Strategic Report

Principal activities

Assetfinance March (B) Limited (the 'Company') is a private limited company incorporated in the United Kingdom and registered in Northern Ireland. Its trading address is 5 Donegal Square South, Belfast BT1 5JP, Northern Ireland.

The principal activity of the Company is to lease assets to third party lessees for an agreed term under finance lease arrangements. No change in the Company's activities is anticipated.

The Company is limited by shares.

Review of the Company's business

During the year the Company continued to manage the leasing transactions written in previous years.

Where relevant, another group undertaking, HSBC Asset Finance (UK) Limited, provides agency services to the Company. The services provided include seeking new business, negotiating and agreeing terms and arranging the execution of all lease documents on behalf of the Company, as well as maintaining accurate accounting and other records such as borrowing funds and settlement of all invoices relating to the services.

The business is funded principally by another group undertaking mainly through borrowing. The Company has no employees. Services required are provided by fellow HSBC Group companies. The Company's principal stakeholder is its parent company.

Performance

The Company's results for the year under review are as detailed in the income statement shown on page 6 of these financial statements.

Key performance indicators

As the Company is managed as part of the global bank, there are no key performance indicators that are specific to the Company. The key performance indicators are included in the annual report of HSBC Bank plc. Ongoing review of the performance of the Company is carried out by comparing actual performance against annually set budgets.

Principal risks and uncertainties

The principal financial risks and uncertainties facing the Company are credit risk, market risk, liquidity risk and funding risk. These risks, the exposure to such risks and management of risk are set out in Note 15 of the financial statements.

Following the referendum on 23 June 2016, the UK took the decision to leave the European Union ('EU') with the process of the UK leaving the EU commencing on 29 March 2017. The ultimate economic effect of the UK leaving the EU is currently uncertain and will depend upon the outcome of negotiations between the UK government, the EU and non-EU countries. In the meantime, this uncertainty is expected to result in market risk volatility in the short to medium term including sterling exchange rates and interest rates. As described in Note 15, foreign exchange and interest rate risks are managed by the Company in the ordinary course of business and so any increased volatility as a result of the UK leaving the EU is not expected to have a material effect on the results and net assets of the Company. Additionally, any general adverse consequences for credit risk at a UK or EU macro economic level that may arise as a consequence of the UK leaving the EU is not expected to translate into a material increase in credit risk for the Company given the nature of the Company's transactions, its counterparties and available security.

Report of the Directors

Directors

The Directors of the Company who were in office during the year and up to the date of signing the financial statements were as follows:

Name	Resigned
G Owen-Conway	06 December 2019
J Subramaniyan	,
S E Long	
C R J Irvin	
O Uwakwe	

The Articles of Association of the Company provide that in certain circumstances the Directors are entitled to be indemnified out of the assets of the Company against claims from third parties in respect of certain liabilities arising in connection with the performance of their functions, in accordance with the provisions of the UK Companies Act 2006. Indemnity provisions of this nature have been in place during the financial year but have not been utilised by the Directors. All Directors have the benefit of Directors' liability insurance.

Dividends

The Directors recommend the payment of a dividend of £648,011 in respect of the year ended 31 March 2019 (2018: nil). No interim dividend was paid on ordinary share capital during the year (2018: £629,530).

Dividend payments are reflected in the financial statements in the period in which they are paid.

Significant events since the end of the financial year

No significant events affecting the Company have occurred since the end of the financial year.

Future developments

No change in the Company's activities is expected.

Going concern basis

The Company had net current liabilities of £2,890,376 as at 31 March 2019. HSBC Asset Finance (UK) Limited, the parent undertaking, has committed to ensuring the provision of sufficient funds for a period of not less than twelve months from the date of authorisation of these financial statements, to enable the Company to meet its liabilities as they fall due. Furthermore, based on the leasing arrangements held by the Company as at the year end, positive cash flows are expected to be generated for more than one year from the date of authorisation of these financial statements. As a result, the Directors have prepared these on a going concern basis.

Financial risk management

The financial risk management objectives and policies of the Company, together with an analysis of the exposure to such risks, are set out in Note 15 of the Notes on the financial statements.

Capital management

The Company is not subject to externally imposed capital requirements and is dependent on the HSBC Group to provide necessary capital resources which are therefore managed on a group basis.

The Company defines capital as total shareholders' equity. It is HSBC Group's objective to maintain a strong capital base to support the development of its business and to meet regulatory capital requirements at all times. There were no changes to the Company's approach to capital management during the year.

Independent auditors

PricewaterhouseCoopers LLP ('PwC') is external auditor to the Company. PwC has expressed its willingness to continue in office and the Board recommends that PwC be re-appointed as the Company's auditor.

Directors' responsibility statement

The following statement, which should be read in conjunction with the auditor's statement of their responsibilities set out in their report on page 5, is made with a view to distinguish the respective responsibilities of the Directors and of the auditors in relation to the financial statements.

The Directors are responsible for preparing the *Annual Report and Financial Statements*, in accordance with applicable law and regulations.

Company law requires the Directors to prepare a Strategic Report, a Report of the Directors and Financial Statements for each financial year. The Directors are required to prepare the financial statements in accordance with International Financial Reporting Standards ('IFRSs') as adopted by the European Union ('EU').

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss for that period.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- · make judgements and estimates that are reasonable and prudent;
- · state whether they have been prepared in accordance with IFRSs as adopted by the EU; and
- prepare the financial statements on a going concern basis unless it is not appropriate. Since the Directors are satisfied that the Company has the resources to continue in business for the foreseeable future, the financial statements continue to be prepared on a going concern basis.

The Directors have responsibility for ensuring that sufficient accounting records are kept that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that its financial statements comply with the Companies Act 2006. They are responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Disclosure of Information to Auditors

In accordance with section 418 of the Companies Act 2006, the Report of the Directors includes a statement, in the case of each Director in office as at the date the Report of the Directors is approved, that:

- so far as the Director is aware, there is no relevant audit information of which the Company's auditors are unaware; and
- they have taken all the steps they ought to have taken as a Director in order to make themselves aware of any relevant audit
 information and to establish that the Company's auditors are aware of that information.

On behalf of the Board

S E Long Director

20 December 2019

5 Donegal Square South Belfast BT1 5JP Northern Ireland

Independent auditors' report to the members of Assetfinance March (B) Limited

Report on the audit of the financial statements

Opinion

In our opinion, Assetfinance March (B) Limited's financial statements:

- give a true and fair view of the state of the company's affairs as at 31 March 2019 and of its profit and cash flows for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report and Financial Statements (the "Annual Report"), which comprise: the balance sheet as at 31 March 2019; the income statement, the statement of comprehensive income, the statement of cash flows and the statement of changes in equity for the year then ended; and the notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

ISAs (UK) require us to report to you when:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

We have nothing to report in respect of the above matters.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern. For example, the terms on which the United Kingdom may withdraw from the European Union are not clear, and it is difficult to evaluate all of the potential implications on the company's trade, customers, suppliers and the wider economy.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic Report and Report of the Directors, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (UK) require us also to report certain opinions and matters as described below.

Strategic Report and Report of the Directors

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic Report and Report of the Directors for the year ended 31 March 2019 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic Report and Report of the Directors.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Directors' responsibilities statement set out on page 3, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2006 exception reporting

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the company, or returns adequate for our audit have not been received from branches not visited by us; or
- certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

Gethin Evans (Senior Statutory Auditor) for and on behalf of PricewaterhouseCoopers LLP Chartered Accountants and Statutory Auditors

Notes on the financial statements

1 Basis of preparation and significant accounting policies

The financial statements of the Company have been prepared in accordance with the Companies Act 2006 as applicable to companies using International Financial Reporting Standards ('IFRSs'). The principal accounting policies applied in the preparation of these financial statements have been consistently applied to all of the years presented, unless otherwise stated.

1.1 Basis of preparation

(a) Compliance with International Financial Reporting Standards

The financial statements of the Company have been prepared in accordance with IFRSs as issued by the International Accounting Standards Board ('IASB'), including interpretations issued by the IFRS Interpretations Committee, and as endorsed by the European Union ('EU').

At 31 March 2019, there were no unendorsed standards effective for the year ended 31 March 2019 affecting these financial statements, and the Company's application of IFRSs results in no differences between IFRSs as issued by the IASB and IFRSs as endorsed by the EU.

Standards adopted during the year ended 31 March 2019

The Company has adopted the requirements of IFRS 9 'Financial Instruments' from 1 April 2018. The classification and measurement and impairment requirements are applied retrospectively by adjusting the opening balance sheet at the date of initial application. As permitted by IFRS 9, the Company has not restated comparatives.

Adoption has reduced net assets at 1 April 2018 by £6.

In addition, the Company has adopted the requirements of IFRS 15 'Revenue from contracts with customers' and a number of interpretations and amendments to standards which have had an insignificant effect on the financial statements of the Company.

(b) Future accounting developments

Minor amendments to IFRSs

The IASB published a number of minor amendments to IFRSs which are effective for periods beginning on or after 1 January 2019, some of which have been endorsed for use in the EU. The Company expects they will have an insignificant effect, when adopted, on the financial statements of the Company.

Major new IFRSs

The IASB has published IFRS 16 'Leases'. IFRS 16 has been endorsed for use in the EU.

IFRS 16 'Leases

IFRS 16 'Leases' has an effective date for annual periods beginning on or after 1 January 2019. IFRS 16 results in lessees accounting for most leases within the scope of the standard in a manner similar to the way in which finance leases are currently accounted for under IAS 17 'Leases'. Lessees will recognise a right of use ('ROU') asset and a corresponding financial liability on the balance sheet. The asset will be amortised over the length of the lease, and the financial liability measured at amortised cost. Lessor accounting remains substantially the same as under IAS 17. The implementation will have no effect on the net assets or retained earnings.

(c) Presentation of information

The functional currency of the Company is sterling, which is also the presentational currency of the financial statements of the Company.

The financial statements have been prepared on the historical basis.

(d) Critical accounting estimates and judgements

The preparation of financial information requires the use of estimates and judgements about future conditions. In view of the inherent uncertainties and the high level of subjectivity involved in the recognition or measurement of items, highlighted as the 'critical accounting estimates and judgements' in section 1.2 to follow, it is possible that the outcomes in the next financial year could differ from those on which management's estimates are based. This could result in materially different conclusions from those reached by management for the purposes of these financial statements.

Management's selection of the Company's accounting policies which contain critical estimates and judgements reflects the materiality of the items to which the policies are applied and the high degree of judgement and estimation uncertainty involved.

(e) Restatement of prior year balances

The Company has restated amounts reported in the Income statement in the prior year from interest income to operating income in order to conform with the presentation for the current year. The reclassification has been made by the Company as considered more appropriate and this did not have any impact on the previously reported profits or equity.

· · · · · · · · · · · · · · · · · · ·	Previously reported	Restatement	Restated
	2018	2018	2018
	£	£	£
Income statement			
Interest income	374,000	(250,865)	123,135
Other operating income		250,865	250,865

(f) Going concern

The Company had net current liabilities of £2,890,376 as at 31 March 2019. HSBC Asset Finance (UK) Limited, the parent undertaking, has committed to ensuring the provision of sufficient funds for a period of not less than twelve months from the date of authorisation of these financial statements, to enable the Company to meet its liabilities as they fall due. Furthermore, based on the leasing arrangements held by the Company as at the year end, positive cash flows are expected to be generated for more than one year from the date of authorisation of these financial statements. As a result, the Directors have prepared these on a going concern basis.

1.2 Summary of significant accounting policies

(a) Income and expense

Interest income and expense

Interest income and expense for all financial instruments, excluding those classified as held for trading or designated at fair value are recognised in 'Interest income' and 'Interest expense' in the income statement using the effective interest method.

The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability.

When calculating the effective interest rate, the Company estimates cash flows considering all contractual terms of the financial instrument but excluding future credit losses. The calculation includes all amounts paid or received by the Company that are an integral part of the effective interest rate of a financial instrument, including transaction costs and all other premium or discounts.

Interest on impaired financial assets is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

See Note 1.2(c) for the accounting policy for finance income or changes on finance leases.

(b) Financial instruments measured at amortised cost

Financial assets that are held to collect the contractual cash flows and that contain contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest, are measured at amortised cost. Such financial assets include trade and other receivables.

Trade and other receivables

These include trade and other receivables originated by the Company, not classified as held for trading or designated at fair value. Other than finance lease receivables, they are recognised when cash is advanced to a borrower and are derecognised when either the borrower repays its obligations, or the receivables are sold or written off, or substantially all the risks and rewards of ownership are transferred. They are initially recorded at fair value plus any directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest method, less impairment allowance. Trade and other receivables include finance lease receivables.

Finance lease receivables

Agreements which transfer to counterparties substantially all the risks and rewards incidental to the ownership of assets are classified as finance leases. They are recorded at an amount equal to the net investment in the lease, less any impairment provisions.

The net investment in finance leases represents the sum of the minimum payments receivable (gross investment in the lease) discounted at the rate of interest implicit in the lease. Initial direct costs incurred in arranging the lease, less any fee income related to the lease, are included in the initial measurement of the net investment.

As a lessor under finance leases, the Company presents the amounts due under the leases, after deduction of unearned charges and any impairment provisions, in Trade and other receivables.

The finance income or charges on finance leases net of rebates and variations are recognised in Net interest income over the lease periods so as to give a constant rate of return.

Leases in their secondary rental period are held at nil value with income recognised at the contracted invoice date. The Directors consider these payments to represent a fee for the continued existence of the lease and therefore, as the Company has no additional performance obligations, recognise the income in full on the contracted invoice date.

Financial liabilities

Amounts owed to other group undertakings represent financial liabilities and are included within trade and other payables. Financial liabilities are initially measured at fair value less any transaction costs that are directly attributable to the purchase or issue. Financial liabilities are recognised when the Company becomes party to the contractual provision of the instrument. The Company derecognises the financial liability when the Company's obligations specified in the contract expire, are discharged or cancelled. Subsequent to initial recognition, financial liabilities are measured at amortised cost using the effective interest rate method.

(c) Impairment of amortised cost financial assets

For the impairment of amortised cost financial assets within the scope of IFRS9, the Company has adopted the methodology as developed within the HSBC group and is detailed below.

Expected credit losses ('ECL'), are recognised for financial assets held at amortised cost. At initial recognition, allowance (or provision in the case of some loan commitments and financial guarantees) is required for ECL resulting from default events that are possible within the next 12 months or less, where the remaining life is less than 12 months, ('12-month ECL'). In the event of a significant increase in credit risk, allowance (or provision) is required for ECL resulting from all possible default events over the expected life of the financial instrument ('lifetime ECL'). Financial assets where 12-month ECL is recognised are considered to be

'stage 1'; financial assets which are considered to have experienced a significant increase in credit risk are in 'stage 2'; and financial assets for which there is objective evidence of impairment so are considered to be in default or otherwise credit-impaired are in 'stage 3'.

Credit-impaired (stage 3)

The Company determines that a financial instrument is credit-impaired and in stage 3 by considering relevant objective evidence, primarily whether:

- contractual payments of either principal or interest are past due for more than 90 days;
- there are other indications that the borrower is unlikely to pay, such as when a concession has been granted to the borrower for economic or legal reasons relating to the borrower's financial condition; and
- the loan is otherwise considered to be in default.

Interest income is recognised by applying the effective interest rate to the amortised cost amount, i.e. gross carrying amount less ECL allowance.

Write-off

Financial assets (and the related impairment allowances) are normally written off, either partially or in full, when there is no realistic prospect of recovery. Where loans are secured, this is generally after receipt of any proceeds from the realisation of security. In circumstances where the net realisable value of any collateral has been determined and there is no reasonable expectation of further recovery, write-off may be earlier.

Significant increase in credit risk (stage 2)

An assessment of whether credit risk has increased significantly since initial recognition is performed at each reporting period by considering the change in the risk of default occurring over the remaining life of the financial instrument. The assessment explicitly or implicitly compares the risk of default occurring at the reporting date compared with that at initial recognition, taking into account reasonable and supportable information, including information about past events, current conditions and future economic conditions. The assessment is unbiased, probability-weighted, and to the extent relevant, uses forward-looking information consistent with that used in the measurement of ECL. However, unless identified at an earlier stage, all financial assets are deemed to have suffered a significant increase in credit risk when 30 days past due.

Unimpaired and without significant increase in credit risk - (stage 1)

ECL resulting from default events that are possible within the next 12 months ('12-month ECL') are recognised for financial instruments that remain in stage 1.

Movement between stages

Financial assets can be transferred between the different categories depending on their relative increase in credit risk since initial recognition. Financial instruments are transferred out of stage 2 if their credit risk is no longer considered to be significantly increased since initial recognition based on the assessments described above. Financial instruments are transferred out of stage 3 when they no longer exhibit any evidence of credit impairment as described above. For receivables that are assessed for impairment on a portfolio basis, the evidence typically comprises a history of payment performance against the original or revised terms, as appropriate to the circumstances. For loans that are assessed for impairment on an individual basis, all available evidence is assessed on a case-by-case basis.

Measurement of ECL

The assessment of credit risk, and the estimation of ECL, are unbiased and probability-weighted, and incorporate all available information that is relevant to the assessment including information about past events, current conditions and reasonable and supportable forecasts of future events and economic conditions at the reporting date. In addition, the estimation of ECL should take into account the time value of money.

In general, HSBC calculates ECL using three main components, a probability of default, a loss given default ('LGD') and the exposure at default ('EAD').

The 12-month ECL is calculated by multiplying the 12-month PD, LGD and EAD. Lifetime ECL is calculated using the lifetime PD instead. The 12-month and lifetime PDs represent the probability of default occurring over the next 12 months and the remaining maturity of the instrument respectively.

The EAD represents the expected balance at default, taking into account the repayment of principal and interest from the balance sheet date to the default event together with any expected drawdowns of committed facilities. The LGD represents expected losses on the EAD given the event of default, taking into account, among other attributes, the mitigating effect of collateral value at the time it is expected to be realised and the time value of money.

The ECL for wholesale stage 3 is determined on an individual basis using a discounted cash flow ('DCF') methodology. The expected future cash flows are based on the credit risk officer's estimates as at the reporting date, reflecting reasonable and supportable assumptions and projections of future recoveries and expected future receipts of interest. Collateral is taken into account if it is likely that the recovery of the outstanding amount will include realisation of collateral based on its estimated fair value of collateral at the time of expected realisation, less costs for obtaining and selling the collateral. The cash flows are discounted at a reasonable approximation of the original effective interest rate. For significant cases, cash flows under four different scenarios are probability-weighted by reference to the three economic scenarios applied more generally by the Group and the judgement of the credit risk officer in relation to the likelihood of the workout strategy succeeding or receivership being required. For less significant cases, the effect of different economic scenarios and work-out strategies is approximated and applied as an adjustment to the most likely outcome.

Period over which ECL is measured

Expected credit loss is measured from the initial recognition of the financial asset. The maximum period considered when measuring ECL (be it 12-month or lifetime ECL) is the maximum contractual period over which HSBC is exposed to credit risk.

Forward-looking economic inputs

HSBC group will in general apply three forward-looking global economic scenarios determined with reference to external forecast distributions representative of our view of forecast economic conditions, the consensus economic scenario approach. This approach is considered sufficient to calculate unbiased expected loss in most economic environments. They represent a 'most likely outcome' (the Central scenario) and two, less likely, 'outer' scenarios referred to as the Upside and Downside scenarios. The Central scenario is used by the annual operating planning process and, with regulatory modifications, will also be used in enterprise-wide stress tests. The Upside and Downside are constructed following a standard process supported by a scenario narrative reflecting the HSBC Group's current top and emerging risks and by consulting external and internal subject matter experts. The relationship between the outer scenarios and Central scenario will generally be fixed with the Central scenario being assigned a weighting of 80% and the Upside and Downside scenarios 10% each, with the difference between the Central and outer scenarios in terms of economic severity being informed by the spread of external forecast distributions among professional industry forecasts. The outer scenarios are economically plausible, internally consistent states of the world and will not necessarily be as severe as scenarios used in stress testing. The period of forecasts is 5 years for the central scenario. Upside and Downside scenarios use distributional forecasts for the first two years after which they converge to the central forecasts. The central forecast and spread between the Central and outer scenarios is grounded on the expected gross domestic product of the UK. This includes consideration of domestic economic factors as well as global economic events, the economic performance of other countries and the impact these can have on the gross domestic product of the UK. HSBC Group runs a global process which ensures that both domestic and international economic factors are considered in creating scenarios for the UK.

The economic factors include, but are not limited to, gross domestic product, unemployment, interest rates, inflation and commercial property prices, reflecting both domestic and international economic factors as appropriate.

In general, the consequences of the assessment of credit risk and the resulting ECL outputs will be probability-weighted using the standard probability weights. This probability weighting may be applied directly or the effect of the probability weighting determined on a periodic basis, at least annually, and then applied as an adjustment to the outcomes resulting from the central economic forecast. The central economic forecast is updated quarterly.

HSBC group recognises that the consensus economic scenario approach using three scenarios will be insufficient in certain economic environments. Additional analysis may be requested at management's discretion, including the production of extra scenarios. If conditions warrant, this could result in alternative scenarios and probability weightings being applied in arriving at the ECL.

(d) Tax

Income tax comprises current tax and deferred tax. Income tax is recognised in the income statement except to the extent that it relates to items recognised in other comprehensive income or directly in equity, in which case the tax is recognised in the same statement in which the related item appears.

Current tax is the tax expected to be payable on the taxable profit for the year and on any adjustment to tax payable in respect of previous years. The Company provides for potential current tax liabilities that may arise on the basis of the amounts expected to be paid to the tax authorities. Payments associated with any incremental base erosion and anti-abuse tax are reflected in tax expense in the period incurred.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the balance sheet, and the amounts attributed to such assets and liabilities for tax purposes. Deferred tax is calculated using the tax rates expected to apply in the periods as the assets will be realised or the liabilities settled.

Current and deferred tax are calculated based on tax rates and laws enacted, or substantively enacted, by the balance sheet date.

(e) Called up share capital

Financial instruments issued are generally classified as equity when there is no contractual obligation to transfer cash or other financial assets. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds, net of tax.

(f) Statement of cash flows

The statement of cash flows has been prepared on the basis that, with the exception of tax related transactions which are classified under 'Operating activities', movements in inter-company transactions are shown under the heading of 'Financing activities'. Such movements arise ultimately from the Company's financing activities, through which the Company will acquire resources intended to generate future income and cash flows.

A group undertaking acts as a treasury function, providing funding for the Company through an inter-company account.

(g) Accounting policies applied to financial instruments prior to 1 April 2018

Impairment of trade and other receivables

Losses for impaired receivables are recognised promptly when there is objective evidence that impairment of a receivable or portfolio of receivables has occurred. Impairment allowances calculated on individual receivables or on groups of receivables assessed collectively, are recorded as charges to the income statement and are recorded against the carrying amount of impaired receivables on the balance sheet. Losses which may arise from future events are not recognised.

Impairment losses on individual receivables are calculated by discounting the expected future cash flows of a receivable, which includes expected future receipts of contractual interest, at the receivable's original effective interest rate and comparing the resultant present value with the receivable's current carrying amount. The impairment allowances on individually significant accounts are reviewed at least quarterly and more regularly when circumstances require.

Collectively assessed impairment losses are calculated on the basis of past experience, current economic conditions and other relevant factors to provide for losses not yet specifically identified.

Reversal of impairment

If the amount of an impairment loss decreases in a subsequent period, and the decrease can be related objectively to an event occurring after the impairment was recognised, the excess is written back by reducing the receivable impairment allowance account accordingly. The write-back is recognised in the income statement.

2 Operating profit

Operating profit is stated after the following items.of income:

		1	Restated
•		2019	2018
		£	£
Income	[ţ	
Finance lease income	1	35,805}	123,135
Other finance lease income		250,8651	250,865

3 Employee compensation and benefits

The Company has no employees and hence no staff costs (2018: nil).

4 Directors' emoluments

None of the Directors of the Company received any emoluments in respect of their services as Directors of the Company (2018: nil). The Directors are employed by other companies within the HSBC Group and consider that their services to the Company are incidental to their other responsibilities within the HSBC Group.

5 Auditors' remuneration

Certain expenses including auditors' remuneration have been borne by fellow group undertaking and are therefore not charged in arriving at the profit before taxation. The auditors' remuneration borne on behalf of Company amounted to £2,100 (2018: £2,000).

There were no non-audit fees incurred during the year (2018: nil).

6 Tax

Tax expense

	2019	2018
	£	£
Current tax		
UK Corporation tax		
- For this year	117,417	391,418
- Adjustments in respect of prior years	-	(708)

- Effects of changes in tax rates	[6,932]	33,893
- Adjustments in respect of prior years	I -!	602
Total deferred tax	(58,928)	(287,496)
Year ended 31 Mar	58,489)	103,214

The UK corporation tax rate applying to the Company was 19.00% (2018: 19.00%).

In the UK Budget on 8 July 2015, the UK Government proposed to reduce the main rate of UK corporation tax to 19% with effect from 1 April 2017. Additionally in the Budget on 16 March 2016 a further rate reduction to 17% was proposed from 1 April 2020 and this was enacted in the Finance (No2) Act 2016 on 6 September 2016. This has therefore been taken into account in the calculation of the UK related deferred tax balances as these balances will materially reverse after 1 April 2020.

Tax reconciliation

Total liabilities			4,046,503

10 Fair value of financial instruments not carried at fair value

Fair value hierarchy

Fair values of financial assets and liabilities are determined according to the following hierarchy:

(a) Level 1 - valuation technique using quoted market price: financial instruments with quoted prices for identical instruments in active markets that HSBC can access at the measurement date.

(b) Level 2 - valuation technique using observable inputs: financial instruments with quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in inactive markets and financial instruments valued using models where all significant inputs are observable.

(c) Level 3 - valuation technique with significant unobservable inputs: financial instruments valued using valuation techniques where one or more significant inputs are unobservable.

Fair values at the balance sheet date of the assets and liabilities set out below are estimated for the purpose of disclosure as follows:

	I	Fair values			
	1		Valuation techniques		
)	Ci	With significant unobservable		
		Carrying amount	inputs	i	
	i	•	Level 3	Total	
		£	£	£

At 31 Mar	1	4,442,364	4,794,514

12 Finance lease receivables

The Company leases assets to third parties under finance leases. At the end of the lease term, assets may be sold to third parties or leased for further terms. Lessees may participate in any sales proceeds achieved. Lease rentals arising during the lease terms will either be fixed in quantum or be varied to reflect changes in, for example, tax or interest rates. Rentals are calculated to recover the cost of assets less their residual value, and earn finance income.

Ī		2019		2018

15 Management of financial risk

All of the Company's activities involve to varying degrees, the analysis, evaluation, acceptance and management of risks or combination of risks. The most important types of risk include financial risk, which comprises credit risk, liquidity risk and market risk. The management of financial risk and consideration of profitability, cash flows and capital resources form a key element in the Directors' assessment of the Company as a going concern.

Credit risk management

Credit risk is the risk of financial loss if a customer or counterparty of the Company fails to meet a payment obligation under a contract.

Within the overall framework of the HSBC Group policy, the Company has an established risk management process encompassing credit approvals, the control of exposures, credit policy direction to the business, and the monitoring and reporting of exposures.

The management of the Company is responsible for the quality of its credit portfolios and follows a credit process involving delegated approval authorities and credit procedures, the objective of which is to identify problem exposures in order to accelerate remedial action while building a portfolio of high quality risk assets. The Company's credit risk rating systems and processes differentiate exposures in order to highlight those with greater risk factors and higher potential severity of loss. Regular reviews are undertaken to assess and evaluate levels of risk concentration.

Summary of credit risk

The disclosure below presents the gross carrying/nominal amount of financial instruments to which the impairment requirements in IFRS 9 are applied and the associated allowance for ECL. Due to the forward-looking nature of IFRS 9, the scope of financial instruments on which ECL are recognised is greater than the scope of IAS 39.

The following table represent the concentration of exposures on which credit risk are managed.

	Gross carrying/ nominal amount	Allowance/Provision for ECL ¹
	£	£
Trade and other receivables	4,444,980	(2,616)
Total gross carrying amount on balance sheet	i 4,444,980	(2,616)
At 31 Mar 2019	4,444,980	(2,616)

¹ The total ECL is recognised in the loss allowance for the financial asset unless the total CL exceeds the gross carrying amount of the financial asset, in which case the ECL is recognised as a provision.

The following table provides an overview of the Company's credit risk by stage and industry, and the associated ECL coverage. The financial assets recorded in each stage have the following characteristics:

- · Stage 1: Unimpaired and without significant increase in credit risk on which a 12-month allowance for ECL is recognised.
- Stage 2: A significant increase in credit risk has been experienced since initial recognition on which a lifetime ECL is recognised.
- Stage 3: Objective evidence of impairment, and are therefore considered to be in default or otherwise credit-impaired on which
 a lifetime ECL is recognised.

Summary of credit risk by stage distribution and ECL coverage

All receivables relate to the corporate and commercial sector of industry

	Gross carr	/ing/nominal an	nount	Allo	wance for E0	L	EC	L Coverage %	6 I

At 31 Mar 2019	1	(2,616)
ECL income statement charge for the year		(2,610)
Total ECL income charge for the year		(2,610)

Maximum exposure to credit risk

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the balance sheet. No finance lease or other receivables is in arrears. No collateral is held in respect of finance leaser receivables, although as title to the underlying assets remain with the lessor, these assets would be recoverable in case of default and it is anticipated that the sale proceeds would cover any shortfall in the amounts recovered from the lessee.

Reconciliation of gross exposure and allowances for trade and other receivables

The following disclosure provides a reconciliation of the Company's gross carrying/nominal amount and allowances for loans and advances to banks and customers including loan commitments and financial guarantees.

The transfers of financial instruments represents the impact of stage transfers upon the gross carrying/nominal amount and associated allowance for ECL. The net remeasurement of ECL arising from stage transfers represents the increase in ECL due to these transfers.

ŧ	Non credit - impaired		Tota	al ;

Total ECL income charge for the year	_	2,610		2,610	

Credit quality

Credit quality of financial instruments

The Company assesses the credit quality of all financial instruments that are subject to credit risk. The credit quality of financial instruments is a point in time assessment of the probability of default of financial instruments, whereas IFRS 9 stages 1 and 2 are determined based on relative deterioration of credit quality since initial recognition. Accordingly, for non-credit impaired financial instruments there is no direct relationship between the credit quality assessment and IFRS 9 stages 1 and 2, though typically the lower credit quality bands exhibit a higher proportion in stage 2.

The five credit quality classifications defined below each encompass a range of more granular, internal credit rating grades, as well as external rating:

	Debt Securities and other bills	Lending and derivatives
Quality classification	External credit rating	Internal credit rating
Strong	A- and above	CRR1 to CRR2
Good	BBB+ to BBB-	CRR3
Satisfactory	BB+ to B and unrated	CRR4 to CRR5
Sub-standard	B- to C	CRR6 to CRR8
Credit-impaired	Default	CRR9 to CRR10

Quality classification definitions

'Strong' exposures demonstrate a strong capacity to meet financial commitments, with negligible or low probability of default.

'Good' exposures demonstrate a good capacity to meet financial commitments, with low default risk.

'Satisfactory' exposures require closer monitoring and demonstrate an average to fair capacity to meet financial commitments, with moderate default risk.

'Sub-standard' exposures require varying degrees of special attention and default risk is of greater concern.

'Credit-impaired' exposures have been assessed as impaired.

Distribution of financial instruments by credit quality

Liquidity risk management

Liquidity risk is the risk that the Company does not have sufficient financial resources to meet obligations as they fall due or will have access to such resources only at an excessive cost. The risk arises from mismatches in the timing of cash flows.

The Company monitors its cash flow requirements on a monthly basis and will compare expected cash flow obligations with expected cash flow receipts to ensure they are appropriately aligned. In light of this the Company will borrow funds as and when required from group undertakings.

The Business manages liquidity risk for the Company as described above for risks generally.

The Company's assets net of deferred tax, are funded principally by borrowings from another group undertaking, which acts as a treasury function. This funding has no fixed repayment date and therefore is technically repayable on demand.

The following is an analysis of undiscounted cash flows payable under various financial liabilities by remaining contractual maturities at the balance sheet date:

		<u> </u>			•
	;		Carrying value	On Demand	Total
	·	l	£	. £	£
Trade and other payables		i	3,145,653	3,145,653	3,145,653
At 31 Mar 2019		<u>ł</u>	3,145,653	3,145,653	3,145,653
Trade and other payables			3,376,533	3,376,533	3,376,533
At 31 Mar 2018			3,376,533	3,376,533	3,376,533

Market risk management

Market risk is the risk that movements in market risk factors including foreign exchange rates and interest rates will impact the Company's income.

Foreign exchange risk

During 2019, the Company has not been exposed to significant foreign exchange risk (2018: nil).

Interest rate risk

The Company's finance leases are predominantly "interest rate fixed". This means that the lease rentals will not change if there is a change in interest rates. Interest is charged on amounts owed to other group undertakings at at variable rate of interest based on the Bank of England base rate.

Sensitivity analysis

Income statement

Interest expense

As at 31 March 2019, the Company was exposed to interest rate risk on its amounts owed to other group undertakings which are based on the Bank of England base rate.

For amounts owed to other group undertakings, the effect on future net interest income of an incremental 100 basis parallel rise or fall in interest rates at the report date (floored to 0%) amounts to a decrease of £31,457 (2018: £33,765) or an increase of £23,592 (2018: £16,883).
