturities designated as trading. Consistent with the exclusion of realized investment gains (losses) with respect to other investments managed on a consistent basis, the net gains or losses on these investments are excluded from adjusted operating income.

Foreign Currency Exchange Movements. The Company has certain assets and liabilities for which, under U.S. GAAP, the changes in value, including those associated with changes in foreign currency exchange rates during the period, are recorded in "Other income (loss)." To the extent the foreign currency exposure on these assets and liabilities is economically hedged or considered part of the Company's capital funding strategies for its international subsidiaries, the change in value included in "Other income (loss)" is excluded from adjusted operating income. The insurance liabilities are supported by investments denominated in corresponding currencies, including a significant portion designated as available-for-sale. While these non-yen denominated assets and liabilities are economically hedged, unrealized gains (losses) on available-for-sale investments, including those arising from foreign currency exchange rate movements, are recorded in AOCI under U.S. GAAP, while the non-yen denominated liabilities are remeasured for foreign currency exchange rate movements, with the related change in value recorded in earnings within "Other income (loss)." Due to this non-economic volatility that has been reflected in U.S. GAAP earnings, the change in value recorded within "Other income (loss)" is excluded from adjusted operating income.

Investment gains (losses) on assets supporting experience-rated contractholder liabilities and changes in experience-rated contractholder liabilities due to asset value changes. Certain products included in the Retirement and International Businesses segments are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The majority of investments supporting these experience-rated products are carried at fair value, with realized and unrealized gains (losses) reported in "Other income (loss)" and the related interest and dividend income reported in "Net investment income." To a lesser extent, these experience-rated products are also supported by derivatives and commercial mortgage and other loans. The derivatives are carried at fair value, with realized and unrealized gains (losses) reported in "Realized investment gains (losses), net." The commercial mortgage and other loans are carried at unpaid principal, net of unamortized discounts and an allowance for losses, with gains (losses) on sales and changes in the valuation allowance for commercial mortgage and other loans reported in "Realized investment gains (losses), net."

Notes to Consolidated Financial Statements—(Continued)

Adjusted operating income excludes net investment gains (losses) on assets supporting experience-rated contractholder liabilities, related derivatives and commercial mortgage and other loans. This is consistent with the exclusion of realized investment gains (losses) with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains (losses) on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including changes in the fair value of commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in "Interest credited to policyholders' account balances." The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread we earn on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that we expect will ultimately accrue to the contractholders.

Other Activities. The Company excludes certain other items from adjusted operating income that are consistent with similar adjustments described above.

Charges related to realized investment gains (losses), net

Charges that relate to realized investment gains (losses) are also excluded from adjusted operating income, and include the following:

- The portion of the amortization of DAC, VOBA, unearned revenue reserves and DSI for certain products that is related to net realized investment gains (losses).
- Policyholder dividends and interest credited to policyholders' account balances that relate to certain life policies that pass back certain realized investment gains (losses) to the policyholder, and reserves for future policy benefits for certain policies that are affected by net realized investment gains (losses).
- Market value adjustments paid or received upon a contractholder's surrender of certain of the Company's annuity products as these amounts mitigate the
 net realized investment gains or losses incurred upon the disposition of the underlying invested assets.

Market experience updates

The Company had historically recognized the immediate impacts from changes in current market conditions on estimates of profitability in current period adjusted operating income. Beginning with the second quarter of 2019, these impacts are excluded from adjusted operating income which the Company believes enhances the understanding of underlying performance trends. These amounts represent the impact of those changes on DAC and other costs and reserves, primarily related to variable annuity and variable and universal life products.

Divested and Run-off Businesses

The contribution to income (loss) of Divested and Run-off Businesses that have been or will be sold or exited, including businesses that have been placed in wind down, but that did not qualify for "discontinued operations" accounting treatment under U.S. GAAP, are excluded from adjusted operating income as the results of Divested and Run-off Businesses are not considered relevant to understanding the Company's ongoing operating results.

The Closed Block division is accounted for as a divested business because it consists primarily of certain participating insurance and annuity products that the Company ceased selling at demutualization in 2001. See Note 15 for further information on the Closed Block.

Other adjustments

Other adjustments represent all other adjustments that are excluded from adjusted operating income. These include certain components of the consideration for the Assurance IQ acquisition, which are recognized as compensation expense over the requisite service periods, as well as changes in the fair value of contingent consideration.

Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests

Equity in earnings of operating joint ventures, on a pre-tax basis, are included in adjusted operating income as these results are a principal source of earnings. These earnings are reflected on a U.S. GAAP basis on an after-tax basis as a separate line on the Company's Consolidated Statements of Operations.

Notes to Consolidated Financial Statements—(Continued)

Earnings attributable to noncontrolling interests are excluded from adjusted operating income. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors, and are reflected on a U.S. GAAP basis as a separate line on the Company's Consolidated Statements of Operations.

Reconciliation of adjusted operating income and net income (loss)

The table below reconciles adjusted operating income before income taxes to income before income taxes and equity in earnings of operating joint ventures:

Total revenue, and benefits and expenses per Consolidated Statements of Operations	\$ 59,689	9 :	\$ 16,435	\$	53,202	\$ 33,794	_ :	\$ 3,822	\$ 2,091	\$ 1,327	\$ 1,580

⁽¹⁾ Assurance IQ was acquired by the Company in October 2019. See Note 1 for additional information.

Revenues, calculated in accordance with U.S. GAAP, for the years ended December 31, include the following associated with the Company's foreign and domestic operations:

	 2019		2018	 2017
		(in millions)	
Domestic operations	\$ 40,868	\$	40,603	\$ 36,573
Foreign operations, total	\$ 23,939	\$	22,389	\$ 23,116
Foreign operations, Japan	\$ 19,626	\$	19,125	\$ 19,589
Foreign operations, Korea	\$ 1,638	\$	1,495	\$ 1,567

Intersegment Revenues

⁽²⁾ Represents the immediate impacts in current period results from changes in current market conditions on estimates of profitability, which are excluded from adjusted operating income beginning with the second quarter of 2019. The Company had historically recognized these impacts in adjusted operating income.

⁽³⁾ Represents adjustments not included in the above reconciling items. "Other adjustments" include certain components of the consideration for the Assurance IQ acquisition, which are recognized as compensation expense over the requisite service periods, as well as changes in the fair value of contingent consideration.

⁽⁴⁾ Prior period amounts have been updated to conform to current period presentation.

Notes to Consolidated Financial Statements—(Continued)

Management has determined the intersegment revenues with reference to market rates. Intersegment revenues are eliminated in consolidation in Corporate and Other operations. The PGIM segment revenues include intersegment revenues, primarily consisting of asset-based management and administration fees, for the years ended December 31, as follows:

	2	2019		2018	2017
			(in	millions)	
PGIM segment intersegment revenues	\$	777	\$	731	\$ 717

Segments may also enter into internal derivative contracts with other segments. For adjusted operating income, each segment accounts for the internal derivative results consistent with the manner in which that segment accounts for other similar external derivatives.

Asset management and service fees

The table below presents asset management and service fees, predominantly related to an investment management activities, for the periods indicated:

	2019	2018	2017
		(in millions))
Asset-based management fees	\$ 3,489	\$ 3,438	\$ 3,328
Performance-based incentive fees	169	56	194
Other fees	581	606	605
Total asset management and service fees	\$ 4,239	\$ 4,100	\$ 4,127

23. COMMITMENTS AND CONTINGENT LIABILITIES

Commercial Mortgage Loan Commitments

	_	Decei	mber 3	31,
	_	2019	- —	2018
		(in n	nillions	s)
Total outstanding mortgage loan commitments	\$	2,129	\$	3,299
Portion of commitment where prearrangement to sell to investor exists	\$	751	\$	1,490

In connection with the Company's commercial mortgage operations, it originates commercial mortgage loans. Commitments for loans that will be held for sale are recognized as derivatives and recorded at fair value. In certain of these transactions, the Company pre-arranges that it will sell the loan to an investor, including to government sponsored entities as discussed below, after the Company funds the loan.

Commitments to Purchase Investments (excluding Commercial Mortgage Loans)

	 (in millions)		51,
	 2019		2018
	(in m	nillions	s)
Expected to be funded from the general account and other operations outside the separate accounts	\$ 7,372	\$	6,941
Expected to be funded from separate accounts	\$ 49	\$	147

The Company has other commitments to purchase or fund investments, some of which are contingent upon events or circumstances not under the Company's control, including those at the discretion of the Company's counterparties. The Company anticipates a portion of these commitments will ultimately be funded from its separate accounts.

Notes to Consolidated Financial Statements—(Continued)

Indemnification of Securities Lending and Securities Repurchase Transactions

	 Decen	nber 3	1,
	 2019		2018
	(in m	illions	s)
Indemnification provided to certain clients for securities lending and securities repurchase transactions(1)	\$ 5,071	\$	5,399
Fair value of related collateral associated with above indemnifications(1)	\$ 5,204	\$	5,503
Accrued liability associated with guarantee	\$ 0	\$	0

⁽¹⁾ As of December 31, 2019, indemnification provided to certain clients and fair value of related collateral associated with such indemnification include \$38 million and \$37 million, respectively, related to securities repurchase transactions.

In the normal course of business, the Company may facilitate securities lending or securities repurchase transactions on behalf of certain client accounts (collectively, "the accounts"). In certain of these arrangements, the Company has provided an indemnification to the accounts to hold them harmless against losses caused by counterparty (i.e., borrower) defaults associated with such transactions facilitated by the Company. In securities lending transactions, collateral is provided by the counterparty to the accounts at the inception of the transaction in an amount at least equal to 102% of the fair value of the loaned securities and the collateral is maintained daily to equal at least 102% of the fair value of the loaned securities. In securities repurchase transactions, collateral is provided by the counterparty to the accounts at the inception of the transaction in an amount at least equal to 95% of the fair value of the securities subject to repurchase and the collateral is maintained daily to equal at least 95% of the fair value of the securities subject to repurchase. The Company is only at risk if the counterparty to the transaction defaults and the value of the collateral held is less than the value of the securities loaned to, or subject to repurchase from, such counterparty. The Company believes the possibility of any payments under these indemnities is remote.

Credit Derivatives Written

As discussed further in Note 5, the Company writes credit derivatives under which the Company is obligated to pay the counterparty the referenced amount of the contract and receive in return the defaulted security or similar security.

Guarantees of Asset Values

	 Decen	nber .	31,
	 2019		2018
	(in m	illion	s)
Guaranteed value of third parties' assets	\$ 80,009	\$	79,215
Fair value of collateral supporting these assets	\$ 81,604	\$	77,897
Asset (liability) associated with guarantee, carried at fair value	\$ 1	\$	2

Certain contracts underwritten by the Retirement segment include guarantees related to financial assets owned by the guaranteed party. These contracts are accounted for as derivatives and carried at fair value. The collateral supporting these guarantees is not reflected on the Consolidated Statements of Financial Position.

Indemnification of Serviced Mortgage Loans

	 Decen	nber 3	31,
	 2019		2018
	(in m	nillions	s)
Maximum exposure under indemnification agreements for mortgage loans serviced by the Company	\$ 2,113	\$	1,828
First-loss exposure portion of above	\$ 622	\$	543
Accrued liability associated with guarantees	\$ 19	\$	17

Notes to Consolidated Financial Statements—(Continued)

As part of the commercial mortgage activities of the Company's PGIM segment, the Company provides commercial mortgage origination, underwriting and servicing for certain government sponsored entities, such as Fannie Mae and Freddie Mac. The Company has agreed to indemnify the government sponsored entities for a portion of the credit risk associated with certain of the mortgages it services through a delegated authority arrangement. Under these arrangements, the Company originates multi-family mortgages for sale to the government sponsored entities based on underwriting standards they specify, and makes payments to them for a specified percentage share of losses they incur on certain loans serviced by the Company. The Company's percentage share of losses incurred generally varies from 2% to 20% of the loan balance, and is typically based on a first-loss exposure for a stated percentage of the loan balance, plus a shared exposure with the government sponsored entity for any losses in excess of the stated first-loss percentage, subject to a contractually specified maximum percentage. The Company determines the liability related to this exposure using historical loss experience, and the size and remaining life of the asset. The Company serviced \$16,878 million and \$14,335 million of mortgages subject to these loss-sharing arrangements as of December 31, 2019 and 2018, respectively, all of which are collateralized by first priority liens on the underlying multi-family residential properties. As of December 31, 2019, these mortgages had a weighted-average debt service coverage ratio of 1.88 times and a weighted-average loan-to-value ratio of 61%. As of December 31, 2018, these mortgages had a weighted-average debt service coverage ratio of 1.83 times and a weighted-average loan-to-value ratio of 62%. The Company had no losses related to indemnifications that were settled for years ended December 31, 2019, 2018, and 2017.

Other Guarantees

	 Decer	nber 31,	1
	 2019	2	2018
	(in n	nillions)	
Other guarantees where amount can be determined	\$ 55	\$	77
Accrued liability for other guarantees and indemnifications	\$ 0	\$	0

The Company is also subject to other financial guarantees and indemnity arrangements. The Company has provided indemnities and guarantees related to acquisitions, dispositions, investments and other transactions that are triggered by, among other things, breaches of representations, warranties or covenants provided by the Company. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or applicable. Included above are \$12 million and \$13 million as of December 31, 2019 and 2018, respectively, of yield maintenance guarantees related to certain investments the Company sold. The Company does not expect to make any payments on these guarantees and is not carrying any liabilities associated with these guarantees.

Since certain of these obligations are not subject to limitations, it is not possible to determine the maximum potential amount due under these guarantees. The accrued liabilities identified above do not include retained liabilities associated with sold businesses.

Insolvency Assessments

Most of the jurisdictions in which the Company is admitted to transact business require insurers doing business within the jurisdiction to participate in guarantee associations, which are organized to pay contractual benefits owed pursuant to insurance policies issued by impaired, insolvent or failed insurers. These associations levy assessments, up to prescribed limits, on all member insurers in a particular state on the basis of the proportionate share of the premiums written by member insurers in the lines of business in which the impaired, insolvent or failed insurer engaged. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets. In addition, Japan has established the Japan Policyholders Protection Corporation as a contingency to protect policyholders against the insolvency of life insurance companies in Japan through assessments to companies licensed to provide life insurance.

Assets and liabilities held for insolvency assessments were as follows:

Notes to Consolidated Financial Statements—(Continued)

	 Decen	mber 31	,
	 2019		2018
	(in m	nillions)	
Other assets:			
Premium tax offset for future undiscounted assessments	\$ 48	\$	54
Premium tax offset currently available for paid assessments	3		3
Total	\$ 51	\$	57
Other liabilities:			
Insolvency assessments	\$ 37	\$	39

Contingent Liabilities

On an ongoing basis, the Company and its regulators review its operations including, but not limited to, sales and other customer interface procedures and practices, and procedures for meeting obligations to its customers and other parties. These reviews may result in the modification or enhancement of processes or the imposition of other action plans, including concerning management oversight, sales and other customer interface procedures and practices, and the timing or computation of payments to customers and other parties. In certain cases, if appropriate, the Company may offer customers or other parties remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

The Company is subject to the laws and regulations of states and other jurisdictions concerning the identification, reporting and escheatment of unclaimed or abandoned funds, and is subject to audit and examination for compliance with these requirements. For additional discussion of these matters, see "—Litigation and Regulatory Matters" below.

It is possible that the results of operations or the cash flow of the Company in a particular quarterly or annual period could be materially affected as a result of payments in connection with the matters discussed above or other matters depending, in part, upon the results of operations or cash flow for such period. Management believes, however, that ultimate payments in connection with these matters, after consideration of applicable reserves and rights to indemnification, should not have a material adverse effect on the Company's financial position.

Litigation and Regulatory Matters

The Company is subject to legal and regulatory actions in the ordinary course of its businesses. Pending legal and regulatory actions include proceedings relating to aspects of the Company's businesses and operations that are specific to it and proceedings that are typical of the businesses in which it operates, including in both cases businesses that have been either divested or placed in wind down status. Some of these proceedings have been brought on behalf of various alleged classes of complainants. In certain of these matters, the plaintiffs are seeking large and/or indeterminate amounts, including punitive or exemplary damages. The outcome of litigation or a regulatory matter, and the amount or range of potential loss at any particular time, is often inherently uncertain.

The Company establishes accruals for litigation and regulatory matters when it is probable that a loss has been incurred and the amount of that loss can be reasonably estimated. For litigation and regulatory matters where a loss may be reasonably possible, but not probable, or is probable but not reasonably estimable, no accrual is established but the matter, if potentially material, is disclosed, including matters discussed below. The Company estimates that as of December 31, 2019, the aggregate range of reasonably possible losses in excess of accruals established for those litigation and regulatory matters for which such an estimate currently can be made is less than \$250 million. Any estimate is not an indication of expected loss, if any, or the Company's maximum possible loss exposure on such matters. The Company reviews relevant information with respect to its litigation and regulatory matters on a quarterly and annual basis and updates its accruals, disclosures and estimates of reasonably possible loss based on such reviews.

Labor and Employment Matters

Prudential of Brazil Labor and Employment Matters

Prudential of Brazil ("POB") sells insurance products to consumers through life planner franchisees ("Life Planners"), who are engaged as independent life insurance brokers and not as employees. When a Life Planner's contractual relationship with POB is terminated, in many cases the Life Planner commences a labor suit against POB alleging entitlement to employment related benefits. POB is a defendant in numerous such lawsuits in Brazil brought by former Life Planners and has been subject to regulatory

Notes to Consolidated Financial Statements—(Continued)

actions challenging the validity of POB's franchise model. POB has continued to receive additional labor suits and regulatory actions involving the operation of its franchise model notwithstanding steps that POB has taken to attempt to mitigate the labor risk by modifying its franchise model. POB continues to evaluate changes to its franchise model to further mitigate this risk.

Individual Annuities, Individual Life and Group Insurance

Broderick v. The Prudential Insurance Company of America, et al.

In December 2016, a complaint entitled *Julie Han Broderick, Darron Smith and Thomas Schreck v. The Prudential Insurance Company of America, et al.*, was filed in the Superior Court of New Jersey, Law Division - Essex County. The complaint: (i) alleges that defendants terminated plaintiffs' employment for engaging in whistleblowing conduct involving the sale of MyTerm policies through Wells Fargo and violated New Jersey's Conscientious Employee Protection Act; and (ii) seeks back and front pay, compensatory and punitive damages and attorneys' fees and costs. In January 2017, defendants filed an answer to the complaint. In December 2019, the court granted the Company's summary judgment motion and dismissed the complaint.

Huffman v. The Prudential Insurance Company of America

In September 2010, Huffman v. The Prudential Insurance Company of America, a purported nationwide class action brought on behalf of beneficiaries of group life insurance contracts owned by the Employee Retirement Income Security Act ("ERISA")-governed employee welfare benefit plans was filed in the United States District Court for the Eastern District of Pennsylvania, challenging the use of retained asset accounts in employee welfare benefit plans to settle death benefit claims as a violation of ERISA and seeking injunctive relief and disgorgement of profits. In July 2011, Prudential Insurance's motion for judgment on the pleadings was denied. In February 2012, plaintiffs filed a motion to certify the class. In April 2012, the court stayed the case pending the outcome of a case involving another insurer that is before the Third Circuit Court of Appeals. In August 2014, the court lifted the stay, and in September 2014, plaintiffs filed a motion seeking leave to amend the complaint. In July 2015, the court granted plaintiffs' motion to file an amended complaint. Plaintiffs' amended complaint added two new class representatives, a new common law breach of fiduciary duty claim, and a prohibited transactions claim under Section 406(a)(1)(C) of ERISA. In August 2015, Prudential Insurance filed its answer to the first amended complaint. In February 2016, plaintiffs filed a class certification motion. In September 2016, plaintiffs' motion for class certification was denied, and in October 2016, plaintiffs filed a motion for reconsideration. In December 2016, the motion for reconsideration was denied. In February 2017, all parties filed motions for summary judgment. In December 2017, the court granted plaintiffs' motion for summary judgment as to their breach of fiduciary duty claims under ERISA, dismissed plaintiffs' state law claim, and denied the motions for summary judgment on the prohibited transaction claim. In December 2017, plaintiffs filed a motion to alter or amend the prior orders denying class certification. In January 2018, the court denied in part, and granted in part, plaintiffs' class certification motion and certified a class limited to participants in the two employer plans involving the named plaintiffs. In February 2018, Prudential Insurance filed a petition with the Third Circuit Court of Appeals seeking permission to appeal the class certification decision. In April 2018, the Third Circuit Court of Appeals denied Prudential Insurance's request for leave to appeal the class certification decision. In November 2018, the court issued an order granting preliminary approval of plaintiffs' proposed Settlement and Distribution Plan. In April 2019, the court entered a Final Judgment and Order of Dismissal. This matter is now closed.

Behfarin v. Pruco Life

In July 2017, a putative class action complaint entitled *Richard Behfarin v. Pruco Life Insurance Company* was filed in the United States District Court for the Central District of California, alleging that the Company imposes charges on owners of universal life policies to cure defaults and/or reinstate lapses, that are inconsistent with the applicable universal life policy. The complaint includes claims for breach of contract, breach of implied covenant of good faith and fair dealing, and violation of California law, and seeks unspecified damages along with declaratory and injunctive relief. In September 2017, the Company filed its answer to the complaint. In September 2018, plaintiff filed a motion for class certification. In October 2019, plaintiff filed: (1) the First Amended Complaint adding Prudential Insurance Company of America and Pruco Life Insurance Company of New Jersey as defendants; and (2) a motion seeking preliminary certification of a settlement class, appointment of a class representative and class counsel, and preliminary approval of the proposed class action settlement. In November 2019, the court issued an order granting the motion for preliminary approval of the settlement.

Escheatment Litigation

Total Asset Recovery Services, LLC v. MetLife, Inc., et al., Prudential Financial, Inc., The Prudential Insurance Company of America, and Prudential Insurance Agency, LLC

Notes to Consolidated Financial Statements—(Continued)

In December 2017, Total Asset Recovery Services, LLC, on behalf of the State of New York, filed a Second Amended Complaint in the Supreme Court of the State of New York, County of New York, against, among other 19 defendants, Prudential Financial, Inc., The Prudential Insurance Company of America and Prudential Insurance Agency, LLC, alleging that the Company failed to escheat life insurance proceeds in violation of the New York False Claims Act. The second amended complaint seeks injunctive relief, compensatory damages, civil penalties, treble damages, prejudgment interest, attorneys' fees and costs. In May 2018, defendants filed a motion to dismiss the Second Amended Complaint. In April 2019, defendants' motion to dismiss the Second Amended Complaint was granted and plaintiff subsequently filed a Notice of Appeal with the New York State Supreme Court, First Department.

Securities Litigation

City of Warren v. PFI, et al

In November 2019, a putative class action complaint entitled City of Warren Police and Fire Retirement System v. Prudential Financial, Inc., Charles F. Lowrey and Kenneth Y. Tanji, was filed in the United States District Court for the District of New Jersey. The complaint asserts claims for federal securities law violations against PFI, and Charles Lowrey, PFI's chief executive officer, and Kenneth Tanji, PFI's chief financial officer, individually, and alleges that: (i) the Company's reserve assumptions failed to account for adversely developing mortality experience in the Individual Life business segment; (ii) the Company's reserves were insufficient to satisfy its future policy benefit liabilities; and (iii) the Company materially understated its liabilities and overstated net income due to flawed assumptions in calculating mortality experience. The putative class includes all purchasers of PFI common stock between February 15, 2019 and August 2, 2019

Donald P. Crawford v. PFI, et al.

In January 2020, a putative class action complaint entitled David P. Crawford v. Prudential Financial, Charles F. Lowrey and Kenneth Tanji, was filed in the United States District Court for the District of New Jersey. The complaint asserts claims for federal securities law violations against PFI, and Charles Lowrey and Kenneth Tanji, individually, and alleges that: (i) the Company's reserve assumptions failed to account for adversely developing mortality experience in the Individual Life business segment; (ii) the Company's reserves were insufficient to satisfy its future policy benefit liabilities; and (iii) the Company materially understated its liabilities and overstated net income due to flawed assumptions in calculating mortality experience. The putative class includes all purchasers of PFI common stock between February 15, 2019 and August 2, 2019.

In January 2020, the Board of Directors received a shareholder demand letter containing allegations: (i) of wrongdoing similar to those alleged in the City of Warren and Crawford complaints; and (ii) that certain of the Company's current and former directors and executive officers breached their fiduciary duties of loyalty, due care and candor. The demand letter requests that the Board of Directors investigate and commence legal proceedings against the named individuals to recover for the Company's benefit the damages purportedly sustained by the Company as a result of the alleged breaches. The Company may become subject to additional actions related to this matter.

Other Matters

Cho v. PICA, et al

In November 2019, a putative class action complaint entitled Cho v. The Prudential Insurance Company of America, et. al., was filed in the United States District Court for the District of New Jersey. The Complaint purports to be brought on behalf of participants in the Prudential Employee Savings Plan (the "Plan") and (i) alleges that Defendants failed to fulfill their fiduciary obligations under the Employee Retirement Income Security Act of 1974, in the administration, management and operation of the Plan, including engaging in prohibited transactions; and (ii) seeks declaratory, injunctive and equitable relief, and unspecified damages including interest, attorneys' fees and costs. In January 2020, defendants filed a motion to dismiss the complaint.

Residential Mortgage-Backed Securities ("RMBS") Trustee Litigation

In June 2014, the Company, together with nine other institutional investors, filed six actions in New York state court against certain RMBS trustees. The actions, which are brought derivatively on behalf of more than 2,200 RMBS trusts, seek unspecified damages attributable to the trustees' alleged failure to: (i) enforce the trusts' respective repurchase rights against sellers of defective mortgage loans; and (ii) properly monitor the respective mortgage loan servicers. The complaints assert claims for breach of contract, breach of fiduciary duty, negligence and violations of the Trust Indenture Act of 1939. In July 2014, the Company amended its complaints against each of the six defendants. In November 2014, the Company filed amended complaints against each of the

Notes to Consolidated Financial Statements—(Continued)

trustee bank defendants in federal court in the Southern District of New York. In December 2014, the New York State Court actions were dismissed without prejudice upon the Company's request. The six actions described above are captioned:

PICA et al. v. Bank of New York Mellon ("BONYM")

In March 2015, defendants filed a motion to dismiss the amended complaint. In March 2016, the court issued a decision involving BONYM's motion to dismiss: (i) denying the motion to dismiss the Pooling and Servicing Agreement ("PSA") trust claims for lack of jurisdiction; (ii) denying the motion regarding claims for violations of the Trust Indenture Act of 1939 and breach of contract; and (iii) granting the motion regarding claims for negligence and breach of fiduciary duty. In October 2019, the federal court action was dismissed with prejudice. This matter is now closed.

PICA et al. v. Citibank N.A.

In February 2015, defendants filed a motion to dismiss the amended complaint. In September 2015, the court issued a decision involving Citibank's motion to dismiss: (i) with respect to the PSA trusts, granting the motion and declining to exercise supplemental jurisdiction; (ii) with respect to the Indenture trusts, denying the motion regarding claims for breach of contract, violations of the Trust Indenture Act of 1939, negligence and breach of fiduciary duty concerning the duty to avoid conflicts of interest; and (iii) with respect to the Indenture trusts, granting the motion to dismiss claims for negligence and breach of fiduciary duty concerning the duty of care. In November 2015, the Company, together with other institutional investors, filed a complaint in New York State Supreme Court, captioned Fixed Income Shares: Series M, et al. v. Citibank N.A., asserting claims relating to the PSA trusts. In February 2016, Citibank filed a motion to dismiss the state court complaint. In August 2016, plaintiffs filed an amended complaint in state court, and in September 2016, Citibank filed a motion to dismiss the amended complaint and plaintiffs filed in federal court a motion for class certification. In April 2017, Citibank filed a motion for summary judgment in the federal court action. In June 2017, the state court issued a decision regarding defendants' motion to dismiss the amended complaint; (i) sustaining plaintiffs' breach of contract claims concerning Citibank's pre-Event of Default obligations; (ii) dismissing plaintiffs' breach of contract claims concerning Citibank's post-Event of Default obligations; (iii) sustaining plaintiffs' implied covenant of good faith and fair dealing claim; (iv) dismissing plaintiffs' claim for breach of fiduciary duty; and (v) dismissing plaintiffs' claim for breach of duty to avoid conflicts of interest. In July 2017, Citibank filed an appeal to the Appellate Division of the Supreme Court of New York, First Department, from the June 2017 decision denying, in part, its motion to dismiss. In January 2018, the First Department: (i) affirmed the trial court's ruling upholding the breach of contract claim based on the trustee's failure to give written notice of breaches of representations and warranties; and (ii) reversed the trial court's order that sustained plaintiffs' breach of contract and implied covenant of good faith and fair dealing claims concerning servicing violations. In March 2018, the federal court granted Citibank's motion for summary judgment. In April 2018, plaintiffs filed a notice of appeal to the U.S. Court of Appeals for the Second Circuit from the March 2018 decision granting summary judgment. In June 2019, the federal court action was dismissed with prejudice, and in September 2019, the state court action was also dismissed with prejudice. This matter is now closed.

PICA et al. v. Deutsche Bank, et al.

In April 2015, defendants filed a motion to dismiss the amended complaint. In January 2016, the court issued a decision involving Deutsche Bank's motion to dismiss: (i) with respect to the PSA trusts, granting the motion and declining to exercise supplemental jurisdiction; and (ii) with respect to the Indenture trusts, granting leave for plaintiffs to file an amended complaint. In February 2016, the Company, together with other institutional investor plaintiffs, filed an amended complaint in federal court. In March 2016, the Company, together with other institutional investors, filed a complaint in California State Superior Court, captioned BlackRock Balanced Capital Portfolio (FI), et al. v. Deutsche Bank Trust Company Americas, asserting claims relating to the PSA trusts. In May 2016, the Company, together with other institutional investors, filed an amended class action complaint in California State Superior Court. In July 2016, defendant filed a motion to dismiss the amended federal court complaint. In August 2016, defendant filed a demurrer and motion to strike the amended state court class action complaint. In October 2016, the court issued a decision regarding defendants' motion to dismiss: (i) sustaining plaintiffs' breach of contract claims concerning the trust at issue; (ii) dismissing plaintiffs' tort claims for breach of fiduciary duty; and (iii) dismissing plaintiffs' claims of breach of duty to avoid conflicts of interest. The court granted plaintiffs' leave to file an amended complaint. In January 2017, the federal court issued a decision involving Deutsche Bank's motion to dismiss: (i) granting the motion with respect to plaintiff's conflicts of interest claims; and (ii) denying the motion with respect to plaintiffs' representations-and-warranties claims, servicer-notification claims, event-of-default claims and Trust Indenture Act claims. In February 2017, the court issued a decision regarding defendants' motion to dismiss the amended complaint: (i) sustaining plaintiffs' breach of contract claims concerning the failure to remedy known servicing violations as to all sixty-two trusts at issue; (ii) sustaining plaintiffs' breach of contract claims concerning the failure to enforce seller representation and warranty claims as to fortyone trusts, and dismissing such claims as to the remaining twenty-one trusts; (iii) dismissing plaintiffs' claim for breach of fiduciary duty; and (iv) dismissing plaintiffs' claim for breach of duty to avoid conflicts of interest. In January 2018, plaintiffs filed motions for class certification in the state and federal court

Notes to Consolidated Financial Statements—(Continued)

actions. In May 2018, plaintiffs' motion for class certification was denied in the state court action. In June 2018, plaintiffs filed a Notice of Appeal to the California Court of Appeal of the denial of their class certification motion. In December 2018, the California Court of Appeal entered the parties' stipulation dismissing plaintiffs' appeal of the class certification decision. In December 2018, the federal court action was dismissed with prejudice. In January 2019, the state court action was dismissed with prejudice. This matter is now closed.

PICA et al. v. HSBC, et al.

In January 2015, defendants filed a motion to dismiss the amended complaint. In June 2015, the court granted in part, and denied in part, defendants' motion to dismiss the complaint for failure to state a claim and granted leave to file an amended complaint. In July 2015, plaintiffs filed an amended complaint. In January 2017, plaintiffs filed a motion seeking class certification and appointing class representatives and class counsel. In February 2018, the court denied plaintiffs' motion for class certification and plaintiffs filed a petition with the Second Circuit Court of Appeals seeking permission to appeal the class certification decision. In May 2018, the Second Circuit denied plaintiffs' request for permission to appeal the denial of their class certification motion. In May 2019, the court dismissed the case with prejudice. This matter is now closed.

PICA et al. v. U.S. Bank N.A.

In February 2015, defendants filed a motion to dismiss the amended complaint. In May 2015, the court granted defendants' motion to dismiss: (i) declining to exercise supplemental jurisdiction regarding claims involving the PSA trusts; and (ii) granting leave for plaintiffs to file an amended complaint asserting direct claims involving the Indenture trusts. In June 2015, the Company, together with other institutional investors, filed a complaint in New York State Supreme court, captioned BlackRock Balanced Capital Portfolio (FI), et al. v. U.S. Bank Nat'l Ass'n, asserting claims relating to the PSA trusts. In July 2015, plaintiffs filed with the court an amended complaint asserting direct claims relating to the Indenture trusts. In August 2015, defendant filed a motion to dismiss the amended class action complaint in the federal court action. In September 2015, defendant filed a motion to dismiss the class action complaint in the state court action. In February 2016, the federal district court issued a decision involving U.S. Bank's motion to dismiss: (i) upholding the breach of contract and Trust Indenture Act claims; and (ii) dismissing the breach of fiduciary duty and extra-contractual claims. In September 2016, the Company together with other institutional investor plaintiffs filed an amended complaint in state court. In October 2016, U.S. Bank filed a motion to dismiss the amended state court complaint. In November 2016, plaintiffs filed in federal court motions seeking class certification and appointing class representatives and class counsel. In January 2018, the state court issued a decision on U.S. Bank's motion to dismiss the amended complaint: (i) upholding the representation and warranty breach of contract claims for all 770 trusts; (ii) upholding the breach of contract claims related to servicer violations for 77 trusts; and (iii) dismissing the breach of fiduciary duty, negligence, and implied covenant of good faith and fair dealing claims. In January 2018, the court denied plaintiffs' motion for class certification in the federal court action. In February 2018, the federal court entered a stipulated order: (i) dismissing all claims involving three trusts with prejudice; (ii) with respect to twenty trusts, dismissing with prejudice the Trust Indenture Act ("TIA") claims for lack of standing, and the breach of contract claims without prejudice; and (iii) dismissing without prejudice the TIA and breach of contract claims concerning the four remaining trusts. In February 2018, U.S. Bank filed an appeal from the state court's order concerning U.S. Bank's motion to dismiss the amended complaint. In March 2018, plaintiffs filed a cross-appeal of the state court's order concerning the motion to dismiss. In August 2018, plaintiffs filed a second class action complaint in New York state court against U.S. Bank, as trustee, asserting claims for breach of contract, breach of fiduciary duty, breach of the implied covenant of good faith and fair dealing, and breach of duty of care. In October 2018, the New York State Supreme Court, First Department, modified the lower court's January 2018 order, by dismissing plaintiffs' breach of contract claims for servicer violations involving 56 of 77 trusts, and otherwise affirmed the remainder of the lower court's January 2018 order. In April 2019, a decision and order were issued dismissing plaintiffs' state court action with prejudice. This matter is now closed.

PICA et al. v. Wells Fargo Bank, et al.

In April 2015, defendants filed a motion to dismiss the amended complaint. In January 2016, the court issued a decision involving Wells Fargo's motion to dismiss: (i) with respect to the PSA trusts, granting the motion and declining to exercise supplemental jurisdiction; and (ii) with respect to the Indenture trusts, granting leave for plaintiffs to file an amended complaint. In February 2016, the Company, together with other institutional investor plaintiffs, filed an amended complaint in federal court. In March 2016, the Company, together with other institutional investors, filed a complaint in California State Superior court, captioned BlackRock Balanced Capital Portfolio (FI), et al. v. Wells Fargo Bank, Nat'l Ass'n., asserting claims relating to the PSA trusts. In May 2016, defendant filed a motion to dismiss or to stay the state court action. In July 2016, defendant filed a motion to dismiss the amended complaint filed previously in federal court. In October 2016, the court dismissed the state court complaint. In December 2016, the Company, together with other institutional investors, filed a complaint in New York State Court, captioned BlackRock Core Bond Portfolio, et al. v. Wells Fargo Bank, Nat'l Ass'n., asserting claims related to the PSA trusts. In March 2017,

Notes to Consolidated Financial Statements—(Continued)

the federal court issued an order concerning defendant's motion to dismiss as to the Indenture trusts: (i) sustaining plaintiffs' breach of contract claims; plaintiffs' claims for violations of the Trust Indenture Act of 1939; and plaintiffs' claims for breach of the duty to avoid conflicts of interest; and (ii) dismissing plaintiffs' claims for breach of fiduciary duty as duplicative of the sustained contract claims. In May 2017, Wells Fargo filed a third-party complaint for contribution against PGIM, Inc., alleging that, in the event the Prudential plaintiff Funds prevail on their claims for damages against Wells Fargo, PGIM must contribute to the award due to PGIM's alleged breach of fiduciary duties owed to the Funds in managing the Funds' RMBS investments. In June 2017, Wells Fargo filed a motion to dismiss the complaint in New York State Court. In October 2017, PGIM filed a motion to dismiss the third-party complaint filed by Wells Fargo seeking contribution. In January 2018, plaintiffs filed a motion for class certification in the federal court action. In November 2018, plaintiffs filed an amended complaint in New York state court against Wells Fargo, as trustee, asserting claims for breach of contract, breach of fiduciary duty, breach of the implied covenant of good faith and fair dealing, breach of duty of due care, and violation of the Trust Indenture Act of 1939. In May 2019, the state court entered an Order and Final Judgment approving the class action settlement and dismissing the case with prejudice, and the federal court action was dismissed with prejudice. This matter is now closed.

LIBOR Litigation

Prudential Investment Portfolios 2, f/k/a Dryden Core Investment Fund, o/b/o Prudential Core Short-Term Bond Fund and Prudential Core Taxable Money Market Fund v. Bank of America Corporation, et al.

In May 2014, Prudential Investment Portfolios 2, on behalf of the Prudential Core Short-Term Bond Fund and the Prudential Core Taxable Money Market Fund (the "Funds"), filed an action against ten banks in the United States District Court for the District of New Jersey asserting that the banks participated in the setting of LIBOR, a major benchmark interest rate. The complaint alleges that the defendant banks manipulated LIBOR, and asserts, among other things, claims for common law fraud, negligent misrepresentation, breach of contract, intentional interference with contract and with prospective economic relations, unjust enrichment, breaches of the New Jersey Civil Racketeer Influenced and Corrupt Organizations Act ("RICO") statute, and violations of the Sherman Act. In June 2014, the United States Judicial Panel on Multidistrict Litigation transferred the action to the United States District Court for the Southern District of New York, where it has been consolidated for pre-trial purposes with other pending LIBOR-related actions. In October 2014, the Funds filed an amended complaint. In November 2014, the defendants filed a motion to dismiss the amended complaint. In August 2015, the court issued a decision granting in part, and denying in part, defendants' motions to dismiss. The court dismissed certain of the Funds' claims, including those alleging fraud based on offering material statements; New Jersey RICO; and express breach of contract. The court upheld certain of the Funds' claims, including those alleging fraud based on false LIBOR submissions to the British Bankers' Association; negligent misrepresentation; unjust enrichment; and breach of the implied covenant of good faith and fair dealing. Following the August 2015 decision, granting in part defendants' motions to dismiss, in September 2015, Prudential filed the following LIBOR complaints: (i) in the Southern District of New York, captioned Prudential Investment Portfolios 2 et al. v. Barclays Bank PLC, et al. (the "New York Complaint"), naming as defendants Barclays Bank PLC, Barclays Capital Inc., Barclays PLC, Citibank, N.A., Citigroup Funding Inc., Credit Suisse AG, Credit Suisse Group AG, Credit Suisse (USA) Inc., Deutsche Bank AG, HSBC Bank plc, HSBC Holdings PLC, JPMorgan Chase & Co., JPMorgan Chase Bank, N.A., Royal Bank of Canada, and The Royal Bank of Scotland PLC. These defendants were dismissed from the original LIBOR action on jurisdictional grounds. The New York complaint reasserts the causes of action brought in the original LIBOR action; and (ii) in the Western district of North Carolina, captioned Prudential Investment Portfolios 2 et al. v. Bank of America Corporation et al. (the "North Carolina Complaint"), naming as defendants Bank of America Corporation and Bank of America, N.A. These defendants were dismissed from the original LIBOR action on jurisdictional grounds. The North Carolina Complaint reasserts the causes of action brought in the original LIBOR action. Both the New York Complaint and the North Carolina Complaint have been transferred for pre-trial purposes to the LIBOR multi-district litigation presided over by Judge Buchwald in the U.S. District Court for the Southern District of New York. In May 2016, the Second Circuit Court of Appeals vacated the district court's dismissal of the LIBOR plaintiffs' antitrust claims and remanded to the district court the question of whether plaintiffs possess standing as "efficient enforcers" of applicable antitrust laws. In July 2016, defendants filed a joint motion to dismiss all antitrust claims based on lack of standing and lack of personal jurisdiction. In December 2016, the motion was granted in part and denied in part. In January 2017, the United States Supreme Court denied defendants' petition for certiorari. In February 2017, the court clarified its December 2016 order, holding that antitrust claims only exist against panel banks, not their affiliates. This clarification resulted in the Funds' New Jersey antitrust claims being dismissed for lack of personal jurisdiction. The Funds antitrust claims in the New York and North Carolina actions remain pending. In July 2017, the Funds obtained an entry of judgment on the New Jersey antitrust claims dismissed on personal jurisdiction grounds. In July 2017, the Funds filed with the Second Circuit Court an appeal from the dismissal of their New Jersey anti-trust claims. In June 2019, the court issued two orders approving stipulations dismissing with prejudice Prudential's claims against Citigroup Inc., Citibank, N.A., Citigroup Funding Inc., and Citigroup Global Markets Inc. In December 2019, the court issued two orders approving stipulations dismissing with

Notes to Consolidated Financial Statements—(Continued)

prejudice Prudential's claims against HSBC Holdings PLC, HSBC Bank PLC, HSBC Finance Corp., HSBC Securities (USA) Inc., and HSBC USA Inc.

Regulatory Matters

Securities Lending and Foreign Tax Reclaim Matter

In 2016, the Company self-reported to the SEC and the U.S. Department of Labor ("DOL"), and notified other regulators, that in some cases it failed to maximize securities lending income for the benefit of certain separate account investments due to a long-standing restriction benefiting the Company that limited the availability of loanable securities. The Company has removed the restriction and implemented a remediation plan for the benefit of customers. As part of the Company's review of this matter, in 2018 it further self-reported to the SEC, and notified other regulators, that in some cases it failed to timely process foreign tax reclaims for the separate account investments. The Company has corrected the foreign tax reclaim process and has implemented a remediation plan for the benefit of customers.

The DOL's review of the securities lending matter is closed. In September 2019, the Company reached a settlement of these matters with the SEC. As part of the settlement the Company agreed to pay a fine of \$5 million and disgorgement of \$27.6 million, and consented to the entry of an Administrative Order containing findings that two subsidiaries of the Company violated certain sections of the Investment Advisers Act of 1940 and the Investment Advisers Act Rules and ordering the subsidiaries to cease and desist from committing or causing any violations and any future violations of those provisions. In reaching this settlement, the Company neither admitted nor denied the SEC's findings.

Summary

The Company's litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcome cannot be predicted. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company's financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, is not likely to have a material adverse effect on the Company's financial position.

Notes to Consolidated Financial Statements—(Continued)

24. QUARTERLY RESULTS OF OPERATIONS (UNAUDITED)

The unaudited quarterly results of operations for the years ended December 31, 2019 and 2018 are summarized in the table below:

	Three Months Ended							
	N	Iarch 31	June 30		S	September 30	I	December 31
	(in millions, except per share amounts)							
2019								
Total revenues	\$	15,091	\$	15,388	\$	15,105	\$	19,223
Total benefits and expenses		13,951		14,512		13,380		17,879

⁽¹⁾ Quarterly earnings per share amounts may not add to the full year amounts due to the averaging of shares.

25. SUBSEQUENT EVENTS

Common Stock Dividend Declaration

On February 4, 2020, Prudential Financial's Board of Directors declared a cash dividend of \$1.10 per share of Common Stock, payable on March 12, 2020 to shareholders of record as of February 18, 2020.

⁽²⁾ Basic and Diluted earnings per share of Common Stock for the second quarter of 2018 reflected a net charge in the Long-Term Care business as a result of the Company's annual reviews and update of assumptions and other refinements.

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Management's Annual Report on Internal Control Over Financial Reporting and the report of the Company's independent registered public accounting firm on the effectiveness of internal control over financial reporting as of December 31, 2019 are included in Part II, Item 8 of this Annual Report on Form 10-K.

In order to ensure that the information we must disclose in our filings with the SEC is recorded, processed, summarized, and reported on a timely basis, the Company's management, including our Chief Executive Officer and Chief Financial Officer, have reviewed and evaluated the effectiveness of our disclosure controls and procedures, as defined in Exchange Act Rule 13a-15(e), as of December 31, 2019. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of December 31, 2019, our disclosure controls and procedures were effective. No change in our internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f), occurred during the quarter ended December 31, 2019, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

In February 2020, the Company entered into a restrictive covenants agreement with Mark B. Grier, its former Vice Chairman, whereby, in consideration of a payment of \$5,335,000, Mr. Grier agreed that until February 14, 2021 he would be bound by the same restrictive covenants, including a covenant not to compete, that apply generally under the terms of our long-term incentive awards. The amount paid for these commitments was determined based on the grant date value of the long-term incentive award Mr. Grier would have been eligible to receive in February 2020 had he continued in employment through that date, pro-rated based on his actual period of employment during 2019. The period during which the restrictive covenants apply under this agreement closely mirrors the one-year post-employment period that would have applied had Mr. Grier retired following receipt of a 2020 long-term incentive grant. If Mr. Grier materially breaches his commitments under this agreement, he will both (i) have to repay all but a de minimis portion of the consideration payable to him under this agreement and (ii) be required to forfeit all then outstanding long-term incentive awards granted to him during his employment with Prudential and to disgorge any profits he realized from any such long-term incentive awards within six months prior to the date he entered into this agreement or may realize at any time thereafter, on the same basis that would be applicable upon a breach of the comparable restrictive covenants applicable under the terms of a 2020 long-term incentive award.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information called for by this Item pertaining to executive officers of Prudential Financial appears in "Business—Information About our Executive Officers."

We have adopted a code of business conduct and ethics, known as "Making the Right Choices," which applies to our Chief Executive Officer, Chief Financial Officer and our Principal Accounting Officer, as well as to our directors and all other employees. Making the Right Choices is posted on our website at www.investor.prudential.com. Our code of business conduct and ethics, any amendments and any waiver granted to any of our directors or executive officers are available free of charge on our website at www.investor.prudential.com.

In addition, we have adopted Corporate Governance Guidelines, which we refer to as our "Corporate Governance Principles and Practices." Our Corporate Governance Principles and Practices are available free of charge on our website at www.investor.prudential.com.

Certain of the information called for by this item is hereby incorporated herein by reference to the relevant portions of Prudential Financial's definitive proxy statement for the Annual Meeting of Shareholders to be held on May 12, 2020, to be filed by Prudential Financial with the Securities and Exchange Commission pursuant to Regulation 14A within 120 days after December 31, 2019 (the "Proxy Statement").

Table of Contents

ITEM 11. EXECUTIVE COMPENSATION

The information called for by this item is hereby incorporated herein by reference to the relevant portions of the Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table provides information as of December 31, 2019, regarding securities authorized for issuance under our equity compensation plans. All outstanding awards relate to Prudential Financial's Common Stock. For additional information about our equity compensation plans, see Note 21 to the Consolidated Financial Statements included in this Annual Report on Form 10-K.

	(a)		(b)			(c)
	Number of securities to be issued upon exercise of outstanding options, warrants and rights		Weighted-average price of outstandi warrants and	ing options,		Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in (a))
Equity compensation plans approved by security holders— Omnibus Plan	13,524,738	(1)	\$	68.32	(2)	14,183,145
Equity compensation plans approved by security holders— Director Plan	134,799					0
Equity compensation plans approved by security holders—PSPP(3)	0					11,006,777
Total equity compensation plans approved by security holders	13,659,537					25,189,922
Equity compensation plans not approved by security holders	0					0
Grand Total	13,659,537					25,189,922

⁽¹⁾ Represents 5,158,189 outstanding Options, 4,596,977 outstanding Restricted Units and 3,769,572 outstanding Performance Shares as of December 31, 2019 under our Omnibus Plan, including those granted as part of the Assurance IQ acquisition. The number of Performance Shares represents the number of shares that would be received based on maximum performance, reduced for cancellations and releases through December 31, 2019. The actual number of shares the Compensation Committee will award at the end of each performance period will range between 0% and 125% (between 0% and 100% for the performance shares related to the Assurance IQ acquisition) of the target number of units granted, based upon a measure of the reported performance of the Company relative to stated goals. Performance awards granted to senior management in 2018 include a stated goal related to diversity & inclusion that can modify the performance result by +/- 10%. The outstanding Performance Units will be settled only in cash and do not reduce the number of shares authorized under the Omnibus Plan, and so they are not reflected in this table.

(2) Represents the weighted average exercise price of the Options disclosed in column (a). The weighted average remaining contractual term of these Options is 4.95 years.

The other information called for by this item is hereby incorporated herein by reference to the relevant portions of the Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information called for by this item is hereby incorporated herein by reference to the relevant portions of the Proxy Statement.

⁽³⁾ The Prudential Financial, Inc. Employee Stock Purchase Plan is a qualified Employee Stock Purchase Plan under Section 423 of the Code, pursuant to which up to 26,367,235 shares of Common Stock were authorized for issuance, all of which have been registered on Form S-8. Under the plan, employees may purchase shares based upon quarterly offering periods at an amount equal to the lesser of (1) 85% of the closing market price of the Common Stock on the first day of the quarterly offering period, or (2) 85% of the closing market price of the Common Stock on the last day of the quarterly offering period.

Schedule II

Condensed Financial Information of Registrant Notes to Condensed Financial Information of Registrant

1. ORGANIZATION AND PRESENTATION

Prudential Financial, Inc. ("Prudential Financial") was incorporated on December 28, 1999, as a wholly-owned subsidiary of The Prudential Insurance Company of America ("PICA"). On December 18, 2001, PICA converted from a mutual life insurance company to a stock life insurance company and became an indirect, wholly-owned subsidiary of Prudential Financial.

The condensed financial information of Prudential Financial, Inc. (the "Parent Company") should be read in conjunction with the consolidated financial statements of Prudential Financial, Inc. and its subsidiaries and the notes thereto (the "Consolidated Financial Statements"). The condensed financial statements of Prudential Financial reflect its direct wholly-owned subsidiaries using the equity method of accounting.

In October 2019, the Company completed the acquisition of Assurance IQ, Inc. ("Assurance IQ"), a leading consumer solutions platform that offers a range of solutions that help meet consumers' financial needs, for approximately \$1,758 million in cash, net of transaction expenses, and restricted Prudential Financial Common Stock and equity awards with a market value of approximately \$454 million as of the closing date. Assurance IQ is reported as a wholly owned subsidiary of Prudential.

2. OTHER INVESTMENTS

Prudential Financial's other investments as of December 31, 2019 and 2018 consisted primarily of highly liquid debt investments and intercompany enterprise liquidity account funds.

3. DEBT

A summary of Prudential Financial's short- and long-term debt is as follows:

				Decen	nber 31,	,
	Maturity Dates	Rate(1)		2019		2018
				(\$ in r	nillions))
Short-term debt:						
Commercial paper(2)			\$	25	\$	15
Current portion of long-term debt				1,179		1,100
Total short-term debt			\$	1,204	\$	1,115
Long-term debt:						
Fixed rate senior notes	2021-2051	1.35%-6.63%	\$	9,912	\$	8,601
Floating rate senior notes				0		29
Junior subordinated notes	2042-2058	4.50%-5.88%		7,518		7,511
Total long-term debt			\$	17,430	\$	16,141

⁽¹⁾ Ranges of interest rates are for the year ended December 31, 2019.

Long-term Debt

In order to manage exposure to interest rate movements, Prudential Financial utilizes derivative instruments, primarily interest rate swaps, in conjunction with some of its debt issues. The impact of these derivative instruments is not reflected in the rates presented in the table above. For those derivatives that qualify for hedge accounting treatment, interest expense was \$0 million, \$0 million, and \$1 million for each of the years ended December 31, 2019, 2018 and 2017, respectively.

Schedule of Long-term Debt Maturities

The following table presents Prudential Financial's contractual maturities for long-term debt as of December 31, 2019:

⁽²⁾ The weighted average interest rate on outstanding commercial paper was 1.71% and 2.45% at December 31, 2019 and 2018, respectively.

			Calo	endar Year				
	 2021	2022		2023	2	2024	2025 and hereafter	 Total
				(in mi	llions)			
Long-term debt	\$ 400	\$ 0	\$	0	\$	700	\$ 16,330	\$ 17,430

4. DIVIDENDS AND RETURNS OF CAPITAL

For the years ended December 31, Prudential Financial received cash dividends and/or returns of capital from the following subsidiaries:

	20	019	2018		2017
	(in millions)				
Prudential Annuities Holding Company	\$	163	\$ 17	5	\$ 145
International Insurance and Investments Holding Companies	1	,065	2,27	0	546
The Prudential Insurance Company of America		600		0	1,000
PGIM Holding Company		462	57	8	467
Prudential Annuities Life Assurance Corporation		978	1,02	.5	950
Other Holding Companies		14	1	0	16
Total	\$ 3	3,282	\$ 4,05	8	\$ 3,124

5. COMMITMENTS AND GUARANTEES

Prudential Financial has issued a subordinated guarantee covering a subsidiary's domestic commercial paper program. As of December 31, 2019, there was \$524 million outstanding under this commercial paper program.

Prudential Financial has provided guarantees of the payment of principal and interest on intercompany loans between affiliates. As of December 31, 2019, Prudential Financial had issued guarantees of outstanding loans totaling \$3.8 billion between international insurance subsidiaries and other affiliates.

In 2013, Prudential Financial entered into a \$500 million indemnity and guarantee agreement with Wells Fargo Bank Northwest, N.A. Under this agreement, Prudential Financial guaranteed obligations with respect to an affiliated loan from PICA to an affiliate. The loan proceeds were utilized to construct Prudential's new home office in Newark, New Jersey.

Prudential Financial is also subject to other financial guarantees, net worth maintenance agreements and indemnity arrangements, including those made in the normal course of businesses guaranteeing the performance of, or representations made by, Prudential Financial subsidiaries. Prudential Financial has provided indemnities and guarantees related to acquisitions and dispositions, investments, debt issuances and other transactions, including those provided as part of its ongoing operations that are triggered by, among other things, breaches of representations, warranties or covenants provided by Prudential Financial or its subsidiaries. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or applicable. Since certain of these obligations are not subject to limitations, it is not possible to determine the maximum potential amount due under these guarantees. At December 31, 2019, Prudential Financial has no accrued liabilities associated with other financial guarantees and indemnity arrangements.

EXHIBIT INDEX

Pursuant to the rules and regulations of the Securities and Exchange Commission, the Company has filed certain agreements as exhibits to this Annual Report on Form 10-K. These agreements may contain representations and warranties by the parties. These representations and warranties have been made solely for the benefit of the other party or parties to such agreements and (i) may have been qualified by disclosures made to such other party or parties, (ii) were made only as of the date of such agreements or such other date(s) as may be specified in such agreements and are subject to more recent developments, which may not be fully reflected in the Company's public disclosure, (iii) may reflect the allocation of risk among the parties to such agreements and (iv) may apply materiality standards different from what may be viewed as material to investors. Accordingly, these representations and warranties may not describe the Company's actual state of affairs at the date hereof and should not be relied upon.

Plan of Reorganization. Incorporated by reference to Exhibit 2.1 to the Registrant's Registration Statement on Form S-1 (No. 333-58524) (the 2.1 "Registration Statement"). Description of Prudential Financial, Inc. Common Stock

The following briefly summarizes some provisions of Prudential Financial, Inc.'s (the "Company", "Prudential Financial, Inc.", "Prudential Financial", "we", "us" or "our") amended and restated certificate of incorporation and amended and restated by-laws that would be important to holders of our Common Stock. The following description may not be complete and is subject to, and qualified in its entirety by reference to, the terms and provisions of our amended and restated certificate of incorporation and amended and restated by-laws which are exhibits to the Annual Report on Form 10-K.

Our Common Stock

We have authorized 1,500,000,000 shares of Common Stock with a par value of \$0.01 per share. As of January 31, 2018, approximately 422,000,000 shares of Common Stock were outstanding. The outstanding shares of Common Stock are fully paid and non-assessable.

Our Common Stock is listed on the New York Stock Exchange under the symbol "PRU".

Dividend Rights

Holders of Common Stock may receive dividends as declared by our board of directors out of funds legally available for that purpose under the New Jersey Business Corporation Act, subject to the rights of any holders of any preferred stock.

Voting Rights

Each share of Common Stock gives the owner of record one vote on all matters submitted to a shareholder vote. The Common Stock votes together as a single class on all matters as to which common shareholders are generally entitled to vote.

Actions requiring approval of shareholders will generally require approval by a majority vote at a meeting at which a quorum is present. Our amended and restated certificate of incorporation provides that, with respect to shares of Common Stock and any shares of preferred stock voting together with the Common Stock as a class, the holders of at least 50% of the shares entitled to cast votes at a meeting of shareholders shall constitute a quorum at all meetings of shareholders for the transaction of business.

Liquidation Rights

In the event of a liquidation, dissolution or winding-up of Prudential Financial, each share of Common Stock will be entitled to receive an equal share in our net assets that remain after paying all liabilities and the liquidation preferences of any preferred stock.

Neither a merger nor a consolidation of us with any other entity, nor a sale, transfer or lease of all or any part of our assets would alone be deemed a liquidation, dissolution or winding-up for these purposes.

Pre-emptive Rights

Holders of our Common Stock have no pre-emptive rights with respect to any shares of capital stock that we may issue in the future.

Provisions of Our Amended and Restated Certificate of Incorporation and Amended and Restated By-Laws

A number of provisions of our amended and restated certificate of incorporation and amended and restated by-laws concern corporate governance and the rights of shareholders. Some provisions, including those granting our board of directors the ability to issue shares of preferred stock and to set the voting rights, preferences and other terms of preferred stock without shareholder approval, may be viewed as having an anti-takeover effect and may discourage takeover attempts not first approved by our board of directors, including takeovers that some shareholders may consider to be in their best interests. To the extent takeover attempts are discouraged, fluctuations in the market price of the Common Stock, which may result from actual or rumored takeover attempts, may be inhibited.

The amended and restated certificate of incorporation and the amended and restated by-laws have provisions that also could delay or frustrate the removal of directors from office or the taking of control by shareholders, even if that action would be beneficial to shareholders. These provisions also could discourage or make more difficult a merger, tender offer or proxy contest, even if they were favorable to the interests of shareholders, and could potentially depress the market price of the Common Stock.

The following is a summary of the material terms of these provisions of our amended and restated certificate of incorporation and amended and restated bylaws. The statements below are only a summary, and we refer you to the amended and restated certificate of incorporation and amended and restated by-laws. Each statement is qualified in its entirety by such reference.

Board of Directors; Number of Directors; Removal; Vacancies

Our amended and restated by-laws provide that the board of directors consists of not less than 10 nor more than 15 members, with the exact number to be determined by the board of directors from time to time. All directors are elected for terms expiring at the next annual meeting of shareholders and until such directors' successors have been elected and qualified. The amended and restated by-laws also provide that the directors may be removed "with or without cause" upon the affirmative vote of a majority of the votes cast at a meeting of shareholders by the holders of shares entitled to vote for the election of directors.

Unless otherwise required by law, vacancies on the board of directors, including vacancies resulting from an increase in the number of directors or the removal of directors, may only be filled by an affirmative vote of a majority of the directors then in office, even though less than a quorum, or by a sole remaining director, subject to any rights to director election held by any one or more classes or series of preferred stock.

Limitations on Call of Special Meetings of Shareholders

The amended and restated by-laws provide that special meetings of shareholders may only be called by the chairman of the board of directors, the chief executive officer, the president, or the board of directors, and shall be called by the chairman of the board of directors or the secretary of the Company upon the written request of shareholders that own at least 10% of the shares entitled to vote on the matters to be brought before the proposed special meeting. For purposes of such shareholder request, shareholders are deemed to own those shares held net long as described in the amended and restated by-laws.

Limitation on Written Consent of Shareholders

The amended and restated certificate of incorporation generally provides that action by holders of Common Stock cannot be taken by written consent without a meeting unless such written consents are signed by all shareholders entitled to vote on the action to be taken.

Advance Notice Requirements for Nomination of Directors and Presentation of New Business at Meetings

Our amended and restated by-laws establish advance notice procedures for shareholder proposals concerning nominations for election to the board of directors and new business to be brought before meetings of shareholders. These procedures require that notice of such shareholder proposals must be timely given in writing to our corporate secretary prior to the meeting at which the action is to be taken. Generally, to be timely, we must receive the notice at our principal executive offices not less than 120 nor more than 150 days prior to the anniversary date of the annual meeting of shareholders before the one in which the shareholder proposal is to be considered.

In order for a director nominee to have access to the Company's proxy statement, the amended and restated by-laws require the nominee to be nominated by not more than 20 shareholders, each of whom has a non-control intent and has had a net long position of 3% or more of the Company's outstanding capital stock continuously for at least three years. These provisions make it procedurally more difficult for a shareholder to place a proposed nomination or new business proposal on the meeting agenda and therefore may reduce the likelihood that a shareholder will seek to take independent action to replace directors or with respect to other matters that are not supported by management.

Limitation of Liability and Indemnification Matters

Amended and Restated Certificate of Incorporation. Our amended and restated certificate of incorporation states that a director will not be held personally liable to us or any of our shareholders for damages for a breach of duty as a director except for liability:

- for any breach of the director's duty of loyalty to us or our shareholders,
- for any act or omission not in good faith or involving a knowing violation of law, or
- for any transaction from which such director derived or received an improper personal benefit.

This provision prevents a shareholder from pursuing an action for damages for breach of duty against one of our directors unless the shareholder can demonstrate one of these specified bases for liability. The inclusion of this provision in the amended and restated certificate of incorporation may discourage or deter shareholders or management from bringing a lawsuit against a director for a breach of his or her duties, even though an action, if successful, might otherwise benefit us and our shareholders. This provision does not affect the availability of non-monetary remedies like an injunction or rescission based upon a director's breach of his or her duty of care.

Amended and Restated By-Laws. Our amended and restated by-laws provide that we must indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding because such person is or was a director or officer of us, or is or was serving at our request as a director or officer, employee or agent of another entity. This indemnification covers expenses, judgments, fines, penalties and amounts paid in settlement actually and reasonably incurred by the indemnified person in connection with such action, suit or proceeding. To receive indemnification, a person must have acted in good faith and in a manner the person reasonably believed to be in or not opposed to our best interests. In the case of any criminal action or proceeding, the indemnified person also must have had no reasonable cause to believe his or her conduct was unlawful. The amended and restated by-laws limit indemnification in cases when a person has been held liable to us.

Anti-Takeover Effect of New Jersey Business Corporation Act

New Jersey Shareholders Protection Act

We are subject to the provisions of Section 14A-10A of the New Jersey Business Corporation Act, which is known as the "Shareholders Protection Act".

Generally, the Shareholders Protection Act prohibits a publicly held New Jersey corporation with its principal executive offices or significant business operations in New Jersey, like us, from engaging in any "business combination" with any "interested stockholder" of that corporation for a period of five years following the time at which that stockholder became an "interested stockholder". An exception applies if (1) the business combination is approved by the board of directors before the stockholder becomes an "interested stockholder"; or (2) the transaction or series of related transactions which caused the stockholder to become an "interested stockholder" was approved by the board of directors prior to the stockholder becoming an "interested stockholder" and any subsequent business combinations with that interested stockholder are approved by the board of directors, provided that any such subsequent business combination is approved by (a) the board of directors, or a committee of that board, consisting solely of persons who are not employees, officers, directors, stockholders, affiliates or associates of that interested stockholder, and (b) the affirmative vote of the holders of a majority of the voting stock not beneficially owned by such interested stockholder at a meeting called for such purpose.

Covered business combinations include certain mergers, dispositions of assets or shares and recapitalizations. An "interested stockholder" is (1) any person that directly or indirectly beneficially owns 10% or more of the voting power of the outstanding voting stock of Prudential Financial; or (2) any "affiliate" or "associate" of ours that directly or indirectly beneficially owned 10% or more of the voting power of the then-outstanding stock of Prudential Financial at any time within a five-year period immediately prior to the date in question.

In addition, under the Shareholders Protection Act, we may not engage in a business combination with an interested stockholder at any time unless:

- our board of directors approved the business combination prior to the time the stockholder became an interested stockholder;
- the holders of two-thirds of our voting stock (which includes Common Stock) not beneficially owned by the interested stockholder affirmatively vote to approve the business combination at a meeting called for that purpose;
- the consideration received by the non-interested stockholders in the business combination meets the standards of the statute, which is designed to ensure that all other shareholders receive at least the highest price per share paid by the interested stockholder; or
- a business combination is approved by (a) the board of directors, or a committee of the board of directors consisting solely of persons who are not
 employees, officers, directors, stockholders, affiliates or associates of the interested stockholder prior to the consummation of the business
 combination; and (b) the affirmative vote of the holders of a majority of the voting stock (excluding that beneficially owned by the interested
 stockholder) at a meeting called for that purpose if the transaction or series of related transactions with the interested stockholder which caused
 the person to become an interested stockholder was approved by the board of directors prior to the consummation of that transaction or series of
 related transactions.

A New Jersey corporation that has publicly traded voting stock may not opt out of these restrictions.

Board Consideration of Certain Factors

Under the New Jersey Business Corporation Act, in discharging their duties, our directors may consider the effects that an action taken by us may have on interests and people in addition to our shareholders, such as employees, customers and the community. The directors may also consider the long-term as well as the short-term interests of us and our shareholders, including the possibility that these interests may best be served by our continued independence.

Transfer Agent

The	transfer ager	nt and registra	r for our	Common S	Stock is	Computershare Limited.

Description of 5.75% Junior Subordinated Notes

The following is a description of the material terms of Prudential Financial, Inc.'s (the "Company", "Prudential Financial, Inc.", "Prudential Financial", "we", "us" or "our") 5.75% junior subordinated notes due 2052 and the junior subordinated indenture. It does not purport to be complete in all respects. This description is subject to and qualified in its entirety by reference to the junior subordinated indenture filed as Exhibit 4.1 to the Company's Current Report on Form 8-K filed June 17, 2008, the seventh supplemental indenture filed as Exhibit 4.2 to the Company's Current Report on Form 8-K filed December 4, 2012 and the form of notes included in the supplemental indenture.

The notes were issued pursuant to the subordinated debt indenture, dated as of June 17, 2008, between us and The Bank of New York Mellon (formerly known as The Bank of New York), as trustee. We refer to the subordinated debt indenture, as amended and supplemented by a seventh supplemental indenture, dated as of December 4, 2012, as the "*junior subordinated indenture*", and to The Bank of New York Mellon or its successor, as trustee, as the "*trustee*". You should read the junior subordinated indenture for provisions that may be important to you.

When we use the term "holder" with respect to registered notes, we mean the person in whose name such note is registered in the security register. We expect that the notes will be held in book-entry form only, as described below under "—Book-Entry System", and will be held in the name of DTC or its nominee.

The junior subordinated indenture does not limit the amount of debt that we or our subsidiaries may incur under the junior subordinated indenture or under other indentures to which we are or become a party or otherwise. The notes are not convertible into or exchangeable for shares of our common stock, our authorized preferred stock or any other securities.

General

We initially issued \$575 million aggregate principal amount of notes. We may, without the consent of holders of the notes, increase the principal amount of the notes by issuing additional notes in the future on the same terms and conditions as the initial notes, except for any difference in the issue date, public offering price, interest accrued prior to the issue date of the additional notes and first interest payment date, and with the same CUSIP number as the initial notes, so long as such additional notes are fungible for U.S. federal income tax purposes with the initial notes. The initial notes and any such additional notes would rank equally and ratably in right of payment and would be treated as a single series of junior subordinated debt securities for all purposes under the junior subordinated indenture.

The notes will mature on December 15, 2052 (the "maturity date"). If that day is not a business day, payment of principal and interest will be postponed to the next business day and no interest will accrue as a result of that postponement. The notes will be subordinated and junior in right of payment to all of our senior indebtedness, as defined under "—Subordination" below, and pari passu with our pari passu securities.

The Bank of New York Mellon will initially serve as paying agent for the notes.

Interest Rate and Interest Payment Dates

From and including December 4, 2012 to but excluding the maturity date or any earlier redemption date, the notes will bear interest at the annual rate of 5.75%, and we will pay accrued interest quarterly in arrears on March 15, June 15, September 15 and December 15 of each year, beginning on March 15, 2013, subject to our rights and obligations under "—Option to Defer Interest Payments". Interest payments will be made to the persons or entities in whose names the notes are registered at the close of business on March 1, June 1, September 1 or December 1 (whether or not a business day), as the case may be, immediately preceding the relevant interest payment date. The amount of interest payable will be computed on the basis of a 360-day year consisting of twelve 30-day months. In the event that any interest payment date falls on a day that is not a business day, the interest payment due on that date will be postponed to the next day that is a business day, and no additional interest will accrue as a result of that postponement.

"Business day" means any day other than (i) a Saturday or Sunday, (ii) a day on which banking institutions in The City of New York are authorized or required by law or executive order to remain closed or (iii) a day on which the corporate trust office of the trustee is closed for business.

Option to Defer Interest Payments

So long as no event of default with respect to the notes has occurred and is continuing, we may elect at one or more times to defer payment of interest on the notes for one or more consecutive interest periods that do not exceed five years. We may not defer interest beyond the maturity date, any earlier accelerated maturity date arising from an event of default (which, under the

junior subordinated indenture, is limited to certain events of bankruptcy, insolvency or receivership involving us) or any other earlier redemption of the notes.

During a deferral period, interest will continue to accrue on the notes, and deferred interest on the notes will bear additional interest at the annual rate of 5.75%, compounded on each interest payment date, subject to applicable law. A "deferral period" refers to the period beginning on an interest payment date with respect to which we defer interest and ending on the earlier of (i) the fifth anniversary of that interest payment date and (ii) the next interest payment date on which we have paid all deferred and unpaid amounts (including compounded interest on such deferred amounts) and all other accrued interest on the notes. When we use the term "interest", we are referring not only to regularly scheduled interest payments but also to interest on interest payments not paid on the applicable interest payment date.

At the end of five years following the commencement of a deferral period, we must pay all accrued and unpaid deferred interest, including compounded interest. If we have paid all deferred interest (including compounded interest thereon) on the notes, we can again defer interest payments on the notes as described above.

We will give the holders of the notes and the trustee written notice of our election to commence or continue a deferral period at least one and not more than 60 business days before the next interest payment date.

We have no present intention to defer interest payments.

Dividend and Other Payment Stoppages During Deferral Periods and Under Certain Other Circumstances

We agree in the junior subordinated indenture that, so long as any notes remain outstanding, if

- · we have given notice of our election to defer interest payments on the notes but the related deferral period has not yet commenced, or
- a deferral period is continuing;

then we will not, nor will we permit our subsidiaries to:

- declare or pay any dividends or distributions on, or redeem, purchase, acquire or make a liquidation payment with respect to, any shares of our capital stock:
- make any payment of principal of, or interest or premium, if any, on, or repay, purchase or redeem any of our debt securities that rank upon our liquidation on a parity with or junior to the notes; or
- make any guarantee payments regarding any guarantee issued by us of securities of any of our subsidiaries if the guarantee ranks upon our liquidation on a
 parity with or junior to the notes.

The restrictions listed above do not apply to:

- any purchase, redemption or other acquisition of shares of our capital stock in connection with:
 - any employment contract, benefit plan or other similar arrangement with or for the benefit of any one or more employees, officers, directors, consultants or independent contractors;
 - the satisfaction of our obligations pursuant to any contract entered into prior to the beginning of the applicable deferral period;
 - a dividend reinvestment or shareholder purchase plan; or
 - the issuance of our capital stock, or securities convertible into or exercisable for such capital stock, as consideration in an acquisition transaction, the definitive agreement for which is entered into prior to the applicable deferral period;
- any exchange, redemption or conversion of any class or series of our capital stock, or the capital stock of one of our subsidiaries, for any other class or series of our capital stock, or of any class or series of our capital stock;
- any purchase of fractional interests in shares of our capital stock pursuant to the conversion or exchange provisions of such capital stock or the securities being converted or exchanged;
- any declaration of a dividend in connection with any shareholder rights plan, or the issuance of rights, stock or other property under any shareholder rights plan, or the redemption or purchase of rights pursuant thereto;
- any dividend in the form of stock, warrants, options or other rights where the dividend stock or stock issuable upon exercise of such warrants, options or other rights is the same stock as that on which the dividend is being paid or ranks equally with or junior to such stock; or

• (i) any payment of current or deferred interest on parity securities that is made pro rata to the amounts due on such parity securities (including the notes) and (ii) any payment of principal or current or deferred interest on parity securities that, if not made, would cause us to breach the terms of the instrument governing such parity securities.

For the avoidance of doubt, no terms of the notes will restrict in any manner the ability of any of our subsidiaries to pay dividends or make any distributions to us or to any of our other subsidiaries.

Redemption

The notes are redeemable at our election on or after December 4, 2017 or within 90 days after the occurrence of certain events prior to December 4, 2017, in each case at the applicable redemption price set forth below and are not subject to any sinking fund or similar provisions.

We may redeem the notes:

- in whole at any time or in part from time to time on or after December 4, 2017 at a redemption price equal to their principal amount plus accrued and unpaid interest to but excluding the date of redemption; *provided* that if the notes are not redeemed in whole, at least \$25 million aggregate principal amount of the notes, excluding any notes held by us or any of our affiliates, must remain outstanding after giving effect to such redemption; or
- in whole, but not in part, at any time prior to December 4, 2017, within 90 days after the occurrence of a "tax event", a "rating agency event" or a "regulatory capital event" at a redemption price equal to (i) in the case of a "tax event" or "rating agency event", their principal amount or, if greater, a make-whole redemption price, in each case plus accrued and unpaid interest to but excluding the date of redemption or (ii) in the case of a "regulatory capital event", their principal amount plus accrued and unpaid interest to but excluding the date of redemption.

For the purposes of clause (i) in the preceding paragraph:

- "make-whole redemption price" means, with respect to a redemption of the notes in whole prior to December 4, 2017, the present value of a principal payment on December 4, 2017 and scheduled payments of interest that would have accrued from the redemption date to December 4, 2017 on the notes being redeemed (excluding any accrued and unpaid interest for the period prior to the redemption date), discounted to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at a discount rate equal to the treasury rate (as such make-whole redemption price shall be determined and provided to the Company by the treasury dealer) plus 0.45%:
- "treasury rate" means the semi-annual equivalent yield to maturity of the "treasury security" that corresponds to the "treasury price" (calculated in accordance with standard market practice and computed by the treasury dealer as of the second trading day preceding the redemption date);
- "treasury security" means the United States Treasury security that the "treasury dealer" determines would be appropriate to use, at the time of determination and in accordance with standard market practice, in pricing the notes being redeemed in a tender offer based on a spread to United States Treasury yields;
- "treasury price" means the bid-side price for the treasury security as of the third trading day preceding the redemption date, as set forth in the Wall Street Journal in the table entitled "Treasury Bonds, Notes and Bills", except that: (i) if that table (or any successor table) is not published or does not contain that price information on that trading day, or (ii) if the treasury dealer determines that the price information is not reasonably reflective of the actual bid-side price of the treasury security prevailing at 3:30 p.m., New York City time, on that trading day, then treasury price will instead mean the bid-side price for the treasury security at or around 3:30 p.m., New York City time, on that trading day (expressed on a next trading day settlement basis) as determined by the treasury dealer through such alternative means as are commercially reasonable under the circumstances; and
- "treasury dealer" means one of Morgan Stanley & Co. LLC, Merrill Lynch, Pierce, Fenner & Smith Incorporated, UBS Securities LLC and Wells Fargo Securities, LLC (or their successors), as selected by us, or if all of the foregoing refuse to act as treasury dealers for this purpose or cease to be primary U.S. Government securities dealers, another nationally recognized investment banking firm that is a primary U.S. Government securities dealer specified by us for these purposes.

"Tax event" means the receipt by us of an opinion of independent counsel experienced in such matters to the effect that, as a result of any:

• amendment to or change (including any officially announced proposed change) in the laws or regulations of the United States or any political subdivision or taxing authority of or in the United States that is enacted or effective on or after the initial issuance of the notes;

- official administrative decision or judicial decision or administrative action or other official pronouncement (including a private letter ruling, technical advice memorandum or other similar pronouncement) by any court, government agency or regulatory authority that reflects an amendment to, or change in, the interpretation or application of those laws or regulations that is announced on or after the initial issuance of the notes; or
- threatened challenge asserted in connection with an audit of us, or a threatened challenge asserted in writing against any taxpayer that has raised capital through the issuance of securities that are substantially similar to the notes, which challenge is asserted against us or becomes publicly known on or after the initial issuance of the notes;

there is more than an insubstantial increase in the risk that interest payable by us on the notes is not, or within 90 days of the date of such opinion will not be, deductible by us, in whole or in part, for U.S. federal income tax purposes.

"Rating agency event" means that any nationally recognized statistical rating organization within the meaning of Section 3(a)(62) under the Exchange Act that then publishes a rating for us (a "rating agency") amends, clarifies or changes the criteria it uses to assign equity credit to securities such as the notes, which amendment, clarification or change results in:

- the shortening of the length of time the notes are assigned a particular level of equity credit by that rating agency as compared to the length of time they would have been assigned that level of equity credit by that rating agency or its predecessor on the initial issuance of the notes; or
- the lowering of the equity credit (including up to a lesser amount) assigned to the notes by that rating agency as compared to the equity credit assigned by that rating agency or its predecessor on the initial issuance of the notes.

"Regulatory capital event" means that, if (a) we are or will be considered to be a systemically important nonbank financial company (a "nonbank SIFI") or are or will be otherwise subject to capital adequacy supervision by a capital regulator and (b) the capital adequacy guidelines that apply or will apply to us as a nonbank SIFI or as a result of such other capital adequacy supervision ("future federal capital adequacy guidelines"), set forth criteria for qualifying "Tier 2 Capital" (or its equivalent), we make a good faith determination that, as a result of (i) any amendment to, or change in, the laws or regulations of the United States or any political subdivision of or in the United States that is enacted or becomes effective after the initial issuance of the notes; (ii) any proposed amendment to, or change in, those laws or regulations that is announced or becomes effective after the initial issuance of the notes; or (iii) any official administrative decision or judicial decision or administrative action or other official pronouncement interpreting or applying those laws or regulations that is announced after the initial issuance of the notes, such that, in any such case, there is more than an insubstantial risk that the full principal amount of the notes outstanding from time to time would not qualify as "Tier 2 Capital" (or its equivalent) for purposes of the future federal capital adequacy guidelines, as in effect and/ or as proposed from time to time to which we are or will be subject, for as long as any notes are outstanding; provided that the proposal or adoption of any criterion set forth in the future federal capital adequacy guidelines applicable to bank holding companies as of the initial issuance of the notes or such guidelines as proposed in the June 2012 joint notice of proposed rulemaking to implement the capital provisions of the Basel Committee on Banking Supervision for U.S. banking institutions will not constitute a regulatory capital event.

Notice of any redemption will be mailed at least 30 days but not more than 60 days before the redemption date to each holder of notes to be redeemed at its registered address. Unless we default in payment of the redemption price and accrued interest, on and after the redemption date, interest will cease to accrue on the notes or portions thereof called for redemption.

We may not redeem the notes in part unless all accrued and unpaid interest, including deferred interest, has been paid in full on all outstanding notes for all interest periods terminating on or before the redemption date.

In the event of any redemption, neither we nor the trustee will be required to:

- issue, register the transfer of, or exchange, notes during a period beginning at the opening of business 15 days before the day of selection for redemption of notes and ending at the close of business on the day of mailing of notice of redemption; or
- transfer or exchange any notes so selected for redemption, except, in the case of any notes being redeemed in part, any portion thereof not to be redeemed.

In the event the notes are treated as "Tier 2 capital" (or its equivalent) under the capital guidelines of the capital regulator applicable to Prudential Financial, Inc., any redemption of notes will be subject to our receipt of any required prior approval from the capital regulator and to the satisfaction of any conditions set forth in those capital guidelines or any other applicable regulations of the capital regulator to our redemption of the notes.

Defeasance

The junior subordinated indenture provides that we will be deemed to have paid and discharged the entire indebtedness represented by the notes ("defeasance"), if:

- we have irrevocably deposited or caused to be irrevocably deposited with the trustee as trust funds in trust, specifically pledged as security for, and dedicated solely to, the benefit of the holders (i) cash or (ii) U.S. government obligations, maturing as to principal and interest at such times and in such amounts as will insure the availability of cash or (iii) a combination thereof, sufficient, without reinvestment, in the opinion of a nationally recognized firm of independent public accountants expressed in a written certification thereof delivered to the trustee, to pay and discharge (a) the principal (and premium, if any) and interest on the notes and (b) any mandatory sinking fund payments or analogous payments applicable to the notes on the due dates thereof;
- such deposit will not result in a breach or violation of, or constitute a default under, any agreement or instrument to which we are a party or by which we are bound:
- we have delivered to the trustee an opinion of independent legal counsel satisfactory to the trustee confirming that (i) we have received from, or there has been published by, the IRS a ruling or (ii) since the issue date of the notes, there has been a change in the applicable U.S. federal income tax law, in either case to the effect that holders will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such deposit, defeasance and discharge and will be subject to U.S. federal income tax on the same amount and in the same manner and at the same times, as would have been the case if such deposit, defeasance and discharge had not occurred;
- no event of default or event which with notice or lapse of time or both would become an event of default with respect to the notes shall have occurred and be continuing on the date of such deposit;
- such defeasance shall not cause the trustee to have a conflicting interest with respect to any of our securities or result in the trust arising from such deposit to constitute, unless it is qualified as, a regulated investment company under the Investment Company Act of 1940, as amended;
- we have delivered to the trustee an opinion of counsel substantially to the effect that the trust funds deposited will not be subject to any rights of holders of senior indebtedness, and after the 90th day following the deposit, the trust funds will not be subject to the effect of any applicable bankruptcy, insolvency, reorganization or similar laws affecting creditors' rights generally; and
- we have delivered to the trustee an officers' certificate and an opinion of counsel, each stating that all conditions precedent provided for relating to the
 defeasance have been complied with.

Subordination

The payment of the principal of and interest on the notes is expressly subordinated, to the extent and in the manner set forth in the junior subordinated indenture, in right of payment and upon liquidation to the prior payment in full of all of our senior indebtedness.

Subject to the qualifications described below, the term "senior indebtedness" is defined in the junior subordinated indenture to include principal of, premium (if any) and interest on and any other payment due pursuant to any of the following:

- all of our obligations (other than obligations pursuant to the junior subordinated indenture and the notes) for money borrowed;
- all of our obligations evidenced by securities, notes (other than the notes), debentures, bonds or other similar instruments, including obligations incurred in connection with the acquisition of property, assets or businesses;
- · all of our capital lease obligations;
- all of our reimbursement obligations with respect to letters of credit, bankers' acceptances or similar facilities issued for our account;
- all of our obligations issued or assumed as the deferred purchase price of property or services, including all obligations under master lease transactions
 pursuant to which we or any of our subsidiaries have agreed to be treated as owner of the subject property for U.S. federal income tax purposes;
- all of our payment obligations under interest rate swap or similar agreements or foreign currency hedge, exchange or similar agreements at the time of
 determination, including any such obligations we incurred solely to act as a hedge against increases in interest rates that may occur under the terms of other
 outstanding variable or floating rate indebtedness of ours; and
- all obligations of the types referred to in the preceding bullet points of another person and all dividends of another person the payment of which, in either
 case, we have assumed or guaranteed or for which we are responsible or liable, directly or indirectly, jointly or severally, as obligor, guarantor or
 otherwise.

The notes will rank senior to all of our equity securities and pari passu with our pari passu securities.

The senior indebtedness will continue to be senior indebtedness and entitled to the benefits of the subordination provisions irrespective of any amendment, modification or waiver of any term of the senior indebtedness or extension or

renewal of the senior indebtedness. Notwithstanding anything to the contrary in the foregoing, senior indebtedness will not include (1) obligations to trade creditors created or assumed by us in the ordinary course of business, (2) indebtedness that is by its terms subordinate, or not superior, in right of payment to the notes or (3) our *pari passu* securities.

As of December 31, 2019, our short- and long-term debt owed to third parties ranking senior to the notes upon liquidation, on an unconsolidated basis, totaled approximately \$11.3 billion. In addition, as of December 31, 2019, our short- and long-term debt owed to subsidiaries ranking senior to the notes upon liquidation totaled approximately \$5.9 billion. All liabilities of our subsidiaries are effectively senior to the notes to the extent of the assets of such subsidiaries. As of December 31, 2019, our subsidiaries had total liabilities of approximately \$814 billion (including policyholders' account balance liability and reserves for future policy benefits and claims of approximately \$446 billion). In addition, our subordinated guarantee covering the commercial paper program of one of our subsidiaries constitutes senior indebtedness. As of December 31, 2019, there was \$549 million outstanding under this commercial paper program.

If either of the following circumstances exist, we will first pay all senior indebtedness, including any interest accrued after such events occur, in full before we make any payment or distribution, whether in cash, securities or other property, on account of the principal of or interest on the notes:

- in the event of any insolvency or bankruptcy proceedings, or any receivership, liquidation, reorganization, assignment for creditors or other similar proceedings or events involving us or our assets; or
- (a) in the event and during the continuation of any default in the payment of principal, premium, if any, or interest on any senior indebtedness beyond any applicable grace period, (b) in the event that any event of default with respect to any senior indebtedness has occurred and is continuing, permitting the direct holders of that senior indebtedness (or a trustee) to accelerate the maturity of that senior indebtedness, whether or not the maturity is in fact accelerated (unless, in the case of either (a) or (b), the payment default or event of default has been cured or waived or ceased to exist and any related acceleration has been rescinded), or (c) in the event that any judicial proceeding is pending with respect to a payment default or event of default described in (a) or (b).

In such events, we will pay or deliver directly to the holders of senior indebtedness any payment or distribution otherwise payable or deliverable to holders of the notes. We will make the payments to the holders of senior indebtedness according to priorities existing among those holders until we have paid all senior indebtedness, including accrued interest, in full.

If such events of insolvency or bankruptcy proceedings, or any receivership, liquidation, reorganization, assignment for creditors or other similar proceedings or events involving us or our assets as described in the first bullet above occur, after we have paid in full all amounts owed on senior indebtedness, the holders of notes together with the holders of any of our other *pari passu* securities will be entitled to receive from our remaining assets any principal, premium or interest due at that time on the notes and such other obligations before we make any payment or other distribution on account of any of our capital stock or obligations ranking junior to the notes.

If we violate the junior subordinated indenture by making a payment or distribution to holders of the notes before we have paid all the senior indebtedness in full, then such holders of the notes will have to pay or transfer the payments or distributions to the trustee in bankruptcy, receiver, liquidating trustee or other person distributing our assets for payment of the senior indebtedness.

Because of the subordination provisions, if we become insolvent, holders of senior indebtedness may receive more, ratably, and holders of the notes having a claim pursuant to those securities may receive less, ratably, than our other creditors. This type of subordination will not prevent an event of default from occurring under the junior subordinated indenture in connection with the notes.

The junior subordinated indenture places no limitation on the amount of senior indebtedness that we may incur. We expect from time to time to incur additional indebtedness and other obligations constituting senior indebtedness.

Denominations

The notes were issued only in registered form, without coupons, in denominations of \$25 each and integral multiples of \$25 in excess thereof. The notes are held in book-entry form only, as described under "—Book-Entry System", and are held in the name of DTC or its nominee.

Limitation on Mergers and Sales of Assets

The junior subordinated indenture generally permits a consolidation or merger between us and another entity. It also permits the conveyance, transfer or lease by us of all or substantially all of our property and assets. These transactions are permitted if:

- the resulting or acquiring entity, if other than us, is organized and existing under the laws of a domestic jurisdiction and expressly assumes by a supplemental indenture to the junior subordinated indenture the payment of all amounts due on the debt securities and performance of all the covenants in the junior subordinated indenture on our part to be performed or observed; and
- certain other conditions as prescribed in the junior subordinated indenture are met.

If we consolidate or merge with or into any other entity or convey, transfer or lease all or substantially all of our assets according to the terms and conditions of the junior subordinated indenture, the resulting or acquiring entity will be substituted for us in such junior subordinated indenture with the same effect as if it had been an original party to the junior subordinated indenture. As a result, such successor entity may exercise our rights and powers under the junior subordinated indenture, in our name and, except in the case of a lease of all or substantially all of our properties and assets, we will be released from all our liabilities and obligations under the junior subordinated indenture and under the notes.

Events of Default: Waiver and Notice

An "event of default" with respect to the notes shall occur only upon certain events of bankruptcy, insolvency or receivership involving us.

The junior subordinated indenture refers to breaches that are not "events of default" as "defaults". They include, among other things:

- the failure to pay interest, including compounded interest, in full on any notes for a period of 30 days after the conclusion of a five-year period following the commencement of any deferral period if such deferral period has not ended prior to the conclusion of such five-year period;
- the failure to pay principal of or premium, if any, on the notes when due; or
- the failure to comply with our covenants under the junior subordinated indenture.

A "default" also includes, for example, a failure to pay interest when due if we do not give a timely written notice of our election to commence or continue a deferral period. If we do not give a timely written notice of our election to commence or continue a deferral period and fail to pay interest when due, any holder of notes may seek to enforce our obligation to make the missed interest payment, including through legal process. However, there is no right of acceleration except upon the occurrence of an event of default as described above.

If we do give a timely written notice of our election to commence or continue a deferral period on any interest payment date (and, if such notice continues a deferral period, the deferral period has not continued for five years), then no "default" arises from our non-payment of interest on such interest payment date.

The junior subordinated indenture provides that the trustee must give holders notice of all defaults or events of default within 90 days after it becomes actually known to a responsible officer of the trustee. However, except in the case of a default in payment on the notes, the trustee will be protected in withholding the notice if its responsible officers determine that withholding of the notice is in the interest of such holders.

If an event of default under the junior subordinated indenture occurs, the entire principal amount of the notes will automatically become due and payable without any declaration or other action on the part of the trustee or any holder of the notes. There is no right of acceleration in the case of any payment default or other breaches of covenants under the junior subordinated indenture or the notes. Notwithstanding the foregoing, in the case of a default in the payment of principal of or interest on the notes including any compound interest (and, in the case of payment of deferred interest, such failure to pay shall have continued for 30 calendar days after the conclusion of the deferral period), the holder of a note may, or if directed by the holders of a majority in principal amount of the notes the trustee shall, subject to the conditions set forth in the junior subordinated indenture, demand payment of the amount then due and payable and may institute legal proceedings for the collection of such amount if we fail to make payment thereof upon demand.

The holders of a majority in aggregate principal amount of the outstanding notes may waive any past default, except:

- a default in payment of principal or interest; or
- a default under any provision of the junior subordinated indenture that itself cannot be modified or amended without the consent of the holders of all outstanding notes.

The holders of a majority in principal amount of the notes will have the right to direct the time, method and place of conducting any proceeding for any remedy available to the trustee, subject to the provisions of the junior subordinated indenture.

We are required to file an officers' certificate with the trustee each year that states, to the knowledge of the certifying officers, whether we have complied with all conditions and covenants under the terms of the junior subordinated indenture.

The trustee shall have no right or obligation under the junior subordinated indenture or otherwise to exercise any remedies on behalf of any holders of the notes pursuant to the junior subordinated indenture in connection with any "default", unless such remedies are available under the junior subordinated indenture and the trustee is directed to exercise such remedies by the holders of a majority in principal amount of the notes pursuant to and subject to the conditions of the junior subordinated indenture. In connection with any such exercise of remedies the trustee shall be entitled to the same immunities and protections and remedial rights (other than acceleration) as if such "default" were an "event of default".

Actions Not Restricted by Junior Subordinated Indenture

The junior subordinated indenture does not contain restrictions on our ability to:

- incur, assume or become liable for any type of debt or other obligation;
- create liens on our property for any purpose; or
- pay dividends or make distributions on our capital stock or purchase or redeem our capital stock, except as set forth under "—Dividend and Other Payment Stoppages During Deferral Periods and Under Certain Other Circumstances" above, or make debt payments on, or purchase, redeem or retire, any senior indebtedness.

The junior subordinated indenture does not require the maintenance of any financial ratios or specified levels of net worth or liquidity. In addition, the junior subordinated indenture does not contain any provisions that would require us to repurchase or redeem or modify the terms of any of the notes upon a change of control or other event involving us that may adversely affect the creditworthiness of the notes.

Modification of Junior Subordinated Indenture

Under the junior subordinated indenture, certain of our rights and obligations and certain of the rights of holders of the notes may be modified or amended with the consent of the holders of at least a majority of the aggregate principal amount of the outstanding notes. However, the following modifications and amendments, among others, will not be effective against any holder without its consent:

- a change in the stated maturity date of any payment of principal or interest (including any additional interest thereon);
- a change in the manner of calculating payments due on the notes in a manner adverse to holders of notes;
- a reduction in the requirements contained in the junior subordinated indenture for quorum or voting;
- a change in the place of payment for any payment on the notes that is adverse to holders of the notes or a change in the currency in which any payment on the notes is payable;
- an impairment of the right of any holder of notes to institute suit for the enforcement of payments on the notes; and
- a reduction in the percentage of outstanding notes required to consent to a modification or amendment of the junior subordinated indenture or required to consent to a waiver of compliance with certain provisions of the junior subordinated indenture or certain defaults under the junior subordinated indenture and their consequences.

Under the junior subordinated indenture, the holders of at least a majority of the aggregate principal amount of the outstanding notes may, on behalf of all holders of the notes, waive compliance by us with certain covenants or conditions contained in the junior subordinated indenture.

We and the trustee may execute, without the consent of any holder of notes, any supplemental indenture for the purposes of:

- evidencing the succession of another corporation to us, and the assumption by any such successor of our covenants contained in the junior subordinated indenture and the notes;
- adding or modifying covenants of us for the benefit of the holders of the notes or surrendering any of our rights or powers under the junior subordinated indenture (including surrendering our right to redeem the notes after the occurrence of a rating agency event); provided that such addition, modification or surrender may not add events of default or acceleration events with respect to the notes;
- evidencing and providing for the acceptance of appointment under the junior subordinated indenture by a successor trustee with respect to the notes;
- curing any ambiguity, correcting or supplementing any provision in the junior subordinated indenture that may be defective or inconsistent with any other
 provision therein or in any supplemental indenture or making any other provisions with respect to matters or questions arising under the junior
 subordinated indenture, provided that such provisions, as so changed, corrected or modified, shall not adversely affect the interests of the holders of the
 notes in any material respect; or

• making any changes to the junior subordinated indenture in order for the junior subordinated indenture to conform to the final prospectus supplement relating to the notes.

We will not enter into any supplemental indenture with the trustee to add any additional event of default with respect to the notes without the consent of the holders of at least a majority in aggregate principal amount of outstanding notes.

Book-Entry System

DTC, to which we refer along with its successors in this capacity as the depositary, will act as securities depositary for the notes. The notes will be issued only as fully registered securities registered in the name of Cede & Co. ("Cede"), the depositary's nominee. One or more fully registered global security certificates, representing the total aggregate principal amount of the notes, will be issued and will be deposited with the depositary or its custodian and will bear a legend regarding the restrictions on exchanges and registration of transfer of the global securities. So long as Cede, as the nominee of DTC, is the registered owner of any global security, Cede for all purposes will be considered the sole holder of that global security. Except as provided below, owners of beneficial interests in a global security will not be entitled to have certificates registered in their names, will not receive physical delivery of certificates in definitive form and will not be considered the holders thereof.

The laws of some jurisdictions may require that some purchasers of securities take physical delivery of securities in definitive form. These laws may impair the ability to transfer beneficial interests in the notes so long as the notes are represented by global security certificates.

Investors may elect to hold interests in the notes in global form through DTC in the United States or through Clearstream or Euroclear in Europe, if they are participants in those systems, or indirectly through organizations that are participants in those systems. Clearstream and Euroclear will hold interests on behalf of their participants through customers' securities accounts in Clearstream's and Euroclear's names on the books of their respective depositaries, which in turn will hold such interests in customers' securities accounts in the depositaries' names on the books of DTC.

Initial settlement for the notes will be made in immediately available funds. Secondary market trading between DTC participants will occur in the ordinary way in accordance with DTC rules and will be settled in immediately available funds. Secondary market trading between Clearstream participants and/or Euroclear participants will occur in the ordinary way in accordance with the applicable rules and operating procedures of Clearstream and the Euroclear System, as applicable.

Cross-market transfers between DTC, on the one hand, and directly or indirectly through Euroclear or Clearstream participants, on the other, will be effected in DTC in accordance with DTC rules on behalf of Euroclear or Clearstream, as the case may be, by its respective depositary; however, such cross-market transactions will require delivery of instructions to Euroclear or Clearstream, as the case may be, by the counterparty in such system in accordance with its rules and procedures and within its established deadlines.

Euroclear or Clearstream will, if the transaction meets its settlement requirements, deliver instructions to its respective depositary to take action to effect final settlement on its behalf by delivering or receiving beneficial interests in the relevant global security in DTC, and making or receiving payment in accordance with normal procedures for same-day funds settlement applicable to DTC. Euroclear participants and Clearstream participants may not deliver instructions directly to the depositaries for Euroclear or Clearstream.

Because of time zone differences, the securities account of a Euroclear participant or Clearstream participant purchasing a beneficial interest in a global security from a participant will be credited during the securities settlement processing day immediately following the DTC settlement date and such credit of any transactions in beneficial interests in such global security settled during such processing will be reported to the relevant Euroclear participant or Clearstream participant on that business day. Cash received in Euroclear or Clearstream as a result of sales of beneficial interests in a global security by or through a Euroclear participant or Clearstream participant to a participant will be received with value on the DTC settlement date but will be available in the relevant Euroclear or Clearstream cash account only as of the business day following settlement in DTC.

Neither we nor the trustee (or any registrar or paying agent) will have any responsibility for the performance by DTC, Euroclear or Clearstream or any of the participants, indirect participants, Euroclear participants or Clearstream participants of their respective obligations under the rules and procedures governing their operations. DTC has advised us that it will take any action permitted to be taken by a holder of notes only at the direction of one or more participants whose DTC accounts are credited with interests in a global security.

DTC has informed us that it is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing

corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds securities that DTC participants deposit with DTC. DTC also facilitates the post-trade settlement among DTC participants of sales and other securities transactions in deposited securities through electronic computerized book-entry transfers and pledges between DTC participants' accounts, thereby eliminating the need for physical movement of certificates. DTC participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Indirect access to the DTC system is also available to others such as banks, brokers and dealers, trust companies and clearing corporations that clear through or maintain a custodial relationship with a participant, either directly or indirectly. The rules applicable to DTC participants are on file with the SEC.

Purchases of notes under the DTC system must be made by or through DTC participants, which will receive a credit for the notes on DTC's records. The ownership interest of each actual purchaser of each note is in turn to be recorded on the participants' and indirect participants' records. Beneficial owners will not receive written confirmation from DTC of their purchase, but beneficial owners are expected to receive written confirmations providing details of the transactions, as well as periodic statements of their holdings, from the participant or indirect participant through which the beneficial owner entered into the transaction. Transfers of ownership interests in the notes are to be accomplished by entries made on the books of participants acting on behalf of beneficial owners. Beneficial owners will not receive certificates representing their ownership interests in notes, except in the limited circumstances described below in which a global security will become exchangeable for note certificates registered in the manner described below.

The deposit of notes with a custodian for DTC and their registration in the name of Cede effect no change in beneficial ownership. DTC has no knowledge of the actual beneficial owners of the notes; DTC's records reflect only the identity of the participants to whose accounts such notes are credited, which may or may not be the beneficial owners. The participants will remain responsible for keeping account of their holdings on behalf of their customers.

Principal and interest payments on the notes will be made to DTC by wire transfer of immediately available funds. DTC's practice is to credit participants' accounts on the payable date in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payment on the payable date. Payments by participants to beneficial owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name" and will be the responsibility of such participant and not of DTC or us, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to DTC is our responsibility, disbursement of those payments to participants will be the responsibility of DTC, and disbursement of those payments to the beneficial owners will be the responsibility of participants and indirect participants. Neither we nor the trustee (or any registrar or paying agent) will have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in the global securities or for maintaining, supervising or reviewing any records relating to those beneficial ownership interests. The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that we believe to be accurate, but we assume no responsibility for the accuracy thereof.

DTC may discontinue providing its services as securities depositary with respect to the notes at any time by giving reasonable notice to us.

The global security will terminate and interests in it will be exchanged for physical certificates representing the notes only in the following situations:

- DTC or any successor depositary notifies us that it is unwilling or unable to continue as depositary for global securities or ceases to be a "clearing agency" registered under the Exchange Act and we notify the trustee that we are unable to locate a qualified successor;
- · an event of default under the notes has occurred and is continuing, or
- we, in our sole discretion and subject to the procedures of the depositary, determine that any or all of the notes will no longer be represented by global securities.

In those situations, the notes represented by a global security that is exchangeable pursuant to this paragraph will be exchangeable for note certificates registered in the names directed by the depositary, with the same terms and in authorized denominations. We expect that these instructions will be based upon directions received by the depositary from its participants with respect to ownership of beneficial interests in the global security certificates.

Governing Law

The junior subordinated indenture and the notes are governed by, and construed in accordance with, the laws of the State of New York, without regard to its principles of conflicts of laws.

The Trustee

The trustee will have all of the duties and responsibilities specified under the Trust Indenture Act. Other than its duties in a case of default, the trustee is under no obligation to exercise any of the powers under the junior subordinated indenture at the request, order or direction of any holders of notes unless offered reasonable indemnification.

Miscellaneous

We or our affiliates may from time to time purchase any of the notes that are then outstanding by tender, in the open market or by private agreement.

Description of 5.70% Junior Subordinated Notes

The following is a description of the material terms of Prudential Financial, Inc.'s (the "Company", "Prudential Financial, Inc.", "Prudential Financial", "we", "us" or "our") 5.70% junior subordinated notes due 2053 and the junior subordinated indenture. It does not purport to be complete in all respects. This description is subject to and qualified in its entirety by reference to the junior subordinated indenture filed as Exhibit 4.1 to the Company's Current Report on Form 8-K filed June 17, 2008, the eighth supplemental indenture filed as Exhibit 4.2 to the Company's Current Report on Form 8-K filed March 14, 2013 and the form of notes included in the supplemental indenture.

The notes were issued pursuant to the subordinated debt indenture, dated as of June 17, 2008, between us and The Bank of New York Mellon (formerly known as The Bank of New York), as trustee. We refer to the subordinated debt indenture, as amended and supplemented by an eighth supplemental indenture, dated as of March 14, 2013, as the "*junior subordinated indenture*", and to The Bank of New York Mellon or its successor, as trustee, as the "*trustee*". You should read the junior subordinated indenture for provisions that may be important to you.

When we use the term "holder" with respect to registered notes, we mean the person in whose name such note is registered in the security register. We expect that the notes will be held in book-entry form only, as described below under "—Book-Entry System", and will be held in the name of DTC or its nominee.

The junior subordinated indenture does not limit the amount of debt that we or our subsidiaries may incur under the junior subordinated indenture or under other indentures to which we are or become a party or otherwise. The notes are not convertible into or exchangeable for shares of our common stock, our authorized preferred stock or any other securities.

General

We initially issued \$710 million aggregate principal amount of notes. We may, without the consent of holders of the notes, increase the principal amount of the notes by issuing additional notes in the future on the same terms and conditions as the initial notes, except for any difference in the issue date, public offering price, interest accrued prior to the issue date of the additional notes and first interest payment date, and with the same CUSIP number as the initial notes, so long as such additional notes are fungible for U.S. federal income tax purposes with the initial notes. The initial notes and any such additional notes would rank equally and ratably in right of payment and would be treated as a single series of junior subordinated debt securities for all purposes under the junior subordinated indenture.

The notes will mature on March 15, 2053 (the "maturity date"). If that day is not a business day, payment of principal and interest will be postponed to the next business day and no interest will accrue as a result of that postponement. The notes will be subordinated and junior in right of payment to all of our senior indebtedness, as defined under "—Subordination" below, and pari passu with our pari passu securities.

The Bank of New York Mellon will initially serve as paying agent for the notes.

Interest Rate and Interest Payment Dates

From and including March 14, 2013 to but excluding the maturity date or any earlier redemption date, the notes will bear interest at the annual rate of 5.70%, and we will pay accrued interest quarterly in arrears on March 15, June 15, September 15 and December 15 of each year, beginning on June 15, 2013, subject to our rights and obligations under "—Option to Defer Interest Payments". Interest payments will be made to the persons or entities in whose names the notes are registered at the close of business on March 1, June 1, September 1 or December 1 (whether or not a business day), as the case may be, immediately preceding the relevant interest payment date. The amount of interest payable will be computed on the basis of a 360-day year consisting of twelve 30-day months. In the event that any interest payment date falls on a day that is not a business day, the interest payment due on that date will be postponed to the next day that is a business day, and no additional interest will accrue as a result of that postponement.

"Business day" means any day other than (i) a Saturday or Sunday, (ii) a day on which banking institutions in The City of New York are authorized or required by law or executive order to remain closed or (iii) a day on which the corporate trust office of the trustee is closed for business.

Option to Defer Interest Payments

So long as no event of default with respect to the notes has occurred and is continuing, we may elect at one or more times to defer payment of interest on the notes for one or more consecutive interest periods that do not exceed five years. We may not defer interest beyond the maturity date, any earlier accelerated maturity date arising from an event of default (which, under the

junior subordinated indenture, is limited to certain events of bankruptcy, insolvency or receivership involving us) or any other earlier redemption of the notes.

During a deferral period, interest will continue to accrue on the notes, and deferred interest on the notes will bear additional interest at the annual rate of 5.70%, compounded on each interest payment date, subject to applicable law. A "deferral period" refers to the period beginning on an interest payment date with respect to which we defer interest and ending on the earlier of (i) the fifth anniversary of that interest payment date and (ii) the next interest payment date on which we have paid all deferred and unpaid amounts (including compounded interest on such deferred amounts) and all other accrued interest on the notes. When we use the term "interest", we are referring not only to regularly scheduled interest payments but also to interest on interest payments not paid on the applicable interest payment date.

At the end of five years following the commencement of a deferral period, we must pay all accrued and unpaid deferred interest, including compounded interest. If we have paid all deferred interest (including compounded interest thereon) on the notes, we can again defer interest payments on the notes as described above.

We will give the holders of the notes and the trustee written notice of our election to commence or continue a deferral period at least one and not more than 60 business days before the next interest payment date.

We have no present intention to defer interest payments.

Dividend and Other Payment Stoppages During Deferral Periods and Under Certain Other Circumstances

We agree in the junior subordinated indenture that, so long as any notes remain outstanding, if

- we have given notice of our election to defer interest payments on the notes but the related deferral period has not yet commenced, or
- · a deferral period is continuing;

then we will not, nor will we permit our subsidiaries to:

- declare or pay any dividends or distributions on, or redeem, purchase, acquire or make a liquidation payment with respect to, any shares of our capital stock:
- make any payment of principal of, or interest or premium, if any, on, or repay, purchase or redeem any of our debt securities that rank upon our liquidation on a parity with or junior to the notes; or
- make any guarantee payments regarding any guarantee issued by us of securities of any of our subsidiaries if the guarantee ranks upon our liquidation on a
 parity with or junior to the notes.

The restrictions listed above do not apply to:

- any purchase, redemption or other acquisition of shares of our capital stock in connection with:
 - any employment contract, benefit plan or other similar arrangement with or for the benefit of any one or more employees, officers, directors, consultants or independent contractors;
 - the satisfaction of our obligations pursuant to any contract entered into prior to the beginning of the applicable deferral period;
 - a dividend reinvestment or shareholder purchase plan; or
 - the issuance of our capital stock, or securities convertible into or exercisable for such capital stock, as consideration in an acquisition transaction, the definitive agreement for which is entered into prior to the applicable deferral period;
- any exchange, redemption or conversion of any class or series of our capital stock, or the capital stock of one of our subsidiaries, for any other class or series of our capital stock, or of any class or series of our capital stock;
- any purchase of fractional interests in shares of our capital stock pursuant to the conversion or exchange provisions of such capital stock or the securities being converted or exchanged;
- any declaration of a dividend in connection with any shareholder rights plan, or the issuance of rights, stock or other property under any shareholder rights plan, or the redemption or purchase of rights pursuant thereto;
- any dividend in the form of stock, warrants, options or other rights where the dividend stock or stock issuable upon exercise of such warrants, options or other rights is the same stock as that on which the dividend is being paid or ranks equally with or junior to such stock; or

• (i) any payment of current or deferred interest on parity securities that is made pro rata to the amounts due on such parity securities (including the notes) and (ii) any payment of principal or current or deferred interest on parity securities that, if not made, would cause us to breach the terms of the instrument governing such parity securities.

For the avoidance of doubt, no terms of the notes will restrict in any manner the ability of any of our subsidiaries to pay dividends or make any distributions to us or to any of our other subsidiaries.

Redemption

The notes are redeemable at our election on or after March 15, 2018 or within 90 days after the occurrence of certain events prior to March 15, 2018, in each case at the applicable redemption price set forth below and are not subject to any sinking fund or similar provisions.

We may redeem the notes:

- in whole at any time or in part from time to time on or after March 15, 2018 at a redemption price equal to their principal amount plus accrued and unpaid interest to but excluding the date of redemption; *provided* that if the notes are not redeemed in whole, at least \$25 million aggregate principal amount of the notes, excluding any notes held by us or any of our affiliates, must remain outstanding after giving effect to such redemption; or
- in whole, but not in part, at any time prior to March 15, 2018, within 90 days after the occurrence of a "tax event", a "rating agency event" or a "regulatory capital event" at a redemption price equal to (i) in the case of a "tax event" or "rating agency event", their principal amount or, if greater, a make-whole redemption price, in each case plus accrued and unpaid interest to but excluding the date of redemption or (ii) in the case of a "regulatory capital event", their principal amount plus accrued and unpaid interest to but excluding the date of redemption.

For the purposes of clause (i) in the preceding paragraph:

- "make-whole redemption price" means, with respect to a redemption of the notes in whole prior to March 15, 2018, the present value of a principal payment on March 15, 2018 and scheduled payments of interest that would have accrued from the redemption date to March 15, 2018 on the notes being redeemed (excluding any accrued and unpaid interest for the period prior to the redemption date), discounted to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at a discount rate equal to the treasury rate (as such make-whole redemption price shall be determined and provided to the Company by the treasury dealer) plus 0.40%;
- "treasury rate" means the semi-annual equivalent yield to maturity of the "treasury security" that corresponds to the "treasury price" (calculated in accordance with standard market practice and computed by the treasury dealer as of the second trading day preceding the redemption date);
- "treasury security" means the United States Treasury security that the "treasury dealer" determines would be appropriate to use, at the time of determination and in accordance with standard market practice, in pricing the notes being redeemed in a tender offer based on a spread to United States Treasury yields;
- "treasury price" means the bid-side price for the treasury security as of the third trading day preceding the redemption date, as set forth in the Wall Street Journal in the table entitled "Treasury Bonds, Notes and Bills", except that: (i) if that table (or any successor table) is not published or does not contain that price information on that trading day, or (ii) if the treasury dealer determines that the price information is not reasonably reflective of the actual bid-side price of the treasury security prevailing at 3:30 p.m., New York City time, on that trading day, then treasury price will instead mean the bid-side price for the treasury security at or around 3:30 p.m., New York City time, on that trading day (expressed on a next trading day settlement basis) as determined by the treasury dealer through such alternative means as are commercially reasonable under the circumstances; and
- "treasury dealer" means one of Wells Fargo Securities, LLC, Citigroup Global Markets Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated, Morgan Stanley & Co. LLC and UBS Securities LLC (or their successors), as selected by us, or if all of the foregoing refuse to act as treasury dealers for this purpose or cease to be primary U.S. Government securities dealers, another nationally recognized investment banking firm that is a primary U.S. Government securities dealer specified by us for these purposes.

"Tax event" means the receipt by us of an opinion of independent counsel experienced in such matters to the effect that, as a result of any:

• amendment to or change (including any officially announced proposed change) in the laws or regulations of the United States or any political subdivision or taxing authority of or in the United States that is enacted or effective on or after the initial issuance of the notes;

- official administrative decision or judicial decision or administrative action or other official pronouncement (including a private letter ruling, technical advice memorandum or other similar pronouncement) by any court, government agency or regulatory authority that reflects an amendment to, or change in, the interpretation or application of those laws or regulations that is announced on or after the initial issuance of the notes; or
- threatened challenge asserted in connection with an audit of us, or a threatened challenge asserted in writing against any taxpayer that has raised capital through the issuance of securities that are substantially similar to the notes, which challenge is asserted against us or becomes publicly known on or after the initial issuance of the notes;

there is more than an insubstantial increase in the risk that interest payable by us on the notes is not, or within 90 days of the date of such opinion will not be, deductible by us, in whole or in part, for U.S. federal income tax purposes.

"Rating agency event" means that any nationally recognized statistical rating organization within the meaning of Section 3(a)(62) under the Exchange Act that then publishes a rating for us (a "rating agency") amends, clarifies or changes the criteria it uses to assign equity credit to securities such as the notes, which amendment, clarification or change results in:

- the shortening of the length of time the notes are assigned a particular level of equity credit by that rating agency as compared to the length of time they would have been assigned that level of equity credit by that rating agency or its predecessor on the initial issuance of the notes; or
- the lowering of the equity credit (including up to a lesser amount) assigned to the notes by that rating agency as compared to the equity credit assigned by that rating agency or its predecessor on the initial issuance of the notes.

"Regulatory capital event" means that, if (a) we are or will be considered to be a systemically important nonbank financial company (a "nonbank SIFI") or are or will be otherwise subject to capital adequacy supervision by a capital regulator and (b) the capital adequacy guidelines that apply or will apply to us as a nonbank SIFI or as a result of such other capital adequacy supervision ("future federal capital adequacy guidelines"), set forth criteria for qualifying "Tier 2 Capital" (or its equivalent), we make a good faith determination that, as a result of (i) any amendment to, or change in, the laws or regulations of the United States or any political subdivision of or in the United States that is enacted or becomes effective after the initial issuance of the notes; (ii) any proposed amendment to, or change in, those laws or regulations that is announced or becomes effective after the initial issuance of the notes; or (iii) any official administrative decision or judicial decision or administrative action or other official pronouncement interpreting or applying those laws or regulations that is announced after the initial issuance of the notes, such that, in any such case, there is more than an insubstantial risk that the full principal amount of the notes outstanding from time to time would not qualify as "Tier 2 Capital" (or its equivalent) for purposes of the future federal capital adequacy guidelines, as in effect and/ or as proposed from time to time to which we are or will be subject, for as long as any notes are outstanding; provided that the proposal or adoption of any criterion set forth in the future federal capital adequacy guidelines applicable to bank holding companies as of the initial issuance of the notes or such guidelines as proposed in the June 2012 joint notice of proposed rulemaking to implement the capital provisions of the Basel Committee on Banking Supervision for U.S. banking institutions will not constitute a regulatory capital event.

Notice of any redemption will be mailed at least 30 days but not more than 60 days before the redemption date to each holder of notes to be redeemed at its registered address. Unless we default in payment of the redemption price and accrued interest, on and after the redemption date, interest will cease to accrue on the notes or portions thereof called for redemption.

We may not redeem the notes in part unless all accrued and unpaid interest, including deferred interest, has been paid in full on all outstanding notes for all interest periods terminating on or before the redemption date.

In the event of any redemption, neither we nor the trustee will be required to:

- issue, register the transfer of, or exchange, notes during a period beginning at the opening of business 15 days before the day of selection for redemption of notes and ending at the close of business on the day of mailing of notice of redemption; or
- transfer or exchange any notes so selected for redemption, except, in the case of any notes being redeemed in part, any portion thereof not to be redeemed.

In the event the notes are treated as "Tier 2 capital" (or its equivalent) under the capital guidelines of the capital regulator applicable to Prudential Financial, Inc., any redemption of notes will be subject to our receipt of any required prior approval from the capital regulator and to the satisfaction of any conditions set forth in those capital guidelines or any other applicable regulations of the capital regulator to our redemption of the notes.

Defeasance

The junior subordinated indenture provides that we will be deemed to have paid and discharged the entire indebtedness represented by the notes ("defeasance"), if:

- we have irrevocably deposited or caused to be irrevocably deposited with the trustee as trust funds in trust, specifically pledged as security for, and dedicated solely to, the benefit of the holders (i) cash or (ii) U.S. government obligations, maturing as to principal and interest at such times and in such amounts as will insure the availability of cash or (iii) a combination thereof, sufficient, without reinvestment, in the opinion of a nationally recognized firm of independent public accountants expressed in a written certification thereof delivered to the trustee, to pay and discharge (a) the principal (and premium, if any) and interest on the notes and (b) any mandatory sinking fund payments or analogous payments applicable to the notes on the due dates thereof;
- such deposit will not result in a breach or violation of, or constitute a default under, any agreement or instrument to which we are a party or by which we are bound:
- we have delivered to the trustee an opinion of independent legal counsel satisfactory to the trustee confirming that (i) we have received from, or there has been published by, the IRS a ruling or (ii) since the issue date of the notes, there has been a change in the applicable U.S. federal income tax law, in either case to the effect that holders will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such deposit, defeasance and discharge and will be subject to U.S. federal income tax on the same amount and in the same manner and at the same times, as would have been the case if such deposit, defeasance and discharge had not occurred;
- no event of default or event which with notice or lapse of time or both would become an event of default with respect to the notes shall have occurred and be continuing on the date of such deposit;
- such defeasance shall not cause the trustee to have a conflicting interest with respect to any of our securities or result in the trust arising from such deposit to constitute, unless it is qualified as, a regulated investment company under the Investment Company Act of 1940, as amended;
- we have delivered to the trustee an opinion of counsel substantially to the effect that the trust funds deposited will not be subject to any rights of holders of senior indebtedness, and after the 90th day following the deposit, the trust funds will not be subject to the effect of any applicable bankruptcy, insolvency, reorganization or similar laws affecting creditors' rights generally; and
- we have delivered to the trustee an officers' certificate and an opinion of counsel, each stating that all conditions precedent provided for relating to the defeasance have been complied with.

Subordination

The payment of the principal of and interest on the notes is expressly subordinated, to the extent and in the manner set forth in the junior subordinated indenture, in right of payment and upon liquidation to the prior payment in full of all of our senior indebtedness.

Subject to the qualifications described below, the term "senior indebtedness" is defined in the junior subordinated indenture to include principal of, premium (if any) and interest on and any other payment due pursuant to any of the following:

- all of our obligations (other than obligations pursuant to the junior subordinated indenture and the notes) for money borrowed;
- all of our obligations evidenced by securities, notes (other than the notes described herein), debentures, bonds or other similar instruments, including obligations incurred in connection with the acquisition of property, assets or businesses;
- all of our capital lease obligations;
- all of our reimbursement obligations with respect to letters of credit, bankers' acceptances or similar facilities issued for our account;
- all of our obligations issued or assumed as the deferred purchase price of property or services, including all obligations under master lease transactions
 pursuant to which we or any of our subsidiaries have agreed to be treated as owner of the subject property for U.S. federal income tax purposes;
- all of our payment obligations under interest rate swap or similar agreements or foreign currency hedge, exchange or similar agreements at the time of
 determination, including any such obligations we incurred solely to act as a hedge against increases in interest rates that may occur under the terms of other
 outstanding variable or floating rate indebtedness of ours; and
- all obligations of the types referred to in the preceding bullet points of another person and all dividends of another person the payment of which, in either
 case, we have assumed or guaranteed or for which we are responsible or liable, directly or indirectly, jointly or severally, as obligor, guarantor or
 otherwise.

The notes will rank senior to all of our equity securities and pari passu with our pari passu securities.

The senior indebtedness will continue to be senior indebtedness and entitled to the benefits of the subordination provisions irrespective of any amendment, modification or waiver of any term of the senior indebtedness or extension or

renewal of the senior indebtedness. Notwithstanding anything to the contrary in the foregoing, senior indebtedness will not include (1) obligations to trade creditors created or assumed by us in the ordinary course of business, (2) indebtedness that is by its terms subordinate, or not superior, in right of payment to the notes or (3) our *pari passu* securities.

As of December 31, 2019, our short- and long-term debt owed to third parties ranking senior to the notes upon liquidation, on an unconsolidated basis, totaled approximately \$11.3 billion. In addition, as of December 31, 2019, our short- and long-term debt owed to subsidiaries ranking senior to the notes upon liquidation totaled approximately \$5.9 billion. All liabilities of our subsidiaries are effectively senior to the notes to the extent of the assets of such subsidiaries. As of December 31, 2019, our subsidiaries had total liabilities of approximately \$814 billion (including policyholders' account balance liability and reserves for future policy benefits and claims of approximately \$446 billion). In addition, our subordinated guarantee covering the commercial paper program of one of our subsidiaries constitutes senior indebtedness. As of December 31, 2019, there was \$549 million outstanding under this commercial paper program.

If either of the following circumstances exist, we will first pay all senior indebtedness, including any interest accrued after such events occur, in full before we make any payment or distribution, whether in cash, securities or other property, on account of the principal of or interest on the notes:

- in the event of any insolvency or bankruptcy proceedings, or any receivership, liquidation, reorganization, assignment for creditors or other similar proceedings or events involving us or our assets; or
- (a) in the event and during the continuation of any default in the payment of principal, premium, if any, or interest on any senior indebtedness beyond any applicable grace period, (b) in the event that any event of default with respect to any senior indebtedness has occurred and is continuing, permitting the direct holders of that senior indebtedness (or a trustee) to accelerate the maturity of that senior indebtedness, whether or not the maturity is in fact accelerated (unless, in the case of either (a) or (b), the payment default or event of default has been cured or waived or ceased to exist and any related acceleration has been rescinded), or (c) in the event that any judicial proceeding is pending with respect to a payment default or event of default described in (a) or (b).

In such events, we will pay or deliver directly to the holders of senior indebtedness any payment or distribution otherwise payable or deliverable to holders of the notes. We will make the payments to the holders of senior indebtedness according to priorities existing among those holders until we have paid all senior indebtedness, including accrued interest, in full.

If such events of insolvency or bankruptcy proceedings, or any receivership, liquidation, reorganization, assignment for creditors or other similar proceedings or events involving us or our assets as described in the first bullet above occur, after we have paid in full all amounts owed on senior indebtedness, the holders of notes together with the holders of any of our other *pari passu* securities will be entitled to receive from our remaining assets any principal, premium or interest due at that time on the notes and such other obligations before we make any payment or other distribution on account of any of our capital stock or obligations ranking junior to the notes.

If we violate the junior subordinated indenture by making a payment or distribution to holders of the notes before we have paid all the senior indebtedness in full, then such holders of the notes will have to pay or transfer the payments or distributions to the trustee in bankruptcy, receiver, liquidating trustee or other person distributing our assets for payment of the senior indebtedness.

Because of the subordination provisions, if we become insolvent, holders of senior indebtedness may receive more, ratably, and holders of the notes having a claim pursuant to those securities may receive less, ratably, than our other creditors. This type of subordination will not prevent an event of default from occurring under the junior subordinated indenture in connection with the notes.

The junior subordinated indenture places no limitation on the amount of senior indebtedness that we may incur. We expect from time to time to incur additional indebtedness and other obligations constituting senior indebtedness.

Denominations

The notes were issued only in registered form, without coupons, in denominations of \$25 each and integral multiples of \$25 in excess thereof. The notes are held in book-entry form only, as described under "—Book-Entry System", and are held in the name of DTC or its nominee.

Limitation on Mergers and Sales of Assets

The junior subordinated indenture generally permits a consolidation or merger between us and another entity. It also permits the conveyance, transfer or lease by us of all or substantially all of our property and assets. These transactions are permitted if:

- the resulting or acquiring entity, if other than us, is organized and existing under the laws of a domestic jurisdiction and expressly assumes by a supplemental indenture to the junior subordinated indenture the payment of all amounts due on the debt securities and performance of all the covenants in the junior subordinated indenture on our part to be performed or observed; and
- certain other conditions as prescribed in the junior subordinated indenture are met.

If we consolidate or merge with or into any other entity or convey, transfer or lease all or substantially all of our assets according to the terms and conditions of the junior subordinated indenture, the resulting or acquiring entity will be substituted for us in the junior subordinated indenture with the same effect as if it had been an original party to the junior subordinated indenture. As a result, such successor entity may exercise our rights and powers under the junior subordinated indenture, in our name and, except in the case of a lease of all or substantially all of our properties and assets, we will be released from all our liabilities and obligations under the junior subordinated indenture and under the notes.

Events of Default: Waiver and Notice

An "event of default" with respect to the notes shall occur only upon certain events of bankruptcy, insolvency or receivership involving us.

The junior subordinated indenture refers to breaches that are not "events of default" as "defaults". They include, among other things:

- the failure to pay interest, including compounded interest, in full on any notes for a period of 30 days after the conclusion of a five-year period following the commencement of any deferral period if such deferral period has not ended prior to the conclusion of such five-year period;
- the failure to pay principal of or premium, if any, on the notes when due; or
- the failure to comply with our covenants under the junior subordinated indenture.

A "default" also includes, for example, a failure to pay interest when due if we do not give a timely written notice of our election to commence or continue a deferral period. If we do not give a timely written notice of our election to commence or continue a deferral period and fail to pay interest when due, any holder of notes may seek to enforce our obligation to make the missed interest payment, including through legal process. However, there is no right of acceleration except upon the occurrence of an event of default as described above.

If we do give a timely written notice of our election to commence or continue a deferral period on any interest payment date (and, if such notice continues a deferral period, the deferral period has not continued for five years), then no "default" arises from our non-payment of interest on such interest payment date.

The junior subordinated indenture provides that the trustee must give holders notice of all defaults or events of default within 90 days after it becomes actually known to a responsible officer of the trustee. However, except in the case of a default in payment on the notes, the trustee will be protected in withholding the notice if its responsible officers determine that withholding of the notice is in the interest of such holders.

If an event of default under the junior subordinated indenture occurs, the entire principal amount of the notes will automatically become due and payable without any declaration or other action on the part of the trustee or any holder of the notes. There is no right of acceleration in the case of any payment default or other breaches of covenants under the junior subordinated indenture or the notes. Notwithstanding the foregoing, in the case of a default in the payment of principal of or interest on the notes including any compound interest (and, in the case of payment of deferred interest, such failure to pay shall have continued for 30 calendar days after the conclusion of the deferral period), the holder of a note may, or if directed by the holders of a majority in principal amount of the notes the trustee shall, subject to the conditions set forth in the junior subordinated indenture, demand payment of the amount then due and payable and may institute legal proceedings for the collection of such amount if we fail to make payment thereof upon demand.

The holders of a majority in aggregate principal amount of the outstanding notes may waive any past default, except:

- a default in payment of principal or interest; or
- a default under any provision of the junior subordinated indenture that itself cannot be modified or amended without the consent of the holders of all outstanding notes.

The holders of a majority in principal amount of the notes will have the right to direct the time, method and place of conducting any proceeding for any remedy available to the trustee, subject to the provisions of the junior subordinated indenture.

We are required to file an officers' certificate with the trustee each year that states, to the knowledge of the certifying officers, whether we have complied with all conditions and covenants under the terms of the junior subordinated indenture.

The trustee shall have no right or obligation under the junior subordinated indenture or otherwise to exercise any remedies on behalf of any holders of the notes pursuant to the junior subordinated indenture in connection with any "default", unless such remedies are available under the junior subordinated indenture and the trustee is directed to exercise such remedies by the holders of a majority in principal amount of the notes pursuant to and subject to the conditions of the junior subordinated indenture. In connection with any such exercise of remedies the trustee shall be entitled to the same immunities and protections and remedial rights (other than acceleration) as if such "default" were an "event of default".

Actions Not Restricted by Junior Subordinated Indenture

The junior subordinated indenture does not contain restrictions on our ability to:

- incur, assume or become liable for any type of debt or other obligation;
- create liens on our property for any purpose; or
- pay dividends or make distributions on our capital stock or purchase or redeem our capital stock, except as set forth under "—Dividend and Other Payment Stoppages During Deferral Periods and Under Certain Other Circumstances" above, or make debt payments on, or purchase, redeem or retire, any senior indebtedness.

The junior subordinated indenture does not require the maintenance of any financial ratios or specified levels of net worth or liquidity. In addition, the junior subordinated indenture does not contain any provisions that would require us to repurchase or redeem or modify the terms of any of the notes upon a change of control or other event involving us that may adversely affect the creditworthiness of the notes.

Modification of Junior Subordinated Indenture

Under the junior subordinated indenture, certain of our rights and obligations and certain of the rights of holders of the notes may be modified or amended with the consent of the holders of at least a majority of the aggregate principal amount of the outstanding notes. However, the following modifications and amendments, among others, will not be effective against any holder without its consent:

- a change in the stated maturity date of any payment of principal or interest (including any additional interest thereon);
- a change in the manner of calculating payments due on the notes in a manner adverse to holders of notes;
- a reduction in the requirements contained in the junior subordinated indenture for quorum or voting;
- a change in the place of payment for any payment on the notes that is adverse to holders of the notes or a change in the currency in which any payment on the notes is payable;
- an impairment of the right of any holder of notes to institute suit for the enforcement of payments on the notes; and
- a reduction in the percentage of outstanding notes required to consent to a modification or amendment of the junior subordinated indenture or required to consent to a waiver of compliance with certain provisions of the junior subordinated indenture or certain defaults under the junior subordinated indenture and their consequences.

Under the junior subordinated indenture, the holders of at least a majority of the aggregate principal amount of the outstanding notes may, on behalf of all holders of the notes, waive compliance by us with certain covenants or conditions contained in the junior subordinated indenture.

We and the trustee may execute, without the consent of any holder of notes, any supplemental indenture for the purposes of:

- evidencing the succession of another corporation to us, and the assumption by any such successor of our covenants contained in the junior subordinated indenture and the notes;
- adding or modifying covenants of us for the benefit of the holders of the notes or surrendering any of our rights or powers under the junior subordinated indenture (including surrendering our right to redeem the notes after the occurrence of a rating agency event); provided that such addition, modification or surrender may not add events of default or acceleration events with respect to the notes;
- evidencing and providing for the acceptance of appointment under the junior subordinated indenture by a successor trustee with respect to the notes;
- curing any ambiguity, correcting or supplementing any provision in the junior subordinated indenture that may be defective or inconsistent with any other
 provision therein or in any supplemental indenture or making any other provisions with respect to matters or questions arising under the junior
 subordinated indenture, provided that such provisions, as so changed, corrected or modified, shall not adversely affect the interests of the holders of the
 notes in any material respect; or

• making any changes to the junior subordinated indenture in order for the junior subordinated indenture to conform to the final prospectus supplement relating to the notes.

We will not enter into any supplemental indenture with the trustee to add any additional event of default with respect to the notes without the consent of the holders of at least a majority in aggregate principal amount of outstanding notes.

Book-Entry System

DTC, to which we refer along with its successors in this capacity as the depositary, will act as securities depositary for the notes. The notes will be issued only as fully registered securities registered in the name of Cede & Co. ("Cede"), the depositary's nominee. One or more fully registered global security certificates, representing the total aggregate principal amount of the notes, will be issued and will be deposited with the depositary or its custodian and will bear a legend regarding the restrictions on exchanges and registration of transfer of the global securities. So long as Cede, as the nominee of DTC, is the registered owner of any global security, Cede for all purposes will be considered the sole holder of that global security. Except as provided below, owners of beneficial interests in a global security will not be entitled to have certificates registered in their names, will not receive physical delivery of certificates in definitive form and will not be considered the holders thereof.

The laws of some jurisdictions may require that some purchasers of securities take physical delivery of securities in definitive form. These laws may impair the ability to transfer beneficial interests in the notes so long as the notes are represented by global security certificates.

Investors may elect to hold interests in the notes in global form through DTC in the United States or through Clearstream or Euroclear in Europe, if they are participants in those systems, or indirectly through organizations that are participants in those systems. Clearstream and Euroclear will hold interests on behalf of their participants through customers' securities accounts in Clearstream's and Euroclear's names on the books of their respective depositaries, which in turn will hold such interests in customers' securities accounts in the depositaries' names on the books of DTC.

Initial settlement for the notes will be made in immediately available funds. Secondary market trading between DTC participants will occur in the ordinary way in accordance with DTC rules and will be settled in immediately available funds. Secondary market trading between Clearstream participants and/or Euroclear participants will occur in the ordinary way in accordance with the applicable rules and operating procedures of Clearstream and the Euroclear System, as applicable.

Cross-market transfers between DTC, on the one hand, and directly or indirectly through Euroclear or Clearstream participants, on the other, will be effected in DTC in accordance with DTC rules on behalf of Euroclear or Clearstream, as the case may be, by its respective depositary; however, such cross-market transactions will require delivery of instructions to Euroclear or Clearstream, as the case may be, by the counterparty in such system in accordance with its rules and procedures and within its established deadlines. Euroclear or Clearstream will, if the transaction meets its settlement requirements, deliver instructions to its respective depositary to take action to effect final settlement on its behalf by delivering or receiving beneficial interests in the relevant global security in DTC, and making or receiving payment in accordance with normal procedures for same-day funds settlement applicable to DTC. Euroclear participants and Clearstream participants may not deliver instructions directly to the depositaries for Euroclear or Clearstream.

Because of time zone differences, the securities account of a Euroclear participant or Clearstream participant purchasing a beneficial interest in a global security from a participant will be credited during the securities settlement processing day immediately following the DTC settlement date and such credit of any transactions in beneficial interests in such global security settled during such processing will be reported to the relevant Euroclear participant or Clearstream participant on that business day. Cash received in Euroclear or Clearstream as a result of sales of beneficial interests in a global security by or through a Euroclear participant or Clearstream participant to a participant will be received with value on the DTC settlement date but will be available in the relevant Euroclear or Clearstream cash account only as of the business day following settlement in DTC.

Neither we nor the trustee (or any registrar or paying agent) will have any responsibility for the performance by DTC, Euroclear or Clearstream or any of the participants, indirect participants, Euroclear participants or Clearstream participants of their respective obligations under the rules and procedures governing their operations. DTC has advised us that it will take any action permitted to be taken by a holder of notes only at the direction of one or more participants whose DTC accounts are credited with interests in a global security.

DTC has informed us that it is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds securities that DTC participants deposit with DTC. DTC also

facilitates the post-trade settlement among DTC participants of sales and other securities transactions in deposited securities through electronic computerized bookentry transfers and pledges between DTC participants' accounts, thereby eliminating the need for physical movement of certificates. DTC participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Indirect access to the DTC system is also available to others such as banks, brokers and dealers, trust companies and clearing corporations that clear through or maintain a custodial relationship with a participant, either directly or indirectly. The rules applicable to DTC participants are on file with the SEC.

Purchases of notes under the DTC system must be made by or through DTC participants, which will receive a credit for the notes on DTC's records. The ownership interest of each actual purchaser of each note is in turn to be recorded on the participants' and indirect participants' records. Beneficial owners will not receive written confirmation from DTC of their purchase, but beneficial owners are expected to receive written confirmations providing details of the transactions, as well as periodic statements of their holdings, from the participant or indirect participant through which the beneficial owner entered into the transaction. Transfers of ownership interests in the notes are to be accomplished by entries made on the books of participants acting on behalf of beneficial owners. Beneficial owners will not receive certificates representing their ownership interests in notes, except in the limited circumstances described below in which a global security will become exchangeable for note certificates registered in the manner described below.

The deposit of notes with a custodian for DTC and their registration in the name of Cede effect no change in beneficial ownership. DTC has no knowledge of the actual beneficial owners of the notes; DTC's records reflect only the identity of the participants to whose accounts such notes are credited, which may or may not be the beneficial owners. The participants will remain responsible for keeping account of their holdings on behalf of their customers.

Principal and interest payments on the notes will be made to DTC by wire transfer of immediately available funds. DTC's practice is to credit participants' accounts on the payable date in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payment on the payable date. Payments by participants to beneficial owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name" and will be the responsibility of such participant and not of DTC or us, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to DTC is our responsibility, disbursement of those payments to participants will be the responsibility of DTC, and disbursement of those payments to the beneficial owners will be the responsibility of participants and indirect participants. Neither we nor the trustee (or any registrar or paying agent) will have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in the global securities or for maintaining, supervising or reviewing any records relating to those beneficial ownership interests. The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that we believe to be accurate, but we assume no responsibility for the accuracy thereof.

DTC may discontinue providing its services as securities depositary with respect to the notes at any time by giving reasonable notice to us.

The global security will terminate and interests in it will be exchanged for physical certificates representing the notes only in the following situations:

- DTC or any successor depositary notifies us that it is unwilling or unable to continue as depositary for global securities or ceases to be a "clearing agency" registered under the Exchange Act and we notify the trustee that we are unable to locate a qualified successor;
- an event of default under the notes has occurred and is continuing, or
- we, in our sole discretion and subject to the procedures of the depositary, determine that any or all of the notes will no longer be represented by global securities.

In those situations, the notes represented by a global security that is exchangeable pursuant to this paragraph will be exchangeable for note certificates registered in the names directed by the depositary, with the same terms and in authorized denominations. We expect that these instructions will be based upon directions received by the depositary from its participants with respect to ownership of beneficial interests in the global security certificates.

Governing Law

The junior subordinated indenture and the notes are governed by, and construed in accordance with, the laws of the State of New York, without regard to its principles of conflicts of laws.

The Trustee

The trustee will have all of the duties and responsibilities specified under the Trust Indenture Act. Other than its duties in a case of default, the trustee is under no obligation to exercise any of the powers under the junior subordinated indenture at the request, order or direction of any holders of notes unless offered reasonable indemnification.

Miscellaneous

We or our affiliates may from time to time purchase any of the notes that are then outstanding by tender, in the open market or by private agreement.

Description of 5.625% Junior Subordinated Notes

The following is a description of the material terms of Prudential Financial, Inc.'s (the "Company", "Prudential Financial, Inc.", "Prudential Financial", "we", "us" or "our") 5.625% junior subordinated notes due 2058 and the junior subordinated indenture. It does not purport to be complete in all respects. This description is subject to and qualified in its entirety by reference to the junior subordinated indenture filed as Exhibit 4.1 to the Company's Current Report on Form 8-K filed June 17, 2008, the eighth supplemental indenture filed as Exhibit 4.2 to the Company's Current Report on Form 8-K filed August 13, 2018 and the form of notes included in the supplemental indenture.

The notes were issued pursuant to the subordinated debt indenture, dated as of June 17, 2008, between us and The Bank of New York Mellon (formerly known as The Bank of New York), as trustee. We refer to the subordinated debt indenture, as amended and supplemented by a twelfth supplemental indenture, dated as of August 13, 2018, as the "junior subordinated indenture", and to The Bank of New York Mellon or its successor, as trustee, as the "trustee". You should read the junior subordinated indenture for provisions that may be important to you.

When we use the term "holder" with respect to registered notes, we mean the person in whose name such note is registered in the security register. We expect that the notes will be held in book-entry form only, as described below under "—Book-Entry System", and will be held in the name of DTC or its nominee.

The junior subordinated indenture does not limit the amount of debt that we or our subsidiaries may incur under the junior subordinated indenture or under other indentures to which we are or become a party or otherwise. The notes are not convertible into or exchangeable for shares of our common stock, our authorized preferred stock or any other securities.

General

We initially issued \$565 million aggregate principal amount of notes. We may, without the consent of holders of the notes, increase the principal amount of the notes by issuing additional notes in the future on the same terms and conditions as the initial notes in all respects, except for any difference in the issue date, public offering price, interest accrued prior to the issue date of the additional notes and first interest payment date, and with the same CUSIP number as the initial notes, so long as such additional notes are fungible for U.S. federal income tax purposes with the initial notes. The initial notes and any such additional notes would rank equally and ratably in right of payment and would be treated as a single series of junior subordinated debt securities for all purposes under the junior subordinated indenture.

The notes will mature on August 15, 2058 (the "maturity date"). If that day is not a business day, payment of principal and interest will be postponed to the next business day and no interest will accrue as a result of that postponement. The notes will be subordinated and junior in right of payment to all of our senior indebtedness, as defined under "—Subordination" below, and pari passu with our pari passu securities.

The Bank of New York Mellon will initially serve as paying agent for the notes.

Interest Rate and Interest Payment Dates

From and including August 13, 2018 to but excluding the maturity date or any earlier redemption date, the notes will bear interest at the annual rate of 5.625%, and we will pay accrued interest quarterly in arrears on February 15, May 15, August 15 and November 15 of each year, beginning on November 15, 2018, subject to our rights and obligations under "—Option to Defer Interest Payments". Interest payments will be made to the persons or entities in whose names the notes are registered at the close of business on February 1, May 1, August 1 or November 1 (whether or not a business day), as the case may be, immediately preceding the relevant interest payment date. The amount of interest payable will be computed on the basis of a 360-day year consisting of twelve 30-day months. In the event that any interest payment date falls on a day that is not a business day, the interest payment due on that date will be postponed to the next day that is a business day, and no additional interest will accrue as a result of that postponement.

"Business day" means any day other than (i) a Saturday or Sunday, (ii) a day on which banking institutions in The City of New York are authorized or required by law or executive order to remain closed or (iii) a day on which the corporate trust office of the trustee is closed for business.

Option to Defer Interest Payments

So long as no event of default with respect to the notes has occurred and is continuing, we may elect at one or more times to defer payment of interest on the notes for one or more consecutive interest periods that do not exceed five years for a single deferral period. We may not defer interest beyond the maturity date, any earlier accelerated maturity date arising from an event

of default (which, under the junior subordinated indenture, is limited to certain events of bankruptcy, insolvency or receivership involving us) or any other earlier redemption of the notes.

During a deferral period, interest will continue to accrue on the notes, and deferred interest on the notes will bear additional interest at the annual rate of 5.625%, compounded on each interest payment date, subject to applicable law. A "deferral period" refers to the period beginning on an interest payment date with respect to which we defer interest and ending on the earlier of (i) the fifth anniversary of that interest payment date and (ii) the next interest payment date on which we have paid all deferred and unpaid amounts (including compounded interest on such deferred amounts) and all other accrued interest on the notes. When we use the term "interest", we are referring not only to regularly scheduled interest payments but also to interest on interest payments not paid on the applicable interest payment date.

At the end of five years following the commencement of a deferral period, we must pay all accrued and unpaid deferred interest, including compounded interest. If we have paid all deferred interest (including compounded interest thereon) on the notes, we can again defer interest payments on the notes as described above

We will give the holders of the notes and the trustee written notice of our election to commence or continue a deferral period at least one and not more than 60 business days before the next interest payment date.

We have no present intention to defer interest payments.

Dividend and Other Payment Stoppages During Deferral Periods and Under Certain Other Circumstances

We agree in the junior subordinated indenture that, so long as any notes remain outstanding, if

- we have given notice of our election to defer interest payments on the notes but the related deferral period has not yet commenced, or
- a deferral period is continuing;

then we will not, nor will we permit our subsidiaries to:

- declare or pay any dividends or distributions on, or redeem, purchase, acquire or make a liquidation payment with respect to, any shares of our capital stock;
- make any payment of principal of, or interest or premium, if any, on, or repay, purchase or redeem any of our debt securities that rank upon our liquidation on a parity with or junior to the notes; or
- make any guarantee payments regarding any guarantee issued by us of securities of any of our subsidiaries if the guarantee ranks upon our liquidation on a parity with or junior to the notes.

The restrictions listed above do not apply to:

- any purchase, redemption or other acquisition of shares of our capital stock in connection with:
 - any employment contract, benefit plan or other similar arrangement with or for the benefit of any one or more employees, officers, directors, consultants or independent contractors;
 - the satisfaction of our obligations pursuant to any contract entered into prior to the beginning of the applicable deferral period;
 - a dividend reinvestment or shareholder purchase plan; or
 - the issuance of our capital stock, or securities convertible into or exercisable for such capital stock, as consideration in an acquisition transaction, the definitive agreement for which is entered into prior to the applicable deferral period;
- any exchange, redemption or conversion of any class or series of our capital stock, or the capital stock of one of our subsidiaries, for any other class or series of our capital stock, or of any class or series of our capital stock;
- any purchase of fractional interests in shares of our capital stock pursuant to the conversion or exchange provisions of such capital stock or the securities being converted or exchanged;
- any declaration of a dividend in connection with any shareholder rights plan, or the issuance of rights, stock or other property under any shareholder rights plan, or the redemption or purchase of rights pursuant thereto;
- any dividend in the form of stock, warrants, options or other rights where the dividend stock or stock issuable upon exercise of such warrants, options or other rights is the same stock as that on which the dividend is being paid or ranks equally with or junior to such stock; or

• (i) any payment of current or deferred interest on parity securities that is made pro rata to the amounts due on such parity securities (including the notes) and (ii) any payment of principal or current or deferred interest on parity securities that, if not made, would cause us to breach the terms of the instrument governing such parity securities.

For the avoidance of doubt, no terms of the notes will restrict in any manner the ability of any of our subsidiaries to pay dividends or make any distributions to us or to any of our other subsidiaries.

Redemption

The notes are redeemable at our election on or after August 15, 2023 or within 90 days after the occurrence of certain events prior to August 15, 2023, in each case at the applicable redemption price set forth below and are not subject to any sinking fund or similar provisions.

We may redeem the notes:

- in whole at any time or in part from time to time on or after August 15, 2023 at a redemption price equal to their principal amount plus accrued and unpaid interest to but excluding the date of redemption; *provided* that if the notes are not redeemed in whole, at least \$25 million aggregate principal amount of the notes, excluding any notes held by us or any of our affiliates, must remain outstanding after giving effect to such redemption and all accrued and unpaid interest, including deferred interest, must be paid in full on all outstanding notes for all interest periods ending on or before the date of redemption; or
- in whole, but not in part, at any time prior to August 15, 2023, within 90 days after the occurrence of a "tax event", a "rating agency event" or a "regulatory capital event" at a redemption price equal to (i) in the case of a "tax event" or a "regulatory capital event", their principal amount plus accrued and unpaid interest to but excluding the date of redemption or (ii) in the case of a "rating agency event", 102% of their principal amount plus accrued and unpaid interest to but excluding the date of redemption.

"Tax event" means the receipt by us of an opinion of independent counsel experienced in such matters to the effect that, as a result of any:

- amendment to or change (including any officially announced proposed change) in the laws or regulations of the United States or any political subdivision or taxing authority of or in the United States that is enacted or effective on or after the initial issuance of the notes;
- official administrative decision or judicial decision or administrative action or other official pronouncement (including a private letter ruling, technical advice memorandum or other similar pronouncement) by any court, government agency or regulatory authority that reflects an amendment to, or change in, the interpretation or application of those laws or regulations that is announced on or after the initial issuance of the notes; or
- threatened challenge asserted in connection with an audit of us, or a threatened challenge asserted in writing against any taxpayer that has raised capital through the issuance of securities that are substantially similar to the notes, which challenge is asserted against us or becomes publicly known on or after the initial issuance of the notes;

there is more than an insubstantial increase in the risk that interest payable by us on the notes is not, or within 90 days of the date of such opinion will not be, deductible by us, in whole or in part, for U.S. federal income tax purposes.

"Rating agency event" means that any nationally recognized statistical rating organization within the meaning of Section 3(a)(62) under the Exchange Act that then publishes a rating for us (a "rating agency") amends, clarifies or changes the criteria it uses to assign equity credit to securities such as the notes, which amendment, clarification or change results in:

- the shortening of the length of time the notes are assigned a particular level of equity credit by that rating agency as compared to the length of time they would have been assigned that level of equity credit by that rating agency or its predecessor on the initial issuance of the notes; or
- the lowering of the equity credit (including up to a lesser amount) assigned to the notes by that rating agency as compared to the equity credit assigned by that rating agency or its predecessor on the initial issuance of the notes.

"Regulatory capital event" means our good faith determination that, as a result of:

• any amendment to, or change in, the laws, rules or regulations of the United States or any political subdivision of or in the United States or any other governmental agency or instrumentality as may then have group-wide oversight of Prudential Financial, Inc.'s regulatory capital (including, for the avoidance of doubt, our capital regulator, which is currently the Federal Reserve Board) that is enacted or becomes effective after the initial issuance of the notes:

- any proposed amendment to, or change in, those laws, rules or regulations that is announced or becomes effective after the initial issuance of the notes; or
- any official administrative decision or judicial decision or administrative action or other official pronouncement interpreting or applying those laws, rules or regulations that is announced after the initial issuance of the notes;

there is more than an insubstantial risk that the full principal amount of the notes outstanding from time to time would not qualify as "Tier 2 Capital" (or a substantially similar concept) for purposes of the capital adequacy rules of any capital regulator to which we are or will be subject; *provided* that the proposal or adoption of any criterion:

- that is substantially the same as the corresponding criterion in the capital adequacy rules of the Federal Reserve Board applicable to bank holding companies as of the initial issuance of the notes; or
- that would result in the full principal amount of the notes outstanding from time to time not qualifying as "Tier 2 Capital" (or a substantially similar concept) for purposes of the capital adequacy rules of the capital regulator solely because we may redeem the notes at our option upon the occurrence of a rating agency event;

will not constitute a regulatory capital event.

Notice of any redemption will be mailed at least 30 days but not more than 60 days before the redemption date to each holder of notes to be redeemed at its registered address. Unless we default in payment of the redemption price and accrued interest, on and after the redemption date, interest will cease to accrue on the notes or portions thereof called for redemption.

We may not redeem the notes unless all accrued and unpaid interest, including deferred interest (and compounded interest), has been paid in full on all outstanding notes for all interest periods ending on or before the redemption date.

In the event of any redemption, neither we nor the trustee will be required to:

- issue, register the transfer of, or exchange, notes during a period beginning at the opening of business 15 days before the day of selection for redemption of notes and ending at the close of business on the day of mailing of notice of redemption; or
- transfer or exchange any notes so selected for redemption, except, in the case of any notes being redeemed in part, any portion thereof not to be redeemed.

In the event the notes are treated as "Tier 2 capital" (or a substantially similar concept) under the capital rules of any capital regulator applicable to Prudential Financial, Inc., any redemption of notes will be subject to our receipt of any required prior approval from such capital regulator and to the satisfaction of any conditions set forth in those capital rules or any other regulations of any other capital regulator that are or will be applicable to our redemption of the notes.

Defeasance

The junior subordinated indenture provides that we will be deemed to have paid and discharged the entire indebtedness represented by the notes ("defeasance"), if:

- we have irrevocably deposited or caused to be irrevocably deposited with the trustee as trust funds in trust, specifically pledged as security for, and dedicated solely to, the benefit of the holders (i) cash or (ii) U.S. government obligations, maturing as to principal and interest at such times and in such amounts as will insure the availability of cash or (iii) a combination thereof, sufficient, without reinvestment, in the opinion of a nationally recognized firm of independent public accountants expressed in a written certification thereof delivered to the trustee, to pay and discharge (a) the principal (and premium, if any) and interest on the notes and (b) any mandatory sinking fund payments or analogous payments applicable to the notes on the due dates thereof;
- such deposit will not result in a breach or violation of, or constitute a default under, any agreement or instrument to which we are a party or by which we are bound;
- we have delivered to the trustee an opinion of independent legal counsel satisfactory to the trustee confirming that (i) we have received from, or there has been published by, the IRS a ruling or (ii) since the initial issuance of the notes, there has been a change in the applicable U.S. federal income tax law, in either case to the effect that holders will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such deposit, defeasance and discharge and will be subject to U.S. federal income tax on the same amount and in the same manner and at the same times, as would have been the case if such deposit, defeasance and discharge had not occurred:
- no event of default or event which with notice or lapse of time or both would become an event of default with respect to the notes shall have occurred and be continuing on the date of such deposit;
- such defeasance shall not cause the trustee to have a conflicting interest with respect to any of our securities or result in the trust arising from such deposit to constitute, unless it is qualified as, a regulated investment company under the Investment Company Act of 1940, as amended;

- we have delivered to the trustee an opinion of counsel substantially to the effect that the trust funds deposited will not be subject to any rights of holders of senior indebtedness, and after the 90th day following the deposit, the trust funds will not be subject to the effect of any applicable bankruptcy, insolvency, reorganization or similar laws affecting creditors' rights generally; and
- we have delivered to the trustee an officers' certificate and an opinion of counsel, each stating that all conditions precedent provided for relating to the
 defeasance have been complied with.

Subordination

The payment of the principal of and interest on the notes is expressly subordinated, to the extent and in the manner set forth in the junior subordinated indenture, in right of payment and upon liquidation to the prior payment in full of all of our senior indebtedness. In addition, the notes may be fully subordinated to any interests held by the U.S. government in the event we enter into a receivership, insolvency, liquidation or similar proceeding, including a proceeding under the "orderly liquidation authority" provisions of the Dodd-Frank Act.

Subject to the qualifications described below, the term "senior indebtedness" is defined in the junior subordinated indenture to include principal of, premium (if any) and interest on and any other payment due pursuant to any of the following:

- all of our obligations (other than obligations pursuant to the junior subordinated indenture and the notes) for money borrowed;
- all of our obligations evidenced by securities, notes (other than securities issued under the junior subordinated indenture, including the notes described herein), debentures, bonds or other similar instruments, including obligations incurred in connection with the acquisition of property, assets or businesses;
- all of our capital lease obligations;
- all of our reimbursement obligations with respect to letters of credit, bankers' acceptances or similar facilities issued for our account;
- all of our obligations issued or assumed as the deferred purchase price of property or services, including all obligations under master lease transactions pursuant to which we or any of our subsidiaries have agreed to be treated as owner of the subject property for U.S. federal income tax purposes;
- all of our payment obligations under interest rate swap or similar agreements or foreign currency hedge, exchange or similar agreements at the time of
 determination, including any such obligations we incurred solely to act as a hedge against increases in interest rates that may occur under the terms of other
 outstanding variable or floating rate indebtedness of ours; and
- all obligations of the types referred to in the preceding bullet points of another person and all dividends of another person the payment of which, in either case, we have assumed or guaranteed or for which we are responsible or liable, directly or indirectly, jointly or severally, as obligor, guarantor or otherwise.

The notes will rank senior to all of our equity securities and pari passu with our pari passu securities.

The senior indebtedness will continue to be senior indebtedness and entitled to the benefits of the subordination provisions irrespective of any amendment, modification or waiver of any term of the senior indebtedness or extension or renewal of the senior indebtedness. Notwithstanding anything to the contrary in the foregoing, senior indebtedness will not include (1) obligations to trade creditors created or assumed by us in the ordinary course of business, (2) indebtedness that is by its terms subordinate, or not superior, in right of payment to the notes or (3) our *pari passu* securities.

As of December 31, 2019, our short- and long-term debt owed to third parties ranking senior to the notes upon liquidation, on an unconsolidated basis, totaled approximately \$11.3 billion. In addition, as of December 31, 2019, our short- and long-term debt owed to subsidiaries ranking senior to the notes upon liquidation totaled approximately \$5.9 billion. All liabilities of our subsidiaries are effectively senior to the notes to the extent of the assets of such subsidiaries. As of December 31, 2019, our subsidiaries had total liabilities of approximately \$814 billion (including policyholders' account balance liability and reserves for future policy benefits and claims of approximately \$446 billion). In addition, our subordinated guarantee covering the commercial paper program of one of our subsidiaries constitutes senior indebtedness. As of December 31, 2019, there was \$549 million outstanding under this commercial paper program.

If either of the following circumstances exist, we will first pay all senior indebtedness, including any interest accrued after such events occur, in full before we make any payment or distribution, whether in cash, securities or other property, on account of the principal of or interest on the notes:

• in the event of any insolvency or bankruptcy proceedings, or any receivership, liquidation, reorganization, assignment for creditors or other similar proceedings or events involving us or our assets; or

• (a) in the event and during the continuation of any default in the payment of principal, premium, if any, or interest on any senior indebtedness beyond any applicable grace period, (b) in the event that any event of default with respect to any senior indebtedness has occurred and is continuing, permitting the direct holders of that senior indebtedness (or a trustee) to accelerate the maturity of that senior indebtedness, whether or not the maturity is in fact accelerated (unless, in the case of either (a) or (b), the payment default or event of default has been cured or waived or ceased to exist and any related acceleration has been rescinded), or (c) in the event that any judicial proceeding is pending with respect to a payment default or event of default described in (a) or (b).

In such events, we will pay or deliver directly to the holders of senior indebtedness any payment or distribution otherwise payable or deliverable to holders of the notes. We will make the payments to the holders of senior indebtedness according to priorities existing among those holders until we have paid all senior indebtedness, including accrued interest, in full.

If such events of insolvency or bankruptcy proceedings, or any receivership, liquidation, reorganization, assignment for creditors or other similar proceedings or events involving us or our assets as described in the first bullet above occur, after we have paid in full all amounts owed on senior indebtedness, the holders of notes together with the holders of any of our other *pari passu* securities will be entitled to receive from our remaining assets any principal, premium or interest due at that time on the notes and such other obligations before we make any payment or other distribution on account of any of our capital stock or obligations ranking junior to the notes.

If we violate the junior subordinated indenture by making a payment or distribution to holders of the notes before we have paid all the senior indebtedness in full, then such holders of the notes will have to pay or transfer the payments or distributions to the trustee in bankruptcy, receiver, liquidating trustee or other person distributing our assets for payment of the senior indebtedness.

Because of the subordination provisions, if we become insolvent, holders of senior indebtedness may receive more, ratably, and holders of the notes having a claim pursuant to those securities may receive less, ratably, than our other creditors. This type of subordination will not prevent an event of default from occurring under the junior subordinated indenture in connection with the notes.

The junior subordinated indenture places no limitation on the amount of senior indebtedness that we may incur. We expect from time to time to incur additional indebtedness and other obligations constituting senior indebtedness.

Denominations

The notes were issued only in registered form, without coupons, in denominations of \$25 each and integral multiples of \$25 in excess thereof. The notes are held in book-entry form only, as described under "—Book-Entry System", and are held in the name of DTC or its nominee.

Limitation on Mergers and Sales of Assets

The junior subordinated indenture generally permits a consolidation or merger between us and another entity. It also permits the conveyance, transfer or lease by us of all or substantially all of our property and assets. These transactions are permitted if:

- the resulting or acquiring entity, if other than us, is organized and existing under the laws of a domestic jurisdiction and expressly assumes by a supplemental indenture to the junior subordinated indenture the payment of all amounts due on the debt securities and performance of all the covenants in the junior subordinated indenture on our part to be performed or observed; and
- certain other conditions as prescribed in the junior subordinated indenture are met.

If we consolidate or merge with or into any other entity or convey, transfer or lease all or substantially all of our assets according to the terms and conditions of the junior subordinated indenture, the resulting or acquiring entity will be substituted for us in the junior subordinated indenture with the same effect as if it had been an original party to the junior subordinated indenture. As a result, such successor entity may exercise our rights and powers under the junior subordinated indenture, in our name and, except in the case of a lease of all or substantially all of our properties and assets, we will be released from all our liabilities and obligations under the junior subordinated indenture and under the notes.

Events of Default; Waiver and Notice

An "event of default" with respect to the notes shall occur only upon certain events of bankruptcy, insolvency or receivership involving us.

The junior subordinated indenture refers to breaches that are not "events of default" as "defaults". They include, among other things:

- the failure to pay interest, including compounded interest, in full on any notes for a period of 30 days after the conclusion of a five-year period following the commencement of any deferral period if such deferral period has not ended prior to the conclusion of such five-year period;
- the failure to pay principal of or premium, if any, on the notes when due; or
- the failure to comply with our covenants under the junior subordinated indenture.

A "default" also includes, for example, a failure to pay interest when due if we do not give a timely written notice of our election to commence or continue a deferral period. If we do not give a timely written notice of our election to commence or continue a deferral period and fail to pay interest when due, any holder of notes may seek to enforce our obligation to make the missed interest payment, including through legal process. However, there is no right of acceleration except upon the occurrence of an event of default as described above.

If we do give a timely written notice of our election to commence or continue a deferral period on any interest payment date (and, if such notice continues a deferral period, the deferral period has not continued for five years), then no "default" arises from our non-payment of interest on such interest payment date.

The junior subordinated indenture provides that the trustee must give holders notice of all defaults or events of default within 90 days after it becomes actually known to a responsible officer of the trustee. However, except in the case of a default in payment on the notes, the trustee will be protected in withholding the notice if its responsible officers determine that withholding of the notice is in the interest of such holders.

If an event of default under the junior subordinated indenture occurs, the entire principal amount of the notes will automatically become due and payable without any declaration or other action on the part of the trustee or any holder of the notes. There is no right of acceleration in the case of any payment default or other breaches of covenants under the junior subordinated indenture or the notes. Notwithstanding the foregoing, in the case of a default in the payment of principal of or interest on the notes including any compound interest (and, in the case of payment of deferred interest, such failure to pay shall have continued for 30 calendar days after the conclusion of the deferral period), the holder of a note may, or if directed by the holders of a majority in principal amount of the notes the trustee shall, subject to the conditions set forth in the junior subordinated indenture, demand payment of the amount then due and payable and may institute legal proceedings for the collection of such amount if we fail to make payment thereof upon demand.

The holders of a majority in aggregate principal amount of the outstanding notes may waive any past default, except:

- · a default in payment of principal or interest; or
- a default under any provision of the junior subordinated indenture that itself cannot be modified or amended without the consent of the holders of all outstanding notes.

The holders of a majority in principal amount of the notes will have the right to direct the time, method and place of conducting any proceeding for any remedy available to the trustee, subject to the provisions of the junior subordinated indenture.

We are required to file an officers' certificate with the trustee each year that states, to the knowledge of the certifying officers, whether we have complied with all conditions and covenants under the terms of the junior subordinated indenture.

The trustee shall have no right or obligation under the junior subordinated indenture or otherwise to exercise any remedies on behalf of any holders of the notes pursuant to the junior subordinated indenture in connection with any "default", unless such remedies are available under the junior subordinated indenture and the trustee is directed to exercise such remedies by the holders of a majority in principal amount of the notes pursuant to and subject to the conditions of the junior subordinated indenture. In connection with any such exercise of remedies the trustee shall be entitled to the same immunities and protections and remedial rights (other than acceleration) as if such "default" were an "event of default".

Actions Not Restricted by Junior Subordinated Indenture

The junior subordinated indenture does not contain restrictions on our ability to:

- incur, assume or become liable for any type of debt or other obligation;
- · create liens on our property for any purpose; or

• pay dividends or make distributions on our capital stock or purchase or redeem our capital stock, except as set forth under "—Dividend and Other Payment Stoppages During Deferral Periods and Under Certain Other Circumstances" above, or make debt payments on, or purchase, redeem or retire, any senior indebtedness.

The junior subordinated indenture does not require the maintenance of any financial ratios or specified levels of net worth or liquidity. In addition, the junior subordinated indenture does not contain any provisions that would require us to repurchase or redeem or modify the terms of any of the notes upon a change of control or other event involving us that may adversely affect the creditworthiness of the notes.

Modification of Junior Subordinated Indenture

Under the junior subordinated indenture, certain of our rights and obligations and certain of the rights of holders of the notes may be modified or amended with the consent of the holders of at least a majority of the aggregate principal amount of the outstanding notes. However, the following modifications and amendments, among others, will not be effective without the consent of the holder of each outstanding note affected:

- a change in the stated maturity date of any payment of principal or interest (including any additional interest thereon);
- a change in the manner of calculating payments due on the notes in a manner adverse to holders of notes;
- a reduction in the requirements contained in the junior subordinated indenture for quorum or voting;
- a change in the place of payment for any payment on the notes that is adverse to holders of the notes or a change in the currency in which any payment on the notes is payable;
- an impairment of the right of any holder of notes to institute suit for the enforcement of payments on the notes;
- a reduction in the percentage of outstanding notes required to consent to a modification or amendment of the junior subordinated indenture or required to consent to a waiver of compliance with certain provisions of the junior subordinated indenture or certain defaults under the junior subordinated indenture and their consequences;
- a reduction in the principal amount of, the rate of interest on or any premium payable upon the redemption of the notes; and
- a modification of any of the provisions relating to supplemental indentures.

Under the junior subordinated indenture, the holders of at least a majority of the aggregate principal amount of the outstanding notes may, on behalf of all holders of the notes, waive compliance by us with certain covenants or conditions contained in the junior subordinated indenture.

We and the trustee may execute, without the consent of any holder of notes, any supplemental indenture for the purposes of:

- evidencing the succession of another corporation to us, and the assumption by any such successor of our covenants contained in the junior subordinated indenture and the notes;
- adding or modifying our covenants for the benefit of the holders of the notes or surrendering any of our rights or powers under the junior subordinated indenture (including our surrendering, without limitation, of any redemption right, including our right to redeem the notes after the occurrence of a rating agency event); provided that such addition, modification or surrender may not add events of default or acceleration events with respect to the notes;
- evidencing and providing for the acceptance of appointment under the junior subordinated indenture by a successor trustee with respect to the notes;
- curing any ambiguity, correcting or supplementing any provision in the junior subordinated indenture that may be defective or inconsistent with any other
 provision therein or in any supplemental indenture or making any other provisions with respect to matters or questions arising under the junior
 subordinated indenture, provided that such provisions, as so changed, corrected or modified, shall not adversely affect the interests of the holders of the
 notes in any material respect; or
- making any changes to the junior subordinated indenture in order for the junior subordinated indenture to conform to the final prospectus supplement relating to the notes.

We will not enter into any supplemental indenture with the trustee to add any additional event of default with respect to the notes without the consent of the holders of at least a majority in aggregate principal amount of outstanding notes.

Book-Entry System

DTC, to which we refer along with its successors in this capacity as the depositary, will act as securities depositary for the notes. The notes will be issued only as fully registered securities registered in the name of Cede & Co. ("Cede"), the depositary's nominee. One or more fully registered global security certificates, representing the total aggregate principal amount of the notes, will be issued and will be deposited with the depositary or its custodian and will bear a legend regarding

the restrictions on exchanges and registration of transfer of the global securities. So long as Cede, as the nominee of DTC, is the registered owner of any global security, Cede for all purposes will be considered the sole holder of that global security. Except as provided below, owners of beneficial interests in a global security will not be entitled to have certificates registered in their names, will not receive physical delivery of certificates in definitive form and will not be considered the holders thereof.

The laws of some jurisdictions may require that some purchasers of securities take physical delivery of securities in definitive form. These laws may impair the ability to transfer beneficial interests in the notes so long as the notes are represented by global security certificates.

Investors may elect to hold interests in the notes in global form through DTC in the United States or through Clearstream or Euroclear in Europe, if they are participants in those systems, or indirectly through organizations that are participants in those systems. Clearstream and Euroclear will hold interests on behalf of their participants through customers' securities accounts in Clearstream's and Euroclear's names on the books of their respective depositaries, which in turn will hold such interests in customers' securities accounts in the depositaries' names on the books of DTC.

Initial settlement for the notes will be made in immediately available funds. Secondary market trading between DTC participants will occur in the ordinary way in accordance with DTC rules and will be settled in immediately available funds. Secondary market trading between Clearstream participants and/or Euroclear participants will occur in the ordinary way in accordance with the applicable rules and operating procedures of Clearstream and the Euroclear System, as applicable.

Cross-market transfers between DTC, on the one hand, and directly or indirectly through Euroclear or Clearstream participants, on the other, will be effected in DTC in accordance with DTC rules on behalf of Euroclear or Clearstream, as the case may be, by its respective depositary; however, such cross-market transactions will require delivery of instructions to Euroclear or Clearstream, as the case may be, by the counterparty in such system in accordance with its rules and procedures and within its established deadlines. Euroclear or Clearstream will, if the transaction meets its settlement requirements, deliver instructions to its respective depositary to take action to effect final settlement on its behalf by delivering or receiving beneficial interests in the relevant global security in DTC, and making or receiving payment in accordance with normal procedures for same-day funds settlement applicable to DTC. Euroclear participants and Clearstream participants may not deliver instructions directly to the depositaries for Euroclear or Clearstream.

Because of time zone differences, the securities account of a Euroclear participant or Clearstream participant purchasing a beneficial interest in a global security from a participant will be credited during the securities settlement processing day immediately following the DTC settlement date and such credit of any transactions in beneficial interests in such global security settled during such processing will be reported to the relevant Euroclear participant or Clearstream participant on that business day. Cash received in Euroclear or Clearstream as a result of sales of beneficial interests in a global security by or through a Euroclear participant or Clearstream participant to a participant will be received with value on the DTC settlement date but will be available in the relevant Euroclear or Clearstream cash account only as of the business day following settlement in DTC.

Neither we nor the trustee (or any registrar or paying agent) will have any responsibility for the performance by DTC, Euroclear or Clearstream or any of the participants or indirect participants of DTC, Euroclear or Clearstream of their respective obligations under the rules and procedures governing their operations. DTC has advised us that it will take any action permitted to be taken by a holder of notes only at the direction of one or more participants whose DTC accounts are credited with interests in a global security.

DTC has informed us that it is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds and provides asset servicing for securities that DTC's participants ("Direct Participants") deposit with it. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants" and, together with Direct Participants, "Participants"). The DTC Rules applicable to its Participants are on file with the SEC.

Purchases of notes under the DTC system must be made by or through Direct Participants, which will receive a credit for the notes on DTC's records. The ownership interest of each actual purchaser of each note ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the notes are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the notes, except in the limited circumstances described below in which a global security will become exchangeable for note certificates registered in the manner described below.

To facilitate subsequent transfers, all securities deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede, or such other name as may be requested by an authorized representative of DTC. The deposit of the notes with DTC and their registration in the name of Cede or such other DTC nominee do not effect any change in their beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the notes; DTC's records reflect only the identity of the Direct Participants to whose accounts such notes are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Redemption proceeds, principal and interest payments on the notes will be made to Cede, or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the issuer or paying agent, on the payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, the paying agent or us, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, principal and interest payments to Cede (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the issuer or paying agent, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Participants.

Neither we nor the trustee (or any registrar or paying agent) will have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in the global securities or for maintaining, supervising or reviewing any records relating to those beneficial ownership interests. The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that we believe to be reliable, but we take no responsibility for the accuracy thereof.

DTC may discontinue providing its services as securities depositary with respect to the notes at any time by giving reasonable notice to us.

The global security will terminate and interests in it will be exchanged for physical certificates representing the notes only in the following situations:

- DTC or any successor depositary notifies us that it is unwilling or unable to continue as depositary for global securities or ceases to be a "clearing agency" registered under the Exchange Act and we notify the trustee that we are unable to locate a qualified successor;
- an event of default under the notes has occurred and is continuing; or
- we, in our sole discretion and subject to the procedures of the depositary, determine that any or all of the notes will no longer be represented by global securities.

In those situations, the notes represented by a global security that is exchangeable pursuant to this paragraph will be exchangeable for note certificates registered in the names directed by the depositary, with the same terms and in authorized denominations. We expect that these instructions will be based upon directions received by the depositary from its participants with respect to ownership of beneficial interests in the global security certificates.

Governing Law

The junior subordinated indenture and the notes are governed by, and construed in accordance with, the laws of the State of New York, without regard to its principles of conflicts of laws.

The Trustee

The trustee will have all of the duties and responsibilities specified under the Trust Indenture Act. Other than its duties in a case of default, the trustee is under no obligation to exercise any of the powers under the junior subordinated indenture at the request, order or direction of any holders of notes unless offered reasonable indemnification.

Miscellaneous

We or our affiliates may from time to time purchase any of the notes that are then outstanding by tender, in the open market or by private agreement.

RESTRICTIVE COVENANTS AGREEMENT

This Restrictive Covenants Agreement (this "Agreement") is entered into by and between Prudential Financial, Inc., a New Jersey corporation (together with any successor to Prudential Financial, Inc., "Prudential"), and Mark B. Grier ("you"), effective February 14, 2020.

WHEREAS, you served as the Vice Chairman of Prudential immediately prior to your retirement from Prudential on August 31, 2019; and

WHEREAS, as Vice Chairman you had access to a significant amount of confidential information regarding Prudential and its affiliates and subsidiaries (collectively, the "Company Group"), and participated in numerous decisions regarding critically important aspects of the business of the Company Group; and

WHEREAS, during your employment, you received awards of Options, Restricted Stock Units, Performance Shares, Performance Units and/or Book Value Units (each, an "Award") pursuant to the terms of Prudential's 2016 Omnibus Stock Incentive Plan, as amended from time to time, and any former plans as applicable (collectively, the "Plan"); and

WHEREAS, because you were eligible to retire, you receive enhanced rights in respect of your Awards outstanding at the date of your retirement, subject to your compliance with certain restrictive covenants for specified period of times following the date of your termination of employment; and

WHEREAS, Prudential desires to extend the period during which you are subject to such restrictive covenants, and you are willing to agree to extend the period you are subject to such restrictive covenants, on terms and conditions that are comparable to those that would have applied had you received Awards under the Plan in 2020, at or about the time similar Awards are made to other key employees of the Company Group, in consideration of a cash payment equivalent in value to the 2020 Awards you would have received had you remain employed, but pro-rated to reflect your actual period of service during 2019.

NOW, THEREFORE, you and Prudential agree as follows:

1. <u>Consideration</u>. In consideration of the covenants set forth in Section 2 of this Agreement and your execution and non-revocation of the General Release (as defined in Section 4), Prudential agrees to pay you, or cause you to be paid to you, \$5,335,000 in a single lump amount on or around February 28, 2020 following the execution hereof and the General Release (the "Covenants Payment").

2. Restrictive Covenants and Acknowledgements.

(a) Restrictive Covenants for the Benefit of Prudential.

- (i) You agree that until the third anniversary of the date hereof, you will not (i) other than on behalf of the Company Group, solicit or induce, either directly or indirectly, or take any action to assist any entity, either directly or indirectly, in soliciting or inducing any employee of the Company Group (other than your former administrative assistant) to leave employment with the Company Group or (ii) hire or employ, or assist in the hire or employment, either directly or indirectly, of any employee of the Company Group (other than your former administrative assistant) or any former employee of the Company Group within 60 days of that former employee's cessation of employment with the Company Group; and
- (ii) You agree that until the first anniversary of the date hereof, you will not compete with the Company Group in any business in which the Company Group is engaged on the date hereof that operates in any geographic area in which the Company Group operates on the date hereof.

You acknowledge that Prudential and the Company Group provide a wide range of insurance, investment management and other financial products and services to customers throughout the world and that the restrictions contained in this Agreement are reasonable and necessary to protect Prudential's and the Company Group's legitimate interests in its confidential information, trade secrets, customer relationships, and investment in the training and development of its employees. You represent that you can earn a living while fully complying with all of the provisions, restrictions and covenants contained in these Agreement.

(a) Acknowledgements. You acknowledge and accept that each of the restrictions and covenants set forth in Section 2(a) of this Agreement will be construed as separate and divisible from each other. If any provision contained in this Agreement is for any reason held invalid, illegal or unenforceable in any respect, that invalidity, illegality or unenforceability will not affect any other provision of this Agreement, and this Agreement will be construed as if the invalid, illegal or unenforceable provision had not been included herein. It is the intention of the parties that if any of the restrictions, requirements or covenants contained in this Agreement is held to cover a geographic area or to be for a length of time which is not permitted by any laws, rules and regulations applicable to this Agreement ("Applicable Laws"), or in any way construed to be too broad or to any extent invalid, that provision will not be null, void and of no effect, but to the extent the provision would be valid or enforceable under any Applicable Law, a court of competent jurisdiction will construe and interpret or reform this Agreement to provide for a restriction, requirement or covenant having the maximum enforceable geographic area, time period and other provisions (not greater than those contained in this Agreement) as will be valid and enforceable under Applicable Laws. Prudential, in its sole discretion, may waive any restriction or any breach in circumstances that it determines do not adversely affect its interests, but only in writing signed by its Chief Executive Officer or its most senior vice president responsible for Corporate Human Resources, or each of their respective successors, or each of their respective delegates. No waiver of a breach of a restriction, requirement or covenant will be deemed a waiver of any other breach.

3. Remedies.

(a) Liquidated Damages. You agree that the restrictions in Section 2(a) of this Agreement are fair, reasonable and necessary, and are reasonably required for the protection of Prudential and the other members of the Company Group. You agree and acknowledge that the amount of damages that would derive from the breach of any restriction is not readily ascertainable and that the restrictions provided hereunder are the consideration being provided by you to Prudential in exchange for the Covenants Payment. Accordingly, if you breach any of the covenants set out in Section 2(a) of this Agreement (a "Breach"), you shall return to Prudential all of the Covenants Payment, less \$10,000, within five business days following of the date Prudential notifies you that a Breach has occurred (the "Notification Date"). In addition, you agree and acknowledge that, upon the Notification Date, (i) any then outstanding Award held by you pursuant to the terms of the Plan will be cancelled and (ii) you shall pay to Prudential in cash or in share of Prudential's common stock ("Common Shares") (rounded to the nearest whole share), as applicable, an amount equal in value (using the current Market Value of Common Shares on the Notification Date) to the profit, if any, realized by you within six (6) months before the date on which your terminated or at any time thereafter in respect of any Award granted to you under the Plan. The term "profit" referred to in the preceding sentence will be equal to (I) in the case of any Options, the sums (determined separately for each exercise of any portion of the Options within the applicable period established pursuant to such sentence) of (i) (A) the Market Value of a share of Common Shares on the date of exercise, in the case of a Cash Exercise, or the price at which shares of Common Shares are sold, in the case of a Same Day Sale, or a combination of such Market Value and sales price, in the case of a Sell to Cover, minus (B) the Grant Price of the Option, times (ii) the number of shares of Common Shares acquired on exercise of the Options; (II) in the case of any Restricted Stock Unit or Performance Share Award, the sums (determined separately for each grant payable within the applicable period established pursuant to such sentence) of (i) the Market Value of a share of Common Shares on the date of payment times (ii) the number of shares of Common Shares acquired or acquirable; and (III) in the case of any other Award payable in cash, the amount of cash paid in respect of such Award. You will pay any amount due (in the form of Common Shares, cash or a combination thereof, as applicable) to Prudential within five (5) business days of the Notification Date. If payment is not made within that period, any subsequent payment will be made with interest at a rate equal to the prime rate as reported in *The Wall Street* Journal (Eastern Edition) on the date on which notice of the Breach is sent to you by Prudential, plus two (2) percent. Interest payments will be made in cash.

For purposes of this Section 3(a) of this Agreement, any capitalized terms used but are not defined shall have the meanings ascribed to it under the Terms and Conditions applicable to the 2020 Long-Term Incentive Program under the Plan.

(b) <u>Injunctive Relief</u>. You also acknowledge that the damages to Prudential for any breach of Section 2(a) of this Agreement would be irreparable. Therefore, in addition to the monetary damages outlined in Section 3(a) above and/or any reasonable attorney's fees that Prudential may incur to enforce its rights under this Agreement, Prudential will have the right to seek injunctive and/or other equitable relief in any court of competent jurisdiction to enforce the restriction. Further, you consent to the issue of a temporary restraining order to maintain the status quo pending the outcome of any proceeding.

4. <u>General Release</u> . As additional consideration to Prudential for the Covenants Payment, you agree that, simultaneously with the execution of this Agreement, you shall execute the general release attached hereto as Attachment A (the " General Release "). You agree that by executing the General Release you are waiving any right that you may have to review and consider the General Release for a longer period prior to the execution thereof. You further agree that, if you revoke the General Release in accordance with its terms, Prudential shall have the right (i) to rescind this Agreement by written notice to you within five (5) business days thereafter, and if Prudential shall elect to rescind this Agreement, neither party shall have obligation to the other under this Agreement, and (ii) to demand the immediate full repayment of the Covenants Payment to the extent any or all of the Covenants Payment was made to you and you have the obligation to make such repayment immediately in accordance with such demand.	
5. <u>Governing Law</u> . This Agreement will be governed by the laws of the State of New Jersey,	without giving effect to its conflict of law provisions.
6. Entire Agreement. This Agreement, including the documents and instruments referred to herein, constitutes the entire agreement and understanding of the parties hereto with respect to the subject matter hereof and supersedes all prior agreements and understandings, whether written or oral, relating to such subject matter.	
IN WITNESS WHEREOF, Prudential and you have executed this Agreement as of the effective date stated above.

Director

KNOW ALL PERSONS BY THESE PRESENTS that the person whose signature appears below constitutes and appoints Charles F. Lowrey, Robert M. Falzon, Kenneth Y. Tanji, Robert D. Axel and Margaret M. Foran, and each of them severally, his or her true and lawful attorney-in-fact with power of substitution and resubstitution to sign in his or her name, place and stead, in any and all capacities, and to do any and all things and execute any and all instruments that such attorneys-in-fact may deem necessary or advisable under the Securities Exchange Act of 1934, as amended, and any rules, regulations and requirements of the U.S. Securities and Exchange Commission (the "Commission"), in connection with the filing with the Commission of an Annual Report on Form 10-K of Prudential Financial, Inc. (the "Registrant") for the fiscal year ending December 31, 2019 (the "Form 10-K"), including specifically, but without limiting the generality of the foregoing, the power and authority to sign his or her name in his or her capacity as a member of the Board of Directors of the Registrant to the Form 10-K and such other form or forms as may be appropriate to be filed with the Commission as any of them may deem appropriate, together with all exhibits thereto, and to any and all amendments thereto and to any other documents filed with the Commission, as fully and for all intents and purposes as he or she might or could do in person, and hereby ratifies and confirms all that said attorneys-in-fact, each acting alone, and his or her substitute or substitutes, may lawfully do or cause to be done by virtue hereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 24th day of December 2019.

CERTIFICATIONS

I, Charles F. Lowrey, certify that:

- 1. I have reviewed this Annual Report on Form 10-K of Prudential Financial, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e)) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f)) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
